

Appendix: Concept drift DL-LLP:

Hadoop:

The Figures below show the AUC performance of Hadoop’s DL-LLPs across time for time frame sizes from 6 up to 24 months. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

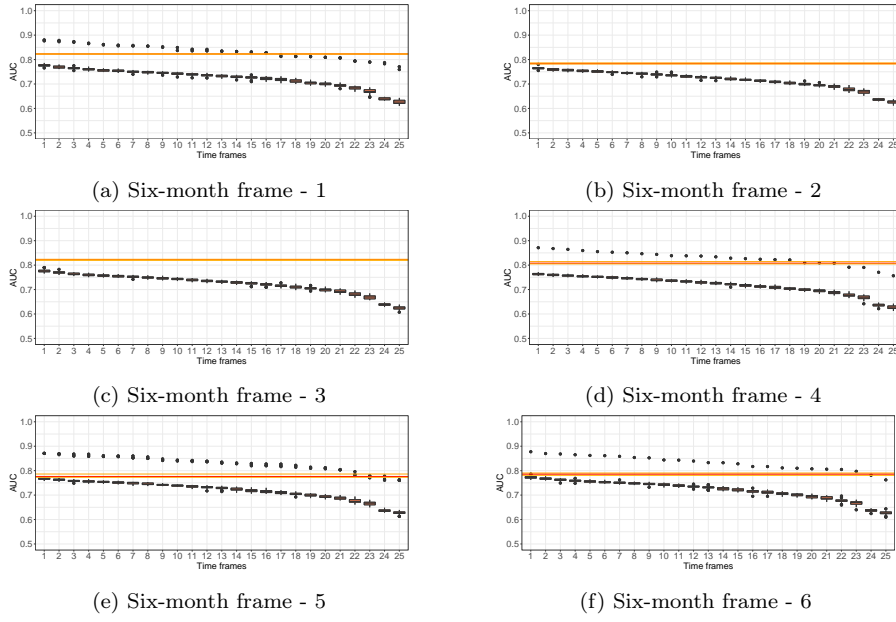

Fig. 1: AUC performance of Hadoop’s models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

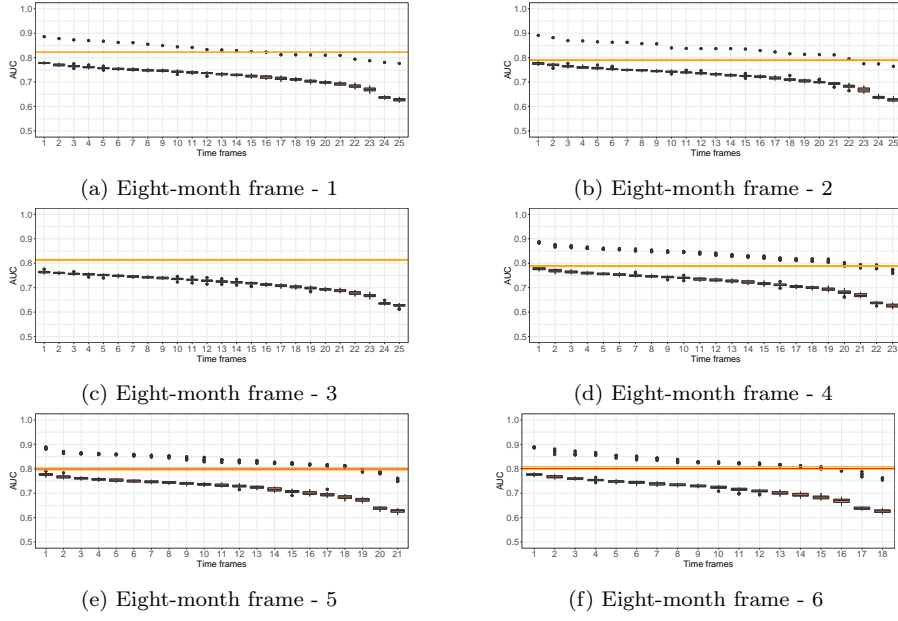

Fig. 2: AUC performance of Hadoop's models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

