

**AN INTIMATE INSIGHT ON PSYCHOPATHY AND A NOVEL HERMENEUTIC
PSYCHOLOGICAL SCIENCE**

Besides and together with a study of the social sciences and philosophy, this author's intuitive confidence in this hermeneutic design insights that underlies the arguments and discourse, is inspired from 'an intimate and spontaneous idiosyncratic philosophical exercise (praxis) in the quest for the essence of meaning', a 'craft' that has been nurtured continuously for nearly 25 years now (without conscious planning at the beginning nor at any time thereafter) since his discovery of 'philosophical questioning and discourse' at high school. An exercise that mirrors the intimate idiosyncratic exercise/praxis allowing an artist like a musician to grasp and develop memes that latter down the years enable the artist to be more or less 'consummate with respect to the personal orientation they give to their arts'. Central to all such idiosyncratic processes is a continuous idiosyncratic memetic refinement over time of rough-cuttings, internal coherences, insights, inspirations, intuitive validations, constraining, sense-of-failing, sense-of-succeeding, confidence, mental inflections and mental projections; of course as per ability and ultimate pertinence with respect to intrinsic reality!

Abstract

This paper is rather a profound hermeneutic enunciation putting into question our present understanding of psychopathy. It further articulates, in complement, a novel theoretical and methodological conceptualisation for a hermeneutic psychological science. Methodology-wise, it puts into question a traditional more or less categorical and mechanical approach to the social and behavioural sciences as it strives to introduce a creative and insightful approach for the articulation of ideas. It rather seeks to construe the scientific method as being more about falsifiability and validation but driven by a sense of creative understanding and insight of notions laid out as open-ended conceptualisations. Theory-wise, it sees continuity between anthropology and psychology as anthropopsychology behind an entropic construct of human psychology based on a recurrent re-institutionalisation mechanism for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation.

Introduction

Quite possibly everything about this paper whether the authoring, the approach and the substance sparks of novelty bordering on the outlandish. Further, why not take a traditional categorical approach and clearly present scientific ideas the traditional way? It is a personal insight developed more than 20 years ago, and just when the author began his B.Sc. In Sociology and Anthropology; that a study of the social and behavioural should carry the philosophical and insightful at its very core above anything else given the inherent ephemeral nature of its subject matter. When I came across the term hermeneutics (and others like phenomenology), this author felt as a personal conviction that that was the chart for the future of the social sciences. My vision in this regard is one of a social science that delves directly to the core of things and avoids platitudes. To come back to the point of this abstract, this explains my apparently tattered approach. But tattered really? No, as the central insight of my articulation is that the scientific method is a validation and falsifiability method, and not necessarily the creative method. The creative method as a hermeneutics isn't supposed to roll down and stifle its very expressiveness, and at the same time it should be articulated in such a way that an exercise of falsifiability, validation and open-ended questioning can be undertaken over it. Such a hermeneutic science calls for a mutual sense of such a hermeneutics by both the author and would-be critique. I hopefully believe the way I have articulated ideas should be able to allow for such an examination. My hermeneutic inspiration in this regard can be analogised with musical creation and music theory. The latter is there to

ensure the appropriate articulation of rules but is not really the drive of musical creation, as musical creation is rather the musician's hermeneutical insight of how to go about creating music while adhering to music theory, such that any such music is analysable/critiqued by the way it credibly adheres to music theory, and actually in exceptional cases further develop music theory. A second point that makes this method ideal is that the apparent enunciation of this paper (an outright call for a reinvention of the state of the art regarding our understanding of psychopathy and the underlying psychology science); is that it is doubtful such an articulation can be credibly presented in simple categorical terms, without rather utilising an entropic hermeneutic-referential approach based on an open-endedness for falsifiability and validation in future elaboration and development of ideas. Further, I thought it more critical (wary of platitudinising the occasion) that the purity of ideas expressed herein shouldn't be overly clouded particularly as the treatment of this paper is largely in substance virgin territory, as of the underlying conceptualisation referential drive (beyond just simplistic rhyming/speculative/interpreted categories of philosophical theories and concepts but rather as 'a driven distinct comprehensively coherent/contiguous operant-level of insights articulation, and carrying implicative and applicative operant-level possibilities going forward'; more like a song is a coherent referential whole beyond just naïve categories of disjointed percussions-and-tunes-more-or-less-similar-to-those-of-the-song construed as constituting the song.) As a matter of fact, I would rather I wrote another paper talking about influences for such an articulation for this paper going by my hermeneutic design insights. Moreover, going by the very nature of how humans develop new ideas; while many, if not most, of my arguments may be more or less 'plainly intelligible', I equally thought it important to articulate ideas I hold in deep conviction and further as many such ideas come with their requisite precise convoluted qualifications even if such ideas might not be quite intelligible from a plain and simple reading, with the notion that such a requisite insight will

be forthcoming in future critique as the very nature of the introduction of new ways of thinking often mean their unintelligibility at first (equally explains my repeating of many terms for ‘habituation’), but then it is not the pertinence of reality that compromises it is the impertinence of human certitudes that does!

In the bigger scheme of things, this author contends that human social and institutional progress and development is not structurally/paradigmatically contiguous as to the very inherent nature of any given institutionalised framework as all such frameworks arrive at at apathetic threshold as these rather develop into denaturing wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives stifling prospective possibilities, thus requiring prospective fundamental reconception. While such prospective re-projection/re-anticipation recognises prior human cumulated knowledge as enabling institutional-recomposuring/institutional-cumulation right up to the present, it also recognises at a certain point the ‘prior knowledge-as-of-mechanical-knowledge predisposition and its developed temporal institutional self-serving predisposition’ becomes critically a drawback for the possibility of knowledge-reification of prospective human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint, as the anamnestic-residuality behind the ‘inventing’/‘creation’ of prior knowledge fades into second-natured mechanical dispositions requiring the renewal of anamnestic-residuality prospectively. At which point, the more decisive issue is recognising and assuming the reality of a fundamental apriorising/axiomatic intellectual break/schism/estrangement with such ‘prior knowledge-as-of-mechanical-knowledge predisposition and its developed temporal institutional self-serving predisposition’, as so-implied across human historicity/ontological-aesthetic-tracing between non-universalising sophistry and prospective universalising idealisation as well as in the case of medieval-pedantic dogmatism and prospective budding-positivism, and this author contends likewise with regards to our modern day intellectual

muddlement as of procrypticism/disjointedness-as-of-reference-of-thought (associated with a predisposition for disparateness-of-conceptualisation) and prospective deprocrypticism/pre-empting-of-disjointedness-as-of-reference-of-thought (as striving for unification-of-explanations narrowing-down veracity as of ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,-to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy). Underlying all such apriorising/axiomatic intellectual break/schism/estrangement because of teleological-decadence—as-to-lack-of-anamnestic-residuality as ‘prior knowledge-as-of-mechanical-knowledge predisposition and its developed temporal institutional self-serving predisposition’ as of the prospective relative-ontological-completeness perspective, as so-reflected in a wooden-language—of-temporal-mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives critically absconding (in totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as to limited-mentation-capacity implications) from the ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ as of ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,-to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy (and rather reverting to eliciting temporal untransvaluated values being passed for knowledge-reification while undermining the prospective relative-ontological-completeness implications of anamnestic-residuality as for instance when statistics as the outcome of prior human originariness-parrhesia,—as-spontaneity-of-aestheticisation in resolving prior human—aporia/undecidability/dilemma/ought-

indeterminacy/deficiency/limitation/constraint are turned around to falsely imply progress occurs anyway to then paradoxically imply surreptitiously there shouldn't be any prospective human originariness-parrhesia,—as—spontaneity-of-aestheticisation in resolving prospective human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint), is the issue of the fundamental lack of anamnestic-residuality as 'knowledge becomes increasingly mechanical' and is rather a secondary and derivational tool for temporal self-serving posturing and is poorly perceived as worthy in of itself but for the imprimaturing so projected and the perceived temporal social-value arising with such imprimaturing and as it is increasingly associated with generalised incuriosity in genuine intellectual development and the substituting of mere imprimatur discretion/whim-of-thought over genuine knowledge-reification as of existence-potency. This has developed in our present age of intellectual muddlement into the absurdity/ridiculousness of pop-intellectualism substituting for genuine and reifying thought, as to the relentless expansion of our modern merchandising mentality to which nothing resists; and paradoxically, such a disposition hangs onto the 'dereified as-deficient-reflexivity of our averaging-of-thought' it then sophistically usurp in its teleological-degradation rather than teleologically-elevating it out of its closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications; with media-driven imprimaturing increasing usurping the role of genuine academic standard production and ultimate validity hanging on the mere imprimatur. As what becomes critical in such a context is no longer prospective knowledge-reification as the primary and essential constraining worth but rather obsession with mere sway and influence even to the point of undermining prospective knowledge-reification as supposed intellection is increasingly infused with obfuscations, falsehoods and subterfuges (as to the fact that misrepresentations and pretences to misunderstand are rather conveniently given as of perceived social-stake-contention-or-confliction and hardly reflecting a

discernment about the possibility for advancing human progress) that apparently render human-subpotency/mortality bigger than existence-potency/immortality. But then human intellection across all ages and times come to an end not because of inherently right or inherently wrong ideas per se (as the very basic genuine striving for intellectual progress is what is critically decisive as that exercise ensures that down-the-line correct and reifying ideas will arise anyway), but critically when deliberate deception-as-of-ontological-bad-faith becomes more important than an aspiration for genuine intellection as an open-ended activity providing the possibility for human knowledge and reflexive empowerment from that knowledge. At which point, it is wrong for 'genuine intellection' not to recognise what is going on as to imply that it is veridically in dialogical-equivalency with such deception-as-of-ontological-bad-faith (whether or not, beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought) as this only leads to a destructuring-threshold-of-ontological-performance habituation and enculturation/endemisation of such deception-as-of-ontological-bad-faith rendering the supposedly empowering activity of knowledge-reification impotent as in many ways such denatured intellection openly claims as of disparateness-of-conceptualisation inclinations that poorly appreciate existence-potency implications of transcendence. In many ways this intellectual falsehood (so-construed by this author as to the implausibility of genuine lack of understanding as from a serious intellectual engagement but rather a 'strategic/calculated behaviour of mere power even against genuine knowledge' which this author intimately construes as a 'decadent and dangerous conception of knowledge' that is effectively destructive of prospective human knowledge reifying and empowering possibilities) is at the 'root source' for surreptitiously ensuring that the public debate fails and thus leading to public policy defaulting into vested postures and interests especially so when such an intellectual teleological-decadence—as-to-lack-of-anamnestic-residuality whether by mystifications-outside-existential-contextualising-contiguity-that-are-

vague-and-imprimatur-driven, misinterpretation-of-statistics-holistic-implications, denial-of-relativism-thus-foiling/undermining-relative-completeness-implications/conclusions/projections-of-prospective-knowledge-reification-in-a-dumbing-down-posturing-that-implies-that-the-present-is-unchangeable-as-of-absolutising-identitive-constitutedness, etymological-flouting-as-of-mere-conceptual-patterning-and-mere-stigmatising-of-competing-theories-and-concepts-on-the-naivety-that-such-stigmatising-representation-will-undermine/override-their-analysable-ontological-veracity and an approach-as-of-the-ordinary-egotistic-perspective-in-existential-extirpation-that-absolutises-the-present-that-is-passed-as-knowledge-reification all undermining informed insight and the requisite human intellectual and emotional sacrifice for genuine knowledge-reification and prospective progress involving the authentic self and social transformation rather than ‘gimmicks instilling a merchandising mentality of ideas’. This then provides paradoxically the underlying meaningfulness-and-teleology infrastructure for upholding the status quo and inducing in many ways the impotence of the social sciences in thoroughly addressing human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of society that ultimately have serious structural/paradigmatic consequences associated with institutional failures (which such intellectualism is hardly inclined to address). Critically, such a ‘self-contented intellectualism’ increasingly focuses not in knowledge-reification as of existence-potency or the critical analysis of such knowledge-reification but in the face of criticism rather consciously substitutes strategies of institutional ascendancy as of a strategy of influence by default imprimatur status rather than genuine knowledge-reification pertinence. It will be as naïve as implying the validity of a common basis for doing arithmetic where an interlocutor insists on $2 + 2$ as 5 but when appropriately explained the veridical assumptions of arithmetic goes on to insist $3 + 3$ as 7, speaking not of a fundamental problem of arithmetic operation as of dialogical-equivalency but a fundamental question of

ontological-bad-faith on the naïve mental reflex that anyway dialogical-equivalency is ever always assumed to then adopt an apriorising/axiomatising attitude of abusing the notion of dialogical-equivalency. Faced with such an orientation the genuine intellectual reaction is to engage it upfront as of an inclination ‘not just to evaluate logical coherence as of correctness or incorrectness or any other evaluation in-between on the basis of good faith’, but beforehand ‘to equally evaluate the apriorising/axiomatising in good-faith or bad-faith (beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought) as of underlying existential-contextualising-contiguity elucidation/deblurring as well as whether the veracity of such apriorising/axiomatising can be established as being of relative-ontological-completeness implications as construed necessary herein and overriding naïve apriorising/axiomatising as of absolutising-identitive-constitutedness in relative-ontological-incompleteness (that seem to undermine the absolute a priori of existence and imply that when existence doesn’t fit/digresses-from its conceptual-moulds then existence must have an inherent issue strangely enough as to be ignored/overcome by the stubborn/political upholding of such defective conceptual-moulds over inherent knowledge-reification implications as of existential-reality)’. We can appreciate that while many a subject-matter will often seem to imply that dialogical-equivalency is just assumed ‘as to the fact of merely engaging as of logical coherence without questioning the underlying apriorising/axiomatising ontological-faith-notion-or-ontological-fideism in good-faith or bad-faith’, the fact is this is rather the consequence of their epistemic–universal-transparency-of-apriorising/axiomatising-as-of-existence rendering the possibility of ontological-bad-faith directly ridiculous as in the natural sciences given its direct subjection to prediction, such that we can hardly contemplate of an interlocutor insisting to imply that gravity on earth is 7 m/s^2 to ensure that calculations conform to its expectations for one interest or another; but the reality of that epistemic–universal-transparency-of-apriorising/axiomatising-as-of-existence

as pre-empting such ontological-bad-faith inclinations is not so directly obvious in many a social domain-of-study and that blurred possibility effectively elicits circumstances of disparateness-of-conceptualisation not only as of wrong ontological-conception out of good-intent/good-faith but equally as of fundamental ontological-bad-faith. This idea is essential in the thought of many such postmodern thinkers as Derrida and Foucault given the implications of human limited-mentation-capacity as herein construed as reflecting human constructiveness-of-ontological-performance and destructuring-threshold-of-ontological-performance. The fact is knowledge-reification is of ‘existential totalising construal for human limited-mentation-capacity-deepening’ and nothing can be construed in discretion/whim-of-thought whether as of ignoring or on the other hand exaggerating, and just as we can fathom that we don’t have the choice to fiddle with even a single number or operation without a mathematical equation going wrong as of its existence-potency over our human-subpotency motives, the same actually do apply in all knowledge-reification and claims of subject-matter specificities ‘rather speak of the difficulty with respect to human emotional-involvement and associated lack of rigour relative to knowledge-reification in addressing human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint’, but not inherent constraining existence-potency dissimilarity of subject-matters. Just as there is no magical arithmetic or physics to resolve such a more fundamental apriorising/axiomatising situation involving ‘abusing the assuming of dialogical-equivalency’, it is wrong and foolhardy not to bluntly recognise this reality in the social domain as to the possibility of then achieving prospective transcendence as of existence-potency implications. The fact is the ‘a priori or axiomatic conception’ is effectively what precedes and validates logic as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity, however there is no logical basis for the ‘a priori or axiomatic

conception’ but for ‘its ontological-faith-notion-or-ontological-fideism construal as of existence’ as can be validated as of strong prediction establishing its epistemic–universal-transparency-of-apriorising/axiomatising-as-of-existence. However, the epistemic–universal-transparency-of-apriorising/axiomatising-as-of-existence generated in domains like mathematics and many a natural sciences is so efficient (as of the underlying positivism/rational-empiricism reference-of-thought achieved ‘epistemic–universal-transparency as of positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules so-reflected as our present positivism/rational-empiricism apriorising/axiomatising–psychologism’ first induced by budding-positivists like Copernicus, Galileo, Descartes, Newton, Leibniz, etc.) that in many ways mathematicians ‘don’t go on to be thinking about the soundness of axioms once these are construed as of existence’ for instance with the axioms-of-addition, but this doesn’t mean that the idea of unsoundness of ‘a priori or axiomatic conception’ (as to invalidate dialogical-equivalency) doesn’t exist especially so when it comes to blurred domains not only in the social sciences but sometimes in the natural sciences as well where lack of epistemic–universal-transparency-of-apriorising/axiomatising-as-of-existence arises such that there is nothing that transparently renders someone ridiculous for fiddling around ‘wrongly implying apriorising/axiomatising meaningfulness-and-teleology as of existence’ not only out of good-intent/good-faith but bad faith as well. (In this regards, the idea of ‘putting in question dialogical-equivalency by not merely engaging for logical coherence but equally putting into question the apriorising/axiomatising meaningfulness-and-teleology’ is effectively central to all prospective institutionalisations in relative-ontological-completeness as reflected with the Socratic philosophers putting in question the apriorising/axiomatising of non-universalising sophists specifically with Socrates during his trial as to his highlighting of the inconsistencies of his accusers arguments for the notion of logical coherent engagement to arise in the very

first place and budding-positivists putting into question the apriorising/axiomatising of non-positivising/non-rational-empiricists medieval-scholasticism pedants specifically as with Galileo's implicit dismissal of any such pretence of logical coherence engagement in the face of what he could see through the telescope with respect to the 'imaginary machinations' of his interlocutors; as in fact the very notion of prospective institutionalisation is one of renewing reference-of-thought and reference-of-thought-devolving apriorising/axiomatising putting into question the wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the absolutising-identitive-constitutedness superseded/transcended). With such teleologically-decadent-as-of-lack-of-anamnestic-residuality spirit of intellectualism, it can difficultly be fathomed how such a ground-breaking event as the appearance of Einsteinian physics in early 20th century prompting great excitement and curiosity among physicists recasting the contributions of prior physicists, and then eliciting the work of many other physicists and mathematicians in the subsequent decades leading in-between to the superseding of Einsteinian physics with Bohrian physics and then Feynmanian physics, etc. as of existence-potency constraining, can be contemplated as of such a rather impoverished conception of genuine intellection which poorly recognises the pre-eminence of existence-potency over human-subpotency, notwithstanding the fact that we are at the backend of human institutional-cumulation/institutional-recomposure, and so because in many ways it is hardly the case that the priority is obsession with such intellectual emancipation rather than obsession with institutional-being-and-craft muddlement. While the natural sciences are 'naturally' constrained by the stronger necessity for prediction, there is nothing that says because the social domain is relatively blurred the possibility for such rigour cannot be achieved in the social as well even as it is highly subject to social-stake-contention-and-confliction meddling; as the possibility of the undercutting of the latter's wooden-language—

of-temporal–mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives with asceticism does exist as has existed throughout human historicity/ontological-aesthetic-tracing. Beyond the seemingly intellectual ebullience ever so portrayed today, the question can be asked to which extent it usually reflect deep curiosity for prospective knowledge-reification rather than a culture of pop-intellectualism today that seem to define our human-subpotency/mortality purposes as superseding existence-potency/immortality purposes, as so-reflected in the supposed intellection values conferred in many a press operation with such vague catchphrases as ‘the-greatest/most-influential thinker of our times’ as of mere influence peddling and poorly advancing the inherent importance of prospective knowledge-reification as addressing the human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of our prior reproducibility—mathesis/motif/throwness-disposition,—as–reproducibility-of-aestheticisation, notwithstanding the sometimes crude and unsavoury social discomfort implications in this respect. Thus in many ways such an orientation is unsettling to upcoming/future young thinkers as to what can be of profound intellection value with respect to opting for a profound intellectual commitment for prospective knowledge-reification rather than just strategies of socially perceived intellectual success within deified temporal/mortal existential frameworks; especially in the underhanded institutional presence of such avowedly teleologically-decadent-as-to-lack-of-anamnestic-residuality mantras like theories die with the passing of their authors as so-implied with regards to many a postmodern scholar, wherein such highbrowing has been surreptitiously inclined to put-up their temporalities/mortalities (notwithstanding that knowledge is as of existence-potency consequences accruing to the entire humankind) to institutionally and socially undermine prospective knowledge-reification with stooges/foils muddying the ontological-veracity of genuine thought as of its true emancipatory implications, as they ‘sneak-in and sneak-out

about knowing and not knowing’ in a distorted conception of intellectualism as a Machiavellian/political exercise rather than the requisite magnanimity of engagement for a genuine knowledge-reification exercise! Actually the projection of values including intellectual values in such totalising–self-referencing–syncretising/circularity/interiorising/akrasiatic-drag are often prospectively deficient, given the fact that notions of value are only as pertinent as of their transvaluation implications in relative-ontological-completeness since the very same conception of value when construed on the basis of relative-ontological-incompleteness may actually be associated with vices-and-impediments, and so beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought (given that virtue is rather as of the Good/understanding/knowledge-driven/ontological-primemovers-totalitative-framework conceptualisation in existence-potency transcendental-enabling and not the vagueness of impression-driven/good-naturedness/wishfulness averaging-of-thought in human-subpotency social-aggregation-enabling). We can grasp in this respect that the value conception as from the non-universalising sophistry perspective had construed as decadent the Socratic prospective universalising idealisation just as did medieval-pedantic dogmatism of budding-positivists like Galileo and Descartes; as in many ways prospective knowledge-reification requires that we supersede our emotional-involvement starting with the very intellection striving for such prospective knowledge-reification. (In any case, ultimately the reality of human knowledge-reification involves ‘direct bilateral relation of appropriate construction-of-the-Self for appropriate cognisance-and-integration of prospective relative-ontological-completeness meaningfulness-and-teleology’, and so in transvaluation; as for instance, it can hardly be imagined that the reference-of-thought of the non-positivistic/medievalism mindset as of its structural/paradigmatic ontologisation/ontological-veracity/aestheticisation-towards-ontology is apt as of its edginess/incisiveness—of-

apriorising/intelligibilitysetup/measuringinstrument/axiomatising to grasp our modern day conception of say physics given its ‘valuation framework as of its totalising–self-referencing–syncretising/circularity/interiorising/akrasiatic-drag’ that needs to be transvaluated into a positivism mindset, and it can fairly be contended that prospective issues of knowledge-reification in modern day physics having to do with theory-of-everything conception arise because of our inappropriately apt edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of an occlusive-consciousness reference-of-thought requiring prospective deprocrypticism reference-of-thought structural/paradigmatic ontologisation/ontological-veracity/aestheticisation-towards-ontology as of a protensive-consciousness (out of a full insight about causality as from the epistemic ‘relative-ontological-completeness projective-totalitative–implications in conflatedness’ herein implied as ontological-primemovers-totalitative-framework), and we can better understand as such why underlying confliction arises with all registry-worldviews/dimensions transcendences because these involve human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint transvaluation as putting in question the old valuation, and in this regards the transcendental/transvaluating conception is universally existential and cannot be just about the physical world without social world implications and vice-versa as so-underlined with the fact that both are for-human-studies/for-human-constructs by the underlying fact that these are about ‘the very same specific human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence’ implications; as inevitably the apparently innocuous Copernican, Galilean, Cartesian, Newtonian, etc. conception of the material world in superseding the human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of ‘traditional mythological/supernatural conceptualisation of material world/things as of the universalising but non-positivism–

medievalism preclusive-consciousness' have constructive implications about corresponding
 requisite prospective social-values in superseding the human–
 aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of
 'traditional mythological/supernatural conceptualisation of the social-construct as of the
 universalising but non-positivism–medievalism preclusive-consciousness', and the possibility
 for the further advancement of such material sciences arises from the effectively enabling
 social-values like freedom-of-speech, opened communication, etc. availing as of the
 transcending positivism/rational-empiricism occlusive-consciousness. Likewise, this author
 contends that the future possibility for the natural sciences advancement is inseparable from
 the possibility of social and social-organisational as of meaningfulness-and-teleology
 infrastructure human–aporia/undecidability/dilemma/ought-
 indeterminacy/deficiency/limitation/constraint transvaluation of the prospective protensive-
 consciousness over our present occlusive-consciousness, and in effect this conjoint-
 epistemic-relationship-and-fate in the conceptualisation of the material and social world is
 even confirmed today as with the social and social-organisational framework that underlied
 and was necessary for most of the scientific and technological advances after the second-
 world war). Basically, anamnestic-residuality as such reflects the successively induced
 originariness-parrhesia,—as—spontaneity-of-aestheticisation specific 'constructiveness-by-
 deconstructing cut-offs/thresholds of ontological-performance' so-construed as of notional-
 protensive-consciousness (trepidatious-consciousness/warped-consciousness/preclusive-
 consciousness/occlusive-consciousness/protensive-consciousness) implications; and as
 eliciting any such specific construction-of-the-Self and its given registry-
 worldview/dimension reference-of-thought and reference-of-thought-devolving overall
 structural/paradigmatic construct-of-meaningfulness-and-teleology as of second-natured
 institutionalisation. The 'deconstructing cut-offs/thresholds of ontological-performance' reflect

prospective lack of solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity so-reflected in the shiftiness-of-the-Self's wooden-language—of-temporal-mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives implying an ontological-performance-including-virtue-as-ontology that is rather constrained on the prior reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation ‘despite the implications as from budding/nascent insights of ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,—to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy’ for the need for prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation, to which the Self absconds (in totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as to limited-mentation-capacity implications) until the perceived induced notional—positive-opportunism from any such prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation elicits the requisite limited-mentation-capacity-deepening (involving prospective knowledge-reification and/or deferential-formalisation-transference) for prospective second-natured institutionalisation as of renewed prospective reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation. Furthermore, besides the conceptualisation articulated herein, what vindicates this idea of apriorising/axiomatic intellectual break/schism/estrangement is effectively that the possibility for prospective meaningfulness-and-teleology is associated with a renewed framework of ontologisation/ontological-veracity/aestheticisation-towards-ontology which is in ‘affirmation/projection by its underlying apriorising/axiomatising perspective as of edginess/incisiveness’ to the superseded framework of ontologisation/ontological-veracity/aestheticisation-towards-

ontology as unaffirmed/deprojected; as to the possibility of the recovery of anamnestic-residuality prospectively, disentangled from 'prior knowledge-as-of-mechanical-knowledge predisposition and its developed temporal institutional self-serving predisposition'. And finally, after many years of formative contemplation this author is rather dedicated to writing henceforth even if read/skimmed just by a handful or fortuitously or never-but-potentially, whatever cometh, hopefully over the next half a century, and thinks any human who genuinely feels strongly about the need for profound human thought should be able to do likewise, as ultimate responsibility and choice notionally lies with the individual.

ontologically from superseding/transcendental categorical-imperatives preserving
intemporality) is not necessarily the deterministic basis for human social adherence to it

Institutionalisation and formalisation are based exactly on the fact that we don't have a
universal intemporality or the-good disposition, but rather according to the mediocrity
principle of science we are solipsistically temporal-to-intemporal in our mental-disposition

transcendental implications

blurriness speaks to 'lack of intellectual lucidity/clarity with respect to supposed knowledge articulation as of existential-reality' wherein a given human-subpotency registry-worldview/dimension edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising so-construed as of mathesis/motif/thrownness-disposition is rather wrongly construed in absolutising-identitive-constitutedness as superseding ecstatic-existence/intrinsic-reality/existence-potency at its prospective deconstructing-threshold/uninstitutionalised-threshold and so as of a lack of insight about projective-totalitative-implications of relative-ontological-incompleteness/relative-ontological-completeness, and blurriness is reflected aporetically with such conundrums as existence-in-existence, disparateness-of-conceptualisation, is-ought problem, and logical issues of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity: blurriness thus fundamentally speaks of a 'closed-minded unilateral-conceptualisation-of-knowledge' wherein the human Self is wrongly construed as of an absolutising-identitive-constitutedness reference for the conception of knowledge rather than reflecting ontological-veracity with an 'open-minded bilateral-conceptualisation-of-knowledge' wherein the human Self itself has to prospectively be developed/constructed-out-of-its-prior-shiftness-of-the-Self in 'epistemic conflatedness construed as epistemic-ricochetting/transepistemicity construct' to then be able to register the implications of prospective knowledge, in the sense that for instance without implying the need for psychoanalytic-unshackling/memetic-reordering/institutional-recomposure as of prospective positivism construction-of-the-Self/self-consciousness a non-positivism mindset as animistic or as medieval in its non-positivism 'closed-minded unilateral-conceptualisation-of-knowledge' will only end up 'complexifying the mechanical outcome of positivism meaningfulness-and-teleology on the basis of its non-positivism as animism or as medievalism apriorising/intelligibilitysetup/measuringinstrument/axiomatising' as implied in an animistic God of plane type of articulation and this applies likewise with our positivism-procrypticism with respect to prospective deprocrypticism, as this is exactly what explains disparateness-of-conceptualisation of all registry-worldviews/dimensions as to the fact that successive registry-worldviews/dimensions involve successive renewing of mathesis/motif/thrownness-disposition as of relative-ontological-completeness in reflection of human limited-mentation-capacity-deepening grasp of existence-potency at their deconstructing-threshold/uninstitutionalised-threshold; blurriness at the deconstructing-threshold/uninstitutionalised-threshold is what brings up the is-ought problem (which had hitherto traditionally been wrongly framed rather in absolutising-identitive-constitutedness as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity, because going by ecstatic-

existence/existence-potency as it reflects human historial becoming in existential-contextualising-contiguity, human 'ontological/knowledge uncertainty' inherently implies human sovereign choices and options are then necessarily of 'ought indeterminacy' as of prior relative-ontological-incompleteness but prospective relative-ontological-completeness with respect to prospective knowledge implications provides the 'ontological/knowledge certainty' to turn such prior 'ought indeterminacy' into 'is determinacy' whether this 'is determinacy' transformation carries with it the given prospective knowledge support/backing of the acceptance, rejection or any other qualified attribution associated with the prior 'ought indeterminacy') given that the prior registry-worldview/dimension mathesis/motif/thrownness-disposition specific elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity reaches its 'is determinacy' limits of analysis from whence its 'ought indeterminacy' arises, speaking of an issue of relative-ontological-incompleteness that is only resolvable by the very fact that prospective relative-ontological-completeness changes the prior 'ought indeterminacy' as of prior normativities/conventions/practices into the prospective registry-worldview/dimension ontologically-veridical 'is determinacy' as reflected in renewed normativities/conventions/practices, and in this regard we can appreciate how medieval-scholasticism non-positivism reference-of-thought-level pedantic dogmatism 'ought indeterminacy' emphasis gave way to the positivism/rational-empiricism scientific cause-and-effect 'is determinacy' emphasis or how ancient sophists non-universalising 'ought indeterminacy' gave way to the universalising idealisation 'is determinacy' of Socratic philosophers or how notions like cannibalism, various practices of slavery and serfdom, etc. in human history as of 'ought indeterminacy' of their practices in relative-ontological-incompleteness gave way to the present 'is determinacy' of their rejection as of relative-ontological-completeness on the basis of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation; blurriness as of disparateness-of-conceptualisation highlights that the destructuring-threshold/uninstitutionalised-threshold of all registry-worldviews/dimensions are deadend of meaningfulness-and-teleology with the implication that without originariness-parrhesia,—as—spontaneity-of-aestheticisation renewing of reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation there is basically no chance for non-universalising ancient sophists ever getting to universalising idealisation, medieval-scholastics pedantic dogmatism ever getting to positivism/rational-empiricism, and just as well with our positivism—procrypticism ever getting to prospective deprocrypticism, and in all these instances as of 'reference-of-thought-level nested-congruence/running-through/deflating—cogent-unifying-operant-dynamics—unification-of-explanations as of construction-of-the-Self'; blurriness is ultimately associated with lack of dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension with regards to human existential-extirpation-as-of-existential-unthought in the perception and relation to the human existential narrative, with contrastive conceptualisation as of

*'an asceticism for opened-construct-of-meaningfulness-and-teleology that is reflexive of overall Being-development/ontological-framework-expansion implications' (as to the possibility of prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation) and 'a nihilistic closed-construct-of-meaningfulness-and-teleology-as-of- 'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications that is rather reflexive of constraining second-natured institutionalisation positive-opportunism implications' (as to a mechanical/mere-form disposition for reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation); and finally blurriness is associated with sophistic induced equivalency of teleologically-elevated knowledge-reifying meaningfulness-and-teleology and teleologically-degraded averaging-of-thought meaningfulness-and-teleology as of social-stake-contention-or-confliction perverted inclination; unblurriness as construed from the ontologically-veridical perspective of ontological-normalcy/post-convergence (in reflection of projective-totalitative—implications of relative-ontological-incompleteness/relative-ontological-completeness), highlights that there is a 'human capacity of apriorising/intelligibilitysetup/measuringinstrument/axiomatising ontological-growth intimately associated with its prospective meaningfulness-and-teleology/knowledge accumulation/recomposuring so-implied in the human institutionalisation process', as of an underlying human epistemic-ricochetting/transepistemicity unification-of-explanations (that speaks more of human limited-mentation-capacity-deepening in its becoming historicity) wherein unification-of-explanations is more than just a question of arbitrary unification but rather is 'a paradigmatic/structural confiscation/selectiveness of the possibility of prospective ontological-veracity of meaningfulness-and-teleology reflexive of ecstatic-existence/existence-potency', as unification-of-explanations effectively implies that at reference-of-thought-level 'intellectual-entitlement to disparateness-of-conceptualisation possibilities within *recurrent-utter-uninstitutionalisation's edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising' are narrowed-down (epistemic-ricochettingly/transepistemicityally as of ontological-normalcy/post-convergence prospective aporetic implications) to rulemaking-over-non-rules (excluding all other supposed meaningfulness-and-teleology/knowledge 'based on prior non-rules') to then induce prospective 'base-institutionalisation unification-of-explanations', likewise narrowed-down within *base-institutionalisation (epistemic-ricochettingly/transepistemicityally as of ontological-normalcy/post-convergence prospective aporetic implications) to universalisation-directed-rulemaking-over-non-rules (excluding all other supposed meaningfulness-and-teleology/knowledge 'based on prior rulemaking-over-non-rules') to then induce prospective 'universalisation unification-of-explanations', likewise narrowed-down within *universalisation (epistemic-ricochettingly/transepistemicityally as of ontological-normalcy/post-convergence prospective aporetic implications) to positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules (excluding all other supposed meaningfulness-and-teleology/knowledge 'based on prior universalisation-directed-*

*rulemaking-over-non-rules') to then induce prospective 'positivism/rational-empiricism unification-of-explanations', and likewise narrowed-down within *positivism/rational-empiricism (epistemic-ricochettingly/transepistemicityally as of ontological-normalcy/post-convergence prospective aporetic implications) to deprocrypticism-or-pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules (excluding all other supposed meaningfulness-and-teleology/knowledge 'based on prior positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules') to then induce prospective 'deprocrypticism unification-of-explanations', and in all such cases the idea is ever always to move from a closed-construct-of-meaningfulness-and-teleology-as-of- 'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications to an opened-construct-of-meaningfulness-and-teleology reflexive of ecstatic-existence/existence-potency increasingly as of its 'rules-universalising-positivising-non-disjointing narrowing-down veracity' while superseding any absolutising-identitive-constitutedness (failing to imply this post-convergence of the human institutionalisation process as of 'rules-universalising-positivising-non-disjointing narrowing-down veracity') which by its very token elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity rather wrongly supersedes ecstatic-existence/existence-potency as the absolute a priori, with unification-of-explanation 'paradigmatic/structural confiscation/selectiveness of the possibility of the ontological-veracity of meaningfulness-and-teleology' implying for instance that there can be no conception/theory/idea of positivism/rational-empiricism devolving meaningfulness-and-teleology that is not rational-empirical like mentioning say magical or supernatural causes and effects, and likewise prospectively with deprocrypticism any conception/theory/idea in disjointedness that fails to reflect 'existential-contextualising-contiguity as of parrhesiastic and mathesis/motif/thrownness-disposition organic coherence and as ultimately reflecting the panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence of all human knowledge', furthermore with regards specifically to say the 'positivism/rational-empiricism reference-of-thought-devolving level of meaningfulness-and-teleology' we can factor in that any 'supposedly deepening/profound' conception/theory/idea say about biological hereditary is rather inconceivable as a phenomenality that fails to narrow-down (epistemic-ricochettingly/transepistemicityally as of ontological-normalcy/post-convergence prospective aporetic implications) rather to a specific-and-coherent conceptualisation of gene regulation and so except it can demonstrate a further narrowing-down (epistemic-ricochettingly/transepistemicityally as of ontological-normalcy/post-convergence prospective aporetic implications) that implies the 'holistic complementing-and/or-superseding-and/or-subsuming of gene regulation' and the life scientist will hardly take seriously any such conceptualisation of biological hereditary that fails to fulfil the above conditions on mere 'sophistic grounds of intellectual-entitlement to disparateness-of-*

falsifiability

falsifiability refers to epistemic-veracity ‘determinable as from existence-potency construal of ontological-primemovers-totalitative-framework as reflecting existential-reality/ontological-veracity’, and thus the broader implication of falsifiability is construed basically as ‘epistemic-veracity for determining existential-reality/ontological-veracity as of projective-totalitative–implications’; with the implication that since existence is the absolute a prior, the ‘becoming of existence as ecstatic-existence’ is the inherent determinative basis of falsifiability as the latter is reflexive of ontological-primemovers-totalitative-framework, and where ecstatic-existence manifestation is rather as of an ‘overall singular/unrepeatable/nonrecurring/as-of-yet-unrepeatable-or-nonrecurring unfolding manifestation’ as implied with the ambit of such theories as the big bang theory, string theory, the human institutionalisation process etc., falsifiability is reflected by determining the coherence-as-of-ontological-congruence/incoherence-as-of-ontological-incongruence of any such ambit implied ‘overall singular ecstatic-existence unfolding manifestation model-theory’ as reflected by ‘the falsifiability of its underlying-and-subsumed-phenomena’ with regards to the epistemic-veracity of their ontological-primemovers-totalitative-framework going by their specifically relevant

repeatable/recurring methodological evaluations or observations or experiments, whereas where ecstatic-existence manifestation is about just a 'repeatable/recurrent ecstatic-existence manifestation phenomenon' then such an ecstatic-existence manifestation phenomenon is falsifiable as of the epistemic-veracity of its ontological-primemovers-totalitative-framework going by its specifically relevant methodological evaluations or observations or experiments

implications 'as requiring knowledge-construct specialisms' involving human deferential-formalisation-transference to 'perceived significant others' with respect to such specialisms 'limited-mentation-capacity resources-and-talent focussing for knowledge-reification', but then sophistic dispositions as of social-stake-contention-or-confliction with regards to such issues like climate change, public policy, etc. can turn around and wrongly reaffirm the 'ontological-veracity of human averaging-of-thought as of propositional-convincing-of-dialogical-equivalency' to undermine such 'prospective meaningfulness-and-teleology routing ontologically-hegemonising-narrative' enlightenment from its dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension specialisms even though we know that the truly specialist lawyer, chemist, etc. doesn't adopt any such propositional-convincing-of-dialogical-equivalency relation with averaging-of-thought but rather is in an enlightening/educating deferential-formalisation-transference posture of 'prospective meaningfulness-and-teleology routing ontologically-hegemonising-narrative', and this relation between flawed sophistic social-stake-contention-or-confliction encouraging of averaging-of-thought propositional-convincing-of-dialogical-equivalency and veridical intellectual 'prospective meaningfulness-and-teleology routing ontologically-hegemonising-narrative' also arises when it comes to prospective knowledge-reification of preceding/traditional normativities, conventions, practices, etc. (such as manifested with sophistic mediums, shamans, witchdoctors, ancient Sophists, medieval-scholasticism pedants and modern day intellectual muddlement), and hence ultimately with respect human limited-mentation-capacity implications sophistry can-and-is only undermined by prospective relative-ontological-completeness 'prospective meaningfulness-and-teleology routing ontologically-hegemonising-narrative' knowledge-reification in inducing the universal-transparency of the prospective registry-worldview/dimension 'reference-of-thought-level nested-congruence/running-through/deflating—cogent-unifying-operand-dynamics—unification-of-explanations as of its construction-of-the-Self' from whence its devolving specialisms/profound knowledge-construct can then be socially engaged in deferential-formalisation-transference undermining sophistry, and so in the sense that it is only because by-and-large every modern human construction-of-the-Self is positivistic/rational-empirical as of reference-of-thought-level that the possibility of devolving specialisms/profound positivistic knowledge-construct can arise (without the possibility of its sophistic social-stake-contention-or-confliction undermining with regards to eliciting non-positivism, supernaturalism, etc. averaging-of-thought) even when the vast majority of humans never have a thorough grasp of any specific given specialism/profound positivistic knowledge-construct say modern medicine, physics, social science, etc., and likewise the sophistic difficulty facing the prospective possibility of deprocrypticism as it is prospectively reflective of our present positivism—procrypticism uninstitutionalised-threshold lies in the fact that it is highly liable to present social-stake-contention-or-confliction procrypticism/disjointedness-as-of-reference-of-thought sophistry 'flawed encouraging of propositional-convincing-of-

dialogical-equivalency averaging-of-thought as of present disjointedness-as-of-reference-of-thought' in undermining the 'prospective meaningfulness-and-teleology routing ontologically-hegemonising-narrative' of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought as of its dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension, and such prospective deprocrypticism organic knowledge-reification necessarily requires at least the induced universal-transparency of the deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought 'reference-of-thought-level nested-congruence/running-through/deflating—cogent-unifying-operant-dynamics—unification-of-explanations as of deprocrypticism construction-of-the-Self' from whence its implied specialised/profound knowledge-construct can be engaged in deferential-formalisation-transference (without the possibility of sophistic undermining like the eliciting of various temporal manifestations of disjointedness-as-of-reference-of-thought as of social-stake-contention-or-confliction implications) even if the vast majority of humans don't have a thorough grasp of deprocrypticism implied profound knowledge-construct implications

potency/transcendental-signifier speaking of 'ontological-primemover-totalitative-framework as causality as of construction', whereas an absolutising-identitive-constitutedness will naively equate any one of the registry-worldview's/dimension's given perceptivity of 'health epiphenomenon of existence' in which it projects-mentally-by-its-reference-of-thought as the 'absolute basis for construing, defining and refining the conception of causality' failing to factor-in that it is rather in an 'epistemic situation as of epistemic-abnormalcy in relative-ontological-incompleteness' requiring not such a constitutedness apriorising/axiomatising but rather a conflatedness/projective-conflating apriorising/axiomatising in relative-ontological-completeness in reflecting the ontological-normalcy/postconvergence of ecstatic-existence/existence-potency/transcendental-signifier (this ontological-primemovers-totalitative-implications insight about causality as reflected with the health epiphenomenon can be extended to all domains construed as for-human-studies/for-human-constructs for the simple reason that all such domains are of 'epistemically manifest historicity/ontological-aesthetic-tracing in existential-contextualising-contiguity as of human limited-mentation-capacity-deepening'); and this explains why a registry-worldview/dimension is a closed-construct-of-meaningfulness-and-teleology-as-of 'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications with the state of relative-ontological-incompleteness just as well aspiring for progress just as the state of relative-ontological-completeness but the former failing to grasp that progress structurally/paradigmatically arises rather by a change of edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising for aposteriorising/intelligising/measuring/logicising of meaningfulness-and-teleology in existence, such that even such budding positivists like Newton or Descartes while making breakthroughs as of positivism/rational-empiricism are still caught up in 'reasoning as of the old' non-positivism/medievalism apriorising/axiomatising respectively with Newton's interests in alchemy and in the case of Descartes lingering religious sacrality/inviolability influence/grip on his thoughts; causality as herein construed as ontological-primemovers-totalitative-framework can thus be understood as the 'structural/paradigmatic implications of relative-ontological-completeness in superseding/overcoming/transcending human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of relative-ontological-incompleteness' as so constructively implied herein, as to the reality that 'a traditional conception of causality as if human-subpotency is constituting the possibility for causations in existence' is herein construed as ontologically-flawed as it fails to reflect that existence is already a given and the very exercise of 'human-subpotency construal of causation is one of conflatedness/projective-conflating apriorising/axiomatising about the already given existence' and so as of human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence, speaking to the fact that existence is rather about ecstatic reflexivity as all manifestations in existence (so-construed as subpotencies)

are as of their specifically/notionally enabled reifying/intelligibility and empowering/subpotency; finally it is just as important to grasp also here that the 'articulation as human-causative-construction' of the notions of 'temporal individuations or temporal-dispositions' and 'intemporal individuation or intemporal disposition' are rather conceived epistemically as of their structural/paradigmatic implications from the perspective of the ontological-normalcy/postconvergence of ecstatic-existence/existence-potency/transcendental-signifier and thus are construed as of their 'structural/paradigmatic implications of relative-ontological-completeness in superseding/overcoming/transcending human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of relative-ontological-incompleteness', reflecting a human-causative-construction conception in conflatedness/projective-conflating apriorising/axiomatising about existence as ontologically-veridical (as it is the 'totalitative projective perspective' that points out the veridical conception of causation) and so over a traditional reflex construal of human causation in constitutedness as of absolutising-identitive-constitutedness apriorising/axiomatising (wherein for instance with regards to prospective human-causative-construction, as of human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence, prospective aetiologisation/ontological-escalation say with respect to a temporal-disposition for accusing others of sorcery in a social-setup cognisant-and-integrative of notions-and-accusations-of-sorcery in conjugation and protraction of other temporal dispositions, speaks to the structural/paradigmatic implications of 'non-positivism notional-procrypticism/notional-disjointedness-as-of-reference-of-thought' induced vices-and-impediments as destructuring-threshold-of-ontological-performance requiring prospective intemporal-disposition projection as of the 'specific notional-deprocrypticism/notional-preempting-of-disjointedness-as-of-reference-of-thought of positivism/rational-empiricism' ontological-performance-including-virtue-as-ontology as prospective constructiveness-of-ontological-performance, and this fundamental conception of aetiologisation/ontological-escalation applies across the human institutionalisation process with respect to human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint, including prospectively say as of our present positivism-procrypticism requiring the structural/paradigmatic implications of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought aetiologisation/ontological-escalation)

positive-opportunism speaks to the fact that unlike is the case with sovereign constructs, 'supra-social or averaging-of-thought validation of ontological-veracity is never a relevant element in prospective knowledge-reification' given that the supra-social construct of meaningfulness-and-teleology as reflected in any social-setup institutionally is rather 'a second-natured/habituated institutionalisation construct as from deferential-formalisation-transference' arising from the 'untenable existentially constraining knowledge-reifying and empowering reflexivity implications of existence-potency induced metaphoricity from solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity intemporal ontological-faith-notion-or-ontological-fideism reasoning-through/messianic-reasoning in solipsistic transversality', and thus reflecting the ontological-veracity that any such supra-social framework is not the inherently relevant basis for prospective knowledge-reification as of 'a convincing of human-subpotency' but rather what is relevant is 'the pertinence of its underlying deferential-formalisation-transference-as-non-sophistic' and/or prospective existence-potency induced metaphoricity as of 'supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence' and so validated as of ontological-primemovers-totalitative-framework with respect to 'adhering to existence-potency implications', for prospective deferential-formalisation-transference supra-social meaningfulness-and-teleology to arise; as the fact is supra-social constructs are rather afterthought/reasoning-from-results as for instance it is not the inherent budding positivists meaningfulness-and-teleology that induced a social transformation into positivist thinking but rather the 'accruing constraining effect on existence' of such budding positivism instigated positivist and liberal meaningfulness-and-teleology that then induced its social adoption later on as of social-stake-contention-or-confliction-with-regards-to-rationalising-the-benefits-of-the-world-as-of-technical,-well-being,-health-and-social-development-implications, as 'supra-social constructs remain beholden to their prior relative-ontological-incompleteness framework of apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of apriorising-teleological-thresholding—as-teleological-framework/narrative-framework of contextualising/instantiative-devolving-meaningfulness' as closed-construct-of-meaningfulness-and-teleology-as-of- 'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications with poor nonextirpatory-existential-preempting-of-existential-unthought without such manifest positive-opportunism and the possibility for transcendence-and-sublimity can only arise as of untenable prospective existence-potency constraining relative-ontological-completeness framework edginess/incisiveness—of- apriorising/intelligibilitysetup/measuringinstrument/axiomatising as opened-construct-of-meaningfulness-and-teleology in its cross-generational transformative effect even as its initial instigation doesn't elicit immediate positive-opportunism as of its dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension explaining the inevitable/inherent conflictedness to such

budding transformative stances as articulated by the Socrates, Copernicuses, Galileos, Descartes, Diderots, and relevant 'prophesiers of antiquity as philosophers', with the projective-totalitative-implications that any given supra-social framework is inherently of 'epistemically underdeterminative contemplation for ontologically and intellectually assessing its prospective transcendence-and-sublimity' as the supra-social mathetic/motified/thrownd state of recurrent-utter-uninstitutionalisation is of epistemically underdeterminative contemplation as of its closed-construct-of-meaningfulness-and-teleology-as-of- 'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications for intellectually gauging about prospective base-institutionalisation, and likewise base-institutionalisation-universalisation with regards to universalisation, universalisation-non-positivism/medievalism with regards to positivism, and prospectively our positivism-procrypticism with regards to deprocrypticism as in all such cases the supra-social and averaging-of-thought inclination is in a totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as of its 'shiftiness-of-the-Self as of mere mathesis/motif/throwndness-disposition enfaming dereifying-gesturing' whether as of trepidatious/warped/preclusive/occlusive identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism, and this is exactly what renders all such transcendence-and-sublimity rather as of 'intemporal ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen for originary/as-of-event reasoning-through/messianic-reasoning' involving the 'displacement/decentering-of-the-human-subject induced as of ontological-dementation/dialectical-dementation stranding dialectics' as to the fact that it is more critically 'a matter of psychoanalytic-unshackling/memetic-reordering/institutional-recomposure' by 'projecting of the transcending of the prior mathesis/motif/throwndness-disposition of reference-of-thought as of 'the institutionalisation process's (ecstatic-existence prospective digression induced epistemic-ricochetting/transepistemicity) anamnestic-residuality as to difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism' explaining why all prior registry-worldviews/dimensions sense-of-progress is foiled since such sense-of-progress is wrongly ever along the same line of mathesis/motif/throwndness-disposition so-construed as pseudo-edginess/pseudo-incisiveness whereas in effect progress rather occurs by the 'unshackling of any such mathesis/motif/throwndness-disposition towards better-and-better existential reflection of the underlying parrhesiastic seeding-promise-of-human-subpotency-ontological-performance-correspondence-with-the-full-potency-of-existence-as-of-its-coherence/contiguity' speaking rather to their ontological-incompleteness of reference-of-thought/psyche that has to be 'addressed psychoanalytically before engaging in prospective knowledge-reification'

transversality/logical-incongruence/avoiding-issue-of-mutual-unintelligibility-or-intellectual-bad-faith-or-flawed-existential-elevation-of-reference-of-thought: transversality involves the epistemic construct of meaningfulness-and-teleology as of 'existence-potency edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising' construed as knowledge-reification gesturing, and so over a human ordinary/averaging-of-thought mental-reflex to construe meaningfulness-and-teleology as of 'human-subpotency enframing pseudo-edginess/pseudo-incisiveness of its second-natured institutionalisation uninstitutionalised-threshold' thus exposing such meaningfulness-and-teleology to human totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag which is exactly what needs to be superseded as of human developing self-consciousness/construction-of-the-Self for prospective transcendence-and-sublimity to arise as of transversality induced reasoning-through/messianic-reasoning, such that the notion of prospective human value and aspiration beyond the 'given registry-worldview/dimension reference-of-thought mathesis/motif/throwness-disposition that underlies its supra-social construct and averaging-of-thought' doesn't exist because of its closed-structure-of-meaningfulness-and-teleology together with the consequent susceptibility to sophistic manipulation of such presencing human-subpotency perspective of social-stake-contention-or-confliction and this further explains why prospective reasoning-through/messianic-reasoning has ever always been as of a 'presencing consummated/forfeiting posture' in this respect in order to then outrightly commit to prospective transcendence-and-sublimity value aspiration

vices-and-impediments-as-to-living/institutional/Being—as-of-reference-of-thought/structural/paradigmatic-defect-of-ontological-performance-including-virtue-as-ontology

There is a common word that already exists that best describes what a psychopath is philosophically-speaking. It is a French word that doesn't exactly exist in English. The word is 'cinglé' and is better translated in English as 'slanted mind' (in contrast to the straightness/candor/deconstruction/ontological-reconstituting/organic-comprehension-thinking/'intemporal-prioritisation-of-reference-of-thought'-as-conflatedness of a 'convictionally predisposed human mind' as of prelogism or prelogism-as-of-conviction. It should equally be noted that sometimes the word cinglé is used intermittently with deranged (dérangé) which is a more general word that does not capture as of the socially-functional-and-accordant phenomenal specificity that is of relevance in this paper. In other words, 'the cinglé' perceives meaning as 'a hollow mimicking form in-of-itself that determines others behaviour' in contrast to the normal human relation to meaning as an essence or conviction or prelogism we abide by (and so, even in the case of bad conviction or prelogism where the bad logic of the prelogism-as-of-conviction mind operates by an ad hoc and circumspect exaggeration or omission).

