Discard changes | Save | Publish

Edit upload

Instructions: (i) Upload minimum one file or fill-in required fields (marked with a red star). (ii) Press "Save" to save your upload for editing later. (iii) When ready, press "Publish" to finalize and make your upload public.

Files

Filename (2 files)	Size	Checksum
FAIR_Policy_and_Practice_Survey_2019_12_10_2019_EN ...	151 kB	md5:2c016770d774101383f148f5f189acd3
FAIRsFAIR Policy and Practice Survey 2019 data for ...	75 kB	md5:d5287c026c2cc3dafe16fe12d6d4d390

Note: File addition, removal or modification are not allowed after an upload has been published. This is because a Digital Object Identifier (DOI) is registered with DataCite for each upload. If you've made a mistake please contact us.

If you have an updated version of your files, you can create a new record version, with a completely new DOI.

New version

Communities — recommended

Specify communities which you wish your upload to appear in. The owner of the community will be notified, and can either accept or reject your request.Please make sure your record complies with the content policy of the communities you add; reported abuse will be followed by account inactivation.

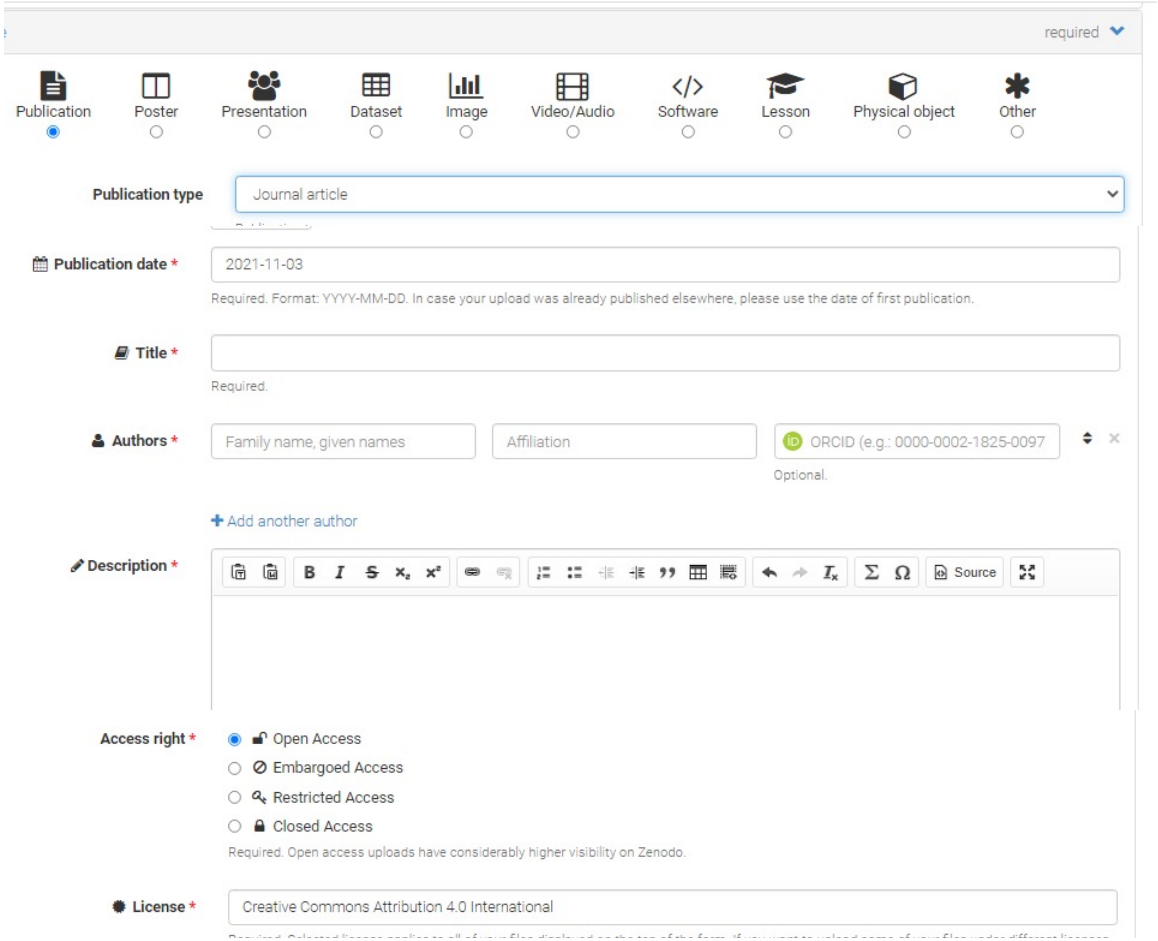
Minimum metadata required

7 mandatory fields:

- **Upload type**
- **Title**
- **Publication date**
- **Authors**
- **Description**
- **Access rights**
- **License**



Benefits to be gained by providing more than the minimum!