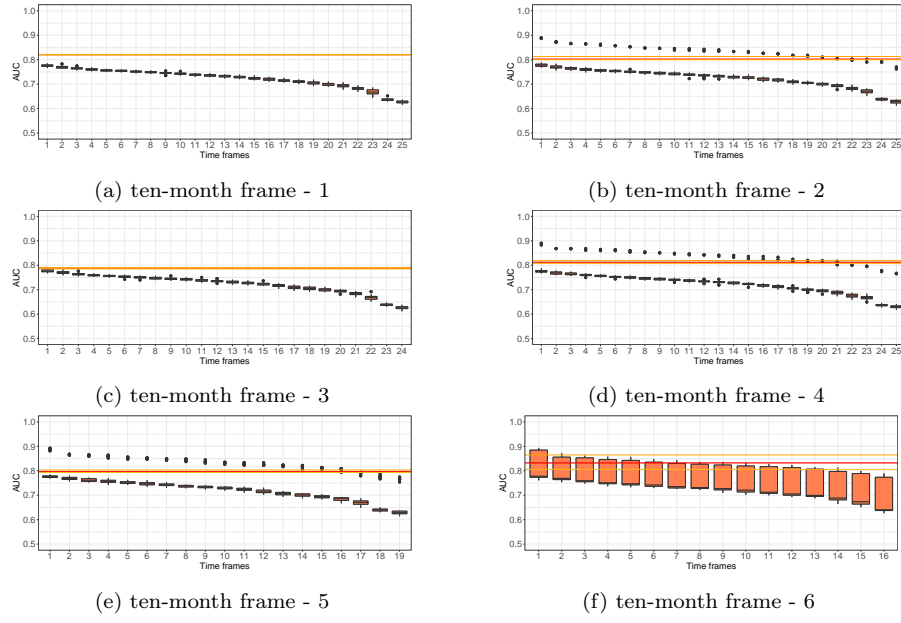

Fig. 3: AUC performance of Hadoop's models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

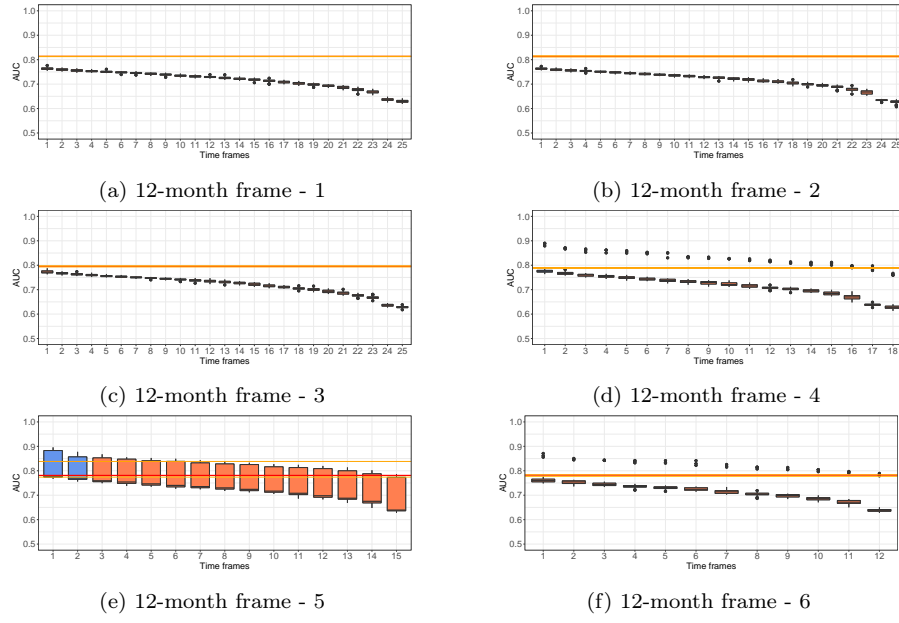

Fig. 4: AUC performance of Hadoop's models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

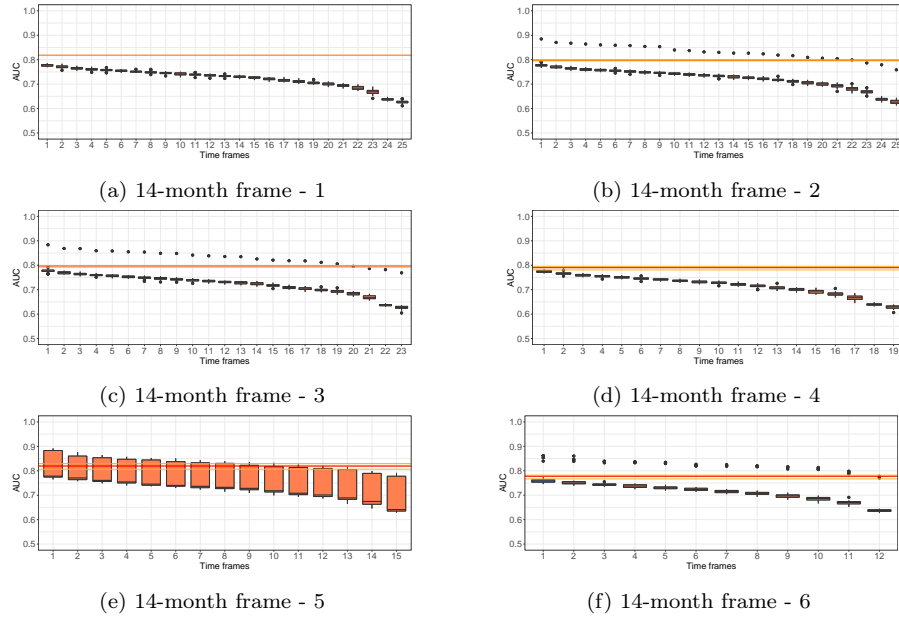

Fig. 5: AUC performance of Hadoop's models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