In other words, the psychopath manifests postlogism/'perverted-outcome-sought-precedes-existentially-veridical-logical-dueness' by its reference-of-thought-devolving-as-of-instantiative-context construed as 'how can a perverted sought after outcome be obtained with an interlocutor or interlocutors with respect to a targeted end-goal or targeted individual by falsely projecting hollow-abstract logic notwithstanding that it is existentially unreal or it is faked or it is opportunistically raised or raised out-of-context (existential-decontextualised-transposition)', i.e. meaning-as-form or pathologically/impulsively 'hollow-constituting'-or-failing-intemporal-preservation-or-misappropriation-of-meaningfulness, contrasted to the

normal prelogism-as-of-conviction minds prelogical state ('existentially-veridical-logical-dueness-precedes-logical-outcome-arrived-at' construed as 'what does the veridical logical-processing-or-logical-implication of a given existential situation intrinsically imply as relevant and sound outcome', i.e. meaning-as-ontologically-veridical/in-conviction, whether thereafter the logical-processing-or-logical-implication is rightly or wrongly assumed). Hence prelogism or prelogism-as-of-conviction is all about the appropriateness of logic without any implication/questioning about any issue with the reference-of-thought on which logical-processing-or-logical-implication is based, and thus the idea of re-engaging is valid on the basis that the logical-processing-or-logical-implication can be well performed subsequently despite an initial failure or possible initial failures. Whereas with postlogism or postlogism-as-of-non-conviction this essentially has to do not with an issue of logical-processing-or-logical-implication but rather an issue of perversion-of-reference-of-thought, as logical-processing-or-logical-implication is on the basis of a sound reference-of-thought (non-perversion-of-reference-of-thought) such that fundamentally 'the notion of the dueness for logical-processing-or-logical-implication' is ontologically jeopardised by the inherent perversion-of-reference-of-thought as 'first-order perversion, out of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context', of apriorising-reference-of-thought-elements/apriorising-registry-elements which are denaturing of implied—logical-dueness-or-scape/profile-or-stature/presumptuousness-or-arrogation/assumptions/value-reference/teleology. Further to this is the derived second-order level deception as of wrongly implied logical-processing-or-logical-implication thereof, as of infinite deception possibilities from this faulty-mentation-procedure-deception-or-urge arising where the implied first-order perversion-of-reference-of-thought is wrongly acquiesced to as appropriateness-of-reference-of-thought-as-of-conflatedness thus wrongly

implying that logical-dueness arises for logical engagement with interlocutors; and so in contrast to the infinite possibilities of ‘sound logical-processing-or-logical-implication’ from non-perversion-of-reference-of-thought. Hence postlogism is actually a usurpation/arrogation of the prelogism-as-of-conviction mentation reflex where social universal-transparency of apriorising–reference-of-thought-elements/apriorising–registry-elements is not available/obscured as of lack of insight on existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context; with the result that with respect to the reference-of-thought, postlogism ‘induces as of ontological-normalcy/post-convergence perspective, a degraded-as-dementing differentiation of existential meaningfulness-and-teleology’ unlike prelogism which ‘induces as of ontological-normalcy perspective, an elevated-as-sound-thinking differentiation of existential meaningfulness-and-teleology’. The postlogical disposition is associated pathologically with the psychopathic character as a faulty-mentation-procedure-deception-or-urge with respect to perceived social-stake-contention-or-confliction but can equally extend ad-hocly or more profoundly as a manifestation of conjugated-postlogism/dementing-integration (due to psychopathic/postlogism induced social loss-of-awareness of the social universal-transparency) where it elicits temporal-dispositions of ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation in situations of social-stake-contention-or-confliction. (‘Candidty/Candour-capacity’ is the ‘overall ontological-contiguity of variance of the same nature as of contiguity of meaningfulness-and-teleology’ in the sense that various degrees of temporal-to-intemporal individuations upholding/failing of candidty/candour-capacity roughly equate to such an ‘intervalist-as-categorising-phenomenal-abstractiveness-of-presencing-in-‘occlusive-consciousness’-

 'Candidty/Candour-capacity' as such refers to the comprehensiveness/social-context-holism-
 construed-conflatedness of individuation and consequently social capacity for ontological-
 normalcy, so reflected in social-context-holism-construed-conflatedness of individual and
 social construal/conceptualisation of meaningfulness-and-teleology in upholding/failing
 ontological-normalcy as reflected by 'closeness-of-tethering-trajectory to prelogism-as-of-
 conviction commitment of reference-of-thought' or 'looseness-of-tethering-trajectory to
 prelogism-as-of-conviction commitment of reference-of-thought'/'madeupness/bottomline of

reference-of-thought' as explaining thus the possibility respectively of appropriateness-of-reference-of-thought-as-of-conflatedness or perversion-and-derived-perversion-of-reference-of-thought, behind the grander issue of ontological-incompleteness/completeness-of-reference-of-thought. Basically, this points to 'notional effecting construing/conceptualising' with respect to ontology/ontological-normalcy as of the thresholds of 'effecting-parsimony' as temporality and 'effecting-wholeness' as intemporality; the elucidation of which brings out the beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought social universal-transparency, enabling intemporal/ontological skewing for institutionalisation. It is the resolving as aetiologisation/ontological-escalation of 'candidty/candour-capacity' as of transcended/superseded psychoanalytic-backdrop for the prospective apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights overcoming human procrypticism or disjointedness-as-of-reference-of-thought that will usher in futural Being-development/ontological-framework-expansion as of prospective depcrypticism institutionalisation psyche on the same token that the resolving of non-positivism including 'superstition' as of transcended/superseded psychoanalytic backdrop for the prospective overcoming of human 'non-positivising/non-rational-empirical'-hollow-staging-and-performance' that ushered in our prospective Positivism institutionalisation psyche and the institutionalisation possibilities thereof. Notional candidty/candour-capacity thus allows for meaningfulness to be recasted in terms-as-of-axiomatic-construct of 'narratives of candidty/candour-capacity in existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context' reflecting more directly the candidty projective-totalitative-implications as of successive temporal-to-intemporal individuations specifically as a capacity variance of the same construct. Furthermore, such a candidty/candour-capacity approach as syncing with a Depcrypticism

reference-of-thought as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought conflatedness over our positivism–procrypticism reference-of-thought and uninhibited/decomplexified from the latter, provides ‘direct ontological insight of deprocrypticism placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology’ as to the nature of the positivism–procrypticism social-functioning-and-accordance—as-of-social-stake-contention-or-confliction threshold as uninstitutionalised-threshold amenable to perversion-and-derived-perversion-of-reference-of-thought on the basis of its more simplistic and direct notion of candidity/candour-capacity variance of the same construct. Unlike the ‘intervalist-as-categorising-phenomenal-abstractiveness-of-presencing-in-‘occlusive-consciousness’-enabling-apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights-of-existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context categorisation scheme’ which rather construes a presencing—or-totalising-self-referencing-syncretising-forward-facing-self-consciousness that is dialectically-thinking and centered positivism–procrypticism registry-worldview/dimension; the ontological-contiguity of a deprocrypticism candidity/candour-capacity construal/conceptualisation articulated as of ‘deprocrypticism narrative of candidity/candour-capacity’ is as of a uninhibited/decomplexified conflatedness in futural Being-development/ontological-framework-expansion as of prospective deprocrypticism registry-worldview’s/dimension’s reference-of-thought as dialectically-thinking-and-centered-to-prospective-institutionalisation’s-categorical-imperatives/axioms/registry-teleology and construing our positivism–procrypticism registry-worldview/dimension as dementing-and-decentered-to-prior-institutionalisation’s categorical-imperatives/axioms/registry-teleology. Candidity/Candour-capacity as such highlights from

the perspective of the dialectically-thinking-and-centered-to-prospective-institutionalisation's-categorical-imperatives/axioms/registry-teleology soundness-or-authenticity-of-reference-of-thought as deprocrypticism opened-construct-of-meaningfulness-and-teleology the dementing/unsoundness-or-inauthenticity-of-reference-of-thought of the positivism–procrypticism closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications, despite the latter’s totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag apparent soundness, at its uninstitutionalised-threshold of procrypticism as wooden-language—of-temporal–mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the registry-worldview’s/dimension’s institutionalisation categorical-imperatives/axioms/registry-teleology. In this regard and dialectically, ‘meaningfulness-and-teleology is closed and opened successively’ as of the ‘successive uninstitutionalised-thresholds and institutionalisations’ driven by the ontological-faith-notion-or-ontological-fideism for intemporal-preservation-entropy-or-contiguity—or–ontological-preservation; - as closed by non-rules-as-impulsive-or-accidented-or-random-mental-disposition in ‘recurrent-utter-uninstitutionalisation uninstitutionalisation’, - opened as rule-making by rulemaking-over-non-rules in ‘base-institutionalisation institutionalisation’ but then closed at the uninstitutionalised-threshold as ‘ununiversalisation uninstitutionalisation’, - opened as universalisation by universalisation-directed-rulemaking-over-non-rules in ‘universalisation institutionalisation’ but then closed at the uninstitutionalised-threshold as ‘non-positivism/medievalism uninstitutionalised-threshold’, - opened as positivism by positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules in ‘positivism institutionalisation’ but then closed at the uninstitutionalised-threshold as ‘procrypticism uninstitutionalisation’, and prospectively opened as deprocrypticism by pre-empting-procrypticism-or-disjointedness-as-of-reference-of-thought,-as-if-of-

 as incapable of getting at the bottom of the archaeological-layers/historiality-tracing of
 ontological axioms/horizons of meaningfulness as of its ‘attempt-at-such-a-delaying’ thus
 considered to be inherently ontologically-deficient/incomplete, can be superseded ‘beyond-

Underlying such graduated conceptualisation of human consciousness as of notional conflatedness, is the fact that as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, such human consciousness conflatedness ultimately behind the successive institutionalisation-cumulations/institutional-recomposures of the institutionalisation process is grounded on its least common human temporality/shortness-to-intemporality/longness denominator which is the ‘constraining social universal-transparency; and while the ‘complementing grander social-universally-non-transparent-thus-non-constraining-element of ontological-faith-notion-or-ontological-fideism’ is aspirational as inducing the solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity intemporal mental-disposition behind the ‘inventing’ of prospective institutionalisation, it is effectively occurs spontaneously to the intemporal disposition and cannot be the basis for collective grounding of such human consciousness conflatedness as this inevitably leads to temporal concatenation to intemporality, rather its import lies solely as of solipsistic intemporal projection drive given that ontological-faith-notion-or-ontological-fideism is beyond the possibility of its second-natured institutionalisation just as implied with the notion of faith in creeds. Further, the dynamics of such a graduated human consciousness as of notional conflatedness of notional-deprocrypticism can be reinterpreted operantly as of ‘notional-referentialism’ as it points to the fact that categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness mental-dispositions/apriorising/intelligibilitysetup/measuringinstrument/axiomatisings are actually

‘various levels of failing to achieve the deprocrypticism referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness apriorising/intelligibilitysetup/measuringinstrument/axiomatising that ensure ontological-completeness-of-reference-of-thought’, and thus are construed as of the same notion of referentialism, as of ‘pseudo-referentialism mental-dispositions/apriorising/intelligibilitysetup/measuringinstrument/axiomatisings levels’ given their respectively underlying limited-mentation-capacity in achieving referentialism. While in reality these are respectively of ‘categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness mental-dispositions/apriorising/intelligibilitysetup/measuringinstrument/axiomatisings’ they still act as if of ‘deprocrypticism referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness apriorising/intelligibilitysetup/measuringinstrument/axiomatising’, and so ‘in their beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought dementing’ thus generating as of their ‘pseudo-referentialism mental-dispositions/apriorising/intelligibilitysetup/measuringinstrument/axiomatisings levels’ their respective neuterising construed as of ‘their prior relative-ontological-incompleteness-of-reference-of-thought of meaningfulness-and-teleology’. Neuterising thus refers to human attribution of meaningfulness-and-teleology as of human limited-mentation-capacity misconstruing, with respect to existential social-stake-contention-or-confliction possibilities, such that its reference-of-thought/structural/paradigmatic—ontological-performance-including-virtue-as-ontology is relatively ontologically-incomplete/of-ontologically-compromised-mediating,-as-of-its-specific-constitutedness, and so-construed from the conflatedness of notional-deprocrypticism; thus neuterising is specifically ‘a contextually developed perversion-or-derived-perversion-of-reference-of-thought, that is second-natured as of its prior relative-ontological-incompleteness-of-reference-of-thought

with the consequent implications of relatively defective meaningfulness-and-teleology ontological-performance. For instance, as of their ontological-incompleteness-of-reference-of-thought, an animist society might notice that going to a given forest leads to illness and ascribe evil to that forest but then a prospective relative-ontological-completeness-of-reference-of-thought positivism interpretation may be that at a certain time of the day and during a certain time of the year that forest attracts mosquitoes that cause malaria for instance which can be prevented by rubbing a certain leaf on ones cloths and body, together with the fact that a given root can be used to cure the malaria, and in addition to a whole web of nuanced understanding available to the positivism meaningfulness-and-teleology relative to the ‘abject and brute’ animistic interpretation as meaningfulness-and-teleology neuterising that it is an evil forest one should not trespass together with a whole cohort of ‘imaginary tales’ in shoring up that posture, speaking of its dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing. This is a most elaborate articulation of neuterising but it equally applies where meaningfulness-and-teleology is ‘just about miscued’ say between positivism–procrypticism and deprocrypticism with the latter underlying the disjointedness-as-of-reference-of-thought of the former as it neuterising, for instance in the case of psychopathy and corresponding conjugated-postlogism as social psychopathy as in the various illustrations highlighted herein and particularly as more obviously revealed with childhood psychopathy. In the bigger picture, ascriptivity-or-ascription-hardening/pseudo-referentialism arises as of notional-referentialism/notional-deprocrypticism; wherein recurrent-utter-uninstitutionalisation’s existential reference-of-thought deepest-level of neuterising is elicited by its ‘trepidatious-consciousness impulsive—ontologically-compromised-mediating,-as-of-its-specific-constitutedness apriorising/intelligibilitysetup/measuringinstrument/axiomatising failing rulemaking-over-non-rules’, base-institutionalisation–ununiversalisation existential reference-of-thought next

 development/ontological-framework-expansion as of prospective deprocrypticism existential
 reference-of-thought overcomes neuterising by its ‘protensive-consciousness referentialism—
 ontologically-uncompromised-mediating,-as-of-conflatedness

 and so by way of conflatedness. Thus basically, neuterising of the various references-of-
 thought-devolving-teleological-structure-of-meaningfulness is as of ‘categorising–occlusive-

dispositions/apriorising/intelligibilitysetup/measuringinstrument/axiomatisings’ by their respective relative human limited-mentation-capacities as their respective beyond-the-consciousness-awareness-teleologies dementing/de-asserting construed as their respective prior relative-ontological-incompleteness-of-reference-of-thought neuterising, and revealing as of the notional-conflatedness of notional-deprocrpticism their ‘reference-of-thought-devolving—différance/internal-dialectics/difference-deferral’ with regards to their respective reference-of-thought/structural/paradigmatic relative transcendently-unenabled-institutionalisation-level-or-uninstitutionalised-threshold; underlining the ontological implications of understanding neuterising with respect to ‘retrospective and prospective Being underdevelopment elucidations of meaningfulness-and-teleology’ as of neuterising induced failing of reference-of-thought/structural/paradigmatic—ontological-performance-including-virtue-as-ontology. Basically neuterising as so articulated is the conception of ‘the ontological-performance-including-virtue-as-ontology of the various institutionalisations references-of-thought-devolving-teleological-structure-of-meaningfulness’ so-conceptualised from the notional-conflatedness of notional-deprocrpticism protensive-consciousness, and such an ontologically-veridical evaluation of neuterising is construed as a deneuterising—referentialism reflecting-ontologically-veridical-‘affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking’-and-ontologically-flawed-‘dementing/deassertion’ as of the various institutionalisations references-of-thought-devolving-teleological-structure-of-meaningfulness’. The implication here being that neuterising ‘can be disambiguated as of the fundamental human limited-mentation-capacity induced totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context ontological-performance-including-virtue-as-ontology misconstrual-as-neuterising, and so-construed as of referentialism as of the notional-conflatedness of notional-deprocrpticism protensive-

consciousness; thus gaining a superseding insight of the ontologically-flawed references-of-thought-devolving-teleological-structure-of-meaningfulness fixations/hardening-construed-as-neuterising of the various relative-ontologically-incomplete institutionalisations as of their existential-contextualisation; as this deneuterising—referentialism reflecting-ontologically-veridical-‘affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking’-and-ontologically-flawed-‘dementing/deassertion’ as from notional-deprocrypticism, disambiguates neuterising as an insight into the ontologically-veridical ‘underlying phenomenological dynamics of human limited-mentation-capacity’ that explains the how-and-why of such ontologically-flawed references-of-thought-devolving-teleological-structure-of-meaningfulness fixations/hardening-construed-as-neuterising associated with the various institutionalisations in prior relative-ontological-incompleteness-of-reference-of-thought. Insightfully and counterintuitively for elucidative construal, neuterising as of relative epistemic-abnormalcy/ontological-incompleteness-of-reference-of-thought is rather ‘a derived-construction as deficient of relative ontological-normalcy/ontological-completeness-of-reference-of-thought’, as it is the elucidation of relative ontological-normalcy/ontological-completeness-of-reference-of-thought as truly reflecting intrinsic-reality/ontological-veridicality, whether we are aware of it as of dialectically-thinking or unaware as unconscious beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as of dementing/deassertion, that reveals neuterising as of epistemic-abnormalcy/ontological-incompleteness-of-reference-of-thought as it is construed in its ontological-veridicality as ‘a deficient derived-construction of ontological-normalcy/ontological-completeness-of-reference-of-thought’. This insight equally explains why it is ‘through the deficient derived-construction of conflatedness’ that is construed the ontologically-veridical nature of ‘distractive-alignment-to-reference-of-thought’-ontological-

destructuring-constitutedness. Understanding and overcoming neutering as such reveals the beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought dynamism of human temporal-to-intemporal individuations mental-dispositions/apriorising/intelligibilitysetup/measuringinstrument/axiomatising as critical across all the registry-worldviews/dimensions construed as of ontological-dementation/dialectical-dementation stranding dialectics. The ontological-veridicality of a ‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics’ as associated with ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ is one grounded as of ontological-dementation/dialectical-dementation stranding dialectics around on ‘decentering/pivoting around the uninstitutionalised-threshold rule’ as a remaking of apriorising/intelligibilitysetup/measuringinstrument/axiomatising involving the resetting of the placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology, pointing out that the prior apriorising/intelligibilitysetup/measuringinstrument/axiomatising has been superseded as of its revealed perversion-and-derived-perversion-of-reference-of-thought and so as of the uninstitutionalised-threshold rule. This explains why at uninstitutionalised-thresholds which are subject to ‘meaningfulness-and-teleology neutering’, prospective institutionalisation can only be achieved as of second-natured constraining social universal-transparency that overcomes the given uninstitutionalised-threshold ‘meaningfulness-and-teleology neutering’ thus enabling the relative ontological-normalcy/ontological-completeness-of-reference-of-thought of the prospective institutionalisation. It also explains why naively implying at an uninstitutionalised-threshold that ‘the social-universally-non-transparent-thus-

non-constraining-element of ontological-faith-notion-or-ontological-fideism' is universally attributable as if humans had only the intemporal/longness-of-register-of-meaningfulness-and-teleology individuation without temporal/shortness-of-register-of-meaningfulness-and-teleology individuations will simply fail to recognise the generation-and-upholding of neuterising and thus unable to reveal perversion-and-derived-perversion-of-reference-of-thought; as it is naïve to think that while being at an uninstitutionalised-threshold like universalisation–non-positivism/medievalism by mere-and-vague impression-driven/good-naturedness/wishfulness averaging-of-thought in social-aggregation-enabling, people will 'simply by magic' find themselves articulating positivistic meaningfulness-and-teleology without grasping that the psychoanalytic-unshackling/memetic-reordering/institutional-recomposure cross-generational process is effectively the mechanism for 'overcoming non-positivism/medievalism uninstitutionalisation meaningfulness-and-teleology neuterising' to be able to then reveal, construe and uphold positivistic Being and meaningfulness-and-teleology, and this equally applies with regards to overcoming our 'procrypticism/disjointedness-as-of-reference-of-thought meaningfulness-and-teleology neuterising' to attain futural Being-development/ontological-framework-expansion as of prospective deprocrypticism Being and meaningfulness-and-teleology. As a further elucidation, a comparison can be made between a construct of 'notional-referentialism' disambiguated as referentialism, categorising neuterising, qualifying neuterising, tendentious neuterising and impulsive neuterising, and in parallel a reflection of 'data conceptualisation' disambiguated as ratio-contiguous referencing, intervalist pseudo-referencing, ordinal pseudo-referencing, nominal pseudo-referencing and random pseudo-referencing. We can grasp that effectively data conceptualisation as of intrinsic-reality/ontological-veridicality is inherently ratio-contiguous as of ontological-normalcy/ontological-completeness-of-reference-of-thought but then we don't always have the capacity to reference ratio-contiguous

data and so the other types of data conceptualisations are available to us as well ‘as of the limitations of our measuring capacity’, and we grasp that the latter are actually in ‘constructed-deficiency of ratio-contiguity/ratiocination’ as of their relative ontological-abnormalcies/ontological-incompleteness-of-reference-of-thought. Here as well it is important to understand that it is the ratio-contiguous referencing data conceptualisation that provides the ‘overriding framework as of conflatedness’ for making-sense-of/construing the relatively deficient referencing data conceptualisations as of their ‘defined tolerable levels’ of neuterising. This elucidation is to point out that reference-of-thought constructs in relative ontological-abnormalcy/ontological-incompleteness-of-reference-of-thought in the very first place cannot be the basis for articulating, as of their given constitutedness, by elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity ontologically-veridical meaningfulness-and-teleology ‘as if in referentialism as of referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness apriorising/intelligibilitysetup/measuringinstrument/axiomatising’ but rather require ‘their ontologically-veridical meaningfulness-and-teleology restoration’ by a conflatedness as of relative ontological-normalcy/ontological-completeness-of-reference-of-thought that factors in ‘their constructed-deficiency with respect to relative ontological-normalcy/ontological-completeness-of-reference-of-thought, so-construed as their neuterising’ as of their categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness mental-dispositions/apriorising/intelligibilitysetup/measuringinstrument/axiomatisings; thus enabling ontologically-veridical construal as of both ontological-completeness/incompleteness-of-reference-of-thought of Being and meaningfulness-and-teleology retrospectively to prospectively across the institutionalisation process. To put it another way, as distinct articulations of the same physics intrinsic-reality, we cannot simply by constitutedness by

elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity of ‘traditional classical mechanics axiomatic-construct’ given its relative epistemic-abnormalcy/ontological-incompleteness-of-reference-of-thought arrive-at/achieve the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ as of its relative ontological-normalcy/ontological-completeness-of-reference-of-thought; as what is so generated is nothing as of reality but rather a virtuality-or-ontologically-flawed-construal. Instead such a construction of prospective relative intrinsic-reality/ontological-veridicality is a conflatedness of ‘traditional classical mechanics axiomatic-construct’ by a totalising–renewing-realisation/re-perception/re-thought as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating; driven by ontological-faith-notion-or-ontological-fideism to reconstruct the same domain of physics as the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’, and rather reflects the ontological-veridicality that ‘traditional classical mechanics axiomatic-construct’ as of its relative epistemic-abnormalcy/ontological-incompleteness-of-reference-of-thought is ‘construed as a constructed-deficiency of the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ relative ontological-normalcy/ontological-completeness-of-reference-of-thought perspective’, and the former can only be subsumed/implied/construed-as-non-contradictory to the latter. Such a basic conception of comparative axiomatic-constructs in their reflection of the very same totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality highlights that ontologically-veridical meaningfulness is a construction or derived-construction as of inherent intrinsic-reality/ontological-veridicality or the closest axiomatic-construct approximation to it; the insight here being that ‘relative completeness/profoundness of axiomatic-construct/reference-of-thought with respect to intrinsic-reality/ontological-veridicality’ is what is ontologically preeminent/critical for the notional perspective of ontological construal/conceptualisation.

This is equally relevant with regards to the ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ which refers to the transcendental-enabling/existence-potency conceptual framework that sets up the apriorising/intelligibilitysetup/measuringinstrument/axiomatising for a registry-worldview’s/dimension’s reference-of-thought construction possibilities of derived axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue as of existential-instantiations’, on the same unchanging intrinsic-reality/ontological-veridicality construed/conceptualised by all registry-worldviews/dimensions, but generating with human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination successive more and more relatively profound/complete registry-worldviews/dimensions reference-of-thought constructions of derived axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue; with the ⟨given consciousness’s neuterising-induced-or-referentialism-induced⟩-reference-of-thought—devolving-teleological-structure-of-meaningfulness as of its intradimensional existential-instantiations derived axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue as the registry-worldview’s/dimension’s reference-of-thought ‘abstract teleological-structure/teleological-possibilities’. For instance, all subsequent axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue of the recurrent-utter-uninstitutionalisation registry-worldview/dimension are possible only by its ⟨trepidatious-consciousness neuterising-

induced)-reference-of-thought—devolving-teleological-structure-of-meaningfulness which is non-rules-as-impulsive-or-accidental-or-random-mental-disposition as this basically defines the possibility of institutionalisation within recurrent-utter-uninstitutionalisation as inherently non-existent. Likewise it is the habituated rulemaking-over-non-rules as of ontological-faith-notion-or-ontological-fideism for the prospective institutionalisation of base-institutionalisation that is the (warped-consciousness neutering-induced)-reference-of-thought—devolving-teleological-structure-of-meaningfulness for enabling intradimensional existential-instantiations derived axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue of base-institutionalisation. This insight extends to all successive registry-worldviews/dimensions institutionalisations in construing their teleological-structure/teleological-possibilities. This equally explains the divergence of individuals and societies ontological-performance-including-virtue-as-ontology across registry-worldviews/dimensions even though all humans have the same basic intellectual potential; as within the institutionalisation limits of a registry-worldview's/dimension's 'reference-of-thought—devolving-teleological-structure-of-meaningfulness' as its underlying reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising, individuals cannot all of a sudden start thinking in terms-as-of-axiomatic-construct enabled by a prospective registry-worldview's/dimension's institutionalisation 'reference-of-thought—devolving-teleological-structure-of-meaningfulness'; given that there is a need for the requisite institutional-cumulation/institutional-recomposuring as of successive psychoanalytic-unshackling/memetic-reordering/institutional-recomposuring underlying the transcendences of the institutionalisation process. The fact is that all meaningfulness-and-teleology ontological-performances, whether teleologically-degraded or teleologically-elevated, implied as of within a given reference-of-thought are necessarily in 'ontological-contiguity',

construed as of a ‘difference-in-kind/notional-contiguity-or-epistemic-contiguity/difference-
 in-aposteriorising-or-logicising’ of the same totalising/circumscribing/delineating reference-
 of-thought-devolving. Such that a registry-worldview/dimension reference-of-thought
 associated postlogism-slantedness manifestation, which is inevitably being instigated as
 postlogism denaturing wooden-language—of-temporal—mere-
 form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the
 implied categorical-imperatives/axioms/registry-teleology of its meaningfulness-and-
 teleology, as well as the temporal manifestations of the registry-worldview/dimension
 including conjugated-postlogism, is inevitably in ‘notional contiguity’ with all other
 meaningfulness-and-teleology of that registry-worldview/dimension reference-of-thought
 since there are all grounded either in a ‘conscious-madeupness as teleologically-degraded’ or
 ‘naïve-conviction as flawed supposedly teleologically-elevated’ relationship with the
 same/common/shared categorical-imperatives/axioms/registry-teleology. Such ‘notional
 contiguity’ is implied by the fact that a reference-of-thought is a
 ‘totalising/circumscribing/delineating meaningfulness-and-teleology implied as of the
 same/common/shared categorical-imperatives/axioms/registry-teleology and with all its
 meaningfulness-and-teleology ontological-performances, given its prior relative-ontological-
 incompleteness-of-reference-of-thought as of its
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of existential-
 contextualising-contiguity-in-dereification, being mutually cognisant-and-integrative by
 ‘conscious-madeupness as teleologically-degraded’ or ‘naïve-conviction as flawed
 supposedly teleologically-elevated’ relationship with the same/common/shared categorical-
 imperatives/axioms/registry-teleology. In this regard, a non-positivistic as ‘a superstitious
 centred-totalising/circumscribing/delineating meaningfulness-and-teleology implied as of the
 same/common/shared categorical-imperatives/axioms/registry-teleology as associated with

say a medieval or animistic social-setup implies that a postlogism-slantedness, conjugated-postlogism or any other temporal mental-disposition with regards to say with notions-and-accusations-of-sorcery will meet with a mental-reflex across the registry-worldview/dimension totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context that is cognisant-and-integrative as of its apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of existential-contextualising-contiguity dereification in ‘notional contiguity’, as in its questioning and analysing whether the accusation of sorcery is true and so as an assumed/presupposed-as-of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising

‘totalising/circumscribing/delineating meaningfulness-and-teleology implied as of the same/common/shared categorical-imperatives/axioms/registry-teleology as of the overall reference-of-thought underlying totalising/circumscribing/delineating belief in superstition, and so beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. Such a construal equally applies to our positivism–procrpticism associated manifestation of disjointedness-as-of-reference-of-thought associated with a postlogism-slantedness, conjugated-postlogism or any other temporal mental-disposition instigation wherein our underlying procrpticism/disjointedness-as-of-reference-of-thought mental-disposition is a ‘notional contiguity’ of the positivism–procrpticism totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context ontological-performances as of ‘conscious-madeupness as teleologically-degraded’ or ‘naïve-conviction as flawed supposedly teleologically-elevated’ relationship with its centred-totalising/circumscribing/delineating meaningfulness-and-teleology implied as of the same/common/shared categorical-imperatives/axioms/registry-teleology. This explains why it is structurally/paradigmatically impossible for either such a non-positivistic social-setup or our procrpticism social-setup to resolve the vices-and-impediments associated with the

corresponding reference-of-thought centred-totalising/circumscribing/delineating
 meaningfulness-and-teleology implied as of the same/common/shared categorical-
 imperatives/axioms/registry-teleology, as it is in circular totalising–self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag as of its
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising centred-totalisation
 grounding; thus explaining the endemisation and enculturation of the associated vices-and-
 impediments. Rather than a ‘difference-in-kind’ implied as of ‘notional-contiguity’, it is
 rather a ‘difference-in-nature’ as of an ‘epistemic-break or notional-discontiguity/epistemic-
 discontiguity’ as of the prospective relative-ontological-completeness of the prospective
 reference-of-thought ‘totalising/circumscribing/delineating meaningfulness-and-teleology
 implied different and relatively-more-profound-and-complete categorical-
 imperatives/axioms/registry-teleology which is non-cognisant and non-integrative and ‘not in
 notional contiguity’ with the prior registry-worldview’s/dimension’s reference-of-thought
 ‘totalising/circumscribing/delineating meaningfulness-and-teleology implied as of the
 same/common/shared categorical-imperatives/axioms/registry-teleology that can induce the
 ‘ontological break’ that is able to de-endemise and de-enculturate as of
 aetiologisation/ontological-escalation the given registry-worldview/dimension vices-and-
 impediments cross-generationally. With a ‘difference-in-nature/notional-discontiguity-or-
 epistemic-discontiguity/difference-in-apriorising-or-axiomatising’ construal there is a double-
 gesture of reification as of implying more critically the inappropriateness of the centred-
 totalisation/reference-of-thought as of its underlying meaningfulness-and-teleology implied
 same/common/shared categorical-imperatives/axioms/registry-teleology, which then
 inherently points to the inappropriateness of logical-processing-or-logical-implication on the
 basis of the centred-totalisation/reference-of-thought and hence implying that there can’t be
 any dialogical-equivalency. Such that from a positivistic perspective, an argument in a non-

positivistic social-setup of the type one may be accused of sorcery is construed as ridiculous since it is in 'notional contiguity', with its apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of existential-contextualising-contiguity-in-dereification cognisant-and-integrative with a non-positivistic superstitious meaningfulness-and-teleology centred-totalisation/reference-of-thought, and that itself is perceived as of 'aetiological concern' as to the possibility of an apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of existential-contextualising-contiguity-in-dereification mental-disposition that can be cognisant-and-integrative in 'notional contiguity' with numerous existential circumstances reflecting the endemising/enculturating of non-positivistic superstition and its vices-and-impediments. The same applies from a deprocrpticism perspective with regards to a procrpticism/disjointedness-as-of-reference-of-thought mental disposition as an argument seeming to articulate meaningfulness-and-teleology in the same disjointedness-as-of-reference-of-thought terms-as-axiomatic-construct by which the procrpticism/disjointedness-as-of-reference-of-thought arises in the first place is in circular totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as of the same centred-totalisation/reference-of-thought defect. Thus it is ontologically impossible to address any given registry-worldview/dimension vices-and-impediments as of that fundamental totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context centred-totalisation, besides at best palliative constructs of a non-universal nature, as not of an aetiologisation/ontological-escalation nature. Thus further validating the idea that it is a cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure in second-naturing such a prospective institutionalisation 'reference-of-thought—devolving-teleological-structure-of-meaningfulness' that enables such a transformation whether from a retrospective or prospective transcendence perspective. This

explains ontological-normalcy/post-convergence referentialism as construing/conceptualising the most profound/complete ontologically-veridical ‘reference-of-thought construction of meaningfulness-and-teleology’, as of the succession of registry-worldviews/dimensions from the notional-deprocrypticism perspective construal/conceptualisation, as being ‘the most profound/complete ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ grasp of intrinsic-reality/ontological-veridicality’ among all the registry-worldviews/dimensions as of its pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules. Furthermore, within a registry-worldview/dimension for the disambiguation of temporal-and-intemporal mental-dispositions, its reference-of-thought of meaningfulness-and-teleology as its apriorising/intelligibilitysetup/measuringinstrument/axiomatising is its ⟨given consciousness’s neuterising-induced-or-referentialism-induced⟩ as reference-of-thought—devolving-teleological-structure-of-meaningfulness, which by way of a différance/internal-dialectics/difference-deferral articulates the intradimensional relative ontological-veracity of all other intradimensional existential-instantiations derived axiomatic-constructs of meaningfulness-and-teleology as its intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue. Thus this is within the framework of the registry-worldview’s/dimension’s teleological-structure/teleological-possibilities; construed either in elevation-as-of-upholding-ontological-veridicality/institutionalisation as reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ of the affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking of prospective relative-ontological-completeness-of-reference-of-thought, or in degradation-as-of-failing-ontological-

veridicality/uninstitutionalised-threshold as of the unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing of prior relative-ontological-incompleteness-of-reference-of-thought; noting that the dialectical nature of the elevation and degradation so implied are inherently affirmed/unaffirmed respectively as of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, wherein prospective relative-ontological-completeness-of-reference-of-thought elevation/institutionalisation is in soundness-or-authenticity-of-reference-of-thought and prior relative-ontological-incompleteness-of-reference-of-thought degradation/uninstitutionalised-threshold is in unsoundness-or-inauthenticity-of-reference-of-thought. Furthermore, metaphysics-of-absence insight as of ontological-aesthetic-tracing reveals and attends to the notional-deprocrypticism ‘perspective issue’ involved for ‘overcoming defect of ontological analysis arising from metaphysics-of-presence totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag’ due to a mental-reflex of representing/skewing-the-representation of presence with respect to its reference-of-thought as of flawed ‘totalising/circumscribing/delineating apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-thought—devolving-teleological-structure-of-meaningfulness’ at the uninstitutionalised-threshold, wrongly construed as rather being in elevation/institutionalisation and thus wrongly reflected as of ‘soundness-or-authenticity-of-reference-of-thought’ rather than being veridically construed in degradation/uninstitutionalised-threshold and thus reflected as of ‘unsoundness-or-inauthenticity-of-reference-of-thought’; and so, when it comes to construing the ontological-veridicality of both elevation/institutionalisation and degradation/uninstitutionalised-threshold as of their respectively ‘relevant apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-

thought—devolving-teleological-structure-of-meaningfulness’, and so with regards to the-
 very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-
 reality/ontological-veridicality which as of underlying relative-ontological-
 incompleteness/relative-ontological-completeness is at the one hand elevated/institutionalised
 and on the other hand degraded/uninstitutionalised, as of human deeper or shallow limited-
 mentation-capacity. Such ontological-aesthetic-tracing as of its notional-conflatedness as it
 implies the conflatedness of the most ‘sound/profound/complete
 anticipation/projection/thrownness-disposition as rather of elevation-as-of-prospective-
 institutionalisation—and-degradation-as-of-uninstitutionalised-threshold-paradigmatic-level-
 of-contrastive-devolving-analysis as of their respective reference-of-thought—elevated-
 devolving-as-of-prospective-institutionalisation and reference-of-thought—degraded-
 devolving-as-of-uninstitutionalised-threshold’ brings out in
 anticipation/projection/thrownness-disposition the overall fundamental elucidative contrast
 between the ‘degradation/uninstitutionalised-threshold unsoundness-or-inauthenticity-of-
 reference-of-thought projection’ and the ‘elevation/institutionalisation soundness-or-
 authenticity-of-reference-of-thought projection’ at their respective reference-of-thought-
 devolving-level of analysis; as can be elucidated contrastively between ‘recurrent-utter-
 uninstitutionalisation uninstitutionalisation and base-institutionalisation institutionalisation’,
 ‘base-institutionalisation—ununiversalisation uninstitutionalisation and universalisation
 institutionalisation’, ‘universalisation—non-positivism/medievalism uninstitutionalisation and
 positivism institutionalisation’ and prospectively ‘positivism—procrypticism
 uninstitutionalisation and deprocrypticism institutionalisation’. The implication here is that
 with say notions-and-accusations-of-sorcery in a universalisation—non-
 positivism/medievalism uninstitutionalisation social-setup, in order to construe ontological-
 veridicality; as of conflatedness we can’t simply imply the presence universalisationnon—non-

positivism/medievalism uninstitutionalisation reference-of-thought—devolving-teleological-structure-of-meaningfulness as the basis of instigating logical-duedness for elucidation and thereof construing ontologically-veridical meaningfulness-and-teleology, as such a mental-reflex representing/skewing-the-representation of the presence as universalisationnon–non-positivism/medievalism uninstitutionalisation will overlook the presence uninstitutionalised-threshold and wrongly represent its meaningfulness-and-teleology at its uninstitutionalised-threshold as of elevation/institutionalisation in soundness-or-authenticity-of-reference-of-thought projection’. It is rather the conflatedness projective/anticipative contrast between the said uninstitutionalised-threshold/uninstitutionalised-threshold however the mental-reflex complex of presence and the prospective positivism institutionalisation however the mental-reflex complex of the latter’s abstractness as from the presence uninstitutionalised-threshold perspective that enables their respective reference-of-thought—devolving-teleological-structure-of-meaningfulness contrastive fundamental elucidations in grasping ontological-veridicality as of their respective prior relative-ontological-incompleteness-and-completeness-of-reference-of-thought perspective. Thus it is the ‘anticipation/projection/throwness-disposition of overall fundamental elucidative contrast’ between prior degradation/uninstitutionalised-threshold and prospective elevation/institutionalisation respectively implied reference-of-thought—devolving-teleological-structure-of-meaningfulness so-construed on the basis of ‘conflatedness as of the most ‘sound/profound/complete anticipation/projection’ relative to existence’s imbricatedness/threadedness/recomposuring existential-instantiations, which is at reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’-paradigmatic-level-of-contrastive-devolving-analysis as-of-the-contrast-of-elevation-as-of-prospective-institutionalisation—and-degradation-as-of-uninstitutionalised-threshold that is more profoundly elucidative of existential-instantiations issues of

perversion-and-derived-perversion-of-reference-of-thought whether with regards to notions-and-accusations-of-sorcery in non-positivism or psychopathy and social psychopathy as of our procrypticism/disjointedness-as-of-reference-of-thought or generally issues arising as of being/existential/ontological/axiomatic-construct problem of perversion-and-derived-perversion-of-reference-of-thought-as-of-human-limited-mentation-capacity-induced-temporal-to-intemporal-Binarity-of-categorical-imperatives/axioms/registry-teleology speaking of prior relative-ontological-incompleteness-of-reference-of-thought; in other words, with respect to the elucidation of existential-instantiations issues, beyond just issues of logical-processing-or-logical-implication as of logical coherence, we need to move at the totalising/circumscribing/delineating level of analysis which is the reference-of-thought and then construe meaningfulness-and-teleology as of contrastive elevation/institutionalisation reference-of-thought—elevated-devolving-as-of-prospective-institutionalisation’ and degradation/uninstitutionalised-threshold ‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’. That is, meaningfulness-and-teleology cannot be registered as of the degradation/uninstitutionalised-threshold but rather the elevation/institutionalisation as of its prospective relative-ontological-completeness-of-reference-of-thought with respect to the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality with the implication that meaningfulness-and-teleology lies-with-and-is wholly as of elevation/institutionalisation reference-of-thought—elevated-devolving-as-of-prospective-institutionalisation’. Insightfully, ontological-aesthetic-tracing as of notional-conflatedness/constitutedness-to-conflatedness points out that as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality: it is rather and critically more apt to ‘articulate organically as of ontological-faith-notion-or-ontological-fideism’ the transcendental construct of prospective base-institutionalisation institutionalisation while in recurrent-utter-

uninstitutionalisation 'doing so by failing the wooden-language—of-temporal—mere-
 form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of
 positivism—procrypticism categorical-imperatives/axioms/registry-teleology in de-
 emphasising non-conviction and emphasising the conviction essence of prospective relative-
 ontological-completeness meaningfulness-and-teleology as of existential-contextualising-
 contiguity knowledge-reification'; such that essence is actually as of ontological-faith-notion-
 or-ontological-fideism. This reflects ontological-aesthetic-tracing as of its notional-
 conflatedness nature of ontological-performance as anti-nihilistically grounded on
 ontological-faith-notion-or-ontological-fideism as enabled by maximalising-recomposuring-
 for-relative-ontological-completeness/transvaluating. It points out that ontologically-veridical
 meaningfulness cannot be construed beyond-the-consciousness-awareness-teleology-in-
 existential-extirpation-as-of-existential-unthought as of a soulless nihilistic-teleology-for-the-
 attainment-of-temporality/human-mortal-whims as it simply brings an end to the
 transcendental potential for the human existential tale perpetuation; as the organic-knowledge
 behind the 'invention' of prospective institutionalisation necessarily has to take precedence in
 further driving the institutionalisation process over a conceptualisation as of denaturing of
 categorical-imperatives/axioms/registry-teleology. Such an approach to transcendence is
 exactly what validates transcendental knowledge as of a psychoanalytic-unshackling
 commitment and not a grounded knowledge-construct commitment; as an approach as of
 grounded knowledge-construct commitment that merely implies transcendence as being
 incremental to the prior registry-worldview's/dimension's reference-of-thought doesn't
 undermine/unshackle that prior reference-of-thought with respect to the-very-same-
 totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-
 veridicality as of the requisite undermining/unshackling by the prospective enlightenment of
 the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-