Give your data a title and description

Digital Object Identifier

10.5281/zenodo.3550529

Optional. Did your publisher already assign a DOI to your upload? If not, leave the field empty and we will register a new DOI for you. A DOI allows others to easily and unambiguously cite your upload. Please note that it is NOT possible to edit a Zenodo DOI once it has been registered by us, while it is always possible to edit a custom DOI.

Reserve DOI ✔

Publication date *

2019-11-22

Required. Format: YYYY-MM-DD. In case your upload was already published elsewhere, please use the date of first publication.

Title *

As part of the EOSC project family the FAIRsFAIR - Fostering Fair Data Practices in Europe - project aims to supply practical solutions for the use of the FAIR data principles throughout the research data life cycle. The FAIRsFAIR project runs from March 2019-February 2022. Landscaping activities have been a core activity during the initial stages of the FAIRsFAIR project and there has been close cooperation with colleagues in Work Package 3 carrying out the FAIR data policy and practice analyses; Work Package 2 on assessing FAIR requirements for interoperability and persistence; Work Package 6 on providing an overview of research communities' needs for competence centres; and Work Package 7 on mapping RDM policies and support as well as FAIR education offerings in European HEIs. In particular, efforts were made to avoid duplication of effort across the three open consultation and survey instruments developed to assess the current landscape and to define a consistent approach to presenting our findings.

Required.

Biography

Joy Davidson is Coordinator for the UK's Digital Curation Centre (DCC) - a research infrastructure that specialises in data management planning, curation and Open Science. Joy currently leads work on policies and practices (WP3) for the EC funded FAIRsFAIR project which aims to increase the production and use of FAIR data. She has been involved in reviews for ESFRI roadmap updates and H2020 research infrastructure funding programmes.

Add funding bodies

Funding recommended

Zenodo is integrated into reporting lines for research funded by the European Commission via OpenAIRE. Specify grants which have funded your research, and we will let your funding agency know!

Grants European Commission (EU) FAIRsFAIR 831558 Fostering FAIR Data Practices in Europe

Optional. OpenAIRE-supported projects only. For other funding acknowledgements, please use the *Additional Notes* field.
Note: a human Zenodo curator will need to validate your upload - you may experience a delay before it is available in OpenAIRE.

+ Add another grant

Related/alternate identifiers recommended

Specify identifiers of related publications and datasets. Supported identifiers include: DOI, Handle, ARK, PURL, ISSN, ISBN, PubMed ID, PubMed Central ID, ADS Bibliographic Code, arXiv, Life Science Identifiers (LSID), EAN-13, ISTC, URNs and URLs.

Related identifiers 10.5281/zenodo.3558173 cites this upload Project deliverable

Optional. Resource type of the related identifier.

10.5281/zenodo.3550544 is cited by this upload Dataset

Optional. Resource type of the related identifier.

As part of the EOSC project family the FAIRsFAIR - Fostering Fair Data Practices in Europe - project aims to supply practical solutions for the use of the FAIR data principles throughout the research data life cycle. The FAIRsFAIR project runs from March 2019-February 2022. Landscaping activities have been a core activity during the initial stages of the FAIRsFAIR project and there has been close cooperation with colleagues in Work Package 3 carrying out the FAIR data policy and practice analyses; Work Package 2 on assessing FAIR requirements for interoperability and persistence; Work Package 6 on providing an overview of research communities' needs for competence centres; and Work Package 7 on mapping RDM policies and support as well as FAIR education offerings in European HEIs. In particular, efforts were made to avoid duplication of effort across the three open consultation and survey instruments developed to assess the current landscape and to define a consistent approach to presenting our findings.

As part of the landscape analysis, FAIRsFAIR ran an open consultation on Policy and Practice which was made available via EU Survey from August 2 - September 27, 2019. The consultation was also made accessible from the FAIRsFAIR website. A total of 106 responses were submitted by research support staff from across Europe and beyond. The open consultation included both open-ended and closed questions which sought to identify the different levels of maturity with regards to FAIR practices among disciplines, the range of policies that influence the way that researchers work, and the sources of support currently available to researchers. In developing the questions, FAIRsFAIR worked collaboratively with several related initiatives including the EOSC 5B projects, the Group of European Data Experts in RDA (GEDE), and the EOSC FAIR Working Group and Landscape Working Group to avoid duplication of effort in our information collection. FAIRsFAIR will continue to cooperate with these and other initiatives over the life of the project. The open consultation targeted members of the research support community to gain insights on their views and experiences in relation to implementing the FAIR principles.

The open consultation questions were grouped under five broad themes:

1) Practice

2) Policy

Metadata makes even closed data findable!

Even if your data is too sensitive to share, a good metadata description means others can find out about it and request legitimate access.

Extra metadata leads to more links!

Summing up

- Upload your data to a discipline-specific repository whenever possible
- Provide at least the basic metadata required to get a citable way to share your data – even for those data that can't be openly shared
- Benefits to be gained from spending a bit more time to add additional metadata and make links
- Leads to greater visibility of your work, more citations and greater collaboration opportunities!

FAIRSFAIR