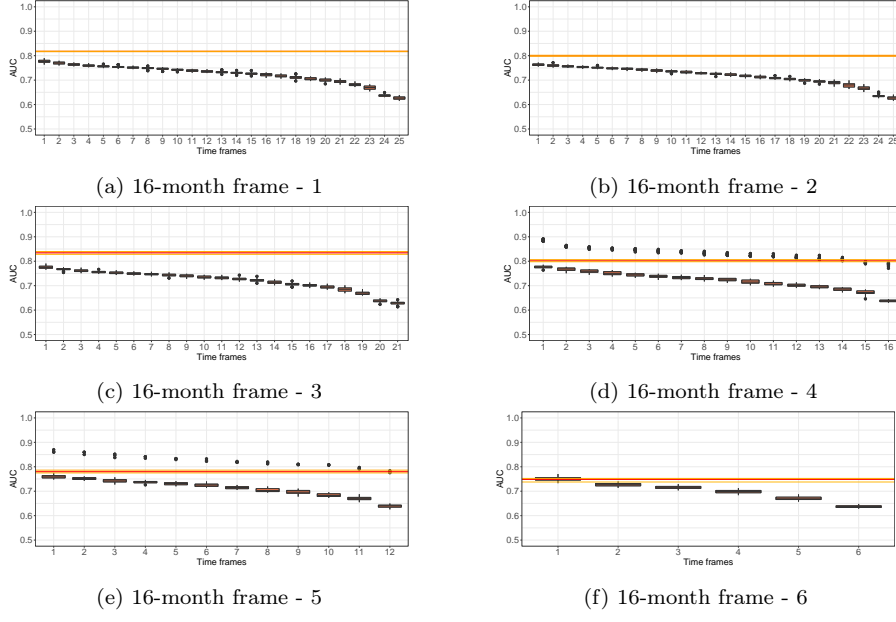

Fig. 6: AUC performance of Hadoop's models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

Fig. 7: AUC performance of Hadoop's models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

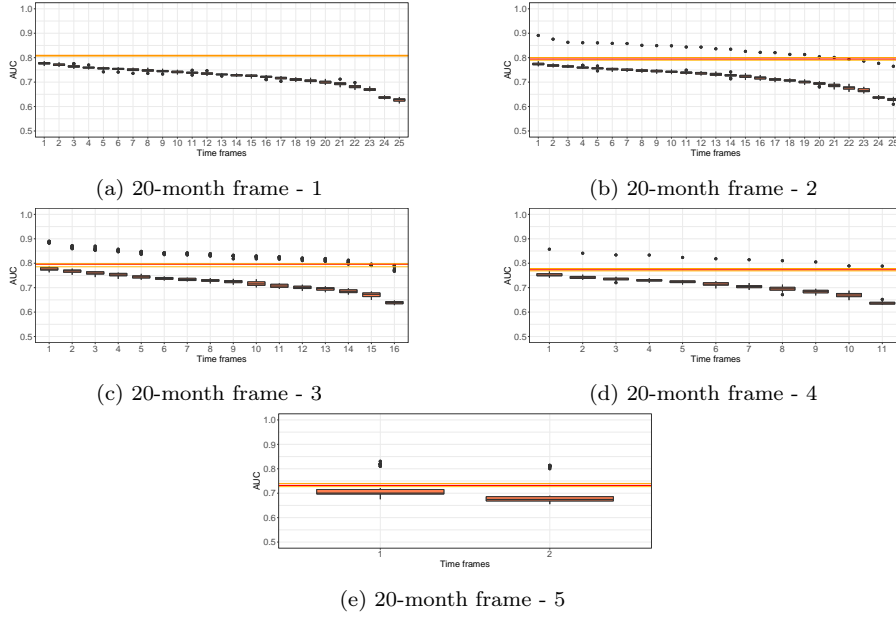

Fig. 8: AUC performance of Hadoop's models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

Fig. 9: AUC performance of Hadoop's models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.

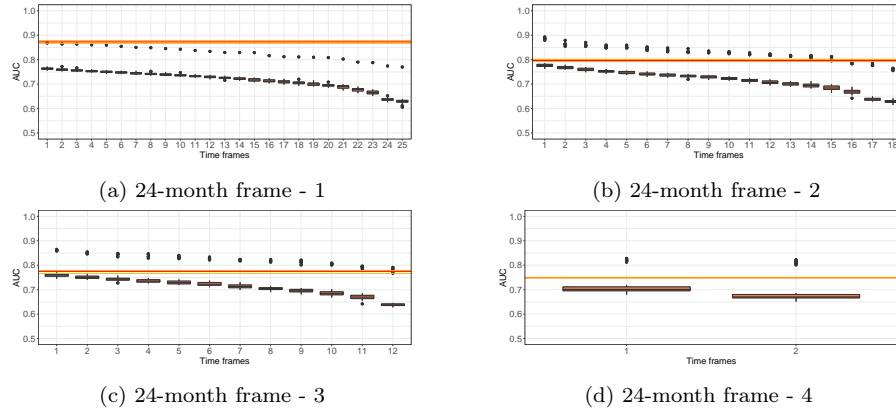

Fig. 10: AUC performance of Hadoop's models across time. The lines represents the 1st quantile, median and 3rd Quantile for the baseline AUC performance. Red boxplots show time frames with a performance statistically below the baseline, blue boxplots show no statistical difference and green boxplots show time frames with a performance statistically better than the baseline.
