### Household Members, Education, and Employment

At the start, read to the respondent: Please give me the names and ages of all household members. A household is a dwelling unit where one or more people live and eat together. They may or may not be related by blood or marriage. Household members include permanent family members as well as lodgers or employees who normally live and eat in the household as well as people temporarily absent. People who usually live and eat somewhere else but who are visiting the household temporarily at the time of the interview are not considered to be household members.

Record each household member's name and age. Mark the total number of household members in the scorecard header next to "# HH members". Then mark Indicator 1 with the number of members who are 12-years-old or younger. For 6- to 12-year-olds, ask about school attendance, and mark Indicator 2 accordingly. For all household members 5-years-old or older, ask whether they ever did any work in the past year for which they were paid on a daily basis. Use the responses to mark Indicator 3.

Name	Age	If <name> is 6- to 12-years-old, does he or she currently attend a school/educational institution?			In the past year, did <name> ever do work for which he/she was paid on a daily basis?
