

Paper 19

Title: Surfacing root requirements interactions from inquiry cycle requirements documents

Authors: W.N. Robinson and S. Pawlowski

1. Add the paper	
DOI	10.1109/icre.1998.667812
Research Field	Software Engineering
2. Describe the paper	
<i>Data Analysis Method</i>	
method	inquiry cycle
	root requirements analysis
	descriptive statistics
<i>Data Collection Method</i>	
method	case study
number of participants	0
<i>Research Question</i>	
question	Could Root Requirements Analysis add value by uncovering requirement relationships?
hidden in text	true
highlighted in text	false
question	Could Root Requirements Analysis be easily incorporated into an existing methodology?
hidden in text	true
highlighted in text	false
<i>Threats to Validity</i>	
construct validity	false
internal validity	false
external validity	false
conclusion validity	false