reality/ontological-veridicality by the prospective registry-worldview's/dimension's
 reference-of-thought ontological-performance given its prospective relative-ontological-
 completeness-of-reference-of-thought. Rather implying a grounded knowledge-construct
 commitment merely 'circularly-complexifies' the uninstitutionalised-
 threshold/uninstitutionalised-threshold reference-of-thought as it adopts by mental-reflex an
 incrementalism-in-relative-ontological-incompleteness mental-disposition rather than a
 maximalising-recomposuring-for-relative-ontological-completeness/transvaluating mental-
 disposition and thus fails to fulfil the requisite totalising–renewing-realisation/re-
 perception/re-thought registering-of-its-reference-of-thought-rather-as-dementing-and-
 decentered-to-prior-institutionalisation's-categorical-imperatives/axioms/registry-teleology
 and its alienation—as-inauthentic/poorly-objectified/poorly-desubjectified-as-
 objectified/ontological-bad-faith/nihilistic as of ontological-dementation/dialectical-
 dementation stranding dialectics, which is what allows for transcendence to the prospective
 reference-of-thought for renewal; that is, this will rather bring about the totalising–self-
 referencing-syncretising/circularity/interiorising/akrasiatic-drag of the prior reference-of-
 thought in 'incremental circular-complexification' and so beyond-the-consciousness-
 awareness-teleology-in-existential-extirpation-as-of-existential-unthought on a false notion of
 'an intemporal temporality', naively passing for intemporality as of intersubjective eliciting
 of temporality. Such notional-conflatedness for ontological-performance implication is easily
 understood as of metaphysics-of-absence when we grasp that a mindset as of a non-
 positivistic social-setup needs to 'wean off organically beyond mere mechanical adjustments'
 its non-positivism before the notion of 'a credible logical engagement in terms-as-of-
 axiomatic-construct of positivism/rational-empiricism with a mindset as of a positivistic
 social-setup' can be genuinely entertained. In this regard, the budding positivists had to
 implied an utter break with medieval-scholasticism-pedants—ideal-type-or-individuation to

avoid the circular problem of their positivism knowledge and science being interpreted in mystical and alchemic terms-as-axiomatic-construct of reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology. Such a psychoanalytic-unshackling commitment equally highlights that the idea of a common universal human potential available to all individuals while true is not inherently existentially fulfilled/valorised if that human-subpotency is not effectively to-the-best-of-our-temporal/mortal-superseding-endeavouring unleashed as of a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating totalising–renewing-realisation/re-perception/re-thought. This conceptualisation insight points out that prospective procrypticism/disjointedness-as-of-reference-of-thought uninstitutionalisation associated with our positivism–procrypticism registry-worldview/dimension as of its relative epistemic-abnormalcy/ontological-incompleteness-of-reference-of-thought is effectively the defective result of our positivism institutionalisation ontological-structuring-constitutedness as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity of categorical-imperatives/axioms/registry-teleology at the positivism–procrypticism uninstitutionalisation, wherein the prospective ‘procrypticism uninstitutionalisation’ arises as wooden-language—of-temporal-mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the registry-worldview’s/dimension’s ‘positivism institutionalisation’ categorical-imperatives/axioms/registry-teleology, which then effectively generates the virtuality-or-ontologically-flawed-construal of procrypticism/disjointedness-as-of-reference-of-thought uninstitutionalisation construed as perversion-and-derived-perversion-of-reference-of-thought of our positivism–procrypticism registry-worldview/dimension. It should be noted that, the ontologically-veridical reflection of procrypticism/disjointedness-as-of-reference-of-thought

is rather construed from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism registry-worldview/dimension perspective as ‘a constructed-deficiency of the profound/complete deprocrypticism perspective’, with deprocrypticism in relative ontological-normalcy/ontological-completeness-of-reference-of-thought of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality as procrypticism which is in epistemic-abnormalcy/ontological-incompleteness-of-reference-of-thought of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality; and the ontological-veridicality of deprocrypticism itself construed as a totalising–renewing-realisation/re-perception/re-thought of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating driven by ontological-faith-notion-or-ontological-fideism. This explains why our positivism–procrypticism so-construed from a deprocrypticism perspective will be decentered and demented, just as our positivism in relative ontological-normalcy/ontological-completeness-of-reference-of-thought construal of non-positivism/medievalism reference-of-thought in relative epistemic-abnormalcy/ontological-incompleteness-of-reference-of-thought show the latter to be decentered and dementing. As a further elaboration, the circularity and totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag mental-disposition attached to a registry-worldview’s/dimension’s reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising is fundamentally grounded on its teleological-structure/teleological-possibilities established as of its (given consciousness’s neuterising-induced-or-referentialism-induced)-reference-of-thought—devolving-teleological-structure-of-meaningfulness as intradimensional existential-instantiations derived axiomatic-constructs of meaningfulness-and-teleology as its

intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue. It is only a cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure in the medium to long-term that can transcendently ‘wean off’ from such a teleological-structure/teleological-possibilities of a registry-worldview/dimension by habituating a prospective institutionalisation as of its (given consciousness’s neuterising-induced-or-referentialism-induced)-reference-of-thought—devolving-teleological-structure-of-meaningfulness as intradimensional existential-instantiations derived axiomatic-constructs of meaningfulness-and-teleology as its intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue. This explains as of metaphysics-of-absence why for instance the mere demonstration to approval/acquiescence of positivistic principles/interpretations of intrinsic-reality/ontological-veridicality in a non-positivistic as animistic social-setup or medieval social-setup however frequent the demonstrations within a given limited period of time doesn’t mean that the social-setup has been transformed into a positivistic social-setup; since their existentially habituated state of animism or medievalism teleological-structure/teleological-possibilities as of (warped-or-preclusive-consciousness neuterising-induced)-reference-of-thought—devolving-teleological-structure-of-meaningfulness as intradimensional existential-instantiations derived axiomatic-constructs of meaningfulness-and-teleology as its intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue, will need to be undone/unshackled psychoanalytically in the medium to long-run to veridically achieve positivism; given that that uninstitutionalised-threshold is in a state of circular-pervasiveness-of-‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’! This equally explains the totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag inherent in our prospective

procrypticism/disjointedness-as-of-reference-of-thought uninstitutionalisation, together with its inherent manifestations of psychopathic postlogism-slantedness and social psychopathy conjugated-postlogism, when construed from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism as pre-empting-disjointedness-as-of-reference-of-thought institutionalisation as in our metaphysics-of-presence beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought we systematically override the ontological-veridicality implications of such procrypticism/disjointedness-as-of-reference-of-thought and proceed by mental-reflex to uphold our procrypticism/disjointedness-as-of-reference-of-thought closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications at this positivism–procrypticism uninstitutionalisation as of an existentially nihilistic mental-disposition in degeneration of the human existential tale; as all presencing by mental-reflex keep on representing their uninstitutionalised-threshold as institutionalised, that is as ‘centered and dialectically-thinking’, as a ‘delusion of an always institutionalised presencing as of its reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ rather than being veridically ‘decentered and dementing’ at the uninstitutionalised-threshold as of ‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’, as logical-dueness doesn’t even arise in the very first place given perversion-and-derived-perversion-of-reference-of-thought as of unsoundness-or-inauthenticity-of-reference-of-thought. We can get a projected sense of this as of metaphysics-of-absence in that despite the articulation of positivistic principles/interpretations in the animistic social-setup or medieval social-setup, in the short to medium run individuals will keep on overriding and ignoring such positivistic meaningfulness-and-teleology nihilistically, notwithstanding that we may recognise this as of

prospective relative-ontological-completeness-of-reference-of-thought, and falling back to construe/conceptualise meaningfulness-and-teleology in non-positivistic animistic or medieval terms-as-of-axiomatic-construct, construed from the positivistic perspective as perversion-and-derived-perversion-of-reference-of-thought as of unsoundness-or-inauthenticity-of-reference-of-thought. As broadly speaking, a registry-worldview's/dimension's reference-of-thought is as of 'an existentially committed madeupness/bottomline of reference-of-thought' of the teleological-structure/teleological-possibilities, established as of its {given consciousness's neuterising-induced-or-referentialism-induced}-reference-of-thought—devolving-teleological-structure-of-meaningfulness as intradimensional existential-instantiations derived axiomatic-constructs of meaningfulness-and-teleology as its intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue; and it is nevertheless so made-up/bottomlined nihilistically, notwithstanding a prospective registry-worldview's/dimension's reference-of-thought that points prospectively to its relative ontological-deficiency/epistemic-abnormalcy/ontological-incompleteness-of-reference-of-thought, as it is in the bigger picture structurally/paradigmatically 'a lifetime mental and existential investment as of the specific prior relative-ontological-incompleteness-of-reference-of-thought beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought meaningfulness-and-teleology' that will not lightly give up on 'its invested specific prior relative-ontological-incompleteness-of-reference-of-thought of meaningfulness-and-teleology as a closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications' despite the ontological-veridicality of a valid anti-nihilistic intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm opened-

construct-of-meaningfulness-and-teleology enabling the human existential tale as of the successive transcendences behind the institutionalisation process notwithstanding that its very own institutionalisation arose out of that anti-nihilistic process, and at the more immediate social-stake-contention-or-confliction level involves temporal concatenation to intemporality as denaturing of the prior institutionalisation's categorical-imperatives/axioms/registry-teleology by their elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity, and so as of postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of 'reference-of-thought-devolving-level difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism reflected as the divergent ontological-performances of the ontological-aesthetic-tracing', due to lack of constraining social universal-transparency at its uninstitutionalised-threshold. Such a madeupness/bottomline being rather as of a temporal extirpatory paradigm and that naively considers the mutual intersubjective eliciting of temporal extirpatory paradigms to be intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm, given a failure to structurally/paradigmatically grasp intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency implications, and rather confusing this with social-aggregation-enabling implications. This is clearly made obvious when 'the very same motif of reasoning' is construed as of metaphysics-of-absence implications say with respect to an animistic or medieval non-positivistic registry-worldview's/dimension's reference-of-thought madeupness/bottomline of reference-of-thought closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-

implications rather in social-aggregation-enabling, implying no possibility for prospective transcendence so-construed from a positivistic perspective of analysis in relative ontological-normalcy/ontological-completeness-of-reference-of-thought. This further points out that, as herein implied with futural Being-development/ontological-framework-expansion as of prospective deprocrypticism as pre-empting-disjointedness-as-of-reference-of-thought, ‘originary/event-of-prospective-ontology-origination transcendental knowledge conceptualisations’ as putting into question a prior registry-worldview’s/dimension’s reference-of-thought teleological-structure/teleological-possibilities, reconceptualised-rather-as-of-prior-relative-ontological-incompleteness-of-reference-of-thought, established as of its ⟨given consciousness’s neuterising-induced⟩-reference-of-thought—devolving-teleological-structure-of-meaningfulness as intradimensional existential-instantiations derived axiomatic-constructs of meaningfulness-and-teleology as its intradimensional knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue, are rather as of ‘a psychoanalytic-unshackling commitment’ and not as of ‘a grounded knowledge construct commitment’. Inherently, such ‘a psychoanalytic-unshackling commitment’ inevitably and fundamentally puts into question the axioms and underlying supposedly transcendental-enabling/existence-potency notion as of the ⟨given consciousness’s neuterising-induced⟩-reference-of-thought—devolving-teleological-structure-of-meaningfulness of the prior registry-worldview’s/dimension’s reference-of-thought of meaningfulness-and-teleology which establishes its ‘grounded knowledge construct’, and so because of its denaturing of the prior institutionalisation’s categorical-imperatives/axioms/registry-teleology by way of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity at the registry-worldview’s/dimension’s uninstitutionalised-threshold inducing prior relative-ontological-incompleteness-of-reference-of-thought in need

for prospective relative-ontological-completeness-of-reference-of-thought, and so as a transitional construct that is in effect as of a psychoanalytic-unshackling/memetic-reordering/institutional-recomposure articulation by its cross-generational transcendental implications projection. Such that such ‘a psychoanalytic-unshackling commitment’ cannot be construed in the same terms-as-of-axiomatic-construct as ordinary intradimensional knowledge as of the established prior institutionalisation teleological-structure/teleological-possibilities for its ‘grounded knowledge construct’ as prior relative-ontological-incompleteness-of-reference-of-thought, but rather construed as of prospective relative ontological-normalcy/ontological-completeness-of-reference-of-thought it more critically and organically points to the uninstitutionalised-threshold state of the present registry-worldview’s/dimension’s reference-of-thought at its uninstitutionalised-threshold with respect to the prospective institutionalisation state of the prospective registry-worldview’s/dimension’s reference-of-thought as of its prospective relative-ontological-completeness-of-reference-of-thought, and thus rather implies an ontological-dementation/dialectical-dementation stranding dialectics. It is psychoanalytic-unshackling commitment and not grounded knowledge construct commitment, because it is for instance about articulating ‘prospective positivism axiomatic-construct ⟨occlusive-consciousness neuterising-induced⟩-reference-of-thought—devolving-teleological-structure-of-meaningfulness’ with respect to a relatively underdeveloped registry-worldview/dimension in prior ‘non-positivism axiomatic-construct ⟨warped-or-preclusive-consciousness neuterising-induced⟩-reference-of-thought—devolving-teleological-structure-of-meaningfulness’, or in the case of articulating ‘futural Being-development/ontological-framework-expansion as of prospective deprocrypticism axiomatic-construct ⟨protensive-consciousness referentialism-induced⟩-reference-of-thought—devolving-teleological-structure-of-meaningfulness’ with respect to a relatively underdeveloped registry-worldview/dimension in prior ‘positivism—

procrypticism axiomatic-construct {occlusive-consciousness neuterising-induced}-reference-
 of-thought—devolving-teleological-structure-of-meaningfulness. It is important to grasp in
 both instances that such psychoanalytic-unshackling commitment implications are not to be
 understood respectively as of the uninstitutionalised-threshold mental-dispositions of non-
 positivism/medievalism or procrypticism reference-of-thought—devolving-teleological-
 structure-of-meaningfulness which will just induce their totalising—self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag mental-dispositions for non-
 transcendence, but rather as of a habituated mental-projection perspective from the
 prospective institutionalisations of positivism or deprocrypticism reference-of-thought—
 devolving-teleological-structure-of-meaningfulness. Thus counterintuitively to metaphysics-
 of-presence conception, human living-development, human institutional-development and
 human Being-development/ontological-framework-expansion as ‘banally’ portrayed
 historically is not as of an expanding ‘grounded knowledge construct’ from time immemorial
 as of a wrong incrementalism-in-relative-ontological-incompleteness mental-reflex as if
 humans have had only one ‘totalising/circumscribing/delineating
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-
 thought—devolving-teleological-structure-of-meaningfulness’. But actually the underlying
 process is one of ‘a psychoanalytic-unshackling as of a succession of prospective
 institutionalisations maximalising-recomposuring-for-relative-ontological-
 completeness/transvaluating construed from a succession of
 ‘totalising/circumscribing/delineating
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-
 thought—devolving-teleological-structure-of-meaningfulness’ so implied by an ontology-
 driven ‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural
 psychology-of-dynamics’ enabling successive prospective relative-ontological-completeness-

of-reference-of-thought/ontological-normalcy with respect to human notional deepening limited-mentation-capacity as of institutional-cumulation; such that counterintuitive to what we might be inclined to think, the development of human psychology is not as of ‘a grounded construction that simply varies incrementally across all times’, but rather ‘a construction which teleological-structure/teleological-possibilities/teleological-potency are sharply rearticulated in succession of institutionalisations as of ontological conflatedness’, and this is important ‘to avoid unduly considering our whole psychical-nature-and-potential as of our present positivistic institutionalisation mindset/consciousness as of metaphysics-of-presence’, but rather grasp that there are teleological-structure/teleological-possibilities/teleological-potency of our mental-projection and mental-disposition as of deprocrpticism/disjointedness-as-of-reference-of-thought

‘totalising/circumscribing/delineating

apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-thought—devolving-teleological-structure-of-meaningfulness’ beyond just what we can imagine as of our presence as positivism—procrpticism. This analysis brings out what is effectively meaningfulness as it shows that meaningfulness is more completely about apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights thus involving the ‘totalising/circumscribing/delineating apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-thought—devolving-teleological-structure-of-meaningfulness’ as of the prospective relative-ontological-completeness-of-reference-of-thought of the ⟨given consciousness’s neuterising-induced-or-referentialism-induced⟩-reference-of-thought—devolving-teleological-structure-of-meaningfulness and then ‘operant-or-incidenting-predicative-insights or logical-coherence’ for effectively articulating their meaningfulness as of instantiative-context or existential-instantiations with respect to existence-as-the-absolute-a-priori

imbricatedness/threadedness/recomposuring ; and these are the two underlying commitments that make-up meaningfulness. Within an institutionalisation framework the placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology is utterly geared in a totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of meaningfulness-and-teleology as of ‘operant-or-incidenting-predicative-insights or logical-coherence’ and beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought by mental-reflex presupposes-and-assumes the ontological absoluteness/indubitability of its ‘totalising/circumscribing/delineating apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-thought—devolving-teleological-structure-of-meaningfulness’, and wrongly so even at its uninstitutionalised-threshold; such that it is only cross-generationally that it can attend effectively as of its transcendence to the reality of temporal denaturing of the said institutionalisation’s categorical-imperatives/axioms/registry-teleology at its uninstitutionalised-threshold by elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity, pointing to its perversion-and-derived-perversion-of-reference-of-thought, and thus the need for totalising–renewing-realisation/re-perception/re-thought as of psychoanalytic-unshackling/memetic-reordering/institutional-recomposure, involving maximalising-recomposuring-for-relative-ontological-completeness/transvaluating, with respect to the implications of its ontologically deficient ‘totalising/circumscribing/delineating apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-thought—devolving-teleological-structure-of-meaningfulness’. Thus a transcendental engagement as articulating prospective relative-ontological-completeness-of-reference-of-thought in an opened-construct-of-meaningfulness-and-teleology strives to go beyond a prior institutionalisation closed-construct-of-meaningfulness-and-teleology-as-of-

‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications at its
 uninstitutionalised-threshold, which simply triggers ‘operant-or-incidenting-predicative-
 insights or logical-coherence’ on the basis of the priorly set/established
 ‘totalising/circumscribing/delineating
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-
 thought—devolving-teleological-structure-of-meaningfulness’ taken for granted without
 questioning as of intradimensional grounded meaningfulness-and-teleology at its
 uninstitutionalised-threshold. Such a transcendental engagement recurrently put into question
 in conflatedness the prior institutionalisation ‘totalising/circumscribing/delineating
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-
 thought—devolving-teleological-structure-of-meaningfulness’ at its uninstitutionalised-
 threshold by substituting it with the prospective institutionalisation
 ‘totalising/circumscribing/delineating
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-
 thought—devolving-teleological-structure-of-meaningfulness’ as of its prospective relative-
 ontological-completeness-of-reference-of-thought, before effecting any ‘operant-or-
 incidenting-predicative-insights or logical-coherence’ for prospective institutionalisation
 meaningfulness-and-teleology, and this explains its reference-of-thought—categorical-
 imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-
 meaningfulness-and-teleology; while on the other hand the grounded uninstitutionalised-
 threshold recurrently overrides as of constitutedness beyond-the-consciousness-awareness-
 teleology-in-existential-extirpation-as-of-existential-unthought any notion of its ontologically
 deficient ‘totalising/circumscribing/delineating
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of reference-of-
 thought—devolving-teleological-structure-of-meaningfulness’ at its uninstitutionalised-

threshold and just triggers ‘operant-or-incidenting-predicative-insights or logical-coherence’ on that basis for its intradimensional grounded meaningfulness-and-teleology, and this explains its ‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’, and explaining why transcendence fully occurs as of a cross-generational habituation process. Remarkably, such a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating behind the institutionalisation process enabling the human existential tale in successive institutional-cumulations is always rather perceived intradimensionally as an exceptional-askance and unordinary. For instance, the maximalising-recomposuring-for-relative-ontological-completeness/transvaluating mental-disposition in their own times advocating the end of such perverse human institutions like serfdom and slavery were construed in their own times by their dominant societies as of exceptional-askance and unordinary such that in effect these actually engendered great conflict before such practices came to an end; and such metaphysics-of-absence analysis does apply with respect to superstitions, universal human rights, free society, modern science, etc. but then as of our developed present institutionalisation the idea of not entertaining such practices is viewed as not an exceptional-askance and ordinarily to be expected. This explains human mental states respectively as of uninstitutionalised-threshold/uninstitutionalised-threshold and as of prospective institutionalisation with respect to maximalising-recomposuring-for-relative-ontological-completeness/transvaluating as the process enabling prospective relative-ontological-completeness-of-reference-of-thought of same totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality hitherto considered off limits to any challenging maximalising-recomposuring-for-relative-ontological-completeness/transvaluating at the uninstitutionalised-threshold but then acknowledged thereafter after prospective institutionalisation; with the implication that the possibility for all prospective transcendences as of opened-construct-of-meaningfulness-and-

teleology arise only by maximalising-recomposuring-for-relative-ontological-completeness/transvaluating but presences in their closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications consider maximalising-recomposuring-for-relative-ontological-completeness/transvaluating as of exceptional-askance and unordinary due to their totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag mental-reflex avoiding being ontologically decentered and demented. Insightfully, this point out the circumspective nature of any transcendental knowledge construction exercise as of ontological-tolerance to avoid on the one hand outrightly articulating construed ontological-veridicality at the expense of avoiding any Being-development/ontological-framework-expansional engagement, as such a psychoanalytical commitment necessarily recognises human potential to transcend, and the other hand the nature of intrinsic-reality/ontological-veridicality that ‘supersedes humankind and doesn’t factor in human moods and whims’ in its effectiveness. Caught between these two elements human meaningfulness-and-teleology is ‘often actually imbued with active and passive mental-strategies of compromise’ but which wouldn’t cut it with the maximalising-recomposuring-for-relative-ontological-completeness/transvaluating necessary for human development and progress. Being-development/ontological-framework-expansion and progress requires ontologically-veridical as intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm ‘responses’ as of universal implications and not temporal extirpatory paradigms ‘reactions’ of mere circumstantial implications. Such a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating totalising–renewing-realisation/re-perception/re-thought prospective reference-of-thought ‘construes as circularity and totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag pretences of knowledge and judgements

which are rather in hollow-staging-and-performance-or-apriorising/intelligibilitysetup-
 caricaturing in ordinariness/averaging-of-thought social-aggregation-enabling' when
 expounded by a prior reference-of-thought going by its prior relative-ontological-
 incompleteness-of-reference-of-thought, since there is no sound/authentic knowledge and
 judgements outside the prospective reference-of-thought relatively sound/authentic
 knowledge and judgements as of its relative ontological-normalcy/ontological-completeness-
 of-reference-of-thought in an
 intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-
 for-relative-ontological-completeness/transvaluating paradigm; and so
 structurally/paradigmatically as of the relationship between non-positivism and positivism as
 well as our procrypticism/disjointedness-as-of-reference-of-thought and futural Being-
 development/ontological-framework-expansion as of prospective deprocrypticism as pre-
 empting-disjointedness-as-of-reference-of-thought. This underlying notion of 'notional-
 conflatedness/constitutedness-to-conflatedness construal/conceptualisation' can further be
 expanded upon contrastively with regards to knowledge practice in many a totalising-
 devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality not
 subject to immediate-constraining ontological-primemovers-totalitative-framework thus
 rather eliciting atomising/taking-to-pieces constitutedness that induces relatively poor
 ontological-performance. The central element here has to do with the pervasiveness of
 'conceptual patterning' that actually speaks of a nombrilistic/totalising-self-referencing-
 syncretising approach to conceptualising knowledge based on an intellectual exercise of
 producing patterns of thought with little consideration as to their underlying intrinsic-
 reality/ontological-veridicality transcendental-enabling/existence-potency as validated by
 ontological-primemovers-totalitative-framework. At its worst, such an orientation construes
 of categorisation/taxonomisation of knowledge as inherently representative of intrinsic-

reality/ontological-veridicality by that mere exercise. Such a constitutedness ends up misconstruing the organical depth involved and renders all knowledge constructs so categorised/taxonomised on the same vague plane of mechanical equivalency undermining their transcendental-enabling/existence-potency, originality, organic nature and more often than not turning them into platitudes as rather concerned with perceived academic formulations and formats in of themselves rather than ontological-veracity as of intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency. The underlying mental-reflex for this intellectual disposition associated with conceptual patterning is the assumption that by mere categorising/taxonomising ideas on the basis of their similarities and differences it should be able to attain a grander truth as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. But then such an approach is naïve by its failure to reckon the reality of human limited-mentation-capacity which implies that human conceptualisation tends to develop from prior relative-ontological-incompleteness-of-reference-of-thought, as of the incompleteness of the paradigm/structure of human reference-of-thought. Such that a naïve categorisation/taxonomisation conceptual patterning perspective on that basis equally inherits that ontological-incompleteness of the paradigm/structure of human reference-of-thought; with the consequence that it is not 'notionally structured' to conceptually factor in human poor to perfect/near-perfect construal on the basis of conflatedness but rather suffers from constitutedness. This weakness is underlined and resolved by the notion of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating driven by ontological-faith-notion-or-ontological-fideism that enables conflatedness in line with existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context. It is such a conceptual patterning mental-reflex associated with categorising/taxonomising

dispositions in constitutedness that is behind the naïve but poor influence of the saying that ‘every idea has already been thought of before’ with the nefarious consequence of ‘emphasising themes and authorial differentiation within such categorised/taxonomised thematics in of themselves’ as if a totalising-devolved–purview-as-domain-of-study mainly involves intersubjective evaluation or evaluation among humans within the scope of their mortality on the naïve assumption that such categorising/taxonomising effectively covers analytically the entirety/potency of existence as the absolute a priori, whereas such is achieved rather by a conceptualising as implied by referentialism-as-of-ontological-normalcy-or-post-convergence that places existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context above intersubjective evaluation or evaluation among humans in their mortality in determining intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency as of intersolipsistic insight. Consider for instance that in the run up to the development of theory-of-relativity and quantum-mechanics in the early part of last century, the scientists involved weren’t in the exercise of evaluating their respective theories in a closed framework emphasising their respective ‘ownership-of-theories’ as mortals but rather an opened framework emphasising whosever theories contribute in disclosing intrinsic-reality/ontological-veridicality as the superior third party. This can equally be compared to naively articulating categories/taxonomies of sounds on the basis that their constitutedness defines the entire existential possibility/potency of musical compositions that can arise but then the ‘depth/axiomatic-construct of existence for musical compositions’ doesn’t submit to such a naïve categorising/taxonomising constitutedness but rather such ‘depth/axiomatic-construct of existence for musical compositions’ is as of an imbricatedness/threadedness/recomposuring of existential-instantiations that is graspable rather by a conflatedness as enabled by referentialism-as-of-ontological-normalcy-or-post-

convergence. Given our limited-mentation-capacity, existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context is then the preceding and transformative element of meaningfulness-and-teleology conceptualisation as of our deepening limited-mentation-capacity enabling our prospective relative-ontological-completeness-of-reference-of-thought for grasping ontologically-veridical organic-knowledge articulated in any given totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality such that the wrong approach for prospective intellectual creation is one that simply lumps authorial articulations under given themes together in 'mechanical association' without factoring beforehand their respective 'transcendental-enabling/existence-potency dynamism and implied organic-knowledge' as of conflatedness. This equally underlies the pervasive disposition for misattributed and misfocused analyses as such blurry intellectual exercise become a totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal-dispositions focussing less on the possibilities and insights of prospective elucidation and expansion of knowledge as of intrinsic-reality/ontological-veridicality as being the transcendental-enabling/existence-potency immortal/first-party, and turning more and more and placing the stakes rather on authorial second-parties/mortals competing analyses even to the extent on occasion of undermining the intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency immortal/first-party. Further, such conceptual patterning will often fail to identify the appropriate point for grasping intrinsic-reality/ontological-veridicality as instead of emphasising conflatedness in ordinary/event-of-prospective-ontology-origination projection into existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context, it emphasises mere structural patterns inducing constitutedness, and so whether at specific or synoptic levels of analysis. This extends to the

way issues are raised, questions are posed, as well as their supposed resolutions; ultimately lacking in providing theoretical, conceptual and operant constructs of universal applicative pertinence, and explains a certain position of closure that holds that philosophy is just a vague thinking exercise. Furthermore, whereas an intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency construal highlights the ontological-contiguity of all knowledge as of their reference-of-thought/structural/paradigmatic relationship, conceptual patterning seem to naively imply a discreet relationship of knowledge constructs with little insight of their intrinsic-reality/ontological-veridicality transcendental enabling ontological-primemovers-totalitative-framework interconnectedness as this is often not the primary driving focus, as it is naively assumed that the conceptual patterning is a correspondence of intrinsic-reality/ontological-veridicality as of the mere structural conceptualisation in constitutedness rather than striving to expand the transcendental-enabling/existence-potency ontological-primemovers-totalitative-framework existential-reality potential, and this easily leads to virtuality or ontologically-flawed construal. The defect of conceptual patterning is easily overlook mainly as philosophy is of first order knowledge, a level at which knowledge differentiation doesn't easily manifest itself. Such errors of conceptual patterning will hardly arise in second-level knowledge where transcendental-enabling/existence-potency implications arise in a specular way. For instance, while hereditary is an underlying conceptual patterning idea in biology, it will be unthinkable to try to lump together and undermine the originality of subsequent hereditary notions of genetics on the basis that these are of the same conceptual patterning as earlier notions like Mendelian heredity as the transcendental-enabling/existence-potency differentiations are spectacular. Finally, one practical intellectual flaw arising out of such naïve categorising/taxonomising conceptual patterning has to do with a certain vague intellectual practice based on perceived intellectual pertinence in terms of the authorial 'precedence of

mentioned terms' irrespective of association whether simple formalistic identifying of terms and notions with little consideration of the divergence of implied organic-knowledge as of their intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency ontological-primemovers-totalitative-framework nature and differences as well as their divergence in meaningfulness-and-teleology implications. This again leads to lumping, artificial categorising and undermines originality and organic-knowledge, turning this into simplistic mechanical associations with the more serious consequence being that the more decisive notion for human knowledge renewal as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating driven by ontological-faith-notion-or-ontological-fideism, becomes seriously undermined; as it refers to a transcendental-enabling/existence-potency ontological-primemovers-totalitative-framework renewal of a same totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality but with such effort for renewal often laden with a tradition that is naively of constitutedness undermining requisite creativity as of conflatedness, as it 'critically presupposes beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought that prospective meaningfulness is deterministically tied down to a certain categorising/taxonomising relationship with the prior conceptualisations' in the given totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality. Ultimately, the idea here is that approaching intrinsic-reality/ontological-veridicality with our given limited-mentation-capacity in order to achieve ontological-veracity requires a rather counterintuitive mental-reflex as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context that 'originally reconstructs the ontological-pertinence of axiomatic-constructs and their derived-conceptualisations'. Such an analytic insight as of a deprocrypticism (protensive-consciousness referentialism-induced)-

reference-of-thought—devolving-teleological-structure-of-meaningfulness analysis as of its prospective relative-ontological-completeness-of-reference-of-thought/ontological-normalcy, points out that actually, and according to this author's view, such a currently discussed philosophical issue as the hard problem of consciousness arises as a result of a fragmented thematic construal as of constitutedness wherein a more profound view of the philosophical enterprise as intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency ontological-primemovers-totalitative-framework here hasn't been entertain sufficiently to point out that effectively it is a problem that actually 'devolves out' of the more fundamental issue of Being as of its but is rather being posed as of a 'disjointed/fragmented analysis' as a consciousness grounded problem. This equally explains this author's construal of human consciousness development as rather of Being-development/ontological-framework-expansion; consciousness defined as of 'notional-totalising—self-referencing-syncretising subpotency/subpotent-mimetic-echoness-derivation-within-the-full-potency of existence/intrinsic-reality/ontology-as-of-its-mimetic-echoness-or-existence-in-reverberation-or-existence-potency'. The fundamental fact is that existence as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context is the absolute a priori of intrinsic-reality/superseding—oneness-of-ontology prior to any human derived knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue, and hence existence as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context is the foundational absolute a priori any (given consciousness's neuterising-induced-or-referentialism-induced)-reference-of-thought—devolving-teleological-structure-of-meaningfulness constructs, by which our limited-mentation-capacity can most pertinently accede to by maximalising-recomposuring-

for-relative-ontological-completeness/transvaluating driven by ontological-faith-notion-or-ontological-fideism as of ontological-normalcy/post-convergence insight. Thus existence as the absolute a priori implies it is as of the entire ‘conflatedness for human construction of ontologically veridical meaningfulness-and-teleology’ implied as of notional-deprocrypticism; this is notionally known as ontological-aesthetic-tracing. The implication here is that conceptualisations/construals not only of consciousness but virtue, aesthetics, episteme and nature together with their derived human notional-totalising–self-referencing-syncretising notions like psychologisms, ethics and moralities, arts, epistemologies and methodologies, and natural sciences are but as of the {given consciousness’s neuterising-induced-or-referentialism-induced}-reference-of-thought—devolving-teleological-structure-of-meaningfulness knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue as derived conceptualisations/construals of the very conflatedness that is as of Being-development/ontological-framework-expansion or existence-as-existence-potency/existential-possibilities. The underlying insight explaining human limited-mentation-capacity flawed mental-disposition for constitutedness lies with human misconstruing from ‘existential-instantiations’ the ontological-veridicality of axiomatic-constructs as derived from the ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’. The ‘iterating nature of existential-instantiations in imbricatedness/threadedness/recomposuring’ as of existence’s is what provides humankind-as-of-it-subpotency with direct mental access to existential-reality/existence-or-intrinsic-reality-or-ontological-veridicality, as humans don’t have direct mental access to conceptualised/construed existential-reality/existence-or-intrinsic-reality-or-ontological-veridicality-as-of-its-full-potency, but rather projectively-or-anticipatorily construe of axiomatic-constructs about intrinsic-reality/ontological-veridicality as derivable as from existence-as-the-absolute-a-priori

imbricatedness/threadedness/recomposuring in elucidating existential-instantiations, as of
 ⟨given consciousness's neuterising-induced-or-referentialism-induced⟩-reference-of-
 thought—devolving-teleological-structure-of-meaningfulness, and so as of the maximalising-
 recomposuring-for-relative-ontological-completeness/transvaluating behind the
 institutionalisation process. Otherwise with a naïve mental-reflex of elaboration-as-mere-
 extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-
 contextualising-contiguity of existential-instantiations, we will rather tend to wrongly
 construe 'the conceptual patterning of existential-instantiations' as rather being 'axiomatic-
 constructs as of the ⟨given consciousness's neuterising-induced-or-referentialism-induced⟩-
 reference-of-thought—devolving-teleological-structure-of-meaningfulness as from existence-
 as-the-absolute-a-priori imbricatedness/threadedness/recomposuring ', thus inducing
 virtualities or ontologically-flawed construals associated with the uninstitutionalised-
 thresholds. Thus, the ontological-veracity as prospective relative-ontological-completeness-
 of-reference-of-thought of 'the axiomatic-constructs of a ⟨given consciousness's neuterising-
 induced-or-referentialism-induced⟩-reference-of-thought—devolving-teleological-structure-
 of-meaningfulness as from existence-as-the-absolute-a-priori
 imbricatedness/threadedness/recomposuring ', generating knowledge-
 constructs/theories/intersolipsistic-intercessory-notions/notional-referential-
 notions/articulations/virtue implied as meaningfulness-and-teleology, is rather ensured by the
 construal of existential-instantiations as of maximalising-recomposuring-for-relative-
 ontological-completeness/transvaluating which is as of conflatedness, thus enabling the
 institutionalisation process. It is interesting to grasp here that we cannot from our 'sense of
 conceptual patterning' claim to put into question the inherent nature of existence as the
 absolute a priori and as of its implied superseding—oneness-of-ontology, since existence is
 structurally/paradigmatically precedent and our conceptual patterning is arising secondarily

as of our shoddy-and-incomplete construal of the ‘iterating nature of existential-instantiations’ as of existence’s imbricatedness/threadedness/recomposuring ; and any such pretence of conceptual patterning is nothing but a virtuality or ontologically-flawed construal as of naïve constitutedness. Of course, it is rather prospective relative-ontological-completeness-of-reference-of-thought that will imply deeper ontological-veracity of the same underlying purview for the construal of meaningfulness-and-teleology mental-disposition grounded on existence as the absolute a priori. Insightfully and making the case against conceptual patterning as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity of existential-instantiations, this points out that existence inherent superseding–oneness-of-ontology necessarily implies ontologically-veridical meaningfulness-and-teleology is effectively as of a natural transcendental-enabling/existence-potency-contiguity-of-all-ontologically-veridical-meaningfulness ‘in wait’ to be elucidated however imbricated/threaded/recomposured such an exercise, explaining why our knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue of a given totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality in conflatedness need to be as of a ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’, and more than just conceptual patterning that doesn’t or poorly attends to a natural transcendental-enabling/existence-potency-contiguity-of-all-ontologically-veridical-meaningfulness. For all the above elucidations highlighting the ontological-veracity implications of constitutedness and conflatedness, it should be noted that emphasis is rather on the deficiency of limited-mentation-capacity in construing intrinsic-reality/ontological-veridicality such that the more profound/complete recomposuring of the very same totalising-devolved–purview-as-domain-

of-construal-as-intrinsic-reality/ontological-veridicality highlights/reflects in its subsuming interpretation the true deficiency of the shoddy/incomplete. This can be expanded upon as follows, the reason why ontological-incompleteness-of-reference-of-thought/epistemic-abnormalcy/ontological-destructuring-constitutedness can only be construed with certainty-as-to-their-real-ontological-deficiency 'rather as a constructed-deficiency of ontological-completeness-of-reference-of-thought/ontological-normalcy/conflatedness' lies in the fact that the construal/conceptualisation of a totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality is 'supposedly as of a perfect or near-perfect or relatively-perfect ontological correspondence between such human construed/conceptualised meaningfulness-and-teleology and the inherent intrinsicness of the totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought of human construal/conceptualisation of it'. The only human construal/conceptualisation that can guarantee or relatively guarantee such a perfect or near-perfect or relatively-perfect ontological correspondence is as of prospective relative-ontological-completeness-of-reference-of-thought/ontological-normalcy/conflatedness. Since there is no direct correspondence between ontological-incompleteness-of-reference-of-thought/epistemic-abnormalcy/ontological-destructuring-constitutedness with the inherent intrinsicness of the totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought of human construal/conceptualisation of it, it is thus only from a constructed-deficiency of ontological-completeness-of-reference-of-thought/ontological-normalcy/conflatedness which has such a direct correspondence that the certainty-as-to-their-real-ontological-deficiency of ontological-incompleteness-of-reference-of-thought/epistemic-abnormalcy/ontological-destructuring-constitutedness can be

established. A direct approach to determine the certainty-as-to-their-real-ontological-
 deficiency of ontological-incompleteness-of-reference-of-thought/epistemic-
 abnormalcy/ontological-destructuring-constitutedness will simply lead to a virtuality-or-
 ontologically-flawed-construal, as failing to elucidate the correspondence of ontological-
 deficiency to the inherent intrinsicness of the totalising-devolved-purview-as-domain-of-
 construal-as-intrinsic-reality/ontological-veridicality, with such a virtuality-or-ontologically-
 flawed-construal often wrongly involving ‘reference-of-thought—elevated-devolving-as-of-
 prospective-institutionalisation’-as-of-upholding-ontological-veridicality rather than
 ‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’ as-of-failing-
 ontological-veridicality since a logical correspondence with intrinsic-reality/ontological-
 veridicality will be vaguely implied by mental-reflex; as is often the case with postlogism and
 conjugated-postlogism. By and large, this overall conceptualisation explains the nature of
 ‘notional constructs’ as implying a variance of poor-to-perfect ontological-performance of the
 same underlying idea conceptualised as of its perfect/near-perfect/relatively-perfect
 ontological-performance as in-sync/corresponding with inherent intrinsic-reality/ontological-
 veridicality beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-
 existential-unthought of human construal/conceptualisation of it. This fully articulates the
 dynamic relationship of human limited-mentation-capacity as of its poor to perfect
 relationship-with/conceptualising-of existence-or-intrinsic-reality-or-ontological-veridicality;
 respectively as poor as of constitutedness and as relatively-perfect/near-perfect/perfect
 conflatedness, construed as notional-conflatedness as of constitutedness-to-conflatedness of
 human limited-mentation-capacity. Insightfully, it highlights that constitutedness arises as of
 human limited-mentation-capacity ‘poor/unsound/shoddy/incomplete
 unanticipated/unprojected’ construal/conceptualisation-of-axiomatic-constructs-as-
 knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-

notions/articulations/virtue from ‘the imbricatedness/threadedness/recomposuring iterating of existential-instantiations’ as of ‘existence-or-intrinsic-reality-or-ontological-veridicality’, while conflatedness arises as of human limited-mentation-capacity ‘good/sound/profound/complete anticipated/projected’ construal/conceptualisation-of-axiomatic-constructs-as-knowledge-constructs/theories/intersolipsistic-intercessory-

notions/notional-referential-notions/articulations/virtue from ‘the imbricatedness/threadedness/recomposuring iterating of existential-instantiations’ as of ‘existence-or-intrinsic-reality-or-ontological-veridicality’. Notional-

conflatedness/constitutedness-to-conflatedness as such highlights an underlying ontological-aesthetic-tracing of the constitutedness-to-conflatedness dynamism of human limited-mentation-capacity with respect to human ontological-performance-as-of-its-broadest-implications amenable to human-subpotency/‘subpotent-mimetic-echoness-derivation-within-the-full-potency of existence/intrinsic-reality/ontology-as-of-its-mimetic-echoness-or-existence-in-reverberation-or-existence-potency’, and so whether as of natural ontology/natural sciences, social ontology/social sciences, aesthetics-as-ontology, virtue-as-ontology, etc. of critical relevance is the notion of existence as of human-subpotency or human subpotent-mimetic-echoness-derivation-within-the-full-potency of existence/intrinsic-reality/ontology-as-of-its-mimetic-echoness-or-existence-in-reverberation-or-existence-

potency, implying the totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as of pivoting nature of human knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-

notions/articulations/virtue wherein it is about existence-as-enabling-of-humankind-potential/possibilities or existence-as-emancipatory-of-humankind-in-the-broadest-sense-of-its-thought-and-projective-potential-but-beyond-just-the-engrossed-contemplation-of-only-humankind. All knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-

referential-notions/articulations/virtue are thus for-human-studies or for-human-constructs in the sense that these do not add anything to the given abstract/imaginary existence but are simply enabling to human curiosity and emancipation; that is, whether humans in 2000 BC or 2000 AD are knowledgeable about notions as genetics, theory-of-relativity, universal human rights, etc. doesn't add anything to 'abstract/imaginary existence as a pre-given' pointing to the fact that human existence is about human-subpotency construed as of successive defining transcendently-enabled-institutionalisation-levels-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism as levels of human dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension. Thus in effect the natural sciences are actually for-human-studies whose specific ambit of human-subpotency is about 'human consciousness as for material and physical effecting devolving teleologies as meaningfulness' while the social domains of study are actually for-human-studies whose specific ambit of human-subpotency is about 'human consciousness inherent effecting devolving teleologies as meaningfulness'. This validates the idea of dualism as ultimately human-subpotency effecting can only arise from the conflatedness of human consciousness in-its-embodiment as the potent 'phenomenological transcendental-point-of-departure handle' for human self-conscious existence and meaningfulness-and-teleology construal/conceptualisation as of knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue, whereas the human body as matter though physically existent cannot as of such its constitutedness conception be construed/conceptualised as of such a 'phenomenological transcendental-point-of-departure handle'. In the bigger framework, human totalising-thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance as of collective

human shallow to deepening limited-mentation-capacity implies that human knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue inherently suffer across the institutionalisation process successive institutional-cumulations/institutional-recomposures from ‘an extended metaphysics-of-presence deficiency’ on human ontological-performance that can be traceable as of a notional-deprocrypticism ‘extended metaphysics-of-absence insight’ construed as ontological-aesthetic-tracing; and we can always grasp insightfully of human existential hyperbole-of-temporal-to-intemporal-ontological-performance from the prospective relative-ontological-completeness-of-reference-of-thought/relative-ontological-normalcy as of base-institutionalisation realisation of the hyperbole of recurrent-utter-uninstitutionalisation, universalisation realisation of the hyperbole of base-institutionalisation–ununiversalisation, positivism realisation of the hyperbole of universalisation–non-positivism/medievalism, and prospectively deprocrypticism realisation of the hyperbole of positivism/procrypticism. Ontological-aesthetic-tracing as of notional-deprocrypticism perspective refers to the underlying idiosyncratic, intricate, compounded and pervasive ‘succession of premeaningfulness-as-psyche-of-existential-stake constructs’ as of notional-conflatedness/constitutedness-to-conflatedness from human shallow to deepening limited-mentation-capacity as of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality as it reflects relative ontological-performance-as-of-its-broadest-implications of any {given consciousness’s neuterising-induced-or-referentialism-induced}-reference-of-thought—devolving-teleological-structure-of-meaningfulness as its intradimensional existential-instantiations derived axiomatic-constructs of meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue and as the registry-worldview’s/dimension’s reference-of-thought

