

Geospatial Data in Environmental Science

**Attachment:
Practical Task in the end of the Workshop**

Practical Task

1. Find an openly accessible dataset with geospatial information that is related to your field of research in the [GBIF portal](#) or in the [PANGAEA repository](#).
2. In which format is the dataset provided?
3. What information do you get from the metadata? (Who, where, when, ...)?
4. What information about the dataset do you not get from the provided metadata?
