

ZAMBIA 2015 PPI®

Scorecards and Look-up Tables

The Poverty Probability Index (PPI®) is a poverty measurement tool for organizations and businesses with a mission to serve the poor. The latest version of the PPI for Zambia was created in November 2017 based on data from 2015.

For more information about the PPI, please visit
www.povertyindex.org.

Household Roster: Household Members and Schooling Status

NOTE: This roster should be used to record responses to Indicators 2 and 3.

According to page 21 of the 2015 LCMS enumerator manual, “List all the usual members of the household serially in any order but starting with the head. You should list them in this manner; you first ask for the name of the head, then for the spouse, then for their children who live with them, then for other relatives who live with them, then for non-relatives who live with them, then for other members of the household who are temporarily away visiting etc., then for members of the household who are at boarding schools, colleges, university, and so on. Ensure that only usual members of the household are recorded. Do not record children of the head who are no longer members of the household. In particular, old people have a tendency of regarding grown up children who have their own households as part of their households because they are their children. This is not the type of household membership we are looking for. If there is a newly born baby who is not yet named in the household then write 'Baby' and the Surname E.g. Baby Musonda.”

“Be sure to include all usual members of the household including those who are temporarily away on visits, funerals, in hospitals, boarding schools and so on. Also ensure that non-usual members of the household are excluded from the list. Then record the total number of members in the household and mark the response to the second scorecard indicator.”

According to page 22 of the 2015 LCMS enumerator manual, “Record the age in completed years, e.g. a person who is 17 years and 11 months old will have 17 entered as his/her age.” Note – you need precise ages only for children who are likely to be between the ages of 6 and 12. For the purposes of the PPI Survey, approximate ages will suffice for other household members. For each household member who is 6 to 12-years-old, ask: Is <name> currently attending school? Based on the responses, circle the response for the third indicator.

First Name or Nickname	Age	If <Name> is between the ages of 6 to 12, is <Name> currently attending school?		
1.		Yes	No	Age not between 6 to 12
2.		Yes	No	Age not between 6 to 12
3.		Yes	No	Age not between 6 to 12
4.		Yes	No	Age not between 6 to 12
5.		Yes	No	Age not between 6 to 12