‘abstract teleological-structure/teleological-possibilities’; and it reflects any given registry-worldview’s/dimension’s specific institutionalisation-by-uninstitutionalisation-or-uninstitutionalised-threshold dialectical-thinking/dementing construct as a specific aesthetic trace of ‘ontologically elevated-by-degraded-devolving-as-of-uninstitutionalised-threshold. Ontological-aesthetic-tracing as of the notional-conflatedness of notional-deprocrpticism equally supersedingly enlightens the idea of holism which is often somewhat articulated as in the statement ‘the whole is greater than the sum of its parts’ but failing to specifically clarify that ‘limited-mentation-capacity constitutedness conceptualisation construes of an ‘ontologically-compromised-mediating,-as-of-its-specific-constitutedness that is relatively shoddy and incomplete’ and generates virtuality-or-ontologically-flawed-construal when it construes of parts and whole in a given totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality and so as a derived/unoriginary mental-reflex as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity, whereas limited-mentation-capacity conflatedness conceptualisation as of notional-deprocrpticism-as-preempting-of-disjointedness-as-of-reference-of-thought construes of a ‘non-mediating incisive as referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness profoundness/completeness’ by an incisive totalising–renewing-realisation/re-perception/re-thought that further expands human grasp of the given totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality as a non-derived/original mental-reflex of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating driven by ontological-faith-notion-or-ontological-fideism. The latter is effectively what relays the ontological-veracity of the totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality implied axiomatic-construct as of completeness/profoundness subsuming the reality of the perceived whole and

parts within the incisive conflatedness; pointing out that the fundamental issue is how human limited-mentation-capacity effectively construes intrinsic-reality/ontological-veridicality as of its profoundness/completeness. Consider in this particular regards the intrinsic-reality/ontological-veridicality reflected as akin to an engineering product like a jet engine wherein the conceptualisation is an incisive conflatedness that goes beyond the whole and parts of the jet engine to grasp a conceptualisation profoundness/completeness of required critical performances like fuel burn, maintenance cycles, robustness, etc. construed as of the articulated depth of the reference-of-thought of aircraft engine engineering science. This overall notional conception extends as well to the various ways by which human limited-mentation-capacity 'accosts' intrinsic-reality/ontological-veridicality, bringing about the various registry-worldviews/dimensions categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-specific-constitutedness induced neutering or prospectively deprocrpticism referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness meaningfulness-and-teleology. That is, the deprocrpticism protensive-consciousness apriorising/intelligibilitysetup/measuringinstrument/axiomatising in its referencing of conflatedness, with no intermediating construct as of constitutedness, thus achieves ontologically-uncompromised-mediating,-as-of-conflatedness meaningfulness-and-teleology. While the occlusive/preclusive/warped/trepidatious-consciousnesses mental-dispositions/apriorising/intelligibilitysetup/measuringinstrument/axiomatisings by their successive intermediating categorising/qualifying/tendentious/impulsive constructs as of constitutedness on conflatedness induce their successively categorising/qualifying/tendentious/impulsive—ontologically-compromised-mediating,-as-of-their-respective-specific-constitutedness meaningfulness-and-teleology. This ultimately points to the centrality of the implications of the 'notion of limited-mentation-capacity' as of its deprocrpticism referentialism—ontologically-uncompromised-mediating,-as-of-

conflatedness as a notional conception in construing meaningfulness-and-teleology, while avoiding its ontologically-flawed constitutedness construals in terms-as-of-axiomatic-construct of the various neutering. Hence the 'notion of limited-mentation-capacity' as it overcomes ontologically-compromised-mediating,-as-of-its-specific-constitutedness towards ontologically-uncompromised-mediating,-as-of-conflatedness is what is effectively and ontologically defining of issues of reference-of-thought of meaningfulness-and-teleology given that as of its ontologically veridical conflatedness it is the cumulative recomposing of human limited-mentation-capacity as deepening limited-mentation-capacity that is behind the institutionalisation process itself, and also underlies temporal-to-intemporal individuations differentiation as shortness-of-register-of-meaningfulness-and-teleology-and-longness-of-register-of-meaningfulness-and-teleology as of limited-mentation-capacity, and as this is so conceptualised from the ontological-normalcy/ontological-completeness-of-reference-of-thought perspective of deprocrysticism 'referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness protensive-consciousness sound conceptualisation perspective'. This equally underlies and is in sync with the notion of candidity/candour-capacity as a variance of the same as of notional-deprocrysticism 'referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness protensive-consciousness sound conceptualisation perspective'. It is the 'notion of limited-mentation-capacity' that as of its deficiency is falsely-composited by 'ontologically-compromised-mediating,-as-of-their-specific-constitutedness consciousnesses flawed conceptualisation perspectives' into ontologically-flawed constructs of neutering. Ontological-aesthetic-tracing as of the notional-conflatedness of notional-deprocrysticism highlights that humankind in its projected-or-anticipated relationship with 'existence as-the-absolute-a-priori' is rather in existential-extirpation-as-of-existential-unthought, and not the full potency of existence; existential-extirpation-as-of-existential-unthought construed rather as 'shoddy-and-

incomplete actualising/presencing’ of the full potency of existence. Existential-extirpation-as-of-existential-unthought refers to a registry-worldview’s/dimension’s overall ontological-aesthetic-tracing as of the notional-conflatedness of notional-deprocrypticism construct, wherein its totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag construes beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought of its ‘projected-or-anticipated-grandest-existential-axiomatic-construct’ as the absolute framework of ontological-performance-as-of-its-broadest-implications and thus failing to factor in the implications on its ontological-performance of its prior relative-ontological-incompleteness-of-reference-of-thought as this induces wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives at its uninstitutionalised-threshold. Existential-extirpation-as-of-existential-unthought thus highlights the overall constitutedness of humankind’s access to existence given the ‘imbricatedness/threadedness/recomposuring as of iterating-of-existential-instantiations ’, such that humankind’s axiomatic-construct/theory of existence/existential-reality/intrinsic-reality/ontological-veridicality as of its ‘projected-or-anticipated-grandest-existential-axiomatic-construct as reference-of-thought—devolving-teleological-structure-of-meaningfulness’ is rather as of various successive relative constitutedness implied with the successive institutionalisations, and explains a natural human mental-disposition to nihilism as of each of such institutionalisation’s closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications at its uninstitutionalised-threshold in a mental-reflex aversion of an opened-construct-of-meaningfulness-and-teleology behind the overall institutionalisation-process. Existential-extirpation-as-of-existential-unthought as of the notional-conflatedness of notional-deprocrypticism equally implies a humankind outlier/originary/event-of-prospective-ontology-origination and effective maximalising-

recomposuring-for-relative-ontological-completeness/transvaluating capacity for inducing the requisite psychoanalytic-unshackling registering-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-rather-as-dementing-and-decentered-to-the-prior-institutionalisation's-categorical-imperatives/axioms/registry-teleology and its alienation—as-inauthentic/poorly-objectified/poorly-desubjectified-as-objectified/ontological-bad-faith/nihilistic while construing prospective opened-construct-of-meaningfulness-and-teleology as dialectically-thinking-and-centered-to-the-prospective-institutionalisation's-categorical-imperatives/axioms/registry-teleology-relative-ontological-completeness-of-reference-of-thought-in-authenticity, thus literally expanding human access to existence-potency as to the existential possibilities that arise with successive institutional-cumulations or institutional-recomposures associated with the institutionalisation process. This thus divulges the essence of existence as 'the full-potency of existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency'. In other words existence is already given rather as of its potency, and the real problem of existence is humankind's access to existential possibilities as of humankind's limited-mentation-capacity. That is, human transcendence is what achieves existence as a 'potent construct', as the notion of existence-as-a-grounded-construct doesn't-make-sense/is-unavailable for any specific human registry-worldview's/dimension's reference-of-thought as a totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag construct, including our positivism–procrypticism registry-worldview/dimension, as this will falsely imply that our reference-of-thought totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag is 'developed enough' as of Being-and-contemplation to have achieved the full potency of existence to then know what's existence whereas in reality such totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag highlights human-subpotency/subpotent-mimetic-echoness-derivation-within-the-full-potency of existence. Thus our construal of

existence can only be an ‘as of existence’ exercise that rather highlights human potential to transcend towards grasping existence/existence-potency/existential-possibilities; with that potency only instigated as of ontological-faith-notion-or-ontological-fideism for transcendence. Basically, existence as of prospective base-institutionalisation reference-of-thought is circularly-unintelligible-but-for-a-totalising–self-referencing-syncretising-meniality-or-hyperbole-of-meaningfulness-and-teleology to recurrent-utter-uninstitutionalisation reference-of-thought but for the former transcendental instigation as of ontological-faith-notion-or-ontological-fideism, existence as of prospective universalisation reference-of-thought is circularly-unintelligible-but-for-a-totalising–self-referencing-syncretising-meniality-or-hyperbole-of-meaningfulness-and-teleology to base-institutionalisation–ununiversalisation reference-of-thought but for the former transcendental instigation as of ontological-faith-notion-or-ontological-fideism, existence as of prospective positivism reference-of-thought is circularly-unintelligible-but-for-a-totalising–self-referencing-syncretising-meniality-or-hyperbole-of-meaningfulness-and-teleology to universalisation–non-positivism/medievalism reference-of-thought but for the former transcendental instigation as of ontological-faith-notion-or-ontological-fideism, and prospectively human-subpotency futural Being-development/ontological-framework-expansion as of prospective deprocrypticism reference-of-thought is circularly-unintelligible-but-for-a-totalising–self-referencing-syncretising-meniality-or-hyperbole-of-meaningfulness-and-teleology to positivism–procrypticism reference-of-thought but for the former transcendental instigation as of ontological-faith-notion-or-ontological-fideism; such that all that is left of permanence determination about existence is its transcendental construct as of human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination. Interestingly, from our vantage positivism/rational-empiricism perspective, we’ll certainly construe the supposed

intradimensional resolution of existential issues of prior relative-ontological-incompleteness-of-reference-of-thought as of ontological-performance including virtue-as-ontology arising in recurrent-utter-uninstitutionalisation as intradimensional meniality-or-hyperbole and rather resolvable as of base-institutionalisation superseding projection/anticipation, and same with base-institutionalisation–ununiversalisation as intradimensional meniality-or-hyperbole and rather resolvable as of universalisation superseding projection/anticipation, and same with universalisation–non-positivism/medievalism as intradimensional meniality-or-hyperbole and rather resolvable as of positivism/rational-empiricism superseding projection/anticipation, but we won't or hardly construe of the same as of our totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag about our positivism–procrpticism as it being of intradimensional meniality-or-hyperbole and rather resolvable as of deprocrpticism as pre-empting-disjointedness-as-of-reference-of-thought superseding projection/anticipation! This points to the flaw of a Heideggerian Dasein conceptualisation as it wrongly implies 'humankind has any developed mental state as of Being-and-contemplation in any past-to-present epoch' to 'fully register as of that epoch's metaphysics-of-presence' what is existence/existence-potency/existential-possibilities not factoring Being conflatedness totalising–renewing-realisation/re-perception/re-thought as rather driven by ontological-faith-notion-or-ontological-fideism across the entire institutionalisation process, and further in contradiction to the notion of human totalising–thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance. Existence is rather a 'potency construct of transcendence as of human existential potential' and not 'a grounded construct for construing existence' as wrongly implied/attempted with the Heideggerian Dasein notion, as all what 'grounding' does is to wrongly elevate the registry-worldview's/dimension's reference-of-thought in which such a construct is articulatedly grounded thus contradictorily undermining

the possibility for transcendence by wrongly implying that the said registry-worldview's/dimension's reference-of-thought is of absolute ontological-performance, whereas it is deepening of human limited-mentation-capacity as of ontological-faith-notion-or-ontological-fideism in inducing prospective apriorising/intelligibilitysetup/measuringinstrument/axiomatisings that allows for prospective relative-ontological-completeness-of-reference-of-thought thus expanding human notion of existence/existence-potency/existential-possibilities. Anecdotally, the prophesying social scientists of their times who insist on the recurrence of the practices of the creed are 'not stupid' as they know very well that categorical-imperatives/axioms/registry-teleology for meaningfulness-and-teleology are just that with respect to an animal of limited-mentation-capacity beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought who is bound to circularly elicit shortness-of-register-of-meaningfulness-and-teleology on such renewed categorical-imperatives/axioms/registry-teleology for meaningfulness-and-teleology and further denaturing them as of the prospective institutionalisation uninstitutionalised-threshold! In other words and as relevant with all other registry-worldviews/dimensions transcendental implications, base-institutionalisation meaningfulness-and-teleology cannot truly be-grounded-as-explained to recurrent-utter-uninstitutionalisation as this wrongly implies the latter's reference-of-thought as of its categorical-imperatives/axioms/registry-teleology is a sound basis for construing the meaningfulness-and-teleology of base-institutionalisation inducing rather a circular-complexification of recurrent-utter-uninstitutionalisation reference-of-thought as it adopts by mental-reflex an incrementalism-in-relative-ontological-incompleteness mental-disposition rather than a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating mental-disposition and thus fails to fulfil the requisite registering-of-its-reference-of-thought-rather-as-dementing-and-decentered-to-prior-

institutionalisation's-categorical-imperatives/axioms/registry-teleology and its alienation—as-inauthentic/poorly-objectified/poorly-desubjectified-as-objectified/ontological-bad-faith/nihilistic as of ontological-dementation/dialectical-dementation stranding dialectics, which is what allows for transcendence to prospective base-institutionalisation reference-of-thought for cross-generational renewal as of prospective relative-ontological-completeness-of-reference-of-thought of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality; but rather such unground articulation is one rather eliciting prospective metaphoricity as of its implied prospective existential reference. Transcendence implies that as of human totalising—thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance, humankind has no 'absolute past-or-present ontological-completeness-of-reference-of-thought' for grounding the construal of meaningfulness-and-teleology of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, as such pretence circularly turns into constitutedness at the given reference-of-thought uninstitutionalised-threshold; highlighting the fact that human potential attainment of the deprocrypticism as preempting-of-disjointedness-as-of-reference-of-thought is actually a 'perpetual transcendence' as of notional-deprocrypticism as notional-preempting-of-disjointedness-as-of-reference-of-thought which points out that the various uninstitutionalised-thresholds from recurrent-utter-uninstitutionalisation to procrypticism are actually levels of disjointedness-as-of-reference-of-thought and that the various institutionalisations from base-institutionalisation to conceptual-deprocrypticism are actually levels of preempting-of-disjointedness-as-of-reference-of-thought, all reflected as of notional-deprocrypticism. The validity of the construal of existence as-of-existence-potency rather as transcendence is that in the state of human totalising—thrownness-in-existence/I-exist-

 ‘imbricatedness/threadedness/recomposuring as of iterating-of-existential-instantiations ’ to
 further elevate its prospective relative-ontological-completeness-of-reference-of-thought of
 the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-
 reality/ontological-veridicality. This thus validates the notion that existence can only be
 construed as a transcendental conflatedness as of maximalising-recomposuring-for-relative-
 ontological-completeness/transvaluating driven by ontological-faith-notion-or-ontological-
 fideism and not as a grounded constitutedness as of elaboration-as-mere-
 extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-
 contextualising-contiguity wrongly inducing totalising–self-referencing-syncretising.
 Transcendence emphasises organic-knowledge as of ontological-faith-notion-or-ontological-
 fideism underlying conflatedness pointing to the ‘false certainty and denaturing implications’
 involved with knowledge construed mechanically as of elaboration-as-mere-
 extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-
 contextualising-contiguity in a constitutedness and extirpatory relationship with human
 totalising–thrownness-in-existence/I-exist-therefore-existence-is-transcendental-
 enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-
 ontological-performance, failing to factor in maximalising-recomposuring-for-relative-
 ontological-completeness/transvaluating driven by ontological-faith-notion-or-ontological-
 fideism. Existence as of its potency implies that what underlies ontological-aesthetic-tracing
 as of the notional-conflatedness of notional-deprocrypticism is always the issue of ‘divulging

prospective relative-ontological-completeness-of-reference-of-thought' as of conflatedness, and so as the very essence of human limited-mentation-capacity relating to existence-as-the-absolute-a-priori. Hence the very essence of a deprocrypticism institutionalisation is one that comes into terms-as-of-axiomatic-construct with existence-potency and as reflected in transcendence as of conflatedness in avoiding meaningfulness-and-teleology denaturing involved with grounded constitutedness posturing. Operantly, the phenomenological quest for an underlying and superseding knowledge construct, construed here as an enabling construct of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing ontological-performance determination as of human totalising–thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance, is fulfilled by the notion of existential-extirpation-as-of-existential-unthought/nonextirpationary-existential-preempting-of-existential-unthought as the construct that reflects any registry-worldview's/dimension's reference-of-thought ontological-aesthetic-tracing as of the notional-conflatedness of notional-deprocrypticism highlighting the affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking of its prospective relative-ontological-completeness-of-reference-of-thought as of the implications of its conflatedness as its given reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology and its constitutedness as of the unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing of its given prior relative-ontological-incompleteness-of-reference-of-thought as of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality. This author's notion of centered-

totalising/circumscribing/delineating meaningfulness-and-teleology as ‘totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing’ fundamentally grasps that the Derridean critique of centered-totalisation as impossible to achieve and postulation instead of decentered-infinite-freeplay is actually a critique arising on the implied assumption of finite human limited-mentation-capacity as of its impossibility as finitely limited to come into the full terms of grasping the full potency of existence/existence-potency/existential-possibilities; but then this author construes that human limited-mentation-capacity is not finite as it deepens as of the possibility of transcendence enabled as of ontological-dementation/dialectical-dementation stranding dialectics thus involving paradigmatic/structural transformations/shifts of human limited-mentation-capacity reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ to grasp existence/existence-potency/existential-possibilities, such that as of notional-deprocrypticism or notional-preempting-of-disjointedness-as-of-reference-of-thought, reflecting the entire human institutionalisation process retrospectively to prospectively, centered-totalising/circumscribing/delineating meaningfulness-and-teleology as of its attaining of ontological-completeness-of-reference-of-thought is/can-be achieved as ‘involving the superseding/transcending of successively defining human finitudes as the uninstitutionalised-thresholds/uninstitutionalised-thresholds towards attaining successive prospective relative-ontological-completeness-of-reference-of-thought as the institutionalisations’. This thus undermines the implications of a Derridean decentered-infinite-freeplay in its critique of ‘centered-totalisation as of circularity of meaningfulness-and-teleology in relative deficient/flawed ontological-performance’ since such a criticism is based on assuming only a same registry-worldview’s/dimension’s reference-of-thought, and so-construed mainly because such a Derridean conception construes of centered-totalisation as only within one registry-worldview’s/dimension’s

reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ as of its apriorising/intelligibilitysetup/measuringinstrument/axiomatising, failing to factor in that the human institutionalisation-process as of notional-deprocrypticism implied paradigmatic/structural shifts of reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ overcome the limitation of ‘centered-totalisation circularity of meaningfulness-and-teleology in relative deficient/flawed ontological-performance’ within a same reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ by way of the successive prospective relative-ontological-completeness-of-reference-of-thought as enabling successive prospective reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ marked by the shift of ‘centered-totalisation circularity of meaningfulness-and-teleology inducing relatively less and less deficient/flawed ontological-performance’ right up to the attainment of deprocrypticism ‘centered-totalisation circularity of meaningfulness-and-teleology of theoretically perfect/sound ontological-performance’; given that the ‘succession of institutionalisation apriorising/intelligibilitysetup/measuringinstrument/axiomatising rules of the successive reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’s’ overcome retrospectively to prospectively the problem of human limited-mentation-capacity by its deepening thus inducing successive human transcendence of human finitudes as uninstitutionalised-thresholds/uninstitutionalised-thresholds. Here as well the Derridean postulation of decentered-infinite-freeplay in lieu of such a conceptualisation of a ‘projected ultimate centered-totalisation circularity of meaningfulness-and-teleology of theoretically perfect/sound ontological-performance’, as implied by this author’s notion of ontological-normalcy/post-convergence, operantly displays the philosophical tradition problem of constitutedness as failing to project of the transformational implications of human

limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-
 realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination for successive
 prospective relative-ontological-completeness-of-reference-of-thought in bringing about
 successive registry-worldviews/dimensions as of conflatedness that prospectively ultimately
 grasps the centred-totalising/circumscribing/delineating meaningfulness-and-teleology
 ontological-performance as of the full-institutionalisation-process or notional-
 deprocrypticism. Despite such a Derridean decentered-infinite-freeplay conception being the
 most radical attempt hitherto to overcome the philosophical tradition constitutedness, it
 perfectly grasps the implications to meaningfulness-and-teleology ontological-performance
 of ‘centered-totalisation as of circularity of meaningfulness-and-teleology in relative
 deficient/flawed ontological-performance’ but rather as within a same horizon of
 meaningfulness-and-teleology ontological-performance. However, it fails to grasp that such a
 centered-totalisation itself arises because an axiomatic-construct is a circularity of
 meaningfulness-and-teleology ontological-performance of the very same totalising-devolved-
 purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality it refers to, and
 so-implied by extension with respect to a given reference-of-thought-as-of-‘reference-of-
 thought—devolving-teleological-structure-of-meaningfulness’ a centered-totalisation is rather
 the circular meaningfulness-and-teleology representation of the-very-same-totalising-
 purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality,
 as the said reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-
 structure-of-meaningfulness’ is ‘supposedly always the systemic and indefinite resolution’ of
 the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-
 reality/ontological-veridicality. Now, the issue of a centered-totalisation defect arises where
 the given reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-
 structure-of-meaningfulness’ is ontologically-flawed/deficient as it will systematically induce

a ‘centered-totalisation circularity of meaningfulness-and-teleology in relative deficient/flawed ontological-performance’ construed as of the uninstitutionalised-threshold of a registry-worldview’s/dimension’s reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’. But then human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination achieving prospectively of an ultimately theoretically perfect/sound reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ as of the full institutionalisation-process as notional-deprocrpticism implies the circular ontologically-flawed/deficient implications of centered-totalisation are done away with as of ontological-completeness with the totalising–renewing-realisation/re-perception/re-thought of the reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, with such a conceptualisation of centered-totalisation also construed as transcendental centered-totalisation or extrapolated-centered-totalisation or extrapolatory-totalisation or transcendental-totalisation and reflects the reality that a Derridean decentered-infinite-freeplay can also be construed as an interpolatory-totalisation or interpolated-decentered-totalisation. For instance, we can grasp that ‘traditional classical mechanics axiomatic-construct’ is a given ‘centered-totalisation circularity of meaningfulness-and-teleology of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ as of a prior relative-ontological-incompleteness of less ontological-performance of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, while with human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising–renewing-realisation/re-

perception/re-thought,-by-ratio-contiguity/ratiocination the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ brings about a new ‘centered-totalisation/circularity of meaningfulness-and-teleology of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ as of prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought as we can do more things with the latter axiomatic-construct more-profound/grander meaningfulness-and-teleology ontological-performance; and interestingly, physicists will surely fancy that they could do better in ultimately grasping theoretically the full-potency of existence divulgeable as of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ with an ambition for a theory of everything. However, a Derridean decentered-infinite-freeplay is nevertheless critical as a first step for breaking away from a prior centered-totalisation of a very same totalising-devolved—purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality in relative deficient/flawed ontological-performance, and thus by extension with regards to the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality which is a given reference-of-thought, construed as ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’; and for all practical matters this has been the way Derridean deconstruction has been commonly applied as in effect all our meaningfulness-and-teleology ontological-performance has been as of our positivism—procrysticism registry-worldview’s/dimension’s reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ horizon and such a Derridean decentered-infinite-freeplay is an inspired conception providing the groundwork as it initiates the centred-totalisation exercise for the insight of a futural différance as of the latter’s transcendental-totalisation that underlies conflatedness in

breaking with the philosophical tradition or human knowledge conceptualisation tradition or towards fulfilling the understanding of Being. In this regard talking about the physics example again, such a Derridean freeplay *différance* is akin to the ‘putting in question exercise’ that surrounds the cooperation/mutual-complementing-ideas-among-various-physicists leading up to the critical breakthroughs; which then establish such physics centered-totalisation schemes as Newtonian physics and later on Theory-of-relativity and Quantum-mechanics, and today with respect to various theoretical efforts with the potential of leading to a physics Theory of Everything. Inherent to futural *différance* is the notion of totalising–self-referencing-syncretising, as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, construed in the immediate-and-short-term as of ‘self-referencing’ as the uninstitutionalised-threshold/uninstitutionalised-threshold temporal individuations circular undermining of the prospective institutionalisation reference-of-thought/structural/paradigmatic implied transformation/shift as transcendence as of prospective relative-ontological-completeness-of-reference-of-thought, as well as the idea of temporal individuations ‘syncretising’ that underlies a spiralling cross-generational increasing undermining of the uninstitutionalised-threshold/uninstitutionalised-threshold reference-of-thought which is in totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag with its ultimate cross-generational collapsing for the prospective institutionalisation’s reference-of-thought; and so as of prospective social-stake-contention-or-confliction dynamism with increasing social universal-transparency as of prospective relative-ontological-completeness-of-reference-of-thought of the prospective institutionalisation’s reference-of-thought. Insightfully again, this idea of infinite-possibilities/circularity implied as of a Derridean infinite-decentered-freeplay of a given meaningful-frame/axiomatic-construct/model such as mathematical models/axiomatic-constructs circularity is familiar to physicists and other scientists who understand that there is

no infinity in the real-world/existence and infinity showing up in mathematical models/axiomatic-constructs point to the fact that there is a circular or undefined or undecidable problem arising from poor human limited-mentation-capacity conceptualisation implying the given mathematical model/axiomatic-construct is in circular-existential-disjointedness-as-of-prior-relative-ontological-incompleteness as of the axiomatic-construct relative notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality) in constitutedness, and thus a need for a more ontologically-complete mathematical model/axiomatic-construct that as of human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination then resolves/overcomes the circularity/circular-existential-disjointedness-as-of-prior-relative-ontological-incompleteness reflected in the prior mathematical model/axiomatic-construct by the infinities-as-circular-or-undefined-or-undecidable with a new mathematical model/axiomatic-construct in relative ontological-contiguity as of conflatedness, and so as of the very same totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality; and so because human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination induces paradigmatically/structurally grander human meaningfulness-and-teleology ontological-performance of human implicit-or-explicit constructed axiomatic-constructs of purviews/domains of construal-as-intrinsic-reality/ontological-veridicality, and this equally applies by extension to reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality. It should be noted thus that an axiomatic-construct is as of an implied correspondence with the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-

reality/ontological-veridicality or totalising-devolved-purview-as-domain-of-construal-as-
 intrinsic-reality/ontological-veridicality, and it supersedes and is defining of logic which is
 rather the 'inner working coherence/contiguity of axiomatic-construct construal of ecstatic-
 existence/the-nature-of-the-world/conditions' as reflected with any given explicated
 axiomatic-construct in the same way that insight/intuition is reflected rather with regards to
 any given implicated axiomatic-constructs; with an axiomatic-construct such as an idea or a
 concept or a notion or a theory being any conception as of meaningfulness-and-teleology of
 supposed existential-implications correspondence. That is the traditional knowledge
 conception articulated as 'axioms of logic' is rather vague, with the appropriate articulation
 being rather 'logic of axiomatic-construct/reference-of-thought', as the axiomatic-
 construct/reference-of-thought is the effective human limited-mentation-capacity supposed
 correspondence relation with existence as the absolute a priori for human-subpotency
 possibilities for devolving meaningfulness-and-teleology as knowledge-
 constructs/theories/intersolipsistic-intercessory-notions/notional-referential-
 notions/articulations/virtue, with increasing ontological-performance as of human
 transcendence; even though such a conception as 'axioms of logic' could be perceived rather
 as a meta-conception or more like a technical practicality akin to say the scaffolding of a
 building! In other words as the 'inner working coherence/contiguity of axiomatic-construct
 construal of ecstatic-existence/the-nature-of-the-world/conditions', logic and by extension
 mathematics imply elaboration-as-mere-
 extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-
 contextualising-contiguity, whereas axiomatic-constructs as reflecting ecstatic-existence/the-
 nature-of-the-world/conditions are construed in affirmation/projection/assertion/dueness-
 validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-
 thinking as of maximalising-recomposuring-for-relative-ontological-

completeness/transvaluating. But then as of ‘ontology of logic’ and ‘ontology of mathematics’ as their very own respective conceptualised meta-axiomatic-constructs as ontologies in terms of reflecting their philosophical depth of contemplation as of ‘coherence/contiguity-of-superseding—oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’, both logic and mathematics are construed practically as formalisations which are mainly as such constructs of faithful/reproducible syntaxisation on the supposed basis of ‘smarter and simpler articulations’ for the sake of succinctness, clarity and fungibility; however, without the implication of any other inherent transcendental-enabling/existence-potency of such formalisations besides their succinctness, clarity and fungibility usefulness ‘thus-limitedly construed as their inherent meta-conceptualised ontological-veracity/axiomatic-construct of logic and mathematics transcendental-enabling/existence-potency’. But then it is naïve to construe of mathematics, as logicians have tended to do, as essentially an exercise of mathematical formalisation. The fact is that mathematics have always been developed implicitly or explicitly in association with or inspired from the context/existential-contextualising-contiguity of other applied and transcendental-enabling/existence-potency activities as of their axiomatic-constructs development and mathematics very own existential-reality of developed axiomatic-constructs applicative orientation, including developing together with heavily dependent mathematics domains like physics, engineering, other applied sciences and statistical studies. This latter situation which is more real than generally said and makes of mathematics ‘a totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality created axiomatic-constructs’ and more so than the ‘abstract romantic image portrayed as of the mere manipulation of numbers and forms’ as if not inspired as of existential-reality contextuality itself. Thus naively taking cue from the

formalisation of mathematics as if it will enable the inherent transcendental-enabling/existence-potency of any discipline is bound to lead to disappointment, as the inherent axiomatic-constructs as theories, concepts, notions and ideas of the existential domain in question have to be critically developed as of existential-contextualising-contiguity knowledge-reification for logic and mathematics to then be relevant as of a secondary tool or at best a concomitant tool. In physics the Newtons, Leibnizes, Einsteins, Poincarés, Schrodingers, Bohrs had to elicit the transcendental-enabling/existence-potency of the physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality created axiomatic-constructs with mathematics being accessory to the transcendental-enabling/existence-potency. They didn't just start to develop 'patterns of mathematical equations' without the prior insight about the physics domain and what to strive for, and actually from that 'physics reality precedence perspective' got the insight to further develop their relevant branches of mathematics. Nor do even pure mathematicians just go about constructing 'mathematical patterns' as of formalisation without striving to get insight and inspiration from existential-reality as transcendental-enabling/existence-potency. The naivety of logicism lies exactly in this respect of construing formalisation as most of what is supposed to be achieved, and failing to grasp that when it comes to social reality its own transcendental-enabling/existence-potency has to be 'creatively construed', and this in many ways explains the frustrated conclusion that will often then arise from such a naïve formalisation perspective that the philosophical exercise is not necessarily transcendental-enabling/existence-potency, contrary to the precept of all other knowledge! Thus the conceptualisation of logic implied by any given registry-worldview/dimension reference-of-thought-as-of-'reference-of-thought—devolving-teleological-structure-of-meaningfulness' as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality points to the fact that the various registry-

worldviews/dimensions operate their own conception of logic as of their prospective relative-ontological-completeness-of-reference-of-thought; as we can appreciate inherently as of metaphysics-of-absence that however deficient, that each registry-worldview/dimension does have its own sense of logic as of its self-conscious construed meaningfulness-and-teleology. The notion of an absolutely valid logic can only arise on the backdrop of an absolutely valid reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ as implied by futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought registry-worldview/dimension institutionalisation, wherein such a logic is its ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’. In this regard, the link-up of all the concepts and notions articulated herein by this author speaks of ‘suprastructural logic’ that is critically articulated as of a prospective notional-deprocrypticism psychoanalytic-unshackling metaphysics-of-absence and conflatedness, and further subsumed in the word candidity or candour-capacity. Such ‘suprastructural logic’ is even more damning about the naïve constitutedness construal of meaningfulness-and-teleology that besets the knowledge and philosophical tradition. Such a conception of logic and logical analysis points to the totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag naivety and vagueness involved when construing logic and logical analysis as absolute without any explicitly implied or formulated reference-of-thought, construed as ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’; usually in our case, in a non-transcendental totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag that is unconsciously implied as of our positivism–procrypticism registry-worldview/dimension. Insightfully, such a ‘suprastructural logic’ undermines metaphysical notions like good, essence and truth as being naively construed as of a given registry-worldview’s/dimension’s totalising–self-referencing-

syncretising/circularity/interiorising/akrasiatic-drag of meaningfulness-and-teleology, and in lieu emphasises Being construed as ontology's-directedness-as-Being which best reflects and captures meaningfulness-and-teleology as of 'intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications'. Being as of its implied notional-deprocrypticism's conflatedness provides elucidation to such question as: what is the meaning of good/truth/essence in a recurrent-utter-institutionalised, an ununiversalised or a non-positivistic society? And invariably the answers will be a vague totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as of each registry-worldview/dimension, and it is rather the emanant insight of the-Good/understanding/knowledge-driven/ontological-primemovers-totalitative-framework conceptualisation as of Being-development/ontological-framework-expansion that carries the prospective transcendences which are the resolution of the successive prior registry-worldview's/dimension's uninstitutionalised-threshold vices-and-impediments; and so by successive Being-development/ontological-framework-expansion as of the institutionalisation process as base-institutionalisation, universalisation and positivism respectively, and prospectively deprocrypticism. Being construed as of ontology's-directedness-as-Being thus enables the superseding of totalising-self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage as metaphysics-of-presence. Further, the fact is that it is rather axiomatic-constructs whether explicit or implicit that are supposedly in a meaningfulness-and-teleology correspondence relation with a totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality as of their given meaningfulness-and-teleology ontological-performance as validated by ontological-primemovers-totalitative-framework; so-construed as of the implications of human limited-mentation-capacity when developing axiomation-

constructs, with the latter subject to their transcendence when prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought avails prospectively with regards to their meaningfulness-and-teleology ontological-performance. The implications here as well are that implicit axiomatic-constructs like analogies and intuitions/insights that do not reflect/align as of the coherence/contiguity of superseding-oneness-of-ontology implied as of the full-potency of existence coherence/contiguity, are ontologically naïve and vague. Thus axiomatic-constructs ontological-veracity are dependent on relative ontological-contiguity; as axiomatic-construct/reference-of-thought in relative ontological-contiguity of totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality. An axiomatic-construct is in such relative ontological-contiguity by its conflatedness as of the coherence/contiguity of superseding-oneness-of-ontology implied as of the full-potency of existence coherence/contiguity. An ‘axiomatic-construct/reference-of-thought in notional-discontiguity/epistemic-discontiguity-⟨as-of-undefined-or-undecidable-threshold-of-ontological-veridicality⟩ as of a totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ highlights two points of failure/as-discontinuity of meaningfulness-and-teleology ontological-performance, having to do with its apriorising/intelligibilitysetup/measuringinstrument/axiomatising unsoundness-or-inauthenticity and by derivation the aposteriorising/intelligising/measuring/logicising; such that a more ontologically-complete ‘axiomatic-construct/reference-of-thought in relative ontological-contiguity as of the very same totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ exists rather beyond the scope of construal of meaningfulness-and-teleology of the prior ‘axiomatic-construct/reference-of-thought in notional-discontiguity/epistemic-discontiguity-⟨as-of-undefined-or-undecidable-threshold-of-ontological-veridicality⟩ as of the very same

totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’. Thus the relationship between a prospective institutionalisation and the uninstitutionalised-threshold is one of relative ontological-contiguity-by-notional-discontiguity/epistemic-discontiguity of their differing references-of-thought as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality; for instance, with regards to the relative ontological-contiguity of reference-of-thought implied as of base-institutionalisation over the relative notional-discontiguity/epistemic-discontiguity-⟨as-of-undefined-or-undecidable-threshold-of-ontological-veridicality⟩ of reference-of-thought implied as of recurrent-utter-uninstitutionalisation, as of their differing references-of-thought and thus implied logic with regards to the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, reflected as of relative mutual unintelligibility. In axiomatic-construct terms, it is ‘mentally-unsound/demented and by derivation illogical’ to be insisting on articulating notions of relevance to the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ like space-time or quanta in terms of ‘traditional classical mechanics axiomatic-construct’ as of their respectively corresponding relative ontological-contiguity and relative notional-discontiguity/epistemic-discontiguity-⟨as-of-undefined-or-undecidable-threshold-of-ontological-veridicality⟩, and so with regards to ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’. Such mutual unintelligibility, with regards to reference-of-thought, speaks of differing ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising as axiomatic-construct’ of the differing references-of-thought, with the traditional philosophical and knowledge anti-psychologism stance fundamentally grounded on a mix-up about the nature of ‘axioms wrongly construed as elements of logic’ as implied with statements like ‘axioms of logic’

rather than the fact that axiomatic-constructs are ‘ontological wholes of correspondence’ as of supposed correspondence with totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality and thus carry transcendental-enabling/existence-potency implications as of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination, whereas logic and logical analysis is rather the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ and at best yields formalisations grounded on the implied ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising as axiomatic-construct’ but doesn’t reify meaningfulness-and-teleology as knowledge which can only arise as of the ‘maximalising-recomposuring-for-relative-ontological-completeness/transvaluating affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking of apriorising/intelligibilitysetup/measuringinstrument/axiomatising as axiomatic-construct’.

Such a logicism disposition is rather in constitutedness and is behind such naïve contention that philosophy doesn’t carry transcendental implications and actually undermines other approaches that strive for transcendental-enabling/existence-potency by way of conceptual patterning arguments blinded to transcendental implications of knowledge as derived from existence as the absolute a priori. In the bigger scheme of things, this author holds that the deepest ‘phenomenological transcendental-point-of-departure handle’ in the conception of meaningfulness-and-teleology ontological-performance as of transcendence reflected by metaphysics-of-absence is wholly sufficient as of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination in accounting for ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-

conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism
 projective-totalitative-implications' as of relative ontological-contiguity of reference-of-
 thought with regards to the-very-same-totalising-purview-of-construal-as-
 existence/existence-potency/intrinsic-reality/ontological-veridicality. This author
 phenomenological transcendental conception is articulated as of non-speculative, non-
 imaginary, theoretical, conceptual and operant implications construing/conceptualising of the
 institutionalisation-process, not as an external speculative dialectics, but as a wholly internal
 natural dialectics in conflatedness as of human limited-mentation-capacity-deepening-in-
 recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-
 contiguity/ratiocination. Such that human phenomenological totalising-thrownness-in-
 existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-
 subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance is the 'complete
 scientific archaeological depth' for grasping ontology and Being as of the conflatedness of
 human limited-mentation-capacity implications construed from notional-deprocrypticism
 perspective as ontological-aesthetic-tracing, and consequently doesn't carry any external
 ideological implication but rather for the inherent ontological and Being implications. Further
 as of such phenomenological transcendental conflatedness, there is no issue about existence
 itself as it is pre-given, as existence-as-of-its-mimetic-echoness/existence-in-
 reverberation/existence-potency, but rather an issue to humankind arising as of its subpotency
 in the full-potency of existence with all the problem of existence being the issue of
 humankind's limited-mentation-capacity implications as failing Being-
 development/ontological-framework-expansion as of ontology's-directedness-as-Being. The
 phenomenological insight here about the nature of 'existence as so construed as of
 ontology's-directedness-as-Being' is that Being is the conflatedness as of intemporal-
 preservation-entropy-or-contiguity-or-ontological-preservation selectivity inherent in

existence that rather skews presence states towards the ‘ontological statistical-exception’ of intemporality over temporality possibilities, thus rendering existence as of relative teleological orderliness and not teleological chaos in the case were all ontological-possibilities as of temporality-to-intemporality were to be arising in equivalence/equal-measure. Thus, such ontology’s-directedness-as-Being conflatedness projective-totalitative-implications as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating existentially supersede abstract/imagined/misconstrued/virtual constitutedness possibilities as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity implications that are effectively as of non-existence. The further implication is that human ‘prior existential-reality insight as arising by conflatedness as of the coherence/contiguity of ontology’s-directedness-as-Being’ rather ‘points to the ontological-veracity of prospective existential-reality as of conflatedness upholding prospective coherence/contiguity of ontology’s-directedness-as-Being’; wherein as of human-subpotency the ontological-veracity of the institutionalisation process as leading up to our present positivism/rational-empiricism registry-worldview/dimension speaks of a conflatedness as of successive opened-constructs-of-meaningfulness-and-teleology superseding closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications and from which Being-development/ontological-framework-expansion exercise we can’t as of soundness-or-authenticity exculpate ourselves to then pretend ours is the registry-worldview/dimension reference-of-thought that is non-transcendable as of our totalising-self-referencing-syncretising, when the insight of prospective transcendence implications as of deprocrypticism/pre-empting-disjointedness-as-of-reference-of-thought avails, and so as the conflatedness upholding prospective coherence/contiguity of ontology’s-directedness-as-Being. This further explains why there is

need for corresponding Being-development/ontological-framework-expansion with respect to human technical development, and as with prior technologies future technologies will necessarily imply renewed human self-consciousness which is not by itself a given and needs to be ‘thought through and effectively conceptualised’ with respect to the future implications of human development, nuclear weapons knowledge, electronic communication, artificial intelligence, etc. as ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ is subject to ontological-decadence as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. Such ‘ontological statistical-exception’ of intemporality as of ontology’s-directedness-as-Being permeates all existential processes including life itself. This explains why the solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity intemporal mental-disposition behind the ‘inventing’ of prior institutionalisation as of ontological-faith-notion-or-ontological-fideism construed as prior ontology’s-directedness-as-Being is necessarily the requisite mental-disposition for the ‘inventing’ of prospective institutionalisation as of ontological-faith-notion-or-ontological-fideism construed as prospective ontology’s-directedness-as-Being; and so, overcoming temporal/shortness-of-register-of-meaningfulness-and-teleology on wooden-language—of-temporal-mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of categorical-imperatives/axioms/registry-teleology as of uninstitutionalised-threshold failing intemporal-preservation-entropy-or-contiguity—or—ontological-preservation. Ultimately, phenomenology is all about grasping the conflatedness of ontology’s-directedness-as-Being. Furthermore, just as a transcendental-enabling/existence-potency biological science in relative ontological-contiguity of reference-of-thought will dissociate modern day heredity

DNA genetics as of its theoretical, conceptual, methodological, operant and applicative implications from say 19th century Mendelian heredity however its inherent merits, and will not naively purport to analyse the former on the grounds of the latter which as axiomatic-construct is in relative notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality) on the basis of a naïve conceptual patterning implied as of the common term ‘heredity’; this author likewise is very much critical and averse to such conceptual patterning mental-reflexes imbued in traditional non-transcendental philosophical and knowledge analysis all too ready to construe and articulate meaningfulness-and-teleology in sophistic conceptual patterning terms overlooking transcendental-enabling/existence-potency implications, and failing to fathom that conceptual patterning is no substitute for transcendental-enabling/existence-potency work required for all knowledge notwithstanding setbacks and failures that may be involved, given the reality that human meaningfulness-and-teleology ontological-performance arises as an exercise of human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as of relatively profound and complete axiomatic-constructs/reference-of-thought in ontological-contiguity of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality or totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality! Consider for instance criticisms often levied against post-structuralism and specifically Derridean deconstruction as simply convoluted expressions of familiar and trite ideas. But then the effective transcendental-enabling/existence-potency insight as of their applications arising in the social sciences and literal studies clearly demonstrate otherwise. Further many such critiques have tended to be naïve about what passes for theory whereby naïve conceptual patterning of general knowledge are articulated devoid of ‘new theory’, with little or no transcendental-

enabling/existence-potency implications, which in reality is nothing more than a sophistry of argument from authority. This conception of relatively profound and complete axiomatic-constructs/reference-of-thought in ontological-contiguity can equally be demonstrated in graphical terms as a problem ‘not along the curve created-by-human-limited-mentation-capacity’ in relative notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality) of axiomatic-construct but rather a problem arising as of the need for ‘a change of the curve to-be-created-by-deepening-human-limited-mentation-capacity’ in relative ontological-contiguity of axiomatic-construct for grander human meaningfulness-and-teleology ontological-performance, as of the very same totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality. The totalising-renewing-realisation/re-perception/re-thought involves taking cue from existence/existential-contextualising-contiguity/contexts as of existential-instantiations imbricatedness/threadedness/recomposuring in a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating exercise as of ontological-faith-notion-or-ontological-fideism; wherein say with a demand curve, the insight as of human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination of a significant rise in consumers’ salaries implies that everything else being equal the demand curve-axiomatic-construct will shift to the right as of relative ontological-contiguity. The notion of axiomatic-construct in ontological-contiguity arises out of its existential completeness and profoundness, for instance the axiomatic-construct in ontological-contiguity as concept of a bicycle arises by the completeness and profoundness of the bicycle in its existential wholeness of functionality and contents as its ontological-contiguity. Ontological-contiguity rather highlights relative perspectives as of ontological-normalcy/post-convergence depths of axiomatic-construct/reference-of-thought of construal; which for instance renders the idea of general

relativity in relative ontological-contiguity and newtonian physics in relative notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality) rather as uncorrelated, whereas a notion of ‘continuity of ontology’ as is implied by ‘ontological-continuity as of relative ontological-continuity and relative notional-discontiguity/epistemic-discontiguity’ will seem to imply correlatedness by the very nature of the term continuity. Ultimately, the overall analysis above points out that this is not an inherent ontological-as-of-the-full-potency-of-existence problem but rather a problem of human-subpotency as of its limited-mentation-capacity that is resolvable by the deepening of human limited-mentation-capacity as of ontological-dementation/dialectical-dementation stranding dialectics with respect to reference-of-thought; as contrary to the ‘Derridean différance decentering’ freeplay that is entrapped in circularity of meaningfulness-and-teleology on the wrong implied assumption of the same perpetual horizon as registry-worldview/dimension reference-of-thought so-implied as of our positivism mental-disposition, a ‘futural différance’ recognises that human limited-mentation-capacity transcendence brings about prospective relative-ontological-completeness-of-reference-of-thought, and thus it centers-as-dialectically-thinking the prospective institutionalisation’s reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ as of its prospective relative-ontological-completeness-of-reference-of-thought to override the circularity as notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality) of meaningfulness-and-teleology implications of the uninstitutionalised-threshold/uninstitutionalised-threshold reference-of-thought-as-of-‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ as of its prior relative-ontological-incompleteness-of-reference-of-thought with respect to the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, and thus broadening human-subpotency in

the full-potency of existence/existence-potency/existential-possibilities as implied retrospectively to prospectively with the institutionalisation-process as of notional-deprocrypticism. What underlies such a centered-totalisation as of its transcending nature, is that given humankind's limited-mentation-capacity as of human-subpotency in its totalising—thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance with respect to the full-potency that is the 'inherent centred-totalisation-as-existence', humankind devises its meaningfulness-and-teleology as of its requisite subpotency ontological-performance to construe of the 'inherent centred-totalisation-as-existence' by way of 'reference-of-thought—devolving-teleological-structure-of-meaningfulness as of implicated-and-explicated reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue' as of human comprehension/deciphering of underlying rules/non-rules as from existential-instantiations in imbricatedness/threadedness/recomposuring supposedly reflecting the 'inherent centred-totalisation-as-existence', with such human-subpotency approximation construed by the specific human existential-extirpation-as-of-existential-unthought ontological-aesthetic-tracing underlying the successive institutionalisations/finitudes of the institutionalisation-process. But then this highlights six issues with respect to meaningfulness-and-teleology ontological-performance with regards to such implicated-and-explicated reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue. Firstly, this has to do with the successive institutionalisations

reference-of-thought—devolving-teleological-structure-of-meaningfulness prospective relative-ontological-completeness-of-reference-of-thought due to human limited-mentation-capacity of projection-or-anticipation in grasping the ‘inherent centred-totalisation-as-existence’. Secondly, even within each of the successive given institutionalisations as of their given underlying specific rules there is a variance of meaningfulness-and-teleology ontological-performance among human individuations-as-mental-dispositions-manifested-by-individuals,-with-the-individual-construed-as-the-existential-receptacle-of-temporal-to-intemporal-possibilities-of-individuations as of intemporal/longness-of-register-of-meaningfulness-and-teleology individuation that notionally upholds the given institutionalisation's categorical-imperatives/axioms/registry-teleology and as of temporality individuations that in its relative ‘totalising–self-referencing-syncretising circularity’ as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought fails to uphold the given institutionalisation’s categorical-imperatives/axioms/registry-teleology due to lack of social universal-transparency in the social-stake-contention-or-confliction dynamism thus highlighting the registry-worldview/dimension uninstitutionalised-threshold/uninstitutionalised-threshold; wherein the ‘circular reference-of-thought of intemporal-as-ontological meaningfulness-and-teleology’ of sound ontological-performance is not disambiguated from the ‘circular reference-of-thought of temporal-as-denaturing meaningfulness-and-teleology’ of ontologically-flawed/deficient ontological-performance. Thirdly, there is thus beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought temporal individuations denaturing dynamics relations to the reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue, arising as of the conjugation of

postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of ‘reference-of-thought-devolving-level difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism reflected as the divergent ontological-performances of the ontological-aesthetic-tracing’.

