Back-page Roster: Household Membership

Note that the participant need not be the same as the respondent. Ask the respondent: *Please tell me the first name of each member of this household, starting with the head.* A household is one or more people—regardless of blood or marital ties—who usually live in the same residence, eat together, and share resources.

To qualify as a household member, a person must have usually lived, ate, and shared resources with the household for at least six of the past 12 months. The head of the household and students qualify as long as they met the three criteria for at least one of the past 12 months.

Count the number of household members and write it in the header under “Number of household members:”. Also mark the corresponding response for the first scorecard indicator.

Keep in mind the full definitions of household and household member in the “Guidelines for the Interpretation of Indicators”.
