# Radian

---

The image shows a projection of the RADIANT website interface. The background is a colorful, abstract map of the world composed of various colored rectangles. The word "RADIANT" is prominently displayed in the upper left, with a yellow circular brushstroke around it. Below the name, the text "Data Education & Advocacy Community" is visible. A search bar is located in the center, with the placeholder text "What are you looking for? Q". To the right of the search bar are two dropdown menus: "Subject" and "Resource Type". The "Resource Type" dropdown is open, showing a list of options: "Lesson Plan", "Slides", "Tutorial", "Lab", and "Video". A "Search" button is positioned to the right of the dropdown menus. At the bottom of the page, the tagline "Shed light on the world—one dataset at a time" is displayed.

# The Data Ethics Canvas

DISCOVER / BY [OPEN DATA INSTITUTE](#) – OCTOBER 24, 2017

Editor Comments: “In the academic setting, we’re seeing an increasing interest in and awareness of the importance of research data management (RDM) and data security. This resource from the Open Data Institute provides a handy visual for helping any user of data think critically about the resources they’re using and what their responsibilities and obligations might be. This is really just the tip of the iceberg when it comes to this topic, but it’s a good way to dive in!” – Catherine McGoveran

The ODI has developed a new approach for organisations to identify and manage data ethics considerations: the Data Ethics Canvas

Data ethics is a rapidly emerging area. Increasingly, those collecting, sharing and working with data are exploring the ethics of their practices and, in some cases, being forced to confront those ethics in the face of public criticism.