Fourthly cross-generationally, the intemporal/longness-of-register-of-meaningfulness-and-teleology individuation as of ontological-faith-notion-or-ontological-fideism reconceptualises of a transcending elevated-devolving-as-of-prospective-institutionalisation of implicit-and-explicit articulation of new reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue as of its human comprehension/deciphering of underlying rules/non-rules from existential-instantiations in imbricatedness/threadedness/recomposuring supposedly reflecting the ‘inherent centred-totalisation-as-existence’ reinitiating the institutionalisation-process, and thus right up to human attainment of ontological-completeness-of-reference-of-thought with this ‘ultimate social universal-transparency’ supposedly overriding human temporality and thus ultimate basis of a centered-totalisation of human meaningfulness-and-teleology ontological-performance construed theoretically as paralleling the ‘inherent centred-totalisation-as-existence’; and so as of humankind’s subpotency in existence Being project! Fifthly, the implications of such transcendental centered-totalisation with regards to the ‘certainty of meaningfulness-and-teleology as of sound ontological-performance’ rather lies with such meaningfulness-and-teleology as being so-construed notionally as of a given institutionalisation’s reference-of-thought ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ transcendental-enabling/existence-potency rules on the basis of

social universal-transparency, and so as of its implied prospective relative-ontological-completeness-of-reference-of-thought: wherein, – non-rules-as-impulsive-or-accidented-or-random-mental-disposition in Recurrent-utter-uninstitutionalisation enables the grasp of certain meaningfulness-and-teleology on the basis of non-rules-as-of-accidentedness-or-randomness-of-occurrences/existential-instantiations by its non-rules-abstracted-as-accidented-or-random human-limited-mentation-capacity type of construal, as relevant in the meaningfulness-and-teleology ontological-performance as of trepidatious-consciousness about occurrences/existential-instantiations; – rulemaking-over-non-rules in Base-institutionalisation enables the grasp of certain meaningfulness-and-teleology on the basis of rules-abstracted-as-of-tendentiousness-of-occurrences/existential-instantiations by its rulemaking-over-non-rules-as-impulsive-or-accidented-or-random human-limited-mentation-capacity type of construal, as relevant in the meaningfulness-and-teleology ontological-performance of warped-consciousness about recurrences/existential-instantiations; – universalisation-directed-rulemaking-over-non-rules of Universalisation enables the grasp of certain meaningfulness-and-teleology on the basis of universalising-rules-abstracted-as-of-qualifying-of-occurrences/existential-instantiations by its universalisation-directed-rule-making-over-non-rules-as-impulsive-or-accidented-or-random human-limited-mentation-capacity type of construal, as relevant in the meaningfulness-and-teleology ontological-performance of preclusive-consciousness about recurrences/existential-instantiations; – positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules of Positivism/Rational-Empiricism enables the grasp of certain meaningfulness-and-teleology on the basis of positivising/rational-empiricism-rules-abstracted-as-of-categorising-of-occurrences/existential-instantiations by its positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-as-impulsive-or-accidented-or-random human-limited-mentation-capacity type of construal, as relevant in the meaningfulness-and-

teleology ontological-performance of occlusive-consciousness about recurrences/existential-instantiations; and prospectively as theoretically/notionally attaining transcendental centered-totalising/circumscribing/delineating meaningfulness-and-teleology as of perfect/sound ontological-performance, – pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules of Deprocripticism enables the prospective grasp of certain meaningfulness-and-teleology on the basis of deprocripticism-as-pre-empting-‘disjointedness-as-of-reference-of-thought’-ontological-normalcy/post-convergence-referentialism-rules-abstracted-as-of-‘conflatedness’-of-occurrences/existential-instantiations by its deprocripticism as pre-empting-‘disjointedness-as-of-reference-of-thought’ human-limited-mentation-capacity type of construal, as relevant in the meaningfulness-and-teleology ontological-performance of protensive-consciousness about recurrences/existential-instantiations. Sixthly, the resolution as of human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination is ultimately with the notional-deprocripticism protensive-consciousness as of its notional-contiguity/epistemic-contiguity superseding of transversal temporal-to-intemporal human limited-mentation-capacity implications. Such superseding is actually attained as of the specific protensive-consciousness specific human premeaningfulness-as-psyche-of-existential-stake. That is, as of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, the limited-mentation-capacity meaningfulness-and-teleology ontological-performance with regards to the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality of the successive consciousnesses as of the successive institutional-cumulations/institutional-recomposures differ by their Being premeaningfulness-as-psyche-of-existential-stake, which ultimately undergo ‘decomplexifying/uninhibiting-(as-

of-elevating-devolving-teleological-structure-of-meaningfulness-as-prospective-
 institutionalisation) maturing as ontology's-directedness-as-Being all along the institutional-
 cumulations/institutional-recomposures involving ontological-normalcy/post-convergence
 reference-of-thought in relative ontological-contiguity over relative notional-
 discontiguity/epistemic-discontiguity, construed as prospective relative-ontological-
 completeness-of-reference-of-thought; wherein as of ontological-aesthetic-tracing
 conflatedness construal as of notional-deprocrypticism, – the trepidatious-consciousness of
 recurrent-utter-uninstitutionalisation is of a 'trepidatious Being complexified/inhibited-(as-
 degraded-devolving-as-of-uninstitutionalised-threshold) premeaningfulness-as-psyche-of-
 existential-stake' as of social-stake-contention-or-confliction, – the warped-consciousness of
 base-institutionalisation–ununiversalisation is of a 'trepidatious Being
 uninhibited/decomplexified-(as-elevated-devolving-as-of-prospective-institutionalisation) but
 warped Being complexified/inhibited-(as-degraded-devolving-as-of-uninstitutionalised-
 threshold) premeaningfulness-as-psyche-of-existential-stake' as of social-stake-contention-
 or-confliction, – the preclusive-consciousness of universalisation–non-
 positivism/medievalism is of a 'warped Being uninhibited/decomplexified-(as-elevated-
 devolving-as-of-prospective-institutionalisation) but preclusive Being
 complexified/inhibited-(as-degraded-devolving-as-of-uninstitutionalised-threshold)
 premeaningfulness-as-psyche-of-existential-stake' as of social-stake-contention-or-
 confliction, – the occlusive-consciousness of positivism–procrypticism is of a 'preclusive
 Being uninhibited/decomplexified-(as-elevated-devolving-as-of-prospective-
 institutionalisation) but occlusive Being complexified/inhibited-(as-degraded-devolving-as-
 of-uninstitutionalised-threshold) premeaningfulness-as-psyche-of-existential-stake' as of
 social-stake-contention-or-confliction, – and prospectively the protensive-consciousness of
 deprocrypticism is of an 'occlusive Being uninhibited/decomplexified-(as-elevated-

devolving-as-of-prospective-institutionalisation) construed as protensive Being premeaningfulness-as-psyche-of-existential-stake' as of social-stake-contention-or-confliction. This repleteness in the institutionalisation process with such successive 'Being uninhibited/decomplexified-(as-elevated-devolving-as-of-prospective-institutionalisation) and Being complexified/inhibited-(as-degraded-devolving-as-of-uninstitutionalised-threshold) premeaningfulness-as-psyche-of-existential-stake' arises given the grounding of human meaningfulness-and-teleology ontological-performance on its various specific apriorising/intelligibilitysetup/measuringinstrument/axiomatisings for meaningfulness-and-teleology ontological-performance as reflected by their respective 'reference-of-thought—devolving-teleological-structure-of-meaningfulness' associated with the successive consciousnesses, as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality; such that the prior Being premeaningfulness-as-psyche-of-existential-stake has to be uninhibited/decomplexified-(as-elevated-devolving-as-of-prospective-institutionalisation) to enable prospective Being premeaningfulness-as-psyche-of-existential-stake for the successive registry-worldviews/dimensions transcendences towards the attaining of futural Being-development/ontological-framework-expansion as of prospective deprocrypticism. Thus the deprocrypticism 'phenomenological transcendental-point-of-departure handle' thus warrants a superseding meaningfulness-and-teleology ontological-performance as-decomplexifying/uninhibiting-(as-elevated-devolving-as-of-prospective-institutionalisation) our positivism—procrypticism occlusive Being premeaningfulness-as-psyche-of-existential-stake'. This overall deneuterising conception of transcendental centered-totalising/circumscribing/delineating meaningfulness-and-teleology ontological-performance is reflected notionally as of notional-deprocrypticism, underlying that the successive registry-worldview's/dimension's institutionalisations are always about pre-empting 'their successive

types of disjointedness-as-of-reference-of-thought' up to its theoretical pre-empting with conceptual deprocrypticism as preempting-of-disjointedness-as-of-reference-of-thought, and so as of successive human limited-mentation-capacity prospective relative-ontological-completeness-of-reference-of-thought as of 'reference-of-thought—devolving-teleological-structure-of-meaningfulness' of the successive institutionalisations. Basically human existential-extirpation-as-of-existential-unthought is operantly construed as ontological-aesthetic-tracing as of the notional-conflatedness of notional-deprocrypticism underlying the idiosyncratic, intricate, compounded and pervasive mimetic dynamism of human conflatedness and human constitutedness, defining any given registry-worldview's/dimension's meaningfulness-and-teleology as of its underlying relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-thought beyond its totalising—self-referencing-syncretising; with such 'reference-of-thought—devolving-teleological-structure-of-meaningfulness' maximally/most-profoundly/most-completely construed as of metaphysics-of-absence insight over presence institutionalisation reference-of-thought as implying meaningfulness-and-teleology is as of a transcendental level of appreciation beyond a totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal-dispositions thus divulging the conflatedness of existence/existence-potency/existential-possibilities as of prospective institutionalisation reference-of-thought. Such an existential-extirpation-as-of-existential-unthought phenomenological construal obviously goes 'beyond our ordinary intradimensional totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag framework of phenomenological contemplation' in drawing out the full transcendental implications of human totalising—thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance from a prospective notional-deprocrypticism perspective as the full

depth of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing ontological-performance; as it is akin to how we can imagine ‘budding science’ in prior non-positivism registry-worldviews/dimensions say in the ancient and medieval worlds but grasping that you really get to systemic scientism rather in a positivism/rational-empiricism registry-worldview/dimension as of its apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights construed as positivism/rational-empiricism ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’, reflected as of positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules. Such a phenomenological construal as of human totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing ontological-performance thus goes beyond a grounded conceptualisation and rather involves a psychoanalytic-unshackling construal as it reflects a totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing ontological-performance in the sense that the ‘normal intradimensional mental-reflex’ of representing the uninstitutionalised-threshold of the prior transcended registry-worldview/dimension as nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) or a-registry-worldview’s-or-dimension’s-ignoring-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-as-an-ontologically-flawed-neuterisation-or-bracketing-or-epoché of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing is overridden to attain full ontological elucidation by the totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing ontological-performance involving the uninstitutionalised-threshold reflection as dementing-and-decentered-to-prior-institutionalisation’s-categorical-imperatives/axioms/registry-teleology in lieu of the

nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) or a-registry-worldview's-or-dimension's-ignoring-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-as-an-ontologically-flawed-neuterisation-or-bracketing-or-epoché of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing. Furthermore, notional-deprocrypticism as the ultimate registry-worldview/dimension by notionally undermining human disjointedness-as-of-reference-of-thought will factor in that since successive registry-worldviews/dimensions institutionalisations articulations of categorical-imperatives/axioms/registry-teleology for intemporal-preservation-entropy-or-contiguity—or-ontological-preservation have always led at the uninstitutionalised-thresholds to human limited-mentation-capacity induced beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought denaturing of categorical-imperatives/axioms/registry-teleology as wooden-language—of-temporal-mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives thus failing prospective intemporal-preservation-entropy-or-contiguity—or-ontological-preservation, inherently the issue of human limited-mentation-capacity as of postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of 'reference-of-thought-devolving-level difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism reflected as the divergent ontological-performances of the ontological-aesthetic-tracing', is a paramount and permanent one such that the construct of deprocrypticism categorical-imperatives/axioms/registry-teleology is exactly about a totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing pre-emptive projecting/anticipating of the denaturing possibility of human limited-mentation-

capacity as of deprocrypticism social universal-transparency ontological-performance; inherently a deprocrypticism protensive-consciousness is one which totalises-for-conflated-meaningfulness-and-teleology-as-notional-deprocrypticism with no nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) or a-registry-worldview's-or-dimension's-ignoring-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-as-an-ontologically-flawed-neuterisation-or-bracketing-or-epoché of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing as of extended metaphysics-of-absence conceptualisation and as of the insight of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor. The latter highlights the recurrence of such 'uninstitutionalised-threshold phenomena' as averaging-of-thought and institutionalised-being-and-craft. For instance, the successive registry-worldviews/dimensions institutionalisations conceptualisation of meaningfulness-and-teleology have arisen as second-natured constructs that have substituted for their uninstitutionalised-threshold free-for-all averaging-of-thought framework, such that many a subject matter domain like the heavens, forces of nature, material nature, social laws, etc. are now effectively construed socially as of institutional and formal deferential-formalisation-transference as abstract intemporal/ontological-driven conceptualisation as of respectively formal religion, formal science, legal system, etc. voiding free-for-all construals as of temporal social-aggregation-enabling teleological dispositions as of respectively animistic dispositions, alchemic and essences-driven explanation of nature, crude mob justice, etc. Insightfully, as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, anthropologists are very much aware that the social diffusion of new transcendental-enabling/existence-potency

practices into a given society are more likely to be adopted as of the society's institutional and formal percolation-channelling framework than as of a solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity intemporal-as-ontological 'direct convincing' at individuals-level underlying deferring to institutional and formal meaningfulness-and-teleology as of the need for profoundness and rigour that doesn't avail in ordinary thought for transcendence. Likewise, on occasion in the face of prior institutionalisation established and perceived vested interest such intemporal-as-ontological meaningfulness-and-teleology could be ontologically undermined as of institutionalised-being-and-craft. Consider in this regard Establishment efforts undermining the Diderot-led Encyclopédistes project. Furthermore, every registry-worldview/dimension relates to its value construct as of its prior relative-ontological-incompleteness-of-reference-of-thought constitutedness as more or less absolute, and doesn't factor in that its prior relative-ontological-incompleteness-of-reference-of-thought is a structural/paradigmatic deficiency inducing the totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of its value construct. But then prospective institutionalisation necessarily implies a notion of prospective value construct as of its prospective relative-ontological-completeness-of-reference-of-thought conflatedness which will be unintelligible to the prior value construct, such that it is only a sense of intemporal consummation that drives transcendental dispositions as it is paradoxical to expect that what is in need for transcendence acts as transcended, as transcendence is inevitably and so across all registry-worldviews/dimensions a state of paradoxical conflictedness as more profoundly involving a cross-generational meaningfulness-and-teleology psychoanalytic-unshackling than a grounding conceptualisation! Furthermore, both the prior institutionalisation value construct and the prospective institutionalisation value construct are their respectively given centred-totalisation-facticity of meaningfulness-and-teleology, with

transcendence conflictedly implying overriding the prior institutionalisation's centred-totalisation-facticity for the prospective institutionalisation's centred-totalisation-facticity. But then the human institutionalisation-process is an empirical fact, and thus the resolution of this transcendence paradox is rather reflected by the dynamics of human positive-opportunism as of human totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as social universal-transparency avails with respect to social-stake-contention-or-confliction, wherein while in the immediate-and-short-term human 'self-referencing' will seem to imply that it is almost impossible to transcend from a given social conventioning centred-totalisation facticity but cross-generationally human 're-conventioning whether driven by a sense of pure ontology as of ontological-faith-notion-or-ontological-fideism or otherwise with say cultural-diffusion', as 'syncretising-effecting' on meaningfulness-and-teleology with respect to social-stake-contention-or-confliction induces human transcendence. Consider in this regard historical transcendence elicited by cultural diffusion whether with respect to trading or invasion or voyages of exploration. The fact is a social-setup is structurally/paradigmatically a framework where individuals are naturally involved in a dynamic relationship of perceived social-stake-contention-or-confliction striving to draw in various ways the optimum as of perceived existential possibilities, and thus individuals and social groups are not in an absolutely given/set self-referencing centred-totalisation-facticity of meaningfulness-and-teleology within their social-setup and are predisposed on critical occasions as of syncretising-effecting to 'reinvent', circumvent or adapt as to what they perceive as optimum existential possibilities, such that a social-setup is already involved internally however restricted in its very own reinvention/circumventing/adaptation as of its very own internal 'self-referencing and syncretising-effecting construed as totalising-self-referencing-syncretising' of meaningfulness-and-teleology with regards to perceived social-stake-

contention-or-confliction; and it is this element that enables all human societies to have a minimal opening/overture/receptivity to each other, including at the very extreme between an industrial age society and a hunter-gatherer society. Without such a structural/paradigmatic ‘self-referencing and syncretising-effecting construed as totalising–self-referencing-syncretising human nature’, both internal social transformation however lethargic and cultural diffusion will be basically impossible, and totalising–self-referencing-syncretising induced transformation arises because human perceived social-stake-contention-or-confliction drifts within-and-across social-setups whether with regards to basic trading, curiosity, social competition and generally as of a predisposition to achieve optimum existential possibilities. In this regard, the rapid transformation implications of cultural diffusion arise because it makes relatively immediately available to individuals and social groups a comprehensive set of options however limited the nature and speed of their adoption. This syncretising-effecting mechanism ultimately explains why cross-generational transcendence occurs notwithstanding a seemingly self-referencing centred-totalisation-facticity of meaningfulness-and-teleology within a given social-setup in the immediate-and-short-term. Transcendence as of prospective relative-ontological-completeness-of-reference-of-thought occurs because structurally/paradigmatically it is social-dispositions and mental-dispositions of intemporal-as-ontological nature as of longness-of-register-of-meaningfulness-and-teleology given their ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ as of more profound ontological-primemovers-totalitative-framework validation as of existence-potency, even if outlier, that are most likely to be syncretised cross-generationally as providing the most overall positive-opportunism by their relative universal projection implications and are formally-and-overtly assumed, and so over temporal-as-ontologically-flawed social-dispositions and mental-dispositions which are

more or less formally-and-overtly unassumed as of their temporal denaturing nature or poor universal projection. However, such a conception of ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ is not actively contemplated socially but occurs latently and passively with any given registry-worldview’s/dimension’s institutionalisation meaningfulness-and-teleology as its inherent social-dispositions and mental-dispositions are rather as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought with regards to such transcendental implications! Despite the fact that all social-setups tend to be surreptitiously permeated with individuals temporal/shortness-of-register-of-meaningfulness-and-teleology social-dispositions and mental-dispositions of suboptimal ontological implications for social-functioning-and-accordance—as-of-social-stake-contention-or-confliction, every social-setup as a conventional-construct can only be held together in the long-term as of its requisite given registry-worldview’s/dimension’s institutionalisation-level of minimally-expected basic conscious-adherence-at-best or token-adherence-at-worst to the said institutionalisation-level’s categorical-imperatives/axioms/registry-teleology with regards to meeting a basic level of individuals and social existential-possibilities expectations. It may thus seem from within just one human generation perspective that the underlying human metaphoricity for transcendence is rather marginal especially when not associated with any external cultural diffusion. However, human metaphoricity as of cultural transformation had tended historically, in the main, to ebb in peaks and lows, and so as of the relative universal transparency about such metaphoricity instigative mathesis/motif/thrownness-disposition direct, indirect and/or devolving implications. The fact that individuals in a social-setup are already involved internally however restricted in its very own reinvention/circumventing/adaptation in a dynamic relationship of perceived social-stake-

contention-or-confliction striving to draw in various ways the optimum as of perceived existential possibilities and is thus of a minimal opening/overture/receptivity to internal and external metaphoricity, also critically speaks to the fact that any social-setup is only able to hold together because of ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ that is subject to existence-potency validatory ontological-primemovers-totalitative-framework. As of its circularity, the lack or poorer cause-and-effect determinism of any such ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence threshold of a social-setup meaningfulness-and-teleology’ allows for the possibility for prospective metaphoricity to reconstrue-and-redefine the social-setup meaningfulness-and-teleology. Such prospective metaphoricity possibility cannot be pre-empted because even the social-setup conventioning in its functional operation of meaningfulness-and-teleology needs this ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ in order to affirm itself over any spontaneously arising disruptive meaningfulness-and-teleology that may be articulated by individuals or groups, with the result that a social-setup ever always exposes itself to prospective metaphoricity in one way or the other when such spontaneously arising disruptive meaningfulness-and-teleology is not of poorer but rather of a superseding ontological-primemovers-totalitative-framework projective-totalitative-implications as of the social-setup given ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence. We can consider in this regard that an animistic non-positivistic or medieval non-positivistic social-setup will certainly imply a ‘supposedly coherent ontological-commitment—construed-as-of-

existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ respectively as of superstitious spiritualism meaningfulness-and-teleology or scholasticism pedantic dogmatism meaningfulness-and-teleology, as of the given social-setup ‘self-assuredness-of-authenticity with respect to its social-stake-contention-or-confliction’ in its capacity to demonstrably and objectively uphold and function going by its specific registry-worldview/dimension as of superstitious spiritualism or scholasticism pedantic dogmatism. It is exactly this ‘self-assuredness-of-authenticity with respect to its social-stake-contention-or-confliction’ that equally makes available the possibility for prospective metaphoricity to demonstrably undermine the implied ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ of such prior social-setups registry-worldview/dimension meaningfulness-and-teleology, and so as of the prospectively induced ontological-primemovers-totalitative-framework superseding meaningfulness-and-teleology as from existence-potency perspective of relative-ontological-completeness-of-reference-of-thought by way of ontological-primemovers-totalitative-framework such as with prospective positivism/rational-empiricism meaningfulness-and-teleology. However, given the inherence of social-stake-contention-or-confliction, inevitably prospective metaphoricity undermines vested interests as of the direct, indirect and/or devolving implications of prospective metaphoricity and by that token elicit sophistic inclinations to such prospective metaphoricity meaningfulness-and-teleology. Further any such prospective metaphoricity ultimately takes hold rather as of within the social deferential-formalisation-transference framework wherein it is driven by a sense of positive-opportunism as of particular and general social interest. That said, a social-setup is ever always ‘existentially invested’ to a given registry-worldview/dimension and the fact of greater existential-contextualising-contiguity knowledge-reification from prospective metaphoricity

which may involve undermining such ‘existentially invested’ registry-worldview/dimension in its closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications means that it doesn’t necessarily construe such prospective metaphoricity as pertinent and so where it is nihilistically disinclined by its totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag to dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as of its beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought manifestation. The abstract notion of anti-nihilism as implied by such prospective metaphoricity is not construed in human temporal terms-as-of-axiomatic-construct as a ‘living notion’ going by a totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag elicitation of value as of temporal-intemporality. In this regard, as of the temporal ‘mental and existential investment’ of recurrent-utter-uninstitutionalisation prospective base-institutionalisation anti-nihilism meaningfulness-and-teleology is basically nothing and worthless, likewise as of the temporal ‘mental and existential investment’ of base-institutionalisation–ununiversalisation prospective universalisation anti-nihilism meaningfulness-and-teleology is basically nothing and worthless, same with universalisation–non-positivism/medievalism and prospective positivism, and equally so for positivism–procrypticism and futural Being-development/ontological-framework-expansion as of prospective deprocrypticism. Explaining in many ways why the elicitation of value as of prospective second-natured institutionalisation rather occurs as of the superseding of totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal-intemporality. Ultimately, prospective metaphoricity in a reflection of the individual-as-receptable-of-temporal-to-intemporal-individuations realistically implies that it is rather fundamentally a question of grasping the mechanism that tips the balance towards human intemporality and subsequent

prospective institutionalisation which is ontologically sufficient for prospective ontological-effectiveness, rather than a naïve engagement as if the human is all-essentially intemporal-as-of-an-absolute-ontological-commitment-disposition. More critically, such a conception of prospective metaphoricity cognisant of the decisiveness of deferential-formalisation-transference for institutionalisation and thus subsequent social percolation-channelling, come to grasp that sophistic/pedantic predispositions are the more salient entrenched interests beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought with respect to prospective metaphoricity as of the implications of such undermining of social deferential-formalisation-transference. In this regard, the sophistic/pedantic barriers to futural Being-development/ontological-framework-expansion as of prospective deprocrypticism metaphoricity implications are necessarily spurious and associated with our positivism–procrypticism institutional-being-and-craft as of the direct, indirect and/or devolving prospective metaphoricity implications. We can appreciate in this regard that for the medieval-scholasticism-pedants—ideal-type-or-individuation, it doesn't matter that budding positivism can be demonstrated as more ontologically pertinent as of ontological-primemovers-totalitative-framework, so long as it is socially and institutionally credible to uphold non-positivism meaningfulness-and-teleology in effect by undermining its deferential-formalisation-transference. It is with regards to such sophistic/pedantic disinclination to prospective metaphoricity that the latter elicits contortioning gesturing, wherein for instance Socrates with respect to the sophists—ideal-type-or-individuation (as we can appreciate that however say a Protagoras engagement with Socrates may project coherence as of his contextual appreciation of Socrates predisposition for coherence, this doesn't exclude the possibility of a 'floating sophistic' inclination that simply adjusts to its interlocutor thus undermining in the bigger picture the notion of knowledge as of universal coherence idealisation, or still maybe Protagoras is just at the lower end of the sophists—

ideal-type-or-individuation) and budding positivists with respect to medieval-scholasticism-pedants—ideal-type-or-individuation (as we can appreciate that the recognition and then censure and then banning of Copernicus’s heliocentric world work or engagement with Galileo’s support of heliocentrism then his persecution for publishing, rather speaks paradigmatically of the covert/underhanded nature of the medieval establishment pedantic disposition as of the implications of ideas undermining medieval dogma as of social-stake-contention-or-confliction) construe of such sophistic/pedantic disinclination as implying notional-discontiguity/epistemic-discontiguity with their prospectively implied metaphoricity; with the consequence that there can’t be common/mutual aposteriorising/intelligising/measuring/logicising as of dialogical-equivalence and intellectual-and-moral-equivalence and inherently so because of the sophists—ideal-type-or-individuation and medieval-scholasticism-pedants—ideal-type-or-individuation inauthentic/unsound apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of respectively non-universalising and non-positivism/medievalism dogma prior relative-ontological-incompleteness-of-reference-of-thought warranting their unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing for the affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking of prospective non-sophistic universalising idealisation and prospective positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising meaningfulness-and-teleology respectively. Likewise, this author’s critique of the spurious institutional-being-and-craft muddlement of our positivism–procrypticism with respect to its structural/paradigmatic implicated undermining of the possibility of futural Being-development/ontological-framework-expansion as of prospective deprocrypticism is not an

idle exercise, and so as of such totalising–self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising
 procrypticism/disjointedness-as-of-reference-of-thought as of direct, indirect and devolving
 undermining of the possibility of futural Being-development/ontological-framework-
 expansion as of prospective deprocrypticism metaphoricity implications and so with respect
 to the social analysis implications of disjointedness-as-of-reference-of-thought associated
 phenomena as reflected in social-stake-contention-or-confliction issues including
 psychopathy and social psychopathy. As of the conflatedness of notional-deprocrypticism
 construal, what underlies the notion of human existential-extirpation-as-of-existential-
 unthought is the idea that human existence is as of ‘human existential-extirpating projection-
 or-anticipation about existence/existence-potency/existential-possibilities as of human
 limited-mentation-capacity construing ‘reference-of-thought—devolving-teleological-
 structure-of-meaningfulness as of implicated-and-explicated reference-of-thought—categorical-
 imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-
 meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-
 notions/notional-referential-notions/articulations/virtue’, and transcendently-complemented
 by ‘human ontological-faith-notion-or-ontological-fideism projection-or-anticipation of this
 human prior relative-ontological-incompleteness-of-reference-of-thought as of human
 existential-unthought’, and thus enabling an epistemic/notional possibility of correspondence
 of human implied meaningfulness-and-teleology with the achievement of
 singularisation/epistemic-immanence/veridical-epistemic-determinism as of prospective
 deprocrypticism ‘inherent centred-totalisation-as-existence’. It is those elements of an
 epistemic/notional possibility of correspondence, as of the totalising–thrownness-in-existence
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising and onto, that together

effectively make human transcendence and the institutionalisation-process possible given that it immanently enables the possibility of successive human prospective relative-ontological-completeness-of-reference-of-thought as of the successive registry-worldviews/dimensions institutionalisations. In other words, it is human ontological-faith-notion-or-ontological-fideism that ultimately ‘vouches’ for every given registry-worldview’s/dimension’s institutionalisation at its uninstitutionalised-threshold for the possibility of a correspondence between human limited-mentation-capacity and the ‘inherent centred-totalisation-as-existence’, as of Being orientation of pursuing-and-attaining ontological-completeness-of-reference-of-thought. It is only such a conflatedness perspective as of notional-deprocrpticism that can articulate a conceptualisation of meaningfulness-and-teleology ontological-performance as of a notional-correspondence to existence/existence-potency/existential-possibilities, thus avoiding totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag misconstrual as of constitutedness. Insightfully with respect to human temporality including postlogism and conjugated-postlogism and as reflected by psychopathy and social psychopathy in our positivism–procrypticism, the conflatedness of notional-deprocrpticism points out that given human limited-mentation-capacity its ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness as of implicated-and-explicated reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue’ as of institutionalisation, is subject at its uninstitutionalised-threshold to human temporality structural/paradigmatic denaturing as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought undermining meaningfulness-and-teleology ontological-performance due to lack of social universal-transparency. This arises because fundamentally as of notional-

correspondence with existence, an institutionalisation in prior relative-ontological-incompleteness-of-reference-of-thought meaningfulness-and-teleology ontological-performance is ultimately rather vouching of such a notional-correspondence with existence on the basis of ontological-faith-notion-or-ontological-fideism as transcendently-complementing at its uninstitutionalised-threshold the said human limited-mentation-capacity ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness as of implicated-and-explicated reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue’ construed as institutionalisation, as the latter’s categorical-imperatives/axioms/registry-teleology can be denaturing as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as of their wooden-language—of-temporal-mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives by the various temporalities in makeupness at its uninstitutionalised-threshold. This latter is only undermined driven by ontological-faith-notion-or-ontological-fideism as of prospective human limited-mentation-capacity prospective relative-ontological-completeness-of-reference-of-thought ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness as of implicated-and-explicated reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue’ construed as prospective institutionalisation, by its greater social universal-transparency. Again, the latter institutionalisation’s meaningfulness-and-teleology ontological-performance is equally vouched by transcendently-complementing ontological-faith-notion-or-ontological-fideism at its given uninstitutionalised-threshold, as its own categorical-imperatives/axioms/registry-

teleology can also be denaturing as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as of their wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives. The overall implication here as implied by ontological-aesthetic-tracing is that only a contextual ontologically contiguous transitioning construal of meaningfulness-and-teleology as reflected as of the conflatedness of notional-deprocrypticism can reveal-the-ontological-veridicality of such inherent systemic beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought perversion-and-derived-perversion-of-reference-of-thought-as-of-human-limited-mentation-capacity-induced-temporal-to-intemporal-Binarity-of-categorical-imperatives/axioms/registry-teleology associated with every institutionalisation in prior relative-ontological-incompleteness-of-reference-of-thought since it ultimately depends on ontological-faith-notion-or-ontological-fideism to transcendently-complement its categorical-imperatives/axioms/registry-teleology at its uninstitutionalised-threshold for upholding intemporality-as-of-ontology that reflects the ‘inherent centred-totalisation-as-existence’. Hence the deprocrypticism registry-worldview/dimension institutionalisation as notionally construed as in full fulfilment of transcendently-complementing ontological-faith-notion-or-ontological-fideism, as of human ontological-dementation/dialectical-dementation contextual ontologically contiguous transitioning construal of meaningfulness-and-teleology ontological-performance that anticipates and accounts for human inherent intemporality and temporality, purports to avoid wrong elevation of temporality in madeupness ‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’ and wrong degradation of intemporality in conviction ‘reference-of-thought—elevated-devolving-as-of-prospective-institutionalisation’, given the inherently confounding ontological-veridicality of human potent beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. Broadly speaking

thus, the projective-totalitative-implications of prospective relative-ontological-completeness-of-reference-of-thought as of human temporal-to-intemporal mental-dispositions in social-stake-contention-or-confliction implies that it is naïve to conceive of a ‘neuter framework of reference-of-thought putting the temporal-and-intemporal mental-dispositions as of the same axiomatic teleological projection’ as in effect as of conflatedness this simply wrongly elevates temporal/shortness-of-register-of-meaningfulness-and-teleology mental-dispositions degraded-devolving-as-of-uninstitutionalised-threshold and wrongly degrades the intemporal/longness-of-register-of-meaningfulness-and-teleology mental-disposition elevated-devolving-as-of-prospective-institutionalisation; as the former is in reality denaturing of categorical-imperatives/axioms/registry-teleology beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought while the latter is upholding categorical-imperatives/axioms/registry-teleology for intemporal-preservation-entropy-or-contiguity-or-ontological-preservation. Actually such an ordinary mental-reflex of a ‘neuter framework of reference-of-thought putting the temporal-and-intemporal mental-dispositions as of the same axiomatic teleological projection’ when it comes to social-stake-confliction-or-contention is only valid as of ‘mutual conceptualisation as of a given institutionalisation with a common ontological-reference-of-thought’ wherein it is then strictly a matter of logical-processing-or-logical-implication in determining ontological-veracity. But then at such an institutionalisation’s uninstitutionalised-threshold, there is a relative variance of ontological-completeness-of-reference-of-thought as of the prospective relative-ontological-completeness-of-reference-of-thought in intemporality entailing the prospective institutionalisation and the prior relative-ontological-incompleteness-of-reference-of-thought in temporality entailing the uninstitutionalised-threshold; thus implying a relative variance in such intemporal and temporal teleological projection respectively as of elevated-devolving-as-of-prospective-institutionalisation and

degraded-devolving-as-of-uninstitutionalised-threshold in determining ontological-veracity. In this sense we can garner that it is inappropriate to imply a 'neuter framework of reference-of-thought putting the temporal-and-intemporal mental-dispositions as of the same axiomatic teleological projection' and so, as of an uninstitutionalised-threshold and the prospective institutionalisation; given the variance of temporality rather as respectively in recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism-or-medievalism, and prospectively procrypticism/disjointedness-as-of-reference-of-thought with intemporality rather as respectively in base-institutionalisation, universalisation, positivism and prospectively deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought. The bigger point here being that the very notion of transcendence as of conflatedness actually construes of more profound categorical-imperatives/axioms/registry-teleology that override the prior categorical-imperatives/axioms/registry-teleology as failing to uphold intemporal-preservation-entropy-or-contiguity-or-ontological-preservation', and so as of differing references-of-thought in transversal ontological unintelligibility. Neuterisation of analysis as so articulated is effectively a deficient human mental-reflex as of its naïve predisposition to imply 'equivalence of consideration' without factoring prospective relative-ontological-completeness-of-reference-of-thought projective-totalitative-implications of differentiated axiomatic/reference-of-thought teleological projection as of temporal degraded-devolving-as-of-uninstitutionalised-threshold and intemporal elevated-devolving-as-of-prospective-institutionalisation. The fact of temporal-to-intemporal variance of prospective relative-ontological-completeness-of-reference-of-thought ultimately reflects the fact that the apparent ordinarily assumed 'axiomatic commonness-in-sharedness of human meaningfulness-and-teleology with regards to the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality' is in effect 'only valid as of within an institutionalisation framework', and so as of its implied 'reference-

of-thought—devolving-teleological-structure-of-meaningfulness as of implicated-and-explicated reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue’. This articulated delimitation of ‘axiomatic commonness-in-sharedness of human meaningfulness-and-teleology with regards to the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality’ within only an institutionalisation framework as of reference-of-thought is critical for an ontologically-complete profoundness/depth of ‘phenomenological departure in-its-overcoming-of-neuterisation’ reflected by metaphysics-of-absence as the ‘requisite conflatedness of understanding’, necessarily entailing transcendental implications for ontologically-veridical knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue; as we can appreciate the inherent reality that there isn’t ‘axiomatic commonness-in-sharedness of human meaningfulness-and-teleology with regards to the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality’ between recurrent-utter-uninstitutionalisation and base-institutionalisation—ununiversalisation, between base-institutionalisation—ununiversalisation and universalisation—non-positivism/medievalism, between universalisation—non-positivism/medievalism and positivism—procrypticism, and prospectively between positivism—procrypticism and deprocrypticism! In this case such overcoming of neuterisation with reference to the variance of successive registry-worldviews/dimensions is rather conceived as deneuterising as of the variance in prospective relative-ontological-completeness-of-meaningfulness-and-teleology disambiguation of uninstitutionalised-threshold and prospective institutionalisation, and so reflected as of ontological-aesthetic-tracing as of the conflatedness of notional-deprocrypticism wherein the

uninstitutionalised-threshold reference-of-thought is in relative notional-
 discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-
 ontological-veridicality) to the prospective institutionalisation reference-of-thought in relative
 ontological-contiguity as of the-very-same-totalising-purview-of-construal-as-
 existence/existence-potency/intrinsic-reality/ontological-veridicality; imply a disambiguation
 as of mutual unintelligibility of prospective institutionalisation's reference-of-thought
 soundness-or-authenticity and the uninstitutionalised-threshold's reference-of-thought
 unsoundness-or-inauthenticity. Deneuterising, from a storied-construct perception perspective
 insight, highlights a temporal mental-disposition uninstitutionalised-threshold issue' as of
 beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-
 unthought involving human temporal limited-mentation-capacity at its uninstitutionalised-
 threshold wherein the reference-of-thought as temporal-mental-disposition-is-actually-of-
 presencing-or-totalising-self-referencing-syncretising-forward-facing-self-consciousness-in-
 an-'apparently-elevated'-devolving-as-of-prospective-institutionalisation whereas inherent-
 superseding-existential-reality-unattached-to-its-temporal-limited-mentation-capacity-mental-
 disposition-points-to-its-degraded-devolving-as-of-uninstitutionalised-threshold. Such a
 deneuterising binarity of storied ontologically-flawed-presencing-or-totalising-self-
 referencing-syncretising-forward-facing-self-consciousness-temporal-mental-dispositions and
 storied background of ontologically-veridical-inherent-superseding-existential-reality-
 unattached-to-such-temporal-mental-dispositions portrays how a storied-construct can be
 articulated as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-
 of-existential-unthought 'emphasising exclusively that it is the construal of human
 temporality-to-intemporality limited-mentation-capacity transversal-and-cumulative-
 implications' that accounts for ontologically-veridical human character-and-social-formation-
 dynamics as of both uninstitutionalised-threshold representation and prospective-

institutionalisation representation. Such a storied-construct is ultimately articulated rather as of the implications of the failing to uphold Being as of the temporal-to-intemporal transversality of human limited-mentation-capacity in temporal constitutedness mental-reflexes at presence reference-of-thought, and so reflected by the implied intemporal conflatedness of phenomenological transcendence as of notional-deprocrypticism. We can appreciate the metaphysics-of-absence insight about such a deneuterising storied-construct from the fact that a non-positivism/medievalism or animistic social-setup is ‘not committed in a presencing–or–totalising–self-referencing-syncretising-forward-facing-self-consciousness’ to positivistic/rational-empiricism meaningfulness-and-teleology with regards to occurrences and incidents best explained and dealt with by such positivistic meaningfulness as of the latter’s prospective relative-ontological-completeness-of-reference-of-thought. As such non-positivism/medievalism or animistic social-setup ‘will not be self-effacing as of its ontologically-flawed-presencing–or–totalising–self-referencing-syncretising-forward-facing-self-consciousness-temporal-mental-dispositions as-if-always-in-a-state-of-institutionalisation, failing to psychoanalytically project about its uninstitutionalised-threshold of non-positivism and the prospective institutionalisation of positivism’. This equally explains how our positivism–procrypticism mental-disposition is construed in deneuterising from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism perspective ‘as not self-effacing as of its ontologically-flawed-presencing–or–totalising–self-referencing-syncretising-forward-facing-self-consciousness-temporal-mental-dispositions as-if-always-in-a-state-of-institutionalisation, failing to psychoanalytically project about the uninstitutionalised-threshold of its procrypticism/disjointedness-as-of-reference-of-thought and the prospective institutionalisation of deprocrypticism’. This is actually the ontologically-veridical phenomenological transcendental framework for construing/conceptualising human temporal

character and social formation mental-dispositions as of uninstitutionalised-threshold and prospective-institutionalisation based on the dynamics of limited-mentation-capacity, unlike a naïve neuterising mental-reflex that by its totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag fails to attain such a conflatedness as of notional-deprocrypticism deneuterising insight. Central and critical to achieving such a deneuterising analysis in grasping the full and complete possibilities of ontologically-veridical construal of human meaningfulness-and-teleology given human temporal-to-intemporal mental-dispositions as of prospective institutionalisation and uninstitutionalised-threshold is the notion of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. It is exactly what renders a veridical ontological-escalation or aetiologisation of the human condition possible as the ontological-aesthetic-tracing of conflatedness as of notional-deprocrypticism. It is most critical because at any registry-worldview/dimension, human self-consciousness is a presencing–or–totalising–self-referencing-syncretising-forward-facing-self-consciousness mental-reflex as of being-only-in-institutionalisation-and-hence-only-of-a-meaningfulness-and-teleology-that-is-intemporal while defectively ignoring-and-undermining the veridicality of uninstitutionalised-threshold-and-its-assorted-and-conjugated-temporal-meaningfulness-and-teleology such that transcendence is always perceived as unnatural when totalising–self-referencing-syncretising, in the sense that ‘it-is-others,-as-of-the-prior-registry-worldviews/dimensions,-that-have-an-uninstitutionalised-threshold-and-the-notion-of-transcendence-is-only-relevant-to-them-as-the-current-presence-is-normal’. The implications of such human presencing–or–totalising–self-referencing-syncretising-forward-facing-self-consciousness mental-reflex as it overlooks human uninstitutionalised-threshold points to the reality that the implied institutionalisation ‘projected reflex of universalised conviction towards meaningfulness-and-teleology’ while a social psychological reference is actually not ontologically-veridical as of human practical

reality given lack of social universal-transparency. Such that with regards to social-stake-contention-or-confliction possibilities the social psychological reference as of wrongly implied institutionalisation ‘projected reflex of universalised conviction towards meaningfulness-and-teleology’ is an abstract social constraint to human temporal mental-dispositions. In practicality such human temporal mental-dispositions involve ‘rationalising threads of part-conviction/part-madeupness perception-and-relation to meaningfulness-and-teleology’ as of social-stake-contention-or-confliction social-functioning-and-accordance temporal constraints of postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of ‘reference-of-thought-devolving-level difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism reflected as the divergent ontological-performances of the ontological-aesthetic-tracing’, and so as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought reflecting uninstitutionalised-threshold Being underdevelopment; wherein with specific regards to a postlogism-slantedness/psychologism mental-disposition and less and less so as of temporal exacerbation/opportunism/affordability, such instigated part-conviction is rather as of a relevant generalised social projection as ‘wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of conviction’ in relevant social engagement not perceived as of critical social-stake-contention-or-confliction as providing a ‘conviction credibility backdrop’ for subsequent targeted madeupness mental-disposition in relation to specific social engagements perceived as of critical social-stake-contention-or-confliction. Effectively, such part-conviction/part-madeupness with respect to pertinently-perceived social-stake-contention-or-confliction contexts arises due to ‘beyond-the-consciousness-awareness-teleology-in-

existential-extirpation-as-of-existential-unthought' constraint of human limited-mentation-capacity as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor such that this induces as of various existential-instantiations 'ontologically-flawed meaningfulness-and-teleology ontological-performance', subpar to ontologically-veridical meaningfulness-and-teleology ontological-performance as fundamentally underscored by the prospective institutionalisation. Thus this determines a consequential 'dynamic beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought limited-mentation-capacity constraint' as reflected from a 'notional-deprocripticism-referentialism-as-of-its-nonascriptivity backdrop-for-the-ontologically-veridical-construing' of 'temporal-to-intemporal individuations meaningfulness-and-teleology and actions of individuals and the collective-social as of their varying-existential-instantiations-mental-dispositions-ontological-performance or their characterisations-as-of-varying-existential-instantiations', as fundamentally underscored by the implied uninstitutionalised-threshold reference-of-thought, wherein such temporal thresholding neuterisation with regards to ontologically-veridical meaningfulness-and-teleology reflects Being-underdevelopment; and so from the 'deepest phenomenological transcendental-point-of-departure handle as of the notional-conflatedness of notional-deprocripticism deneuterising—referentialism' as of metaphysics-of-absence insight that ontology's-directedness-as-Being lies with Base-institutionalisation institutionalisation over Recurrent-utter-uninstitutionalisation uninstitutionalisation presencing—or—totalising—self-referencing-syncretising-forward-facing-self-consciousness, it lies with Universalisation institutionalisation over Base-institutionalisation—ununiversalisation uninstitutionalisation presencing—or—totalising—self-referencing-syncretising-forward-facing-self-consciousness, it lies with Positivism institutionalisation over Universalisation—non-positivism/medievalism

uninstitutionalisation presencing—or-totalising-self-referencing-syncretising-forward-facing-self-consciousness, and it lies prospectively with Deprocripticism institutionalisation over our Positivism—procripticism presencing—or-totalising-self-referencing-syncretising-forward-facing-self-consciousness. This operantly defines procripticism/disjointedness-as-of-reference-of-thought as beyond just the construal of new supposedly intemporal categorical-imperatives/axioms/registry-teleology of the prospective institutionalisation to pre-empt the temporally denaturing categorical-imperatives/axioms/registry-teleology of the prior institutionalisation, but rather the deneuterising construal of the very ‘limited-mentation-capacity as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor as the beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought constraining dynamism’ behind the denaturing of categorical-imperatives/axioms/registry-teleology in the very first place; conceptualised henceforth as the very categorical-imperatives/axioms/registry-teleology for intemporal-preservation-entropy-or-contiguity—or-ontological-preservation as of the Deprocripticism registry-worldview/dimension institutionalisation as of its implied notional-deprocripticism. Overall, the fact is that given that what is most relevant to the individual is the practicality as of their ‘rationalising threads of part-conviction/part-madeupness perception-and-relation to meaningfulness-and-teleology’ over just abstract universal propositions, when it comes to social-stake-contention-or-confliction social-functioning-and-accordance constraints such temporal part-conviction/part-madeupness mental-dispositions tend to be ultimately translated decisively onto issues of public repercussions like corruption, mismanagement, nepotism, etc. It is very much naïve to imagine that as of such uninstitutionalised-threshold as of Being/ontological-framework-expansion underdevelopment, individuals in positions of social-stake-contention-or-

confliction with respect to upholding/failing probity will simply adhere, at the exclusion of engrained-habits-and-mental-dispositions, to mere propositions of probity rather than in the face of weak-institutional-constraints-and-penalties to perceive such universal propositions as mere linguistic appendages of relative practical insignificance. The notion of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought is the effective and credible deneuterising enabling articulation that grasps such an ontologically flawed mental-reflex that recurrently permeates consciously and unconsciously human phenomenological mentation, as it ‘credibly’ grasps-and-accounts-for, without resorting to any neuterising, the full and complete possibilities of human mental-dispositions as of the exclusive dynamics of human limited-mentation-capacity across all registry-worldviews/dimensions involving the conjugation of the intemporal/longness-of-register-of-meaningfulness-and-teleology individuation and temporal/shortness-of-register-of-meaningfulness-and-teleology individuations of postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of ‘reference-of-thought-devolving-level difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism reflected as the divergent ontological-performances of the ontological-aesthetic-tracing’. Ultimately, the notion of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought given its psychoanalytic-unshackling as of prospective deprocrylicism transcendence, points to a self-consciousness that should rather come to terms with the reality of human limited-mentation-capacity dynamics as of temporal-to-intemporal mental-dispositions resolved beyond just the notion of categorical-imperatives/axioms/registry-teleology but rather their protraction as of ontological-faith-notion-or-ontological-fideism conflatedness of Being as implied as of

deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought. The issue of Being-development/ontological-framework-expansion or Being underdevelopment is associated with that of the construal of knowledge as organic-knowledge or mechanic-knowledge respectively; with the latter construed as of the ‘mere effecting possibilities of knowledge’ without a coherence/contiguity with the ‘knowledge inventing’ mental-disposition as of ontological-faith-notion-or-ontological-fideism behind the given knowledge, as implied with organic-knowledge. It is such a mechanical-knowledge as of ‘temporal/shortness-of-register-of-meaningfulness-and-teleology mental-dispositions towards the mere effecting possibilities of the knowledge’ that induces the forgetting of Being construed as ontology’s-directedness-as-Being, by undermining the ontological-faith-notion-or-ontological-fideism upholding of intemporal-preservation-entropy-or-contiguity-or-ontological-preservation that is behind organic-knowledge. Human presencing-or-totalising-self-referencing-syncretising-forward-facing-self-consciousness temporal mental-dispositions as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought are all too ready to construe of the comprehensiveness of knowledge as mere effecting possibilities of knowledge at the given institutionalisation’s uninstitutionalised-threshold in temporal/shortness-of-register-of-meaningfulness-and-teleology terms-as-of-axiomatic-construal as of the plainly implied opportunism with little consideration of the projective intemporal value dispositions behind the ‘knowledge inventing’ and its organic preservation. Thus the institutionalisation process arises exactly to ensure deferential-formalisation-transference second-naturing of knowledge as of organic-knowledge comprehensiveness. The following is enlightening in this regard. [For what it takes to get a medieval as non-positivistic mindset/reference-of-thought into a positivistic mindset/reference-of-thought, that is, suppose for instance where in a medieval social-setup an accusation of witchcraft is demonstrated by an outsider from a positivistic social-setup to

be incorrect and unsound to the approval of all in that social-setup, that outsider understanding fundamentally that the medieval setup by its ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought is in a state of totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of a medieval worldview will grasp that that unique demonstration of medieval-postlogism/perversion-of-reference-of-thought (as accusation of witchcraft) is not to be construed naively as an adequate basis for a new logical-processing-or-logical-implication as ‘conviction/prelogical re-engaging mental-reflex’ that re-engages with non-positivistic/medieval mindset/reference-of-thought, given the possibilities of further accusations of witchcrafts or by-and-large the vices-and-impediments potentially arising from such a non-positivistic/medieval worldview as of the ‘local community dynamism of individual interests involved’ that endemises and enculturates notions-and-accusations-of-sorcery. It is rather the cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure transforming of the non-positivistic/medieval mindset/reference-of-thought into a positivistic mindset/reference-of-thought that is ontologically-speaking to be construed as the structural/paradigmatic resolution of the vices-and-impediments arising from a non-positivistic/medieval worldview with respect to such notions-and-accusations-of-sorcery. The same applies with respect to our positivism–procrypticism worldview and futural Being-development/ontological-framework-expansion as of prospective deprocrypticism worldview.]. We can appreciate such metaphysics-of-absence insight as of say in a situation of cultural diffusion the requirement that a recurrent-utter-uninstitutionalisation social-setup opportunistically grasping mere effecting possibilities of base-institutionalisation knowledge, as of relative convenience to individuals, are much more better off equally coming into terms institutionally with the ontological-faith-notion-or-ontological-fideism induced intemporality behind the ‘inventing

of the base-institutionalisation culturally diffused knowledge' for an optimum accrual of the Being-development/ontological-framework-expansion of recurrent-utter-uninstitutionalisation; that is, based on base-institutionalisation's 'rulemaking-over-non-rules' enabling the superseding of recurrent-utter-uninstitutionalisation vices-and-impediments as of its 'non-rules-as-impulsive-or-accident-ed-or-random-mental-disposition'. Such conceptualisation extends to all registry-worldviews/dimensions prospective institutionalisation including our positivism–procrypticism prospective transcendental emancipation to deprocrypticism. Underlying Being-development/ontological-framework-expansion is the construal of knowledge in both its 'immediate, cause-and-effect and non-blurry practical and scientific knowledge' and the 'detached, contemplative and blurry human social-construct of knowledge'. In many ways as of human temporal/shortness-of-register-of-meaningfulness-and-teleology mental-reflex, the former is structurally/paradigmatically associated with relatively immediate-constraining ontological-primemovers-totalitative-framework that quickly portrays Being-development/ontological-framework-expansion by its mere relative disambiguation effectiveness of 'ontologically-veridical knowledge agents' over 'ontologically-flawed knowledge agents'. For instance as of the ontological-faith-notion-or-ontological-fideism induced intemporal/longness-of-register-of-meaningfulness-and-teleology positivism/rational-empiricism mental-disposition behind the articulation of Newtonian mechanics inducing its mere effecting possibilities of knowledge, the inherent possibilities of inventing things on this positivism/rational-empiricism knowledge intemporal value reference inherently undermines the pertinence of any other supposed knowledge value reference, like a mystical knowledge construal, of the very same physics totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality, such that their inherent contrast disambiguates what is of Being-development/ontological-framework-expansion from what is of Being underdevelopment. But then this 'immediate, cause-and-

effect and non-blurry practical and scientific knowledge' is just one aspect of Being-development/ontological-framework-expansion as its mere effecting possibilities of knowledge however effective do not exist in a vacuum but rather within the 'detached, contemplative and blurry human social-construct of knowledge' which is the complementary background for Being-development/ontological-framework-expansion; as we can appreciate that despite the positivistic inclinations of the Copernicuses, the Galileos and the Newtons, the scientific advances that ultimately took hold arose because those budding scientists had a sense that the very 'detached, contemplative and blurry human social-construct of knowledge' background had to be superseded as of its scholasticism and mysticism underlying knowledge background for a positivism/rational-empiricism knowledge background to take hold as transcendental-enabling/existence-potency not only to science but transcendental-enabling/existence-potency as well to the open society equally required for the sound functioning of science. It is this dynamic relationship as of 'immediate, cause-and-effect and non-blurry practical and scientific knowledge' and 'detached, contemplative and blurry human social-construct of knowledge' that is behind Being-development/ontological-framework-expansion with respect to the prospective registry-worldview/dimension as resolving the vices-and-impediments of the prior registry-worldview/dimension. But then no matter the succession of institutionalisations as successive Being-development/ontological-framework-expansion, there is an ever present issue of Being underdevelopment as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor wherein institutionalising categorical-imperatives/axioms/registry-teleology are always subject at uninstitutionalised-thresholds to their denaturing as of their wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives, as of

temporal failing to uphold intemporal-preservation-entropy-or-contiguity-or-ontological-preservation. Hence Being-development/ontological-framework-expansion given human limited-mentation-capacity is rather upheld by ontological-faith-notion-or-ontological-fideism as of intemporal-preservation-entropy-or-contiguity-or-ontological-preservation wherein the abstract intemporal/longness-of-register-of-meaningfulness-and-teleology behind the prior registry-worldview institutionalisation should equally be reflected as of prospective registry-worldview institutionalisation, and involving the requisite deferential-formalisation-transference second-naturing of knowledge as organic-knowledge. We can appreciate the latter point in the sense that with the development of various positivistic scientific and knowledge fields, the knowledge agents weren't naïve to imply that the 'normal social temporal-to-intemporal mental-dispositions as of averaging-of-thought' are appropriate framework for engaging their subject-matter, as they rather promoted formal societies and adopted their specific jargons to ensure that the intemporal value reference mental-dispositions behind their respective 'knowledge inventing' was the institutional mental-disposition for engaging with the knowledge formally or as of second-natured education practically available to everyone interested, and so while alienating and considering general social averaging-of-thought as improper and unqualified. This was to avoid a circularity of averaging-of-thought undermining of the intemporal-projection of their specific knowledge, as they contribute in overall Being-development/ontological-framework-expansion. The point here is that at uninstitutionalised-thresholds the idea of 'equal opinionatedness' doesn't apply by the mere fact that knowledge of intrinsic-reality itself doesn't arise by averaging-of-thought but rather ontological-pertinence, and the point of the institutionalisation process as knowledge-led is to harness ontological-pertinence and not averaging-of-thought, thus explaining deferential-formalisation-transference as of institutional percolation-chanelling. This point is central and critical to the very notion of society-as-social-construct, as society is

caught between the notion of sovereignty as-allowing-basic-level-of-universal-individual-and-collective-self-affirmation-striving-for-social-equality and the notion of knowledge as-of-selective-construal-of-social-value-and-institutional-hierarchisation-as-of-ontological-primemovers-totalitative-framework-overriding-social-equality-for-the-sake-of-individual-and-social-emancipation-as-of-efficient-ontological-performance-implications. The implication of this dilemma is the reality that society is always subpar to a knowledge social determination as well as subpar to a sovereignty social determination. This dilemma is unavoidable by the very implications of a society: every social-setup as a conventional-construct can only be held together in the long-term as of its requisite given registry-worldview's/dimension's institutionalisation-level of minimally-expected basic conscious-adherence-at-best or token-adherence-at-worst to the said institutionalisation-level's reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology with regards to meeting a basic level of individuals and social existential-possibilities expectations; such that the notions of knowledge and sovereignty can only be 'socially effective' within this articulated framework as enabled by 'social universal-transparency'. This articulation can be elucidated more explicitly in cases of cultural diffusion between societies of differing institutionalisation level as such cultural diffusion isn't by a simplistic institutionalisation knowledge-level transference, but involves a mutual sense of sovereign selectivity and recognition among the societies, however the drive for cultural diffusion; thus allowing for 'acculturating-indigenising-pidginising transitioning settings and their social constructions as of totalising-self-referencing-syncretising' prior to eventual prospective relative-ontological-completeness-of-reference-of-thought accommodation. This is equally the knowledge and sovereignty dynamics that prevails within any given society. Thus, knowledge can effectively and efficiently be pushed forward but rather through an exercise of increasing 'social

universal-transparency’ thus enabling ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ associated with Being-development/ontological-framework-expansion. However, all along this institutionalisation process a suboptimal relation between knowledge and sovereignty undermines Being-development/ontological-framework-expansion as of various pertinent social manifestations: – wherein sovereignty is affirm over knowledge as ‘supposedly being knowledge’ by a culture of mere social-aggregation-enabling of temporal-to-intemporal hotchpotch opinionatedness, notwithstanding the underlying transcendental-enabling/existence-potency in formal institutional deferential-formalisation-transference and percolation-channelling, with the result that beyond the underlying implied institutionalisation-level such a social-aggregation-enabling hotchpotching opinionatedness culture tends to critically and decisively inform individual and collective thought and action in a manner that is suboptimal to intemporality-as-ontology as of the manifestation of such a temporal-to-intemporal hotchpotching culture in the extended-informality that permeates even formal institutions; – wherein by exploiting of temporal mental-dispositions as of individuals and the collective-social sovereignty, knowledge is undermined by wrongly implying the pertinence of social-aggregation-enabling construed as ‘exploitation of sovereignty’/mobbishness as of ‘intellectual institutional-being-and-craft self-serving’ in lieu of upholding institutionalisation, including the tendency to degrade knowledge conceptualisations into popular frameworks of knowledge appraisal thus subverting institutional deferential-formalisation-transference rigorous knowledge framework as of their transcendental-enabling/existence-potency; – the ontologically-flawed articulation of knowledge by an intellectual disposition akin to wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of

reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-
aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology undermining
knowledge as of its organic true nature implied by ontological-faith-notion-or-ontological-
fideism behind prior ‘knowledge inventing’ and prospective ‘knowledge inventing’, and so as
of intellectual institutional-being-and-craft; – ultimately the very paradox of human
presencing–or–totalising–self-referencing-syncretising-forward-facing-self-consciousness
means that the human sovereign psyche is one that is geared to construe of ‘presence as all-
encompassing meaningfulness-and-teleology value construct’ such that the transcendental
implications of knowledge by mental-reflex are construed as of incrementalism-in-relative-
ontological-incompleteness to presence, rather than as of totalising–renewing-realisation/re-
perception/re-thought of presence construed as of prospective relative ontological-contiguity
over presencing-as-prior relative notional-discontiguity/epistemic-discontiguity. However
despite this knowledge and sovereignty dilemma associated with Being-
development/ontological-framework-expansion, the insight about human totalising–self-
referencing-syncretising/circularity/interiorising/akrasiatic-drag as of self-referencing and
syncretising-effecting intemporal implications means that the requisite intemporal/longness-
of-register-of-meaningfulness-and-teleology psychoanalytic-unshackling positive-
opportunism can cross-generationally be induced for Being-development/ontological-
framework-expansion despite the inherent circular distractiveness of temporality, and
ultimately so as enabled by ‘social universal-transparency’. The above analysis point out that
transcendental knowledge in particular involves more than just knowledge as a grounded
construct but as well an understanding of how such knowledge is instigated in society as part
and parcel of the knowledge construed as organic-knowledge; given that the social-construct-
as-society is not necessarily of immediate receptivity and is of a suboptimal disposition to
such transcendental-enabling/existence-potency implications that are not priorly as of

grounded constructs of knowledge. This will explain why the mere articulation of positivism/rational-empiricism meaningfulness-and-teleology constructs of knowledge wasn't enough in undermining medieval mental-dispositions, and the persistent initiatives of the Copernicuses, Galileos, Rousseaux, Diderots, etc., were not vague actions but informed by an intuition about the nature of human society and how it develops given the inherently untransformable human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor as of human limited-mentation-capacity. Thus as of the institutionalisation process, crucially the issue of ontological-veracity is only half the problem of knowledge, with the other half being the grasp of the underlying sovereignty and knowledge dynamics as of eliciting 'social universal-transparency'. As it is the latter that induces that social positive-opportunism for deferential-formalisation-transference and institutional percolation-channelling, as of social deferential attribution of power for the beneficial effect of knowledge as empowering various institutional domains. Further, as implying the superseding of entrenched grounded knowledge as of its psychoanalytic-unshackling implications and in destabilising the underlying existential reference-of-thought, transcendental knowledge is of a circular but consistent exercise of totalising—renewing—realisation/re-perception/re-thought, and so due to the 'existential and emotive commitments' it is involved in undoing with regards to the implied prior notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality) reference-of-thought and introducing the prospective ontological-contiguity reference-of-thought as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality. Consider in this regard, that the 'theory-of-relativity-together-with-quantum-mechanics axiomatic-construct' as of prospective ontological-contiguity is more than just a reification gesturing of its very own axiomatic-

construct affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking but extends to encompass a de-assertion/dementing/unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing of ‘traditional classical mechanics axiomatic-construct’, at the threshold where it supersedes ‘traditional classical mechanics axiomatic-construct’, as being in notional-discontiguity/epistemic-discontiguity-⟨as-of-undefined-or-undecidable-threshold-of-ontological-veridicality⟩ when analysed as of ‘traditional classical mechanics axiomatic-construct’, and so with regards to ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’.

The ontological veridicality here is that such ‘double-gesture reification as the prospective axiomatic affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking together with the prior axiomatic de-assertion/dementing/unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing’ implied as of the non-presencing in transcendence-and-sublimity is not to be construed as an incrementalism-in-relative-ontological-incompleteness as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity of the superseded presencing, but is rather a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating in subsuming ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’.

While the emotional involvement and sense of ‘existential ego undermining’ involved in such a transcending reification gesturing of axiomatic-constructs as of the very same totalising-

devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-
 veridicality/existential-reality is relatively trite as occurring within the same registry-
 worldview/dimension reference-of-thought as of the positivistic/rational-empiricism
 meaningfulness-and-teleology mindset as well as its distance rather with respect to physical
 reality, such a transcending reification gesturing as of the grandest axiomatic-constructs
 having to do with consciousness with regards to the ‘very reference-of-thought itself’ wherein
 the prospective ontological-contiguity reference-of-thought as
 deprocrypticism/disjointedness-as-reference-of-thought implies a transcending reification
 gesturing that not only affirms deprocrypticism prospective registry-worldview/dimension
 but in that affirmation/projection/assertion/dueness-validating-
 logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking as of its
 ontological-completeness-of-reference-of-thought de-asserts/dements our positivism—
 procrypticism registry-worldview/dimension, this will elicit an existential and emotional
 involvement that will rather convert into a circular neuterisation of deprocrypticism by a
 mental-complex avoiding such emotional discomfort and sense of existential ego
 undermining as is the case with all uninstitutionalised-thresholds/uninstitutionalised-
 thresholds with respect to their prospective institutionalisations. This explains why it is not a
 fundamental contradiction as of human—aporia/undecidability/dilemma/ought-
 indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-
 dispositions—existentialism-form-factor at uninstitutionalised-thresholds that the
 positivistic/rational-empiricism initiatives of such enlightenment thinkers like Galileo,
 Descartes, Diderot, etc. were met with counteracting reactionary views, and as it further
 elicits ontologically-flawed ‘uninstitutionalised-threshold by prospective institutionalisation
 dialogical-equivalency’. This can’t be the case because dialogical-equivalency can only arise
 where there is ‘common reference-of-thought’ whereas a state of institutionalisation as of

prospective relative-ontological-completeness-of-reference-of-thought is veridically in an institutionalising/enlightening/educating exercise relative to a state of uninstitutionalised-threshold as of prior relative-ontological-incompleteness-of-reference-of-thought, and not such a flawed notion of dialogical-equivalency. We can appreciate even within a same reference-of-thought like our positivism/rational-empiricism registry-worldview/dimension that there is no dialogical-equivalency between the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ in ontological-contiguity and ‘traditional classical mechanics axiomatic-construct’ in notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality) but for the former’s enlightening the latter’s undefined-or-undecidable-threshold-of-ontological-veridicality. This insight reflects the reality of transcendence across the institutionalisation process associated with Being-development/ontological-framework-expansion, wherein uninstitutionalised-threshold mental-reflexes of presencing—or-totalising—self-referencing-syncretising-forward-facing-self-consciousness in their incrementalism-in-relative-ontological-incompleteness as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity tend to perpetuate the representation of prospective institutionalisation as nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) in an ontologically-flawed dereification gesturing of neuterisation, rather than maximalising-recomposuring-for-relative-ontological-completeness/transvaluating as of totalising—renewing-realisation/re-perception/re-thought implied as of prospective institutionalisation’s deneuterising. It should thus be noted that such a transcendental exercise is not about passing the test as of the judgment of uninstitutionalised-threshold mental-reflexes of presencing—or-totalising—self-referencing-syncretising-forward-facing-self-consciousness which is ‘ontologically flawed and wanting’ but rather is as of a maximalising-recomposuring-for-relative-ontological-

completeness/transvaluating intemporal-projection transcendental-enabling/existence-potency for prospective institutionalisation relative to such presencing—or-totalising—self-referencing-syncretising-forward-facing-self-consciousness that circularly reinstitute the uninstitutionalised-threshold temporality as if intemporal in incrementalism-in-relative-ontological-incompleteness as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. In other words prospective institutionalisation arises as of ‘transcendental-reasoning-of-event-as-prospective-ontology-origination’ which as of prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought is introducing a ‘new-as-of-the-prospective-institutionalisation ordinary-nontranscendental-reasoning’ that blocks-out/supersedes/de-asserts/dements as of notional-discontiguity/epistemic-discontiguity the ‘prior-or-old-as-now-uninstitutionalised ordinary-nontranscendental-reasoning’; with the implication that our ‘procrypticism/disjointedness-as-of-reference-of-thought reasoning’ is not admissible to prospective ‘deprocrypticism/pre-empting-disjointedness-as-of-reference-of-thought reasoning’ and so from the moment of the event-construed-as-the-prospective-ontology-origination of deprocrypticism, just as ‘non-positivistic medieval reasoning’ is not admissible to prospective ‘positivism reasoning’ from the moment of the event-construed-as-the-prospective-ontology-origination of positivism, etc., across the successive institutionalisations of the institutionalisation process; and so as of notional-discontiguity/epistemic-discontiguity of the uninstitutionalised-threshold and the prospective institutionalisation. Such a temporal/shortness-of-register-of-meaningfulness-and-teleology ontologically-flawed predisposition in circularly striving to reassert the ‘prior-or-old-as-now-uninstitutionalised ordinary-nontranscendental-reasoning’ over the ‘transcendental-reasoning-of-event-as-prospective-ontology-origination’ is fundamentally due to the paradigmatic/structural lifetime ‘mental and existential investment’ in the former,

such that by and large it is mostly a crossgenerational transcendence-and-sublimity that fully brings about the adaptation of the induced ‘transcendental-reasoning-of-event-as-prospective-ontology-origination’ as the ‘new-as-of-the-prospective-institutionalisation ordinary-nontranscendental-reasoning’. Such a temporal/shortness-of-register-of-meaningfulness-and-teleology ontologically-flawed circular predisposition arises due to human temporal-dispositions as of Being underdevelopment that tends to lead to the beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought denaturing of knowledge as mechanical-knowledge and undermining organic-knowledge; wherein knowledge is related to as of existential-extirpation-as-of-existential-unthought, that is, knowledge related to as of ‘the mere positive-opportunism it engenders at best’ with little or no cognisance that there is an attitude/mental-disposition/care-and-episteme as of intemporality behind ‘knowledge invention’ that must be preserved and perpetuated as ‘the very core of knowledge’ and so to undermine knowledge denaturing, so-construed as organic-knowledge. Organic-knowledge requires the articulation of meaningfulness-and-teleology rather in nonextirpationary-existential-preempting-of-existential-unthought terms-as-of-axiomatic-construct as the profound-and-complete articulation of knowledge, and as the very attitude/mental-disposition/care-and-episteme behind knowledge that induces the appropriate psychoanalytic-unshackling for its reception. In other words, we can’t seriously contemplate a profound positivistic knowledge engagement with a non-positivistic as animistic or medieval mindset without the idea of priorly eliciting the appreciation-and-adoption of a positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme when contending about any salient positivistic articulations as otherwise all such positivism/rational-empiricism articulations and explaining will be reconstrued circularly in animistic or medieval terms-as-of-axiomatic-construct as of the latter teleologically-degraded prior relative-ontological-incompleteness-of-reference-of-

thought meaningfulness-and-teleology. Likewise meaningfulness-and-teleology articulated as of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought relative to our positivism–procrypticism necessarily requires priorly the requisite apriorising-teleological-elevation-in-ontological-contiguity from positivism–procrypticism’s disjointedness-as-of-reference-of-thought mindset into deprocrypticism’s pre-empting-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care–and–episteme as otherwise such knowledge will be teleologically-degraded in circular positivism–procrypticism disjointedness-as-of-reference-of-thought terms-as-of-axiomatic-construct as of prior relative-ontological-incompleteness-of-reference-of-thought meaningfulness-and-teleology, even though in the latter case our totalising–self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage as metaphysics-of-presence blinds us to appropriately appreciating this given the human mental-reflex of representing any uninstitutionalised-threshold as nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) as of our presencing–or–totalising–self-referencing-syncretising-forward-facing-self-consciousness.

The point here is that the meaningfulness-and-teleology so-construed has to supersede the prior registry-worldview/dimension uninstitutionalised-threshold perspective/framing/reference/horizon for its prospective transcendence-and-sublimity-enabling purpose, even if that implies being temporally unpalatable, given that the fundamental purpose for the underlying aetiologisation/ontological-escalation is of intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm and not temporal extirpatory paradigm. Put another way, for instance, Newtonian physics doesn’t have any inherent meaningfulness-and-teleology as we can appreciate from a positivism/rational-empiricism perspective/framing/referencing/horizon with an animistic social-setup as of the latter’s

attitude/mental-disposition/care-and-episteme underlying its meaningfulness-and-teleology thus requiring the latter's prior apriorising-teleological-elevation-in-ontological-contiguity to a positivism/rational-empiricism attitude/mental-disposition/care-and-episteme 'for the notion of the mutual contemplation of Newtonian physics to even arise'. This speaks of the centrality of attitude/mental-disposition/care-and-episteme with respect to human meaningfulness-and-teleology, as it is what underlies apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of a given registry-worldview's/dimension's institutionalisation reference-of-thought. Attitude/mental-disposition/care-and-episteme as such carries a registry-worldview's/dimension's 'underlying sense of end-teleology/end-purposefulness' and thereof its operative-construct and implicative-construct with regards to meaningfulness-and-teleology. It further implies a 'the human toddling potential' for living-as-of-human-personality-developing, social-projection-institutional-orientations and Being-development/ontological-framework-expansion; with the 'human toddling potential' implying the human potential to develop from a relative-ontologically-flawed to a relative-ontologically-veridical attitude/mental-disposition/care-and-episteme with respect to living-as-of-human-personality-developing, social-projection-institutional-orientations and Being-development/ontological-framework-expansion. This 'human toddling potential' is what enables notional-discontiguity/epistemic-discontiguity induced psychoanalytic-unshackling for grounding meaningfulness-and-teleology prospectively as of the prospective relative-ontological-completeness of non-presencing. The attitude/mental-disposition/care-and-episteme structure is what fundamentally determines mental-states in their 'projection/anticipation of the coherence/contiguity-of-superseding-oneness-of-ontology-as-of-inherent-existence-coherence/contiguity' whether with respect to any individual within any registry-worldview/dimension as well as the registry-worldview's/dimension's overall reference-of-

thought, as of its specific reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology. Thus an attitude/mental-disposition/care–and–episteme can pertinently be defined as the ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ inducing a given specific non-presencing outcome with regards to prospective relative-ontological-completeness-or-incompleteness-of-reference-of-thought as of the construal-as-existence/intrinsic-reality/ontological-veridicality, and establishing-and-upholding the underlying framework of meaningfulness-and-teleology associated with that attitude/mental-disposition/care–and–episteme; and so, whether such a framework is a reference-of-thought as of overall construal-as-existence/existence-potency/existential-possibilities, or within a reference-of-thought like a social projection totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality or specifically with living-as-of-human-personality-developing. For instance, with respect to coming across and living say in an early hunter-gather society with its interpretation of ill-health as of bad omen, we will still maintain an ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ as of the attitude/mental-disposition/care–and–episteme of positivism’s/rational-empiricism’s perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation, at least as of our self-conscious awareness, even as this reflects mutual beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as when we publicly pretend to act otherwise by subscribing to the interpretation within such a social-setup. As construed within a given reference-of-thought, say in our positivism/rational-empiricism reference-of-thought we can further have the conception of the physics or biology or law or literature or

even just entrepreneur or accountant or technician specific attitude/mental-disposition/care-and-episteme, and further at the individual level as of changing attitude/mental-disposition/care-and-episteme with living-as-of-human-personality-developing. Attitude/mental-disposition/care-and-episteme as so-construed is critical fundamentally because the notionally inherent human capacity for aetiologisation/ontological-escalation is directly associated with ‘attitude/mental-disposition/care-and-episteme as dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension to be able to achieve transcendence-and-sublimity’, and so as of intemporality. With regards to living-as-of-human-personality-developing, we can appreciate in the case of a child’s personality development as of its given attitude/mental-disposition/care-and-episteme that it has a poor dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as of its more direct focus on instant-sensations-and-carefreeness requiring that the child is directed to end at successive stages infantile habits as it grows up with an increasing sense of dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension that ultimately involves major stages like schooling, greater social autonomy and responsibility, and developing into an adult with even greater dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as for instance the notion of pleasure is increasingly substituted with that of work-and-pleasure, etc. Such ‘living-as-of-human-personality-developing’ as dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension is construed as the more profound attitude/mental-disposition/care-and-episteme for human optimum living, and so over say an animal-like immediacy attitude/mental-disposition/care-and-episteme of living. With regards to the second-level of social aetiologisation/ontological-escalation associated with ‘attitude/mental-disposition/care-and-episteme dispensing-with-immediacy-for-relative-ontological-

completeness-by-reification/contemplative-distension', for achieving transcendence-and-sublimity; humankind construes of existence as 'more than just plain living as animals' but as enabling for various domains of social projections dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension so-implied across the various registry-worldviews/dimensions, whether in an animistic social-setup involving animistic practices or in the modern social-setup as of our modern practices involving subject-matter specialisms, trade roles, functionaries, arts, research, sports and other activities, etc.; with each involving their specific attitude/mental-disposition/care-and-episteme dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension. The idea being that this provides more existential possibilities by the overall expanded human capabilities available directly or indirectly to fulfil individuals desires and needs. Finally the third-level reflects 'intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications' with Being-development/ontological-framework-expansion, beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, implying specifically a nonextirpationary-existential-preempting-of-existential-unthought attitude/mental-disposition/care-and-episteme as dispensing-with-immediacy-for-relative-ontological-completeness-of-reference-of-thought-by-reification/contemplative-distension thus transcendently enabling the successive registry-worldview's/dimension's ontological-possibilities construed as of human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm; with such dispensing-with-immediacy-for-relative-ontological-completeness-of-reference-of-thought-by-reification/contemplative-distension construed as rejection of existential-extirpation-as-of-

existential-unthought attitude/mental-disposition/care-and-episteme which will imply a stalling of the institutionalisation process as of Being-development/ontological-framework-expansion at the given registry-worldview/dimension, and so-construed as temporal extirpation paradigm. Being-development/ontological-framework-expansion as such implies increasingly more profound-and-complete enabling framework of human emancipation as of technical and existential possibilities arising from prospective relative-ontological-completeness-of-reference-of-thought. We can get an insight of registry-worldviews/dimensions attitude/mental-disposition/care-and-episteme contrast as clarified in the preceding example as of the technical and existential emancipatory possibilities that can be contemplated with a positivism/rational-empiricism attitude/mental-disposition/care-and-episteme in an early hunter-gather social-setup inclined to construe of ill-health as bad omen; and appreciate that the human-subpotency is much more than stalling at any prior relative-ontological-incompleteness-of-reference-of-thought registry-worldview/dimension, and so not only retrospectively but equally prospectively. Thus, an attitude/mental-disposition/care-and-episteme can pertinently be defined as the ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ inducing a given specific non-presencing outcome with regards to prospective relative-ontological-completeness-or-incompleteness-of-reference-of-thought as of the construal-as-existence/intrinsic-reality/ontological-veridicality, and establishing-and-upholding the underlying framework of meaningfulness-and-teleology associated with that attitude/mental-disposition/care-and-episteme. It can be construed with regards to prospective transcendence as a structural/paradigmatic adjunctive-metaphoricity-signification inducing-and-upholding a prospective ‘underlying totalising/circumscribing/delineating signifying-construct as totalising/circumscribing/delineating reference-of-thought-devolving’. In other words, a registry-worldview’s/dimension’s reference-of-thought

apriorising/intelligibilitysetup/measuringinstrument/axiomatising is utterly apprehended decisively by its given attitude/mental-disposition/care-and-episteme as of the ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’. This insight is critical as for instance with appreciating what is implied by futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme by its given specific non-presencing outcome; as we simply have to project/anticipate its ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ implied as of preempting-of-disjointedness-as-of-reference-of-thought construed as thinking as it remains unintelligible to our positivism-procrypticism’s disjointedness-as-of-reference-of-thought reconstrued as of dementing. Attitude/mental-disposition/care-and-episteme ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ is a corresponding disposition for reflecting the ‘incisive-and-intransigent nature of existence as absolute a priori’ to which we can only get in-relative-synchronisation with a corresponding level of projection-or-anticipation/apriorising/intelligibilitysetup/measuringinstrument/axiomatising that as of its relative dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension is the appropriate attitude/mental-disposition/care-and-episteme ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ required for the correspondingly required meaningfulness-and-teleology ontological-performance. Basically, attitude/mental-disposition/care-and-episteme is simply

a reflection of level of deneuterising—referentialism as of the notional-conflatedness of notional-deprocrypticism. Ultimately for living-as-of-human-personality-developing, social-projection-institutional-orientations and Being-development/ontological-framework-expansion, ‘the human toddling potential’ or the human potential to develop from a relative-ontologically-flawed to a relative-ontologically-veridical attitude/mental-disposition/care—and–episteme, can only arise by notional-discontiguity/epistemic-discontiguity induced psychoanalytic-unshackling as of relative-ontologically-veridical attitude/mental-disposition/care—and–episteme ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ over relative-ontologically-flawed attitude/mental-disposition/care—and–episteme, with the latter necessarily having to ascend to the relative-ontologically-veridical attitude/mental-disposition/care—and–episteme for the former’s implied meaningfulness-and-teleology as of its ontological-performance to avail, and so in reflecting the ‘incisive-and-intransigent nature of existence as the absolute a priori’; as we can appreciate this with regards to existence’s relative validation of the positivism/rational-empiricism ‘perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation’ interpretation over recurrent-utter-uninstitutionalisation’s ‘bad omen’ interpretation. Such an ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ has ultimately nothing to do with the deliberate willing of the relative-ontologically-veridical attitude/mental-disposition/care—and–episteme. As we can appreciate that without implying a dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as of a child’s living-as-of-human-personality-developing, the child’s poorly developed attitude/mental-disposition/care—and–episteme will poorly face optimum living of adult life or where such was the case about all human children

then the human species will be no more culturally unique than any other animal. Again, as of human social-projection-institutional-orientations we know that subject-matter, trades and bureaucratic expertise come with a requisite implied attitude/mental-disposition/care-and-episteme in detachment from averaging-of-thought as we know that, everything being equal legitimately, it is the professional electrician as of its assumed-and-unflinching professionally-institutionalised-as-dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension attitude/mental-disposition/care-and-episteme whose workmanship is guaranteed to produce the best and safe outcome for electrical installations; and so dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as of averaging-of-thought dispositions thus expanding human needs and desires possibilities. Likewise, the dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ of a relative-ontologically-veridical attitude/mental-disposition/care-and-episteme as of its prospective relative-ontological-completeness-of-reference-of-thought over a relative-ontologically-flawed attitude/mental-disposition/care-and-episteme is implied for prospective reference-of-thought transcendence-and-sublimity, as of overall human existential and technical emancipation. Basically, while attitude/mental-disposition/care-and-episteme implied with regards to both living-as-of-human-personality-developing and social-projection-institutional-orientations arises as of second-naturing institutionalisation. However, attitude/mental-disposition/care-and-episteme specific instigating of Being-development/ontological-framework-expansion as of prospective relative-ontological-completeness-of-reference-of-thought is originary/event-of-prospective-ontology-origination as of humanity level intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-

for-relative-ontological-completeness/transvaluating paradigm; inducing thereof social institutionalisation second-naturing by way of deferential-formalisation-transference and percolation-channelling. Inherently, the very grounding of Being-development/ontological-framework-expansion attitude/mental-disposition/care-and-episteme is beyond presencing, and actually lies prospectively in existence's non-presencing. The implication here is that as of its very 'nonextirpation-existential-preempting-of-existential-unthought behind the entire institutionalisation process' Being-development/ontological-framework-expansion attitude/mental-disposition/care-and-episteme cannot be contemplated as of second-natured institutionalisation living-as-of-human-personality-developing and social-projection-institutional-orientations attitude/mental-disposition/care-and-episteme in 'existential-extirpation-as-of-existential-unthought' which structurally/paradigmatically 'do not project beyond reference-of-thought as of prospective relative-ontological-completeness-of-reference-of-thought' to grasp prospective existence's non-presencing. Thus with regards to Being-development/ontological-framework-expansion, overall it is the underlying intemporality-or-longness-of-register-of-meaningfulness-and-teleology attitude/mental-disposition/care-and-episteme of successive institutionalisations as associated with the intemporal-as-conviction reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology, rather than temporal-as-token-or-madeupness denaturing of the same reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology, that are responsible for the underlying nonextirpation-existential-preempting-of-existential-unthought behind the entire institutionalisation process; and so construed as of an abstract notion of perpetual/eternising preservation of Being, and so beyond temporality existential-extirpation-as-of-existential-unthought lack of the projecting attitude/mental-disposition/care-and-

episteme for prospective institutionalisations as mainly concerned with the physical human lifespan extirpation framework as absolute reference of meaningfulness-and-teleology 'with little sense of coherence as of Being-development/ontological-framework-expansion', and thus the latter cannot unlike the former be the framework for aetiological/ontological-escalation as of universal implications, and particularly so as of the 'naivety of eliciting mutual temporality as intemporality or eliciting of averaging-of-thought'. This notion of fulfilling a given prospective institutionalisation's requisite attitude/mental-disposition/care-and-episteme underlies the very idea of intellectual-and-moral-inequivalence/non-correspondence as well as dialogical inequivalence/non-correspondence; as where one party does fulfil the attitude/mental-disposition/care-and-episteme of a given institutionalisation's reference-of-thought as of prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought and thus its corresponding meaningfulness-and-teleology, and the other doesn't as of prior relative-ontological-incompleteness. This further explains why epistemic-breaks/epistemic-resetting arise with the successive prospective institutionalisations of the institutionalisation process, wherein for instance the positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme of say a Galileo or Descartes is circularly beyond the contention framework of scholasticism meaningfulness-and-teleology, speaking of the impossibility of logical-congruence between the positivists and scholastics with only the utter dominance of positivism arising as of its ontological-primemovers-totalitative-framework induced positive-opportunism as of scientific, medical, technical advancements, free society, etc. that leads to the crossgenerational collapsing of scholasticism. It is interesting to note here that such positivist scholars were 'never beholden to a convincing exercise with scholasticism but rather with intrinsic-reality/ontological-veridicality', and for which purpose rather opted to create internally-coherent positivist networks and societies for the

perpetuation of positivistic meaningfulness-and-teleology while averting its denaturing by wrongly implying ontological-contiguity with scholasticism. But rather implying notional-discontiguity/epistemic-discontiguity given the latter's flawed paradigm as of prior relative-ontological-incompleteness-of-reference-of-thought. The insight here is that knowledge is not about 'interhuman negotiating or agreeableness' but more critically about a third party validator known as 'intrinsic-reality/ontological-veridicality' which is the transcendental-enabler/existence-potency above the mortals that are humans, and that the exercise of knowledge construction is rather an interhuman transversality/logical-incongruence/mutual-unintelligibility/disambiguated-binarity-of-reference-of-thought-apriorising/intelligibilitysetup/measuringinstrument/axiomatising-as-of-thinking-and-dementing exercise in search for the validation of the 'superior party that is intrinsic-reality/ontological-veridicality as of ontological-primemovers-totalitative-framework', and so beyond institutional-being-and-craft and social-aggregation-enabling averaging-of-thought. Where these latter practices become de rigueur as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought denaturing of the requisite intellectualism required for further Being-development/ontological-framework-expansion, and start undermining knowledge construction as of its intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency, effectively there shouldn't be any compunction as of human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm to overlook them and imply intellectual-and-moral-inequivalence/non-correspondence and/or dialogical inequivalence/non-correspondence in other to preserve genuine knowledge over charlatanism; as such intellectual-bad-faith practices do not speak of 'genuine intellectual disagreement' but undermining of intellectualism basically and do not merit to be elevated

teleologically to the level of intellectual contention because of their underlying knowledge denaturing predisposition. This is critically the case with registry-worldview/dimensional reference-of-thought transcendence implied knowledge given that the old/prior/superseded as of its beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought prior relative-ontological-incompleteness-of-reference-of-thought construes of ‘implied grounding of meaningfulness-and-teleology’ in terms-as-of-axiomatic-construct of presencing while the new/prospective/superseding as of its prospective relative-ontological-completeness-of-reference-of-thought construes of ‘implied grounding of meaningfulness-and-teleology’ in terms-as-of-axiomatic-construct of prospective non-presencing. This brings home the reality that it is inevitable that all uninstitutionalised-thresholds are necessarily ‘paradigmatically/structurally conflicted’, with prospective transversal/logically-incongruence ontological-primemovers-totalitative-framework being the critically fundamental determining arbiter of what will prospectively pass for knowledge rather than the naivety of logical-congruence of interhuman contention at any such uninstitutionalised-threshold; as fundamentally the issues faced by the Descartes, Galileos, Diderots, etc. as of ‘budding positivism/rational-empiricism attitude/mental-disposition/care–and–episteme’ are structurally/paradigmatically fundamentally inevitable as of their articulation within a non-positivism/medievalism scholasticism context. This is the case since at a registry-worldview’s/dimension’s uninstitutionalised-threshold, such a framework of logical-congruence of interhuman contention is structurally/paradigmatically superseded, in the sense that every institutionalisation say for instance scholasticism scholarship has its ‘genuine intellectual engagement framework’ as of its underlying attitude/mental-disposition/care–and–episteme, but then at such at uninstitutionalised-threshold implied by prospective positivism/rational-empiricism such a modern attitude/mental-disposition/care–and–episteme is prospectively implied and so increasingly beyond such a framework of the

logical-congruence of scholasticism interhuman contention; and is reflected in their mutually beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. This is equally reflected with regards to the prospective transcendence implying knowledge proponents, as the very notion of implying a prospective transcendental conceptualisation as of organic-knowledge is one that undervalues the presencing attitude/mental-disposition/care-and-episteme as of its social-stake-contention-or-confliction while the very notion of perceiving highly the meaningfulness-and-teleology within a prior institutionalisation framework is one that is necessarily apprehensive and flatminded to the notion of a prospectively undermining non-presencing transcendence attitude/mental-disposition/care-and-episteme. In addition, the disruptive uninstitutionalised-threshold contextualisation as of such divergent commitments and 'lack of perceived constraining framework of logical-congruence of interhuman contention' further radicalises the human disposition to act temporally beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought institutional-being-and-craft as of perceived vested interest, striving to undermine prospectively implied transcendence meaningfulness-and-teleology as of its attitude/mental-disposition/care-and-episteme. What is then the manifestation of such intellectual undermining which must necessarily be understood as of knowledge-notionalisation required as of the notional-conflatedness of deprocrypticism/pre-emption-of-disjointedness-as-of-reference-of-thought protensive-consciousness? Intellectual-bad-faith as of its charlatanic effect fundamentally involves the undermining at any human uninstitutionalised-threshold of the possibility of intellectually induced social universal transparency; for the ultimate outcome of undermining any such intemporal knowledge deferential-formalisation-transference behind the second-naturing for prospective institutionalisation. Such a beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought undermining exercise is geared towards the

ontologically-flawed apriorising-teleological-elevation-in-ontological-contiguity of social averaging-of-thought and temporal-intemporality social-chainism, on the conation of upholding intellectual-bad-faith contentions; by its deflating of the conception of ontologically-veridical meaningfulness-and-teleology as of human mortals contentions in transversality, wherein the ‘superior party’ of existence/intrinsic-reality/ontological-veridicality is the validator of ontological-pertinence as of concurrent ontological-primemovers-totalitative-framework, and thereof ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ as new reasoning-from-results/afterthought, and so over and above ‘interhuman negotiating or agreeableness’. Thus intellectual-bad-faith as of its charlatanic effect undermines, as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, the articulation of meaningfulness-and-teleology as of prospective maximalising-recomposuring-for-relative-ontological-completeness/transvaluating that could jeopardise pre-established temporal interest, and cultivating rather incrementalism-in-relative-ontological-incompleteness as of prior reasoning-from-results/afterthought in overlooking concurrent ontological-primemovers-totalitative-framework strife to uphold-and-promote the ‘superior party’ which is the non-presencing of existence/intrinsic-reality/ontological-veridicality; with such intellectual-bad-faith rather advancing such an incrementalism-in-relative-ontological-incompleteness accommodating framework for strategically cultivating pre-established temporal interest. Central to such incrementalism-in-relative-ontological-incompleteness is a simplistic, poor and inadequate articulation of the notion of scepticism usurping genuine intellectual scepticism. Such a poor notion of scepticism operates by a spurious relationship with intellectual contentions that is susceptible to legitimise-or-delegitimise arguments however ontologically pertinent or impertinent as of concurrent ontological-primemovers-totalitative-framework, rather as of its commitment to

incrementalism-in-relative-ontological-incompleteness that in many ways could just as well validate averaging-of-thought and temporal-intemporality attitude/mental-disposition/care—and—episteme and their social contentions. As in effect, such intellectual-bad-faith scepticism fails to act as a ‘knowledge-growth-mechanism with regards to the perpetuation of knowledge coherence and pertinence’ as is the case with genuine intellectual scepticism, but is rather geared towards a dogmatic pedantry/mandarinism that usurps the very notion of scepticism, and so as of the naïve implication that proceduralism is the substitute for existence/intrinsic-reality/ontological-veridicality as transcendental-enabling/existence-potency and sublimity. This poor scepticism attitude/mental-disposition/care—and—episteme usurping the pre-established ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, has enframing implications as of the forestalling of prospective ‘concurrent ontological-primemovers-totalitative-framework’ upholding of the primacy of the ‘superior party’ that is existence/intrinsic-reality/ontological-veridicality, and so over mere ‘interhuman negotiating or agreeableness’; as this subsequently undermines intemporal knowledge deferential-formalisation-transference behind the second-naturing for prospective institutionalisation. Rather the attitude/mental-disposition/care—and—episteme of genuine intellectual scepticism is encrusted within the very notion of prospective relative-ontological-completeness of human meaningfulness-and-teleology, given human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination. Such a genuine intellectual scepticism construes of knowledge by its given totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality in terms-as-of-axiomatic-construct of the competing contending construals elicited relative credibility and relative scepticism as of prospective relative-ontological-completeness, thus enabling the upholding of the ‘superior party’ that is existence/intrinsic-reality/ontological-

veridicality, which as of its transcendence-enabling nature brings about prospective human emancipation. While genuine intellectual scepticism rather strives in a comprehensive intellectual credibility and scepticism framework as of prospective relative-ontological-completeness, intellectual-bad-faith scepticism avoids such constraining as it rather emphasises a predisposition for discreet, ‘ontologically unconstrained framework as of prospective relative-ontological-completeness projective-totalitative-implications’ and non-comprehensiveness, that rather allow for selectivity, incompleteness and perfidy passing for genuine intellectual scepticism. Effectively while genuine intellectual transformation involves dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension, a perfidious intellectual-bad-faith scepticism involves eliciting a sense of immediacy and temporality as of averaging-of-thought and temporal-intemporality social-chainism as ‘developed thought’, thus deflating the requisite dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension intemporal detachment/backstep for transcendence-and-sublimity. In this latter respect, and for the possibility of prospective social transcendence and emancipation, social practices at any given period as ‘becoming constructs’ are not inherently ontologically sacrosanct by the fact that these are the outcome of preceding prospective relative-ontological-completeness as of preceding intemporal dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension, and by that very implication this is what carries the possibility of ‘inventing’ as-of-prospective-institutionalisation social practices as of prospective relative-ontological-completeness. Intellectual-bad-faith ad-hoc pretences extolling social practices as of presencing but of a poor conception outside the prospective relative-ontological-completeness behind such social practices ‘inventing’ as-of-prior-institutionalisation and so-implied as of Being-development/ontological-framework-expansion, are but denaturing and down the line equally

undermines prospective relative-ontological-completeness for the further emancipation of human social practices. As such intellectual-bad-faith ad-hoc pretences extolling social practices as of presencing are of the same notional-contiguity/epistemic-contiguity kind that bathe in the averaging-of-thought and temporal-intemporality social-chainism that implied as much about extolling social practices presencing of existential-extirpation-as-of-existential-unthought reasoning-from-results/afterthought attitude/mental-disposition/care—and–episteme of recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism and today’s positivism–procrypticism, with little prospect/opening for prospective transcendence-and-sublimity. Essentially and constructively, all intellectualism as of their intemporal job description as emancipative is to relay in uninhibited/decomplexified terms-as-of-axiomatic-construct the blunt reality of the social as this is the very attitude/mental-disposition/care—and–episteme that empowers prospective social emancipation however socially uncomfortable it may sound; and so beyond habituated totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag. The fact that many that are institutionally anchored may speak otherwise or naively against such a stance doesn’t diminish in any way the ‘natural appropriateness’ of such a job description as of human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm, but rather speaks of a poverty of institutionalisation that creeps into institutional anchors as of their reasoning-from-results/afterthought constructions subject to temporal/shortness-of-register-of-meaningfulness-and-teleology denaturing of reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology. As a result of human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-

dispositions—existentialism-form-factor, the ever present reality of human uninstitutionalised-threshold as reflected successively with recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism, has always implied resolution beyond just reasoning-from-results/afterthought that warrants successive non-presencing as of the reasoning-through/messianic-reasoning of base-institutionalisation, universalisation, positivism and deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought, together construed as of the notional-conflatedness of notional-deprocrypticism. Reasoning-through/messianic-reasoning attitude/mental-disposition/care—and—episteme implicitation arises as of metaphoricity at uninstitutionalised-thresholds where blurry/vague/undeveloped construct of any given ‘totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ is unamenable-or-poorly-amenable to reasoning-from-results/afterthought attitude/mental-disposition/care—and—episteme explicitation of ontological-primemovers-totalitative-framework procedure of transversal-contention-for-determination-of-veridical-meaningfulness. Such reasoning-through/messianic-reasoning attitude/mental-disposition/care—and—episteme ‘implicitation of ontological-primemovers-totalitative-framework’ is as of intemporal solipsistic and intersolipsistic internalisation, construed as more fully articulating the notion of authenticity, in reflecting such uninstitutionalised-threshold impracticable reasoning-from-results/afterthought attitude/mental-disposition/care—and—episteme explicitation of ontological-primemovers-totalitative-framework procedure of transversal-contention-for-determination-of-veridical-meaningfulness. In this regard, reasoning-through/messianic-reasoning is driven as of ontological-faith-notion-or-ontological-fideism intemporal projection, and reflects the fact that however explicated, as of reasoning-from-results/afterthought attitude/mental-disposition/care—and—episteme explicitation of ontological-primemovers-totalitative-framework procedure of transversal-contention-for-

determination-of-veridical-meaningfulness, human meaningfulness-and-teleology is always about *différance/internal-dialectics/difference-deferral* of apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-imperatives/axioms/registry-teleology for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology; so-implied as of the *différance/internal-dialectics/difference-deferral* of the very apriorising/intelligibilitysetup/measuringinstrument/axiomatising totality that is the reference-of-thought (inducing ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications’), and as the reference-of-thought then aposteriorises/intelligises/logicises meaningfulness-and-teleology as of the temporal-to-intemporal ontological-performance *différance/internal-dialectics/difference-deferral* of the totalising/circumscribing/delineating reference-of-thought-devolving, involving existential-instantiation devolved temporal denaturing of the reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology. The implication here is that ontological-faith-notion-or-ontological-fideism is rather about a ‘seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’, but that reasoning-through/messianic-reasoning adduced transcendence prospectively comes out short with the prospective reasoning-from-results/afterthought outcome, and so because of human limited-mentation-capacity at any moment. Thus the successive reasoning-from-results/afterthought outcomes as the logocentric constructs of the successive registry-worldviews/dimensions arrive at their successive reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as of

successive prospective relative-ontological-completeness-of-reference-of-thought, but fail to grasp/capture all the apriorising/intelligibilitysetup/measuringinstrument/axiomatising projective-totalitative-implications about the full-potency of existence as the absolute a priori for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology that can fully reflect human-subpotency existential potential/possibilities of ontological-performance in correspondence with the full-potency of existence in its coherence/contiguity. But then, ontological-faith-notion-or-ontological-fideism ‘seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’ can always be ‘reinvigorated as of furthered ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen’ for originary/as-of-event reasoning-through/messianic-reasoning prospective relative-ontological-completeness-of-reference-of-thought overriding prior reasoning-from-results/afterthought now in prior relative-ontological-incompleteness-of-reference-of-thought at such uninstitutionalised-thresholds; and so, in a renewing apriorising/intelligibilitysetup/measuringinstrument/axiomatising instigation as of reasoning-through/messianic-reasoning attitude/mental-disposition/care-and-episteme implicitation for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology, which is construed as more fully articulating the notion of authenticity. This practical conceptualisation of authenticity as of its method is further critical because however well elicited, even reasoning-from-results/afterthought constructs still need their good ontological-performance in practice, and given human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, there is always room for human denaturing temporal ontological-performance of such reasoning-from-results/afterthought constructs induced by reasoning-through/messianic-reasoning; pointing to the fact that ultimately the underlying

‘sanctity of knowledge’ arises from ontological-faith-notion-or-ontological-fideism as of such authenticity based intemporal organic-knowledge that is wary of the denaturing that can arise as of temporal mechanical-knowledge that ‘dispenses with the originary/as-of-event spirit of reasoning-through/messianic-reasoning’ and adopts a mere pedantic relating with the reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology. Thus human ontological-faith-notion-or-ontological-fideism driven reasoning-through/messianic-reasoning holds the prospect for an ever renewal of reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as of prospective relative-ontological-completeness-of-reference-of-thought, undermining institutional-anchoring and logocentric complexes/denials/pedantry of such prospective transcendental possibilities. Such prospective apriorising/intelligibilitysetup/measuringinstrument/axiomatising transformation for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology is the reflection of a reality of human mental regeneration potential that speaks of the continuity of humankind as of the same relative-emancipatory potential as pertinently reflected with Being-development/ontological-framework-expansion as of ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications’ retrospectively and prospectively; with relative-emancipation construed as the inherent meaningfulness-and-teleology truth form of existence, wherein truth is as of immanent-ed-teleologically-pertinent-truth over truth-devoid-of-immanent-ed-teleology, for instance, like the teleological disposition of living organisms for self-preservation beyond just their organical composition. Thus, human ontological-faith-notion-or-ontological-fideism underlies the conception of ontological-

dementation/dialectical-dementation stranding dialectics cross-generational as enabling human transcendence-and-sublimity, and is reflected in ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ as of grander dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension. Finally as a further analysis, Being-development/ontological-framework-expansion is by a rather surreptitious manner undermined by what this author qualifies as ‘subterfuges of Being-development/ontological-framework-expansion’ which are rather as of ideology; ideology in the sense that these are ‘commitments’ ready to ‘forego the pre-eminence of knowledge construed as of its ontological-veracity’ which is the only assurance of optimum construct of knowledge for human emancipation. Ideology as such takes the form of either ‘ideology denaturing of Being-development/ontological-framework-expansion’ or ‘reactive fear of ideology denaturing of Being-development/ontological-framework-expansion’. In both instances what is lost is Being-development/ontological-framework-expansion itself, such that besides temporal/shortness-of-register-of-meaningfulness-and-teleology interests undermining natural Being-development/ontological-framework-expansion, natural Being-development/ontological-framework-expansion is perceived as a risk that will foster ‘ideology denaturing of Being-development/ontological-framework-expansion’ or ‘reactive fear of ideology denaturing of Being-development/ontological-framework-expansion’, with Being-development/ontological-framework-expansion itself losing out. These subterfuges are behind the awkward, unnatural and clobbered nature of human development for the past two centuries as civilisation is construed and developed in ‘an undertone reaction/anticipation of threat’ rather than natural as of human communion. Thus ‘subterfuges of Being-development/ontological-framework-expansion’ arise as of the suboptimality of human

intemporality which suffers from human apprehensiveness of humans, thus undermining the notion of human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm. This underlying human mental-disposition arises as of the successive human as trepidatious/warped/preclusive/occlusive-consciousness in neuterising; as such neuterising is the outcrop of human limited-mentation-capacity. In other words neuterising can effectively be ‘decomposed-as-from-a-conflatedness-perspective into the ontologically-veridical underlying limited-mentation-capacity manifestation’ as of social-stake-contention-or-confliction presencing—or-totalising—self-referencing-syncretising-forward-facing-self-consciousness, and so-construed from the ‘deepest phenomenological transcendental-point-of-departure handle as of the notional-conflatedness of notional-deprocrypticism deneuterising—referentialism’. Such an exercise can be conceptualised as an abstract reference-of-thought/totalisation level of deneuterising—referentialism, wherein for instance, with regards to ‘the very same medical totalising-devolved—purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality’ as structurally/paradigmatically defining ‘social-stake-contention-or-confliction as of existential-instantiations dynamics among individuals and the social-collective’:

- the trepidatious-consciousness of an early hunter-gatherer recurrent-utter-uninstitutionalisation society direct experience of misfortune say like catching an unknown disease in a given forest may imply an existential-contextualising-contiguity-lowest-level-reification perceptivity-as-of-bad-omen as of its relative neuterising as of its random-as—uncircumscribing/undelineating-as-totality existential-totalisation-scheme-of-meaningfulness-and-teleology given its non-rules-as-impulsive-or-accidentated-or-random-mental-disposition (noting that such a poor reification is better than no reification at all in the

sense that where the given forest is infested with say mosquitoes carrying malaria for instance, such a perceptivity-as-of-bad-omen provides a basic reifying-and-empowering reflexivity to human-subpotency however its trepiditious nature as to ‘a crude predisposition to avoid the forest’);

- for the warped-consciousness of an animistic base-institutionalisation society imply existential-contextualising-contiguity-second-level-reification perceptivity-as-of-a-specific-place-or-specific-evil-people-or-specific-evil-period as of its relative neutering as of its tendentious–circumscribing-as-totality-or-delineating-as-totality existential-totalisation-scheme-of-meaningfulness-and-teleology given its rulemaking-over-non-rules (noting as well that in the case where the given forest is infested with say mosquitoes carrying malaria for instance, such a perceptivity-as-of-a-specific-place-or-specific-evil-people-or-specific-evil-period provides a relatively better reifying-and-empowering reflexivity to human-subpotency however its tendentious nature as to inducing tendentiously crude behaviours and psychological assurances associated with positive experiences over negative experiences);

- for the preclusive-consciousness of a universalisation–non-positivism/medievalism society imply existential-contextualising-contiguity-third-level-reification perceptivity-as-of-failure-to-follow-the-heeding-of-the-Deity-or-failure-to-adhere-to-a-certain-mysticism-or-failure-to-pay-reverence-to-an-ancestor as of its relative neutering as of its qualifying–circumscribing-as-totality-or-delineating-as-totality existential-totalisation-scheme-of-meaningfulness-and-teleology given its universalisation-directed-rulemaking-over-non-rules (noting that in the case where the given forest is infested with say mosquitoes carrying malaria for instance, such a perceptivity-as-of-failure-to-follow-the-heeding-of-the-Deity-or-failure-to-adhere-to-a-certain-mysticism-or-failure-to-pay-reverence-to-an-ancestor provides a more better reifying-and-empowering reflexivity to human-subpotency however its preclusive nature as to comprehensively-qualified narrative of a non-ad-hoc and weighty/profound existential

interpretation inducing the predisposition as of a fateful universal narrative of human behaviour implications);

- for an occlusive-consciousness as of our positivism/rational-empiricism implying existential-contextualising-contiguity-fourth-level-reification perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation still as of its relative neutering as of its categorising—circumscribing-as-totality-or-delineating-as-totality existential-totalisation-scheme-of-meaningfulness-and-teleology given its positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules (noting also that in the case where the given forest is infested with say mosquitoes carrying malaria for instance, such a perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation provides an even better reifying-and-empowering reflexivity to human-subpotency however its occlusive nature as to an existential interpretation as of rational-empiricism/positivism conception of human behaviour implications); and prospectively

- for the protensive-consciousness notional-deprocrpticism existential-contextualising-contiguity-full-level-of-reification notional-deprocrpticism deneutering—referentialism as of referentialism—circumscribing-as-totality-or-delineating-as-totality existential-totalisation-scheme-of-meaningfulness-and-teleology given its pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules implied as of say post-structuralism ‘which factors in socioeconomic, education, information, environmental, gender and power relations issues underlying healthcare and medical delivery’ (noting finally that in the case where the given forest is infested with say mosquitoes carrying malaria for instance, such a perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation provides the best reifying-and-empowering reflexivity to human-

subpotency as of its protensive nature as to coherent existential interpretation drawing out the full implications of human limited-mentation-capacity-deepening as of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought as a projective–totalitative-implications conception and superseding absolutising-identitive-constitutedness naiveties). The latter as deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought, as of its ontological-completeness-of-reference-of-thought/ontological-normalcy/post-convergence is the effective basis for evaluating the ontological-veracity of all preceding reference-of-thought as of its deneuterising—referentialism that breaks-down the various neuterising to their basic human limited-mentation-capacity dynamics implications.

In this regard, their successive profoundness as of their ‘successive (uncircumscribing/undelineating-as-totality with recurrent-utter-uninstitutionalisation) circumscribing-as-totality-or-delineating-as-totality existential-totalisation-scheme-of-meaningfulness-and-teleology’ speaks of more and more profound convergence-as-of-accumulation of human-subpotency grasp of the full-potency of existence coherence/contiguity. It should be noted as well that the afore is focused on the abstract reference-of-thought/totalisation level of *différance*/internal-dialectics/difference-deferral, as it is actually reflecting ‘the backdrop construed as human textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence’ for the effectively devolving *différance*/internal-dialectics/difference-deferral teleological process of meaningfulness; given that the abstract reference-of-thought/totalisation level so-established rather enframes teleologically-devolving-as-drifting meaningfulness with regards to ‘social-stake-contention-or-confliction as of existential-instantiations dynamics among individuals and the social-collective’ construed from notional-deprocrypticism deneuterising, to fully reflect the ontological-veridicality of mental-states as of affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-

validating-measuring/dialectically-thinking and unaffirmation/deprojection/de-
 assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-
 measuring/dialectically-dementing stranding dialectics. For instance, reflecting in an early
 hunter-gatherer society the ‘candid existential expressiveness’ of how one is suffering from
 bad omen on the backdrop of its ‘recurrent-utter-uninstitutionalisation
 totalising/circumscribing/delineating reference-of-thought-devolving—différance/internal-
 dialectics/difference-deferral’ construed as disambiguation its uninstitutionalised-threshold
 meaningfulness-and-teleology. Thus this will disambiguate, specifically ‘with regards to the
 ill-health totalising-devolved—purview-as-domain-of-construal-as-intrinsic-
 reality/ontological-veridicality’ the recurrent-utter-uninstitutionalisation random-as—
 uncircumscribing/undelineating-as-totality ‘existential-totalisation-scheme-of-
 meaningfulness-and-teleology’, as it construes any ill-health issue as of the idea of bad omen
 given its ‘non-rules-as-impulsive-or-accidented-or-random-mental-disposition’. The
 uninstitutionalised-threshold as such, as of the reference-of-thought beyond-the-
 consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, is
 the basis for determining both intemporal as well as temporal ontological-performances
 specifically as of postlogism-
 slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-
 discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-
 endemisation, so-disambiguated as of ‘reference-of-thought-devolving-level difference-
 conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism
 reflected as the divergent ontological-performances of the ontological-aesthetic-tracing’. This
 thus involves the disseminative-as-rearticulated totalising/circumscribing/delineating
 reference-of-thought-devolving—différance/internal-dialectics/difference-deferral as
 conjugations as of intemporal-as-conviction ontological-performance and also as the various

temporal-as-token-or-madeupness denaturing, all as conjugating variously to the very same implied categorical-imperatives/axioms/registry-teleology underlying idea of bad omen interpretation of recurrent-utter-uninstitutionalisation going by its random-as-uncircumscribing/undelineating-as-totality ‘existential-totalisation-scheme-of-meaningfulness-and-teleology’; and with this reflecting the metaphoricity of ‘social-stake-contention-or-confliction as of existential-instantiations dynamics among individuals and the social-collective’. The foregoing conception of disseminative-as-rearticulated totalising/circumscribing/delineating reference-of-thought-devolving—différance/internal-dialectics/difference-deferral is equally pertinent with respect to all the other registry-worldviews/dimensions reference-of-thought but rather as of their own given ‘candid existential expressiveness’ with regards to their own respective specific same categorical-imperatives/axioms/registry-teleology conjugations as intemporal-as-conviction ontological-performance and as various temporal-as-token-or-madeupness ontological-performances’ by the respective underlying interpretations as evil-forest-bad-omen/failure-to-heed-the-Deity/full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation/and-further-factoring-in-socioeconomic,-education,-information,-environmental,-gender-and-power-relations-issues-underlying-healthcare-and-medical-delivery respectively as of their base-institutionalisation–ununiversalisation warped-consciousness, universalisation–non-positivism/medievalism preclusive-consciousness, positivism–procrypticism occlusive-consciousness and deprocrypticism protensive-consciousness, inducing their respective tendentious/qualifying/categorising/referentialism–circumscribing-as-totality-or-delineating-as-totality ‘existential-totalisation-scheme-of-meaningfulness-and-teleology’; and so, respectively due to their rulemaking-over-non-rules, universalisation-directed-rulemaking-over-non-rules, positivising-or-rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules, and pre-empting-disjointedness-

as-of-reference-of-thought,-as-if-of-positivising-or-rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules. Insightfully, the foregoing points out that human meaningfulness-and-teleology is ‘a metaphoricity of social-stake-contention-or-confliction as of existential-instantiations dynamics among individuals and the social-collective that is fundamentally already a totalising/circumscribing/delineating reference-of-thought-devolving—différance/internal-dialectics/difference-deferral as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality with the shifts in human meaningfulness-and-teleology induced by human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as of prospective relative-ontological-completeness-of-reference-of-thought’, such that human meaningfulness-and-teleology is not absolutely identitive but shifting as of totalising/circumscribing/delineating reference-of-thought-devolving—différance/internal-dialectics/difference-deferral, given that human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination is in a constant totalising—renewing-realisation/re-perception/re-thought of meaningfulness-and-teleology; with the implication that the ontological-performance of human meaningfulness-and-teleology/textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence is fundamentally construable as of the developing scope of ‘the respective relative neuterising’ towards prospective deneuterising—referentialism. Overall, the emphasis here is as of a Being-development/ontological-framework-expansion that is as of ‘various relative mentally-closed limited-mentation-capacity as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought’ as presencing—or-totalising-self-referencing-syncretising-forward-facing-self-consciousness towards ‘mentally-opened

limited-mentation-capacity overcoming beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought' presencing-or-totalising-self-referencing-syncretising-forward-facing-self-consciousness, and so as of non-presencing; wherein as for the trepidatious-consciousness presencing-or-totalising-self-referencing-syncretising-forward-facing-self-consciousness, 'human mentally-closed limited-mentation-capacity as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought' induced neuterising can be construed as originating as of random-as-uncircumscribing/undelineating-as-totality 'existential-totalisation-scheme-of-meaningfulness-and-teleology' as reflected in the idea of bad omen, for the warped-consciousness as originating as of tendentious-circumscribing-as-totality-or-delineating-as-totality 'existential-totalisation-scheme-of-meaningfulness-and-teleology' as reflected in the idea of evil forest, for the preclusive-consciousness as originating as of qualifying-circumscribing-as-totality-or-delineating-as-totality 'existential-totalisation-scheme-of-meaningfulness-and-teleology' as reflected in the idea of failure to heed the Deity, while for the occlusive-consciousness as originating as of categorising-circumscribing-as-totality-or-delineating-as-totality 'existential-totalisation-scheme-of-meaningfulness-and-teleology' as reflected in the idea of full disease and scientific theory construct as the exclusive cause-and-effect conceptualisation'. Such that in the final analysis, there is an underlying tendency of Being-development/ontological-framework-expansion that decomposes-as-of-conflatedness 'human mentally-closed limited-mentation-capacity as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought' induced neuterising into the underlying limited-mentation-capacity manifestation disambiguation basis for their ontologically-veridical construal', and so-construed from a notional-deprocrypticism ontological-normalcy/post-convergence perspective. Thus for the protensive-consciousness as originating as of referentialism-circumscribing-as-totality-or-

delineating-as-totality ‘existential-totalisation-scheme-of-meaningfulness-and-teleology’ implied say as of post-structuralism factoring in socioeconomic, education, information, environmental, gender and power relations issues underlying healthcare and medical delivery’; as of deprocrypticism is as of deneuterising—referentialism. This analysis conveys the reality of human cross-generational institutional-cumulation/institutional-recomposuring due to the impossibility of the very first humans as of their limited-mentation-capacity and yet inexperience/unaccumulated-experience to be able to reason more than their initial apriorising/intelligibilitysetup/measuringinstrument/axiomatising will permit as of their state of recurrent-utter-uninstitutionalisation ‘non-rules-as-impulsive-or-accidented-or-random-mental-disposition’, and hence their construal of meaningfulness-and-teleology as of ‘their relative neuterising’. Likewise the ultimate possibility of human cross-generational institutional-cumulation/institutional-recomposuring as enabling the apriorising/intelligibilitysetup/measuringinstrument/axiomatising of notional-deprocrypticism/pre-empting-of-disjointedness-as-of-reference-of-thought is the backdrop for deneuterising—referentialism enabling the full transparent ontologically-veridical elucidation of human meaningfulness-and-teleology construed as of ontological-aesthetic-tracing; as of the possibility of deneuterising. In the bigger scheme of things, as of the notional-conflatedness of notional-deprocrypticism as deneuterising—referentialism, what had hitherto been conceived notionally as logicism is herein exposed as effectively superseded by the notion of *différance*/internal-dialectics/difference-deferral so-construed as of ‘reference-of-thought-or-axiomatic-construct-devolving-as-of-ontological-reconstituting-*différance*/internal-dialectics/difference-deferral’ and as implied as-of-the-construal-of-*différance*/internal-dialectics/difference-deferral-of-meaningfulness-and-teleology; and so with respect to the more ontologically-veridical reality of human conceptualisation of meaningfulness-and-teleology always from a position of limited-mentation-capacity as of

prior relative-ontological-incompleteness-of-reference-of-thought, thus in need for its prior deepening so-captured in the ‘human textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence as of the notional-conflatedness of notional-deprocrypticism *différance*/internal-dialectics/difference-deferral’ as transcendence-and-sublimity-enabling, whereas such a human limited-mentation-capacity implication is naively ignored with logicism in its metaphysics-of-presence/illusion-of-the-present/present-consciousness/mirage. Such a ‘human textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence as of the notional-conflatedness of notional-deprocrypticism *différance*/internal-dialectics/difference-deferral’, by its insight with respect to the implications of human limited-mentation-capacity for ontologically-veridical meaningfulness-and-teleology construal, is best predisposed to grasp the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ as of non-presencing reference-of-thought as this enables transcendence-and-sublimity, thus fulfilling the full implications of knowledge as of its ontologically-veridical knowledge-notionalisation and organic-knowledge nature. Fundamentally this all has to do with human limited-mentation-capacity, as if at a given originary/event-of-prospective-ontology-origination moment humankind-as-of-its-integrand-individuals had a profound-and-complete mentation-capacity, then human meaningfulness-and-teleology will be absolutely identitive with no implied-*différance*/internal-dialectics/difference-deferral-of-meaningfulness-and-teleology requiring as of existential-constraint human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as the circular driving notion of *différance*/internal-dialectics/difference-deferral. *Différance* as internal-dialectics/difference-deferral, beyond just an ontological conception as expressed herein, had already always been existent notionally as a wholly internal process of human self-referencing-syncretism for

prospective relative-ontological-completeness-of-reference-of-thought,-as-of-devolving-axiomatic-constructs as-so-reflected in ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ construed-as institutional-cumulation/institutional-recomposuring, and with regards to the successive registry-worldview/dimension rearticulated as of temporal-to-intemporal ontological-performance of totalising/circumscribing/delineating reference-of-thought-devolving. The notion of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought also highlights theoretically why the Husserlian epoché or bracketing method construed as eidetic reduction is ontologically-flawed by its constitutedness as it naively imply circumscribing-as-totality/delineating-as-totality meaningfulness-and-teleology for its essence in presence, rather than the fact that presence reference-of-thought as ‘metaphysics-of-presence is structurally/paradigmatically an ontologically-flawed bracketing or epoché as of ontological-normalcy/post-convergence, and is representing metaphysics-of-absence implications as nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives)’ when it comes to presence uninstitutionalised-threshold reference-of-thought in its relative notional-discontiguity/epistemic-discontiguity/relative-ontological-incompleteness-of-reference-of-thought for meaningfulness-and-ontology ontological-performance, as well as ignoring prospective institutionalisation implications construed as of ontological-normalcy/post-convergence. Such an eidetic reduction is circularly constraint in totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag at its given registry-worldview’s/dimension’s reference-of-thought without factoring in the phenomenological implications of ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-

singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ as ‘Being-development/ontological-framework-expansion coherence/contiguity implications as of ontology’s-directedness-as-Being’, and thus fails to get to the ‘deepest phenomenological transcendental-point-of-departure handle as of the notional-conflatedness of notional-deprocrypticism deneuterising—referentialism’ reflected by metaphysics-of-absence in the conception of meaningfulness-and-teleology ontological-performance which is as of the transcendental implications of the institutionalisation process. The further insight here is that, such a most ontologically-complete profoundness/depth of ‘phenomenological transcendental-point-of-departure handle in-its-overcoming-of-neuterisation’ reflected by metaphysics-of-absence for the construal of knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue points to a fundamental epistemic-break/epistemic-resetting; with the latter arising as a result of lack of ‘axiomatic commonness-in-sharedness of human meaningfulness-and-teleology with regards to the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality’ as of the variance of uninstitutionalised-threshold prior relative-ontological-incompleteness-of-reference-of-thought and prospective institutionalisation prospective relative-ontological-completeness-of-reference-of-thought. For instance, such epistemic-break/epistemic-resetting associated with the overall human institutionalisation process necessarily explains the ‘mutually transversal unintelligibility’ of the Galileos, Newtons, Diderots episteme articulating prospective positivising/rational-empiricism meaningfulness-and-teleology and the Establishment scholasticism medieval dogmatic episteme. The implication here is that the articulation of transcendence as of reference-of-thought is by itself tied up to a prospective epistemic disruption, construed as of soundness-or-authenticity-of-reference-of-thought, beyond just grounded knowledge as of the prior episteme which is rather construed as of unsoundness-or-inauthenticity-of-reference-of-

thought. Such transcendental epistemic-breaks/epistemic-resetting arise because humankind is subpotent as of its knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue to the full-potency of existence, and in the human construal/conceptualisation of intrinsic-reality/ontological-veridicality, the ‘superseding party’ is not any involved humans as knowledge agents but inherent existential-reality itself, with any such humans as knowledge agents only ‘pertinent in delegation’ as of their ‘kowtowing to existential-reality’, with such delegation inherently revoked as of their failed ‘kowtowing to existential-reality’. To the extent that human knowledge agents ‘achieve sufficient-and-recurrent credibility as of their knowledge methods and approaches’ with respect to social universal-transparency, an apparent episteme as of ‘axiomatic commonness-in-sharedness of human meaningfulness-and-teleology with regards to the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality’ arises as of institutional-being-and-craft. But then, where transcendental implications as of prospective institutionalisation prospective relative-ontological-completeness-of-reference-of-thought point to more profound reference-of-thought for construing/conceptualising existential-reality putting such a prior episteme in question, this induces a state of mutual intellectual-bad-faith between the prospective episteme and the prior episteme as of the lack of ‘axiomatic commonness-in-sharedness of human meaningfulness-and-teleology with regards to the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality’ with respect to social universal-transparency; and so more than just as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, but further because as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, there is ‘a drift from the ideal of knowledge agents

only as ‘pertinent in delegation’ as of their ‘kowtowing to existential-reality’ to a degraded exercise of institutional-being-and-craft. It should be noted that such a notional construct of episteme interpreted herein is implied as of ‘dynamic social totalising–self-referencing–syncretising’ across the entire social spectrum as of notional-episteme dynamically covering both informal institutional settings and formal institutional settings. In the bigger scheme of things, such transcendental epistemic-breaks/epistemic-resetting in transition associated with the institutionalisation process as of human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions–existentialism-form-factor arise wherein ‘the prior shaman is being contested by a new shaman in a hunter-gatherer society’ with possible accusations of witchcraft as of institutionalised-being-and-craft, wherein ‘two or more traditional priesthoods of an early civilisation foment against one another’, wherein ‘sophistry and philosophy vie for what passes as valuable and true knowledge’, wherein ‘medieval scholasticism dogmatic knowledge and positivism/rational-empiricism knowledge vie for the interpretation of human and physical nature’, and in our case wherein ‘knowledge traditions including philosophical traditions are put into question as of Being-development/ontological-framework-expansion, anti-nihilism and transcendental-enabling/existence-potency knowledge perspectives’. Ultimately, this point out that epistemic-breaks/epistemic-resetting become inevitable wherein the prior knowledge episteme paradigmatically/structurally loses its way as of its initial justification as safeguarding the prospective possibility of enlightening human knowledge as of ontology’s-directedness-as-Being, but then by its institutional-being-and-craft uninstitutionalised-threshold actually paradigmatically/structurally beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought undermines the prospective possibility of prospective enlightening human knowledge; and so, as increasingly the prior epistemic disposition is one that overlooks prospective inherent

transcendental-enabling/existence-potency of meaningfulness-and-teleology ontological-performance turning rather towards social-aggregation-enabling implications as meaningfulness-and-teleology ontological-performance, undermining the very notion of the intellectual exercise as about developing/institutionalising the social and not kowtowing-to-it construed as charlatanism! Further in all such transcendental contexts despite the fact that the-new is derived from the-old as for instance the Descartes, the Galileos, the Leibnizes and the Newtons as budding positivists are the outcrop of Scholasticism itself, the-new epistemic-break/epistemic-resetting is justified in that even the-old is predicated on upholding Being-development/ontological-framework-expansion as of ontology's-directedness-as-Being going by the human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm. Insightfully, that exercise is actually reflected as of temporal-to-intemporal individuations wherein the individual is rather a receptacle of temporal-to-intemporal individuations with variance of mental-dispositions among individuals an issue of variance as of skewness towards temporality or intemporality; such that even the budding positivists carried elements of scholasticism but were more definitely of a positivistic outlook, and many scholastics articulated notions which could more fruitfully be developed in a positivistic outlook but were stifled by their scholasticism dogmatic intellectual commitments. In effect, human limited-mentation-capacity however the institutionalisation-level as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor implies that it is impossible for the intemporal projection as longness-of-register-of-meaningfulness-and-teleology that prospectively construes of successive frameworks of 'reference-of-thought—devolving-teleological-structure-of-meaningfulness as of implicated-and-explicated reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-

aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue' as of the specific institutionalisation, to ensure that human meaningfulness-and-teleology ontological-performance will remain intemporal-as-ontological as of their categorical-imperatives/axioms/registry-teleology given 'the impossibility of overcoming the abstract human seed of temporality dynamically involved, as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, in a formulaic-non-conviction deterministic relation with such categorical-imperatives/axioms/registry-teleology by wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives thus failing to uphold intemporal-preservation-entropy-or-contiguity—or—ontological-preservation'. Thus the ontological effectiveness of such intemporal-projection as longness-of-register-of-meaningfulness-and-teleology lies rather in undermining the existential possibility of the successive uninstitutionalised-thresholds/uninsitutionalisations as of bringing about prospective relative-ontological-completeness-of-reference-of-thought driven by ontological-faith-notion-or-ontoligical-fideism thus inducing social universal-transparency which renders untenable temporality as of the given uninstitutionalised-threshold instigated from the prior institutionalisation's categorical-imperatives/axioms/registry-teleology denaturing; as implied with base-institutionalisation prospective relative-ontological-completeness-of-reference-of-thought over recurrent-utter-uninstitutionalisation, universalisation prospective relative-ontological-completeness-of-reference-of-thought over base-institutionalisation—non-universalisation, positivism prospective relative-ontological-completeness-of-reference-of-thought over universalisation—non-positivism/medievalism, and prospectively deprocrypticism prospective relative-ontological-completeness-of-reference-of-thought over positivism—procrypticism. Such that we can garner that it is a positivism

registry-worldview's/dimension's institutionalisation prospective relative-ontological-completeness-of-reference-of-thought social universal-transparency that makes it untenable for non-positivism/medieval temporal mental-dispositions to elicit non-positivism/medieval implied temporality. Likewise, prospectively it is a deprocrypticism registry-worldview's/dimension's institutionalisation prospective relative-ontological-completeness-of-reference-of-thought social universal-transparency that can render it untenable for procrypticism temporal mental-dispositions to elicit procrypticism/disjointedness-as-of-reference-of-thought implied temporality. Thus aetiologisation/ontological-escalation is not about transforming the reality of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor as overcoming temporality inherently, but rather it is about bringing about prospective relative-ontological-completeness-of-reference-of-thought. The reality of human institutionalisation and uninstitutionalised-threshold mental-dispositions imply that at the uninstitutionalised-threshold prospective institutionalisation knowledge as transcendental-enabling/existence-potency is not socially integrated directly as of a solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity exercise engaging with intemporal-as-ontological meaningfulness-and-teleology. Such prospective intemporal-as-ontological meaningfulness-and-teleology is not necessarily perceived at the uninstitutionalised-threshold as any more pertinent for attaining social approbation than other temporal meaningfulness-and-teleology as of the said uninstitutionalised-threshold. This point out that maximalising-recomposuring-for-relative-ontological-completeness/transvaluating mental-dispositions in their intemporality or longness-of-register-of-meaningfulness-and-teleology are as of a projected-or-anticipated conflatedness of social universal-transparency for institutional and formal deferential-formalisation-transference as of percolation-channelling. That is at the

uninstitutionalised-threshold such intemporal-as-ontological meaningfulness-and-teleology is pragmatically expounded socially not in terms of its inherent solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity ideal which is socially-too-abstract but rather as a structuring/paradigmatic second-natured construct of positive-opportunism as of institutional and formal deferential-formalisation-transference percolation-channelling to attain social approbation. It is such a ‘conflatedness structuring/paradigmatic second-natured construct of positive-opportunism of institutional and formal deferential-formalisation-transference as of percolation-channelling to attain social approbation’ that holds together in social universal-transparency temporal-to-intemporal solipsistic mental-dispositions as of a given second-natured institutionalisation. Out of such a conflatedness structuring/paradigmatic second-natured construct, intemporal-as-ontological meaningfulness-and-teleology is not necessarily perceived as any more pertinent for attaining social approbation than other temporal meaningfulness-and-teleology. In other words, the ideal articulation of base-institutionalisation meaningfulness-and-teleology in recurrent-utter-uninstitutionalisation, just as that of universalisation in base-institutionalisation–ununiversalisation, positivism/rational-empiricism in universalisation–non-positivism/medievalism, and prospectively deprocrypticism in positivism–procrypticism; are only pertinent for attaining social approbation as of their conflatedness structuring/paradigmatic second-natured construct of positive-opportunism of institutional and formal deferential-formalisation-transference as of percolation-channelling. This highlights that from the perspective of immediate-or-short-run social approbation, it is simpler though ontologically flawed as of constitutedness to engage a registry-worldview/dimension at its uninstitutionalised-threshold rather by an incrementalism-in-relative-ontological-incompleteness mental-disposition on the basis of its prior relative-ontological-incompleteness-of-reference-of-thought or its same metaphysical

framework of contention rather than adopting at its uninstitutionalised-threshold a more complex but ontologically-veridical maximalising-recomposuring-for-relative-ontological-completeness/transvaluating mental-disposition on the basis of the prospective relative-ontological-completeness-of-reference-of-thought or superseding metaphysical framework of contention as of conflatedness. That is, engaging a non-positivism registry-worldview/dimension meaningfulness-and-teleology with respect to say notions-and-accusations-of-sorcery on its same terms in case of an accusation of sorcery to imply the other is the sorcerer, etc. will sound more credible as of its averaging-of-thought in a non-positivism social-setup than say projecting to prospective positivism registry-worldview/dimension meaningfulness-and-teleology and implying that notions-and-accusations-of-sorcery are not real speaking of both the defect of such accusation and the defective superstitious averaging-of-thought in the non-positivism social-setup. Ultimately, such a profound phenomenological totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing ontological-performance construal faced with the inherent dogmatic and psychological biases of human totalising—thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance in many ways necessarily has to project out of ‘ordinariness of thought’ for pretence of arriving at a sound construct capable of a most profound reflection of social ontological-veridicality. Consider with respect to a most profound emotional-involvement the issue of human imperilment as a test for the capacity for such requisite depth of transcendental contemplation. Consider for instance that tens of millions including soldiers killed in both the first and second world wars pass for mere victims of the wars in a bizarre twist of mutual totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag that shuts-off-the-mind to the odious reality of mutual genocide, to say the least. Consider that in Russia a

dictator responsible for killing about 25 millions of his own citizens is still considered a national hero by the majority. Consider that the first president of the United States in position of power was a slave-owner thus encouraging the Atlantic slave trade that led to genocidal proportions of deaths but he is venerated by a majority as the greatest U.S. President. Consider in a different sense though non-exculpatory that Heidegger a leading intellectual joined the Nazi party leaving 2 years later with hardly any critical influence on the party and is universally condemned today. Consider as well that many an intellectual or public figure today actively or passively voiced for the recent wars killing millions whether in the Middle-East or elsewhere with a corresponding social indifference and mental shut-off. These profound considerations highlight the contemplative depth to which the social thinker needs to get to in order to truly be engaged in a transcendental-enabling/existence-potency ontological-primemovers-totalitative-framework construal as implied with notional-deprocrypticism as preempting-of-disjointedness-as-of-reference-of-thought, and so be able to keep their head up from drowning in human totalising–thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance in order to be able to produce ‘veridical ontology’ on a same parity as nature constrains on the natural sciences. Effectively, such transcendental insight points out that existence/existence-potency/existential-possibilities is inherently a radical ontology beyond our totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag in existence/existence-potency/existential-possibilities as ‘hyperbolic pretences of ontology’. This author thinks that there can effectively be an engaging and constructive approach for arriving at such a depth of radical ontology warranted by existence/existence-potency/existential-possibilities that is transcendental-enabling/existence-potency for the social avoiding the platitudes of our times such that many an intellectual have even given up to ‘this all-powerful emotional-

involvement element of the social'. Human totalising–thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance implies the need for a sound perpetuating construct of universal projection as intemporality-or-longness-of-register-of-meaningfulness-and-teleology as the opportunity for prospective transcendental-enabling/existence-potency. Such a construct is a 'response construal' that inherently enables transformative universal implications as beyond presence issues and complexes as it sublimates presence out of its failure. This is unlike the all too frequent construct of 'reaction construal' caught up in presence as it is presence-serving, and so whether as of positive or negative reaction; as even as a positive act a reaction construal is hardly universalisable thus hardly as of aetiologicalisation/ontological-escalation. A hero as of a positive 'reaction construal' may perfectly prevent a crime from happening and save the day but then such action is not dependable and the outcomes are unreliable as well together with the possibility on occasion of wrong judgement and/or wrong action or usurpation; thus the social construction of crime prevention needs an intellectualised social 'response construal' mechanism of universal implication that ensures dependability of crime prevention as of the foresight of law and policing management construed as of an intemporal-as-ontological intellectual projection exercise. This same depth-of-thought is warranted across the dynamic scope of the social including the political for true transcendental-enabling/existence-potency beyond normative conventioned constructs bound to hold-up the possibility of prospective 'visions of humankind emancipation'. Such a depth of contemplation will fathom for instance that humankind appeared on earth about 100000 years ago but the pervasive structural/paradigmatic determinism of the nation-state which became common just about 500 years ago has been a source of much of humankind's problems as of 'reaction construal' and humankind's constitutedness to the notion of nation-state seems to create an impasse for

human Being-and-contemplative development. Consider again the possibility capable of arising as of a ‘response construal’ as effectively articulated by Derrida in his analysis of spirit. Derrida grasps that Heidegger strove to produce universal human meaningfulness-and-teleology but was caught up in the totalising–thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance as spirit failed to universalise and so Heidegger couldn’t carry the effective implications of his work to its true universal conclusion as he was caught up in the ‘reaction construal’ of them-and-us, as his commitment to the ‘us’ overlooked/didn’t-come-into-grips with what the ‘us’ was doing, not to mention the possibility of him actually acting as transcendental over the them-and-us as a position of making a universal ‘response construal’. This problem isn’t particular to Heidegger but for the fact that the underlying regime of ‘us’ were the Nazis, as the them-and-us logic is intellectually rampant such that even Derrida was being condemned by many for not adopting it. The question can be asked whether any genuine intellectualism as providing a ‘response construal’ for humankind overall can construe of emancipation meaningfulness-and-teleology in them-and-us basis and whether this isn’t a recipe for potential disaster as all them-and-us rationale are just variances of the same insanity! We can imagine that a true understanding and universal application of Derrida’s spirit insight as a ‘response construal’ could have educated thought-and-intellectualism and prevent say the subsequent Rwanda and Burundi genocides in Africa from occurring with many supposedly normal and educated persons caught up in the overall mobbishness; but such a lesson can hardly come out from the prevalent them-and-us lazy intellectualism ‘reaction construal’ which simply provides totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag comfort to protagonists by its lack-of or pseudo universal projection. Basically, a phenomenological extended metaphysics-of-absence as of notional-deprocrypticism perspective points out that

humankind does have the possibilities of adopting an uninhibited/decomplexified posture for ‘inventing’ a whole new renewal/re-perceiving/re-thinking beyond our apparently constricted metaphysics-of-presence framework which in reality is just presence ‘hyperbolic dazing effect’ utterly distinct from the radical ontology possibilities of existence/existence-potency/existential-possibilities. Transcendence as implied here is with regards to reference-of-thought/totalisation level ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ which is the ‘ontologically veridical enabling notion of transcendence’ as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality in conflatedness as of underlying relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-thought. Such a conceptualisation of transcendence is actually what a Kantian transcendental imagination and other subsequent philosophies of transcendence it inspired would have strove to arrive at, but according to this author wrongly understood transcendence rather as of ‘phenomenal-abstractiveness’ as the basis/grounding to then construe/conceptualise meaningfulness-and-teleology failing to factor in that ‘existential phenomenal-abstractiveness conflates-in-effecting-wholeness-as-of-profoundness-and-completeness-to-meaningfulness-and-teleology all the way to the consciousness as apriorising/intelligibilitysetup/measuringinstrument/axiomatising for the possibility of meaningfulness-and-teleology to then arise on the basis of such a given apriorising/intelligibilitysetup/measuringinstrument/axiomatising’; given that it is consciousness that teleologically-registers/recognises phenomenal-abstractiveness as of meaningfulness-and-teleology in addition to the implications thereof with regards to the varying-as-transcending nature of consciousness with human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination arising in further conflatedness as of human

maximalising-recomposuring-for-relative-ontological-completeness/transvaluating in an exercise of totalising–renewing-realisation/re-perception/re-thought that re-projects-or-re-anticipates the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, and so as of a retrospective to prospective insight. Hence such philosophies failing to grasp that phenomenal-abtractiveness is ultimately as of ‘a conflatedness and so construed from the perspective of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing’ actually ended up inducing constitutedness in striving to construe meaningfulness-and-teleology vaguely from phenomenal-abtractiveness as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. Consciousness as the enabling point-of-focus for ‘human-subpotency existential meaningfulness-and-teleology ontological-peformance’ as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating induced apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights is actually the conflatedness point-of-focus that registers-as-of-meaningfulness-and-teleology all human phenomenal-abtractiveness whether as derived from sense organs like eyes construed specifically as sight ontological-performance, the ear construed specifically as hearing ontological-performance, etc., derived from embodied phenomenal-abtractiveness like health/illness ontological-performance, vigour/tiredness ontological-performance, etc., and/or derived from mind phenomenal-abtractiveness like thought ontological-performance, emotional ontological-performance, etc.; and so-registered in conflatedness as of consciousness’s point-of-focus totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing ontological-performance, so-derived as it solipsistically constructs-and-reconstructs underlying ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-

inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ontological-primemovers-totalitative-framework projective-totalitative-implications and not any notion of innateness besides existentially inherent human-subpotency) and developing meaningfulness-and-teleology as of understanding/reconstruing/correcting/adapting/maturing, taking its cue from the conflatedness of existential-instantiations successions as it construes of existence/existence-potency/existential-possibilities as living-being! Put another way, consciousness as point-of-focus conflatedness of meaningfulness-and-teleology is ‘operative of human-subpotency as of the coherence/contiguity-of-superseding-oneness-of-ontology-as-of-inherent-existence-coherence/contiguity’, so-implied with ‘explicited axiomatic-constructs’ construed as concepts/notions and ‘implicated axiomatic-constructs’ construed as intuitions/insights/foresights, and so correspondingly as of the explicited-focusing and implicated-coherencing/contiguity as of a supposed living-being reflection of existential-instantiations and contextualisations in forming knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue; thus explaining by this ‘explicited-focusing and implicated-coherencing/contiguity existential dynamics for producing knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue’, the constitutedness of the Kantian understanding of concepts and intuitions as being mutually dependent for meaningfulness-and-teleology articulation. In other words, constitutedness tend to fallaciously imply existence-in-existence or existence-of-things-in-existence whereas conflatedness rightly implies becoming-in-existence-rather-as-subsumed-in-existence or things-becoming-in-existence-rather-as-subsumed-in-existence as

of underlying ‘coherence/contiguity-of-superseding—oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ontological-primemovers-totalitative-framework projective-totalitative-implications and not any notion of innateness besides existentially inherent human-subpotency) or ‘consciousness’s ontological-performance construed in amalgamation as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality’. This notion of conflatedness construal of existence as of becoming-in-existence-rather-as-subsumed-in-existence is critical in that all notions that naively imply an intercession between human becoming and existence construed as existence-in-existence, such as the transcendental ego perspective, end up in constitutedness as the said ‘transcendental ego cannot invent existence as if preceding existence’ thus inducing constitutedness. Rather existence as the absolute a priori is by itself construed as ‘the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality with nothing else outside or preceding it’; as existence is an implied-axiomatic-construct-construed-as-reference-of-thought as an implied-theory, with the ‘implied about existence’ arising as of a given/specific apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of a given human limited-mentation-capacity implied registry-worldview/dimension consciousness, such that meaningfulness-and-teleology is as of existence’s implied axiomatic-devolving-teleological-structure-of-meaningfulness-as-of-instantiative-context with no meaningfulness-and-teleology construable outside it but for a totalising—renewing-realisation/re-perception/re-thought of prospective ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising reference-of-thought’ as of human limited-mentation-capacity-deepening—in-recomposuring,-

as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination implied prospective registry-worldview/dimension consciousness and its corresponding existence’s the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality implied axiomatic-devolving-teleological-structure-of-meaningfulness-as-of-instantiative-context, with no meaningfulness-and-teleology outside or preceding it. Thus conflatedness warrants that human-subpotency becoming is amalgamated as of existence as of the underlying ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ontological-primemovers-totalitative-framework projective-totalitative–implications and not any notion of innateness besides existentially inherent human-subpotency) for appropriate construal of meaningfulness-and-teleology ontological-performance. The insight here is that we can’t be at a posture of prior relative-ontological-incompleteness-of-reference-of-thought in relative notional-discontiguity/epistemic-discontiguity of the the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality and then pretend to ground meaningfulness-and-teleology about the nature of existence as if we are of ontological-completeness-of-reference-of-thought in ontological-contiguity as of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, as our state of ontological-incompleteness perverts that grounding objective and rather points to the need for an notional-discontiguity/epistemic-discontiguity induced psychoanalytic-unshackling towards a prospective state of prospective relative-ontological-completeness-of-reference-of-thought. What is fundamentally warranted

is priorly attaining psychoanalytically, as of apriorising/intelligibilitysetup/measuringinstrument/axiomatising, ontological-completeness-of-reference-of-thought in ontological-contiguity of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, rather than a flawed attempt at grounding as with say a transcendental ego basis of construal of meaningfulness-and-teleology, unsuspectedly grounding as of our positivism–procrypticism prior relative-ontological-incompleteness-of-reference-of-thought; as such a role is simply undertaken by conflatedness as of prospective relative-ontological-completeness-of-reference-of-thought and is rather construed then as of such prospective underlying ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ontological-primemovers-totalitative-framework projective-totalitative–implications and not any notion of innateness besides existentially inherent human-subpotency) for appropriate meaningfulness-and-teleology ontological-performance. Such a conflatedness insight as of notional-deprocrypticism rather points out that soundness-or-authenticity of meaningfulness-and-teleology ontological-performance arises as of Being-development/ontological-framework-expansion involving the institutionalisation process induced various consciousnesses up to the protensive-consciousness enabling transcendental centered-totalisation, as of human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination. Actually, this author holds that the very fundamental handicapping issue to meaningfulness-and-teleology as of the philosophical tradition lies in the naïve human mental-reflex of implying that ‘a given human determination

of the effecting basis/foundation/axiomatic-construct derived/deciphered from existential-instantiations as underlying the presence institutionalisation totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context carries-and-reflects all the depth/profoundness of existence/existence-potency/existential-possibilities’, thus not allowing for the possibility for further imbricatedness/threadedness/recomposuring as of existence/existence-potency/existential-possibilities of existential-instantiations outside any such reference-of-thought determination; such reference-of-thought determination being affixed rather in constitutedness as of any of the various registry-worldviews/dimensions specific underlying apriorising/intelligibilitysetup/measuringinstrument/axiomatising reference-of-thought such as ‘non-rules-as-impulsive-or-accidented-or-random-mental-disposition of recurrent-utter-uninstitutionalisation’ not cognisant of the conflatedness possibility of prospective base-institutionalisation prospective relative-ontological-completeness-of-reference-of-thought, ‘rulemaking-over-non-rules of base-institutionalisation–ununiversalisation’ not cognisant of the conflatedness possibility of prospective universalisation prospective relative-ontological-completeness-of-reference-of-thought, ‘universalisation-directed-rulemaking-over-non-rules of universalisation–non-positivism/medievalism’ not cognisant of the conflatedness possibility of prospective positivism prospective relative-ontological-completeness-of-reference-of-thought, and in our case ‘positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules of positivism–procrypticism’ not cognisant of the conflatedness possibility of futural Being-development/ontological-framework-expansion as of prospective deprocrypticism prospective relative-ontological-completeness-of-reference-of-thought. Such that it thus construes as absolutely reflecting existence/existence-potency/existential-possibilities by operations of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-

contextualising-contiguity on the basis of that given determination categorical-imperatives/axioms/registry-teleology with the consequence that its constitutedness, since it doesn't allow for superseding existence/existence-potency/existential-possibilities, now 'contradictorily-and-naively supersedes-and-is-determinative-of existence itself' rather than taking its cue from the conflatedness of existence/existence-potency/existential-possibilities given the imbricatedness/threadedness/recomposuring of existential-instantiations and as reflected at registry-worldview/dimension depth of construal as of reference-of-thought; as it then fails to grasp that 'there is no understanding to be had outside the conflatedness of existence as of prospective relative-ontological-completeness-of-reference-of-thought' with any such conceptualisation being nothing but vague virtuality that is not as of ontological-contiguity and ontological-veracity. Thus the problem of the philosophical tradition is notionally one of erroneous constitutedness, and this issue is recurrent-beyond-historiality-with-the-latter-only-a-bi-manifestation-of-the-reccurence,-as-psychically-recurrent as of human shallow to deepening limited-mentation-capacity due to inherent human temporality and intemporality across all registry-worldviews/dimensions, and speaks of a human existential-extirpation-as-of-existential-unthought disposition reflected as ontological-aesthetic-tracing as of the notional-conflatedness of notional-deprocrypticism behind the reality of a conceptualisation of human nature rather more completely as of institutionalisation and uninstitutionalised-threshold mental-dispositions. As highlighted before: consciousness is the point-of-focus totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing ontological-performance, so-derived as it solipsistically constructs-and-reconstructs underlying 'coherence/contiguity-of-superseding—oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness' (so-enabled by underlying ontological-commitment—construed-

as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ontological-primemovers-totalitative-framework projective-totalitative-implications and not any notion of innateness besides existentially inherent human-subpotency) and developing meaningfulness-and-teleology as of understanding/reconstruing/correcting/adapting/maturing, taking its cue from the conflatedness of existential-instantiations successions as it construes of existence/existence-potency/existential-possibilities as living-being. Such ‘focusing construed as consciousness’ explains why axiomatic-constructs are explicated and implicated/intuited as of a living-being totalising-conflated-meaningfulness-and-teleology in coherence/contiguity-of-superseding-oneness-of-ontology. The above conception fundamentally underscore the development and how all human knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue arises existentially as of consciousness, and is singularly reflected as of language development which is the ‘signifying mirroring’ of human meaningfulness-and-teleology. The implication here is that meaningfulness-and-teleology as of ‘existential self-referencing’ and ‘existential syncretising-effecting’ construed as totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag corresponds to language as of its ‘underlying totalising/circumscribing/delineating signifying-construct’ and its ‘metaphoricity’; in reflecting how human social-stake-contention-or-confliction induces human transcendence-as-of-full-transcendental-potential underlying knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue. Consciousness, and as reflected by the signifying mirroring of meaningfulness-and-teleology that is language, is thus a point-of-focusing axiomatic/reference-of-thought devolving-construal disposition for meaningfulness-and-teleology as of the ‘human species textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence as of existential-stakes migration enabled by

human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination’ that speaks of ‘meaningfulness-and-teleology accreting-substitutive-subsumption-as-futural-différance-freeplay construed here as the human species consciousness-différance’, reflected by notional-deprocrypticism conceptualised ontological-aesthetic-tracing as of the conflatedness of the successive human consciousnesses ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’. Thus consciousness by its full development as of Being-development/ontological-framework-expansion speaks fundamentally of the entire narrative possibilities of the human species as of human textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence. Such ‘consciousness conflatedness of meaningfulness-and-teleology’ is reflected by the signifying mirroring of meaningfulness-and-teleology that is language as of its metaphoricity. Metaphoricity can thus be construed as the signification of articulated meaningfulness-and-teleology as of reference to existential-instantiation contexts adjunctively and not as naturally devolving into the ‘underlying totalising/circumscribing/delineating signifying-construct of language’ as signification of reference-of-thought, such that metaphoricity is rather an ‘adjunctive incorporation’ to the ‘underlying totalising/circumscribing/delineating signifying-construct of language’. The ‘underlying totalising/circumscribing/delineating signifying-construct of language’ as of its self-referencing meaningfulness-and-teleology is always susceptible to the further deepening of human limited-mentation-capacity as of totalising-renewing-realisation/re-perception/re-thought such that prospective meaningfulness-and-teleology arises out of the adjunction to this ‘underlying totalising/circumscribing/delineating signifying-construct of language’ and is adjoined to it as metaphoricity, with metaphoricity construed as the signification implied as of syncretising-effecting meaningfulness-and-teleology. Thus language effectively reflects the totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag reality of

human meaningfulness-and-teleology, as language is always a blending of the ‘underlying totalising/circumscribing/delineating signifying-construct of language’ with the conflatedness adjunction of its metaphoricity. It is interesting to grasp here that a signifying-construct as signification of ‘the self-referencing of meaningfulness-and-teleology’ is always totalising/circumscribing/delineating and is effectively signifying a reference-of-thought as of ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’. Such centred-totalising/circumscribing/delineating meaningfulness-and-teleology construed as reference-of-thought, and its signification as implied by an ‘underlying totalising/circumscribing/delineating signifying-construct of language’ necessarily has to do with the fact that meaningfulness-and-teleology is as of a ‘coherence/contiguity-of-superseding—oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ (so-enabled by underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ontological-primemovers-totalitative-framework projective-totalitative—implications and not any notion of innateness besides existentially inherent human-subpotency) for intelligibility to arise, thus is construed as reference-of-thought as of the the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality; as we know intuitively that meaning is always about the-one-meaning as well as a perspective/framing/reference/horizon were all the-one-meaning cohere/are-in-ontological-contiguity metaphoricity as of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination adhocly produces by conflatedness adjunctive significations where these do not fit in with the ‘underlying totalising/circumscribing/delineating signifying-construct of language’ due to the

implications of human limited-mentation-capacity as of ontological-incompleteness-of-reference-of-thought when conceptualising about such an ‘underlying totalising/circumscribing/delineating signifying-construct of language’. But then an adjunctive-metaphoricity-signification so produced as reflected by ‘a transcendental syncretising-effecting meaningfulness-and-teleology’ like the construal of budding positivism/rational-empiricism in medieval society, may turn out in-due-course/cross-generationally to be of an even greater meaningfulness-and-teleology totalising/circumscribing/delineating effect over the prior notion of the ‘underlying totalising/circumscribing/delineating signifying-construct of language’ and thus prospectively become the ‘underlying totalising/circumscribing/delineating signifying-construct of language’; and so as of accreting-substitutive-subsumption-as-futural-différance-freeplay, by **SUBSUMING** some significations of the prior ‘underlying totalising/circumscribing/delineating signifying-construct of language’ together with some adjunctive-metaphoricity-significations of the prior ‘underlying totalising/circumscribing/delineating signifying-construct of language’, while **ELIMINATING** some significations of the prior ‘underlying totalising/circumscribing/delineating signifying-construct of language’ and so together with some adjunctive-metaphoricity-significations of the prior ‘underlying totalising/circumscribing/delineating signifying-construct of language’, and finally **LEAVING-OUT** some significations of the prior ‘underlying totalising/circumscribing/delineating signifying-construct of language’ and so together with some adjunctive-metaphoricity-significations of the prior ‘underlying totalising/circumscribing/delineating signifying-construct of language’, as its very own as the prospective ‘underlying totalising/circumscribing/delineating signifying-construct of language’ adjunctive-metaphoricity-significations to which other adjunctive-metaphoricity-

significations could be incorporated adjunctively. Effectively, with the positivism/rational-empiricism self-referencing totalising/circumscribing/delineating construct of meaningfulness-and-teleology, its adjunctive-metaphoricity-signification can be construed as of the ontological-aesthetic-tracing of cross-generational positivism/rational-empiricism reappropriation of the ancient mathesis universalis metaphoricity as its very own ‘underlying totalising/circumscribing/delineating signifying-construct of language’ ‘behind the instigative-drive for construing all human knowledge’ by such enlightenment thinkers like Galileo and ubiquitously with Descartes that rolled-over into later thinkers like Leibniz, Newton, and ultimately subverted medievalism and scholasticism leading to our present positivism/rational-empiricism dominant totalising/circumscribing/delineating construct of meaningfulness-and-teleology. Existence itself as the absolute a priori underscores such a conception given the human species textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence as of existential-stakes migration; since the existential dispositions of human subjects relative to social-stake-contention-or-confliction arises as of ‘their living existential-instantiations’, and where they construe meaningfulness-and-teleology as not self-referentially covered by the ‘underlying totalising/circumscribing/delineating signifying-construct of language’, they will inevitably articulate adjunctive-metaphoricity-significations to that prior ‘underlying totalising/circumscribing/delineating signifying-construct of language’. This explains the lockstep nature of human meaningfulness-and-teleology and language, with the latter as the former’s signification mirroring, such that institutional-cumulation/institutional-recomposuring is actually as of ‘accreting-substitutive-subsumption-as-futural-différance-freeplay construed here as of ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–

 metaphoricity-significations conflatedness projective-totalitative-implications mirror the
 syncretising-effecting as of the acculturation-indigenisation-pidginisation behind dialectal

 pidginisation and creolisation; as of social-stake-contention-or-confliction context adjunctive-
 metaphoricity-significations conflatedness induced 'underlying
 totalising/circumscribing/delineating signifying-construct of languages'. In another respect
 with regards to language acquisition as mirroring a child's existential integration into the
 dynamics of social-construct existential situations/instances, stakes, institutions and
 processes, a new born child existential integration into society, from its perspective, develops
 as of a dynamics of adjunctive-metaphoricity-significations in 'significations accreting-
 substitutive-subsumption-as-futural-*différance*-freeplay construed here as the phenomenology
 of human language acquisition *différance*' that fundamentally mirror the child's developing
 existential social relationships as an ordered process of social existential overtures
 constraining-and-cohering the child's adoption-of/integration-with the supposedly
 'underlying totalising/circumscribing/delineating signifying-construct of language' as of a
 peculiar, intuitive and dynamic developing metaphoricity where 'both the child and members
 of the overall social-construct existentially adjust to each other as of spurious meaningful

utterances like mutual babbling and baby-talk’ while implicitly converging towards the child’s adoption/integration at various stages of its existential development of the ‘underlying totalising/circumscribing/delineating signifying-construct of language’ as it is reflected by the dynamics of social-construct existential situations/instances, stakes, institutions and processes. But then as might be phenomenologically appreciated the notion of language as of its existential import is thus utterly dynamic as an overall signification construct that is never ‘absolutely present’ but rather ‘immensely existentially present’ with an ‘absolute language signification construct imagery rather implied as of projection/anticipation but not phenomenologically real’ explaining the concrete variation of individuals linguistic performance, as the phenomenality of language is rather held together by ‘the given social-setup underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence for its evolving-and-devolving construct of meaningfulness-and-teleology’! Thus phenomenologically, ‘language arises, ebbs and flows as of a continuously-elusive individual and collective-social consciousness steering that reflects the totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag dynamics of individual and collective-social meaningfulness-and-teleology’, and this equally explains why language evolves and transforms over time. In effect, ‘language is never phenomenologically the complete possibilities of language as an absolute present conception but is rather a becoming as of an immensely-existentially-present signification reflected by individuals and the collective-social along existential development stages as of the dynamics of social-construct existential situations/instances, stakes, institutions and processes’. The above insight further points out the pertinence of construing-of and analysing language more completely as of human existentialism/throwness/facticity, giving that language is more phenomenologically-and-pragmatically a signification accompaniment of ‘individuals and the collective-social along

existential development stages as of the dynamics of social-construct existential situations/instances, stakes, institutions and processes'. This highlights the 'knowledge implications as of accreting-substitutive-subsumption-as-futural-différance-freeplay with regards to such a phenomenological conception of language as a lockstep veridical reflection of human personality development all along the various existential stages as of a notion of the dynamics of social-construct existential situations/instances, stakes, institutions and processes from childhood to adulthood', notwithstanding the fact that the privileged social conceptualisation of language is as of 'language as the complete possibilities of language as of an absolute present conception usually of a privileged end-institution purpose'. Metaphoricity is thus rather construed as of its overall conflatedness projective-totalitative—implications of full consciousness development as of Being-development/ontological-framework-expansion underlying human textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence, beyond just mere figurativeness but as of figurative projected implications of individuals and the collective-social meaningfulness-and-teleology as of their peculiarity/differentiation to the entire textual/hermeneutical rhetorical-stylistic-semantic delivery, and as such metaphoricity induces totalising/circumscribing/delineating signification in producing, as of accreting-substitutive-subsumption-as-futural-différance-freeplay, 'underlying totalising/circumscribing/delineating signifying-construct of language' and together with its associated adjunctive-metaphoricity-significations. Overall, human explicit and implicit signification as of language as articulated above is equally reflected in human aesthetics/arts like music and even science. Ultimately, human adjunctive-metaphoricity-significations conflatedness reflecting syncretising-effecting superseding of human self-referencing signifying-constructs as of the need to supersede the limited certitude as of human limited-mentation-capacity, inherently implies that the possibility for 'absolute certitude as of its theoretical possibility' lies with such an adjunctive-

metaphoricity-significations conflatedness as of syncretising-effecting as ultimately converging towards a deprocrypticism or preempting-of-disjointedness-as-of-reference-of-thought, and so as of the prospect of an ontologically-veridical Theory of Everything, and insightfully with regards to elucidating the pervasiveness of ‘accreting-substitutive-subsumption-as-futural-différance-freeplay construed as différance in conflatedness’ associated with human existential grasp of knowledge as of the implications of its limited-mentation-capacity. The notion of accreting-substitutive-subsumption-as-futural-différance-freeplay as underlying human limited-mentation-capacity induced différance highlights the phenomenological reality all along humanity’s existence of ‘the privileging of ontological-construction’ as from the perspective/framing/reference/horizon of the end-purpose of the various relevant dominant social agencies and social institutions, and so as reflected as of humanity’s existence ontological-aesthetic-tracing. While such a privileging as of immediate/instant existential implications like say parents and society privileging the conception of what is language in terms-as-of-axiomatic-construct of its end-purpose as of the perspective of the child’s integration in various social structures and institutions; however, in the bigger picture the fact that social structures and social institutions dysfunction as of human limited-mentation-capacity, point to the ‘ontological-veracity of fundamentally re-evaluating the pertinence of only-a-social-and-institutional-end-purpose-perspective/framing/reference/horizon driven basis for ontological-construction’, and so as of a putting into question exercise. Ultimately, such privileged perspective/framing/reference/horizon as of its ‘non-recording and negation’ of a ‘diverse-and-complete existential effecting possibilities accountability for ontological-construction’, and rather assuming the approach of a ‘select privileged ontological-aesthetic-tracing ontological-construction’, instead incompletely portrays the operant reality of humanity’s existence as of the cumulation of successive humanity’s presencing—or-totalising-self-

referencing-syncretising-forward-facing-self-consciousness as implied with the various institutionalisations finalities. But then while that is pertinent, and so with regards to the successive institutionalisations outcomes of ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications’ as successive transcendental outcomes, so reflected by the ontological-aesthetic-tracing; this doesn’t reflect an inherent *différance* operant phenomenological process reality. Such a reality is actually reflected as of accreting-substitutive-subsumption-as-futural-*différance*-freeplay as of the transversality of various temporal-to-intemporal perspectival existential amalgamation that structurally/paradigmatically reflect the dynamics of human ontologically-veridical construals and misconstruals towards transcendence. Accreting-substitutive-subsumption-as-futural-*différance*-freeplay is thus reflective of the fulsome humanity existential ontological-conceptualisation dynamics than just as of the select ontological-veracity of the privileged as dominant social and institutional end-purpose perspective/framing/reference/horizon. Consider in this regard supposedly that ‘traditional classical mechanics axiomatic-construct’ and the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ reflect an ontological-aesthetic-tracing as transcendental outcomes of such *différance*, accreting-substitutive-subsumption-as-futural-*différance*-freeplay is not only about the successive presencing—or-totalising—self-referencing-syncretising-forward-facing-self-consciousness as *différance* transcendental outcomes as of ‘developed classical mechanics’ and then ‘developed theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ as of their prospective relative-ontological-completeness/relative-ontological-contiguity as axiomatic-constructs of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, but will grasp the

deeper-level phenomenological insight with regards to all the background efforts and contributions that ultimately brought about these two successive presencing—or-totalising—self-referencing-syncretising-forward-facing-self-consciousness construed as the ontological-aesthetic-tracing of the *différance*. The implication here resonates with the idea that knowledge is much more than the construal of conceptual knowledge outcome, but rather its construal as notional-knowledge involving the dynamic understanding of both its temporality/misconstrual and intemporality-as-ontological-construal as of accreting-substitutive-subsumption-as-futural-*différance*-freeplay involving specifically disambiguation as of human limited-mentation-capacity dynamics as of deneuterising—referentialism and thus beyond neuterising’ reflecting the difference-in-nature/notional-discontiguity-or-epistemic-discontiguity/difference-in-apriorising-or-axiomatising of the uninstitutionalised-threshold and the prospective institutionalisation; as the ‘effecting implications of knowledge’ are more than just about its conceptualised intemporality-as-ontology but involves grasping this together with the implications of temporality, and so because of the circular existential implications of human limited-mentation-capacity. Hence language can be more pertinently construed ontologically as of the social dynamics of existential meaningfulness-and-teleology signification than just as of just an outcome privileged institutional end-purpose perspective/framing/reference/horizon that is in many ways ad-hoc and phenomenologically un insightful as of the many existential implications behind comprehending language. Thus human privileged social and institutional end-purpose perspective/framing/reference/horizon tend to be in constitutedness. Further such accreting-substitutive-subsumption-as-futural-*différance*-freeplay is the existentially veridical and effective basis for reflecting ontological-aesthetic-tracing transcendental outcome as can be implied in a storied-construct as of existentially insightful meaningfulness-and-teleology. Such a perspective should possibly usher in a ‘suprastructural postmodernism in everything’

including such nascent contemplations for breaking out of currently perceived subject-matter doldrums as implied with postmodern social sciences, postmodern humanities, postmodern art, postmodern science, postmodern mathematics and postmodern physics, and so notwithstanding a history of post-structuralism critiques of intellectual-bad-faith ‘with moronic incantations that fail the mark of even bad intellectual arguments as social-aggregation-enabling invocations’, granted as of their beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought; as such a statement is not gratuitous given the mere fact that where knowledge-as-of-organic-knowledge as of human intemporality doesn’t take its due place, it is occupied by ignorance as of human temporality with consequent nefarious ramifications for Being-development/ontological-framework-expansion. Basically, just as the adjunctive-metaphoricity-signification instigation of positivistic rationality as a potent construct took the form of a centred-totalisation permeating all aspects and subject-matter domains of human existence and so for the better with regards to Being-development/ontological-framework-expansion, postmodern-thought and as of its underlying phenomenological depth transcendently carries prospective Being adjunctive-metaphoricity-signification as of a potent construct for a centred-totalisation permeation and sublimity of all aspects and subject-matter domains of human existence, and so for the better of Being-development/ontological-framework-expansion. Such phenomenology as the ‘deepest phenomenological transcendental-point-of-departure handle as of the notional-conflatedness of notional-deprocrypticism deneuterising—referentialism’ is operantly enabled by accreting-substitutive-subsumption-as-futural-différance-freeplay and is the maximal ontologically veridical articulation of conflatedness that ‘undermines the privileging of presencing—or-totalising—self-referencing-syncretising-forward-facing-self-consciousness as of its ubiquitous-protractedness/structural-or-paradigmatic ‘ontological-contiguity or difference-of-kind’ disposition, and so beyond just reflecting such presencing privilege

undermining as of transcendental outcomes implied by ontological-aesthetic-tracing. While the ‘Derridean quasi-transcendental-freeplay *différance*’ by its rather quasi-transcendental-freeplay orientation doesn’t quite get to such a phenomenological depth of conflatedness, it does effectively elicit such an underlying conception of phenomenological profoundness. As such a ‘Derridean quasi-transcendental-freeplay *différance*’ is what is meant to be understood as a relatively more pertinent ontologically depth for such a more evolved and ‘experimental’ articulation of *différance* in the strive to maximally undermine presencing—or-totalising-self-referencing-syncretising-forward-facing-self-consciousness implied in the Glas experimental project which goal is well beyond the two texts but more fundamentally a demonstration of ‘textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence’ as multifaceted. Ultimately, ‘Derridean quasi-transcendental-freeplay *différance*’ unsuspectingly points out that meaningfulness-and-teleology imply by default a given perspective/framing/reference/horizon, such that as of a presencing—or-totalising-self-referencing-syncretising-forward-facing-self-consciousness meaningfulness-and-teleology facet it is then already compromising non-presencing—or-withdrawal—or-metaphysics-of-absence—or-transcendental-reasoning-of-event-as-prospective-ontology-origination meaningfulness-and-teleology facet. Thus, this author holds that such a ‘Derridean quasi-transcendental-freeplay *différance*’ is fundamentally incomplete as of comparison with the implied conflatedness of accreting-substitutive-subsumption-as-futural-*différance*-freeplay which is truly transcendental. The former fails to factor in that human limited-mentation-capacity has to establish the appropriate ‘perspective/framing/reference/horizon implications’ with regards to meaningfulness-and-teleology, and so as disambiguating presencing from non-presencing, such that unsuspectingly the ‘Derridean quasi-transcendental-freeplay *différance*’ not doing that rather represents the presencing as the common perspective/framing/reference/horizon for both, thus falsely pointing to ‘difference-in-

kind/notional-contiguity-or-epistemic-contiguity/difference-in-aposteriorising-or-logicising between presencing and non-presencing, and so contradictorily as if both are of the presencing. With the reality that non-presencing is wrongly-and-unsuspectingly given as common with presencing, thus inducing a relative ontologically-flawed quasi-transcendental freeplay as non-presencing is in ‘notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality)’ when analysed as of presencing. Consider in this regard ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ with the articulation as of prior relative-ontological-incompleteness being ‘traditional classical mechanics axiomatic-construct’ and the articulation as of prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought being the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’; now, articulating meaningfulness-and-teleology of this ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ as of ‘traditional classical mechanics axiomatic-construct’ construed as presencing makes the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ construed as non-presencing to be in notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality). Consider in this regard that the ‘Derridean quasi-transcendental-freeplay différence’ is akin to the contributions of many prior seminal scientists like Poincaré, Lorentz, Plank, Rutherford and others to the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ but whose works were still being interpreted in terms-of/adjunctive-to ‘traditional classical mechanics axiomatic-construct’ thus explaining the implied notional-discontiguity/epistemic-discontiguity-(as-of-undefined-or-undecidable-threshold-of-ontological-veridicality). Whereas accreting-substitutive-subsumption-as-futural-différance-freeplay is akin to the complete ‘epistemic-break’, as of

Einstein's defining-threshold contribution with the-theory-of-relativity and Bohr's defining-threshold atomic-model contribution to quantum-mechanics together with other seminal scientists subsequent contributions that ultimately led to 'the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality' transcendence-and-sublimity as of the 'theory-of-relativity-together-with-quantum-mechanics axiomatic-construct' interpretation as of non-presencing. In any case thus such a 'Derridean quasi-transcendental-freeplay différance' doesn't have any serious ontological consequences with respect to presencing since it is reflecting presencing as with the Glas experimental project, but it fails to recognise the possibility of a futural différance where meaningfulness-and-teleology is construed as of the prospective non-presencing which points to a prospective relative-ontological-completeness/ontological-contiguity as of the very same totalising-devolved—purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality; even though it is the first step towards such a futural différance transcendence-and-sublimity. It equally explains such a Derridean conclusion that human sublimity is an always evasive notion given its failure to recognise the difference-in-nature/notional-discontiguity-or-epistemic-discontiguity/difference-in-apriorising-or-axiomatising as of the transcendental implications of prospective non-presencing in inducing sublimity, with such a difference-in-nature/notional-discontiguity-or-epistemic-discontiguity/difference-in-apriorising-or-axiomatising arrived at by human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as of ontological-dementation/dialectical-dementation stranding dialectics involving ontological-faith-notion-or-ontological-fideism driven re-projection/re-anticipation as of prospective apriorising/intelligibilitysetup/measuringinstrument/axiomatising about 'coherence/contiguity-of-superseding—oneness-of-ontology-implied-as-of-inherent-existence-

coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness' (so-enabled by underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ontological-primemovers-totalitative-framework projective-totalitative-implications and not any notion of innateness besides existentially inherent human-subpotency), and validated as of ontological-primemovers-totalitative-framework; as of ontological-faith-notion-or-ontological-fideism 'promise of correspondence between human-subpotency as of Being-and-consciousness development and existence as of ontological-veridicality'. It is interesting again to note that the so-renewed 'underlying totalising/circumscribing/delineating of physics' as the 'theory-of-relativity-together-with-quantum-mechanics axiomatic-construct' as of transcendence-and-sublimity, is not arbitrarily arising from any human-subpotency presencing but is rather divulged-as-of-relative-ontological-contiguity from existence's non-presencing by the fact of 'human-subpotency ontological-faith-notion-or-ontological-fideism led projection/anticipation' ultimate validation by ontological-primemovers-totalitative-framework. This meaningfulness-and-teleology centred-totalisation-inducing-transcendence-and-sublimity metaphoricity thus perfectly satisfies the 'foreboding concern for ontological-veracity' critically pursued by the Derridean freeplay *différance*, as it is existence as the absolute a priori that phenomenological validates transcendence-and-sublimity, and so implying human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination; and thus, this point that enables the Derridean freeplay *différance* as of tendential-deliberation-of-decidability to achieving transcendence-and-sublimity is the full conflatedness reflecting existence as the absolute a priori in its non-presencing, and so beyond just a Derridean freeplay *différance* which is then in constitutedness as not factoring in the process of a tendential-deliberation-of-decidability

towards attaining transcendence-and-sublimity. Insightfully, we can grasp that the Derridean freeplay *différance* becomes as of constitutedness because ‘reasoning itself has become defective’ as presupposing-by-the-Derridean-freeplay to supersede existence as the absolute a priori. So because at the point of transcendence-and-sublimity reasoning is still presupposing thought-determination instead of given up to the possibility of existence’s divulgation construed as ontological-faith-notion/ontological-fideism, and so erroneously become the transcendental-signifier of existence despite the reality of human limited-mentation-capacity which priority at that point should be the need for validation from existence as the absolute a priori and not make any determination priorly, even as of freeplay. Furthermore, it is wrong to construe/equate as imagination such ontological-faith-notion-or-ontological-fideism that as ‘hunch’ restores existence as the absolute a priori, since in reality it is rather pushing reasoning to its very limits in a notional disposition that is not guaranteed, and only occasionally as of tendential-deliberation-of-decidability is it confirmed by existence’s non-presencing as validatable by ontological-primemovers-totalitative-framework. Thus behind ontological-faith-notion-or-ontological-fideism as ‘hunch’ is a transversal depth of reasoning and perspective which is pushed to its brink in projection/anticipation/expectancy. The fact is ontological-faith-notion-or-ontological-fideism exhausts-and-supersedes-reasoning as of projection/anticipation/expectancy with no prior certitude, and is more than just imagination which rather comes prior to and is exhausted-and-superseded-by-reasoning. Such a lack of prior certitude explains why transcendence-and-sublimity ‘are not really reasoned-out’ but rather discovered-as-divulged by existence, with the human-subpotency concern being one of adopting the right attitude/mental-disposition/care—and–episteme that allows existence-as-full-potency to come up with the divulgation. Ontological-faith-notion-or-ontological-fideism as such is equally the basis for implying a correspondence theory of human thought and reality, as not really arising as of any instantative absolute correspondence but rather as of the

ontological-completeness/transvaluating/maximalising-recomposuring-for-relative-
 ontological-completeness/transvaluating. This insight about ontological-faith-notion-or-
 ontological-fideism further reveals that prospective non-presencing implies prospective
 renewal of attitude/mental-disposition/care—and—episteme, as of ontological-
 dementation/dialectical-dementation stranding dialectics which at once draws out the
 renewed implications of what qualifies as affirmation/projection/assertion/dueness-
 validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-
 thinking and unaffirmation/deprojection/de-assertion/undueness-invalidating-
 logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing
 respectively as of prospective relative-ontological-completeness-of-axiomatic-construct-or-
 reference-of-thought and prior relative-ontological-incompleteness. In this regard we can
 imagine as of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-
 intrinsic-reality/ontological-veridicality/existential-reality’, the strange feeling upon
 physicists wedded to ‘traditional classical mechanics axiomatic-construct’ with respect the
 prospective ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’
 maximalising-recomposuring-for-relative-ontological-completeness/transvaluating
 articulation of such ideas as space-time, considering the ether as unreal, considering that the
 laws of physics are different at atomic scale, etc. as the fundamental basis for understanding
 the new physics as of its prospective relative-ontological-completeness-of-reference-of-
 thought. Such a construal as a shift in axiomatic-construct is more-or-less within the same
 positivism/rational-empiricism registry-worldview, though it might pretty much be argued
 that the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ marks
 the beginning of a proto-postmodern science as of the fundamental human-subject-
 emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation
 developments in physics since then, even though its meaningfulness-and-teleology remains

intelligible, more or less, to the positive science essentially by the modern conception of observational and experimental validation. However, the idea of requisite shift in attitude/mental-disposition/care-and-episteme from that simplistic ‘modern conception’ cannot be contested. Such an attitude/mental-disposition/care-and-episteme implied shift as articulated above, construed as of an overall registry-worldview/dimension reference-of-thought transcendence is rather ‘massively distressing’ when implied ‘as of an instant of transitioning’ since the reality of such attitude/mental-disposition/care-and-episteme transitioning have tended to take place rather cross-generationally as of human beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. As we can now imagine the transitioning of positivism/rational-empiricism attitude/mental-disposition/care-and-episteme from earlier crude conceptualisations of positivism/rational-empiricism as presently reflecting a more universal valid notion of positivism/rational-empiricism as of its spread worldwide and profoundness in today’s societies. Interestingly, this transitioning nature of human attitude/mental-disposition/care-and-episteme renewal manifestation as of the social collective evolution, and is equally reflected in the individual as-receptacle-of-temporal-to-intemporal-individuations-ontological-performance; as at any given moment individuals and society are rather inclined to adopt an attitude/mental-disposition/care-and-episteme of dual-language/split-mentality as of totalising–thrownness-in-existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance. The implied notion of human emancipation is always being articulated in an existentially dual-language/split-mentality that on the one hand fails the implied emancipation and on the other hand implies a strife for such emancipation. Consider in this regard, the attitude/mental-disposition/care-and-episteme of warring nations in the early 20th century all too ready to arm themselves massively in preparation for the world wars and equally very much aware of

the need for international peace, or in the 18th and 19th centuries the dual-language/split-mentality of universal human rights and ending slavery in the new world and the slave trade on the one hand and on the other still practicing it up to the point of wars like the American civil war to bring an end to it. In a more prosaic note, the dual-language/split-mentality associated with the evasiveness of emancipatory social and political dispositions as of relevant settings and contexts. In fact, this author will surmise that in many ways we already carry inklings of postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and–episteme as of the dual-language/split-mentality at appropriate contexts and settings extolling our liberality with progressive stakes while in other secluded settings and contexts espouse a damning language regarding such progressive stakes. The idea of requisite attitude/mental-disposition/care—and–episteme renewal as implied for notional ontological-faith-notion-or-ontological-fideism induced transcendence-and-sublimity speaks of a ‘reality as of underlying human beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought’, that reflects a human tacit awareness that the grounding of its meaningfulness-and-teleology is not-certain-as-absolute at any given moment, and that it should be prepared to shift its attitude/mental-disposition/care—and–episteme for more profound-and-complete meaningfulness-and-teleology. While such an inclination is more forthcoming as of less profound-and-perceived personal existential implications with regards to the axiomatic-constructs within a reference-of-thought as articulated priorly with a shift for the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ within the positivism/rational-empiricism reference-of-thought, however, as of more profound-and-perceived personal existential implications as drastically implied at the phenomenological depth of reference-of-thought transcendental conceptualisation this turns out to be much more difficult to countenance

given individuals 'mental and existential investment' into meaningfulness-and-teleology as grounded on a given 'registry-worldview's/dimension's reference-of-thought totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag established existential-totalisation-of-meaningfulness-and-teleology' as well as the 'psychological comfort' habituated at the given neuterising. But then every registry-worldview/dimension has its own specific hurdle to clamber-over and that of futural Being-development/ontological-framework-expansion as of prospective deprocrypticism is exactly the capacity to construe meaningfulness-and-teleology as of full/complete human consciousness implications as implied by its protensive-consciousness which ultimately doesn't allow for meaningfulness-and-teleology beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought arising as of human prior relative-ontological-incompleteness-of-reference-of-thought. The fact is the ontological-faith-notion-or-ontological-fideism conflatedness implication with respect to existence's non-presencing is such that in reality we are always tacitly aware of the evasiveness of absolute certainty but often rather inclined as of practicality to hang on to a delusion of the results of prior non-presencing as if of absolute certainty, so-construed as reasoning-from-results/afterthought. But then veridical absolute certainty is ever a promise always held in prospective existence's non-presencing, and so as of the certainty of of human limited-mentation-capacity prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought projective-totalitative-implications for transcendence-and-sublimity, implied as of intemporal-preservation-entropy-or-contiguity-or-ontological-preservation. This explains why ontology's-directedness-as-Being is the direction of meaningfulness-and-teleology grounding as always prospective as of prospective relative-ontological-completeness-of-reference-of-thought; and so, as of the successive base-institutionalisation, universalisation, positivism and deprocrypticism registry-worldviews/dimensions non-presencing respectively as successive meaningfulness-and-

teleology grounding for recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism, and positivism–procrypticism presencing. Interestingly we can appreciate that the attitude/mental-disposition/care–and–episteme as of relevant existential issues of all the prior registry-worldviews/dimensions reference-of-thought are wanting-as-relatively-ontologically-flawed from our positivism–procrypticism as prospective perspective/framing/reference/horizon of meaningfulness-and-teleology. However, we are hard-pressed to concede that from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought as of its prospective relative-ontological-completeness-of-reference-of-thought, our positivism–procrypticism is wanting-as-relatively-ontologically-flawed; as by reflex every registry-worldview/dimension is inclined to hang on to a delusion of the results-as-afterthought of prior non-presencing even at its uninstitutionalised-threshold despite its notional-discontiguity/epistemic-discontiguity with the prospective registry-worldview/dimension institutionalisation. Thus inducing its specific neutering as it fails to construe of meaningfulness-and-teleology projectively as of prospective existence’s non-presencing. The implied maximalising-recomposuring-for-relative-ontological-completeness/transvaluating notion also underscores the postmodern conception of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation with regards to any totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality, as fundamentally driven as of existence’s non-presencing as so validatable by their ontological-primemovers-totalitative-framework. Hence it is ‘more real in its human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation understood as a double-gesture reification for prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought’ by its maximalising-

recomposuring-for-relative-ontological-completeness/transvaluating as of existence's non-presencing than any other prior non-constructed meaningfulness-and-teleology simply because of the profoundness of its phenomenological depth of projection/anticipation in the quest for ontological-primemovers-totalitative-framework validation, which ordinary averaging-of-thought doesn't even bother contemplating about by its incrementalism-in-relative-ontological-incompleteness reflex of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity as of existence's presencing. This social knowledge human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation insight translate the reality that 'conventioning and tradition grounded critiques' of postmodernism fundamentally misconstrue that they are departing, as of their reference-of-thought, from a less real position to evaluate a more real position; more like the irony of trying to evaluate the 'theory-of-relativity-together-with-quantum-mechanics axiomatic-construct' from a posture of 'traditional classical mechanics axiomatic-construct'. Here is what fundamentally underlies the naïve misunderstanding of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation. For instance, the 'theory-of-relativity-together-with-quantum-mechanics axiomatic-construct' actually reflects that priorly conceptualised-notions like 'space', 'time', 'ether' and 'the laws of physics at atomic scale had to be the same as at the macroscale', were all wrong. Thus 'speaking of the reality of human limited-mentation-capacity as of its existential analytic capacity' in a state of prior relative-ontological-incompleteness-of-reference-of-thought. It is human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as of prospective relative-ontological-completeness-of-reference-of-thought as subsequently assuming as more real the notion of 'space-time', 'considering the ether as unreal', 'considering that the laws of

physics are different at atomic scale from the macroscale', etc. that as of the human-subject-
 emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation
 exercise brought about the more profound insight enabling the conception of the 'theory-of-
 relativity-together-with-quantum-mechanics axiomatic-construct' ultimately validated as of
 ontological-primemovers-totalitative-framework by existence's non-presencing; as all along
 humankind existence as of human-subpotency, the new reality so-espoused 'is never about
 existence in itself as-existence-is-given-whatever-it-is-that-is-given', but about human
 limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-
 realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination for human
 emancipation. Thus implying existence's non-presencing is 'not really about any variation as
 of the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-
 towards-singularisation directed directly to inherent-existence-as-of-existential-
 reality/existence-potency/intrinsic-reality/ontological-veridicality whatever', as it rather
 comes down to the human-subject-emancipatory-relativism-driven-recomposuring-
 constructivism-towards-singularisation as of human limited-mentation-capacity-deepening-
 in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-
 contiguity/ratiocination bringing about a more profound and complete grounding for human
 construing of the full-potency of existence, which remains-whatever-it-is-ultimately. The
 postmodern insight here is rather that what is relevant to humankind is human-subpotency
 development towards the abstract full-potency of existence-whatever-it-is-ultimately. So the
 notion of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-
 towards-singularisation has nothing to do with the inherent nature of existence/existence-
 potency/intrinsic-reality/ontological-veridicality. Rather it has to do with 'enlightening
 human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-
 singularisation' of human limited-mentation-capacity which needs to be deepen before

humankind embarks on the task of ‘conceptualising meaningfulness-and-teleology that increasingly reflects existence/existence-potency/intrinsic-reality/ontological-veridical’. Thus this actually lead to ‘more and more objective meaningfulness-and-teleology’ as we cannot argue that the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ is less objective than ‘classical-mechanics axiomatic-construct’ since it involved the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation that led to human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination. Quite the contrary, it is that exercise in inducing prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought that brings about greater objectivity, as reflected in the institutionalisation process behind Being-development/ontological-framework-expansion. That naivety in failing to grasp this lies in the ontologically-flawed mental-reflex of temporal totalising-self-referencing-syncretising, wherein mental-dispositions operate by default without a double-gesturing, on the ‘wrong assumption that they already have the most ontologically-developed perspective/framing/reference/horizon for grasping prospective meaningfulness-and-teleology’; and failing to project/anticipate prospectively the implications of their very own shallow limited-mentation-capacity implications from a deeper prospectively-construed perspective/framing/reference/horizon. Such a ‘modern take’ is susceptible to construe of the presence as of metaphysics-of-presence/illusion-of-the-present/present-consciousness/mirage, with hardly any contemplation of the retrospective and prospective projective-insights for construing ontologically-veridical meaningfulness-and-teleology. This paradox for human knowledge, as implied with the postmodern double-gesture reification, highlights that the human paradigm for construing knowledge is similar to H.G. Well’s country of the blind narrative, with the more critical issue being about ‘human blindness which needs to be

resolved first before proceeding to see', as what is to be seen as of the world is already given-
 whatever-it-is, and our true issue-as-of-knowledge is to develop the necessary human-
 subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-
 singularisation limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-
 renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination to see it. This
 fundamentally underlies the idea of
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising/'reference-of-thought—
 devolving-teleological-structure-of-meaningfulness' as underlying a given registry-
 worldview's/dimension's reference-of-thought for meaningfulness-and-teleology
 conceptualisation and ontological-performance. In registry-worldview/dimension terms, the
 naivety of 'failing to recognise that human limited-mentation-capacity deepens by human-
 subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-
 singularisation' paradoxically and ridiculously amounts rather to construing of a prospective
 registry-worldview/dimension institutionalisation's reference-of-thought as of its prospective
 relative-ontological-completeness-of-reference-of-thought in terms of the prior registry-
 worldview/dimension uninstitutionalised-threshold's/uninstitutionalised-threshold's
 reference-of-thought as of it prior relative-ontological-incompleteness-of-reference-of-
 thought. The argument traditionally made about postmodern-thought as 'sceptical with
 regards to ontologically-flawed-metanarratives/ideologies and the lack of objectivity of
 meaning' is a wrongly articulated/made argument ontologically, since it is being wrongly
 articulated/made from the 'modern perspective/frame/reference/horizon' which is actually in
 prior relative-ontological-incompleteness-of-reference-of-thought as of a shallower limited-
 mentation-capacity and thus has to be decentered-as-dialectically-dementing. Rather the
 ontologically-veridical articulation of the postmodern argument as of its actual prospective
 relative-ontological-completeness-of-reference-of-thought which has to be prospectively

centered-as-dialectically-thinking over the modern take as prospectively decentered-as-dialectically-dementing, should be affirmatory in articulating that postmodern-thought is about: the appraisal and supplanting of ontologically-flawed-metanarratives/ideologies including socio-econo-political ideologies and ontologically-flawed professed ideologies like demarcating ontological-flawed-ideology-of-science-and-its-distortive-implications from ontologically-veridical-science-in-practice, and its pursuit for the most profound-and-complete objectivity of meaning as of prospective relative-ontological-completeness-of-reference-of-thought by renewing appraisal of intrinsic-reality/ontological-veridicality by human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation as of human-subpotency existential-contextualising-contiguity conflatedness'. The implication here is that hitherto postmodern-thought had been naively and falsely conceptualised within the 'modern take attitude/mental-disposition/care-and-episteme' as of its procrypticism/disjointedness-as-of-reference-of-thought, instead of implying the ontologically-veridical 'subverting of the modern take' by its very own 'postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme' which prospectively represents the modern as dialectically-dementing while the postmodern is dialectically-thinking; as the point of assertion of postmodern-thought as deprocrypticism/pre-empting-disjointedness-as-of-reference-of-thought is actually a point of prospective ontological-dementation/dialectical-dementation stranding dialectics. Of critical insight here is the fact that many postmodern authors like Foucault, Lyotard and Derrida adopted stances as of constructivism, relativism and deconstruction are rather ontologically-veridical observations/remarks/'constatations' about the conception of social reality from their authentic analysis 'without going further out-of-the-scope-of-ontological-veracity to ideologise constructivism, relativism and deconstruction

beyond their implied ontologically-veridical observations/remarks/constatations’ as many of their critiques poorly misinterpret them; with the implications that their stances are open-ended and receptive to the elucidative justifications for their non-ideologised ontologically-veridical observations/remarks/‘constatations’ about the constructivism, relativism and deconstruction manifestation/conception of social reality. Thus the ontologically affirmatory position adopted herein as of the prospective ‘postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought

apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and–episteme’ is not contradictory but rather complementing their positions as it rather reinterprets their observations/remarks/‘constatations’ as of human limited-mentation-capacity prospective relative-ontological-completeness-of-reference-of-thought projective-totalitative–implications; wherein for instance, for the recurrent-utter-uninstitutionalisation reference-of-thought ill-health is as of an existential-contextualising-contiguity-lowest-level-reification perceptivity-as-of-bad-omen while for the positivism reference-of-thought ill-health is as of a perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation. Basically, the ‘hitherto ontologically-flawed postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and–episteme’ in its relation with modernity wrongfully implied that it seeks the validation of modernity, and so as ridiculously as implying that budding positivism/rational-empiricism should have sought for its validation from medieval-scholasticism-pedants—ideal-type-or-individuation. In both cases, the fundamental issue once universal-transparency avails, as herein implied originarily/as-of-event with the ‘prospective/new postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising

attitude/mental-disposition/care-and-episteme', is mostly about dismissing the prior relative-ontological-incompleteness-of-reference-of-thought as when a critique in notional-discontiguity/epistemic-discontiguity exposes the reality of a dialogical and intellectual inequivalence given their anti-intellectual stances against postmodern-thought preferring to 'circumvent genuine intellectual engagement' for extra-intellectual activities of institutional-being-and-craft meant to preserve vested narrow interests beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. Just as it was perceived as a fool's errand by the Descartes, Galileos, Diderots, etc., to contemplate of genuine intellectual engagement between their budding positivism/rational-empiricism ventures with traditional medieval scholasticism, especially with regards to the latter's institutionally-associated dogmatic censure and persecution, and thus with the former resorting to discursive strategies for universal-transparency; it is inevitably the case that what is most critically warranted is for the 'prospective/new postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought

apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme' to articulate its full-fledged discourse as of universal-transparency as of the liberality of thought allowed for in open society notwithstanding such extra-intellectual and media-driven perverted representation of postmodern-thought. The reality of human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-

dispositions—existentialism-form-factor speaking of human shallow-to-deeper limited-mentation-capacity implies that prospective paradigmatic transcendental knowledge by its so-projected intemporality, at the uninstitutionalised-threshold, is not necessarily grasp as intemporal in the overall human social-stake-contention-or-confliction framework as of the lack of universal-transparency for its prospective institutionalisation. Critical for the social

validation and institutionalisation of any paradigmatic transcendental knowledge is the fact that its ‘concurrent ontological-primemovers-totalitative-framework’ is not sufficiently decisive given that human temporal-to-intemporal nature as of the social-stake-contention-or-confliction framework at the uninstitutionalised-threshold cannot adjudge-and-commit-to the ontological-pertinence of such prospective transcendental knowledge ‘concurrent ontological-primemovers-totalitative-framework’. Consider in this regard, the ‘concurrent ontological-primemovers-totalitative-framework’ of the prospective positivism/rational-realism transcendental knowledge articulated by the Copernicuses, Descartes, Galileo, Diderots, etc. as meaningfulness-and-teleology of prospective relative-ontological-completeness-of-reference-of-thought validated by corresponding prospective ‘concurrent ontological-primemovers-totalitative-framework’. Such ‘concurrent ontological-primemovers-totalitative-framework’ was not a sufficient basis for their ideas to be socially adopted by the medieval establishment social-stake-contention-or-confliction framework at its uninstitutionalised-threshold as of non-positivism/medievalism. The point being made here is that within a given registry-worldview/dimension institutionalisation framework the idea of ‘concurrent ontological-primemovers-totalitative-framework’ is only more or less determinant as of the institutionalisation’s internal basis of validation of knowledge grounded on its reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as of its totalising/circumscribing/delineating reference-of-thought-devolving’. However, at its uninstitutionalised-threshold the prospective ‘concurrent ontological-primemovers-totalitative-framework’ as of the prospective institutionalisation’s basis of validation of knowledge grounded on the reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of the prospective institutionalisation’s totalising/circumscribing/delineating

reference-of-thought-devolving' will not necessarily meet with the approbation of the prior institutionalisation now construed as the uninstitutionalised-threshold, and so as of mutually beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. This has to do with the fact that the full-potency of existence that divulges relative ontological-vericality supersedes human-subpotency epistemising orientation towards its, and thus epistemic constructs as of human-subpotency construal are inevitably ad-hoc to ontological-veracity as of the full-potency of existence; as existence doesn't adjust to human-subpotency with the reverse being true, equally it is human epistemic constructs that ad-hocly adjust to ontological-veracity as of prospective relative-ontological-completeness. Thus while the idea of 'concurrent ontological-primemovers-totalitative-framework' as the basis for the validation of knowledge is inherently ontologically veridical as of a given institutionalisation's internal reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of its totalising/circumscribing/delineating reference-of-thought-devolving', however, this is an overrated notion with regards to human social-stake-contention-or-confliction framework at its uninstitutionalised-threshold as external/prospective reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of its totalising/circumscribing/delineating reference-of-thought-devolving', which should and cannot be ignored by any proponent of prospective paradigmatic transcendental knowledge. Rather human social-stake-contention-or-confliction framework fundamentally subscribes to knowledge, given this paradox, as of 'detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness' induced as of a paradigmatic transcendental knowledge 'concurrent ontological-primemovers-totalitative-framework' establishing and upholding it. The idea here is that the inherent and direct notions of

positivism/rational-empiricism expounded by the Galileos, Descartes, Diderots, Copernicuses, etc. were not the fundamental basis for the ultimate human social-stake-contention-or-confliction framework validation but rather their derived positive-opportunism that brought about the ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ implied-by-and-deriving-from their notions of universal human rights and open society, technical advances, better social organisation, etc., then leading to a reasoning-from-results/afterthought institutionalisation and enculturation of such originary/event-of-prospective-ontology-origination positivism/rational-empiricism thought. In other words, human solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity as inclination to adhere to prospective paradigmatic transcendental knowledge as of its ‘concurrent ontological-primemovers-totalitative-framework’ is very much limited and such prospective ‘concurrent ontological-primemovers-totalitative-framework’ however its ontological-veridicality cannot be naively construed as all that which is needed to effectuate social transformation and transcendence. We can appreciate this for instance in the case of cultural diffusion with respect to many a non-modern traditional social-setting where modern day medicine however its overall ‘concurrent ontological-primemovers-totalitative-framework’ over other types of premodern medicine, will often be suspected and avoided as of its poorly established ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, and it is only after it has been ‘socially habituated-as-institutionalised’ that it has the requisite ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. This equally manifests as of prospective paradigmatic transcendental knowledge construal, as implied for instance by postmodern-thought and particularly so as postmodern-thought has still been undergoing its full construction. The implication here is that all prospective transcendental

meaningfulness-and-teleology superseding uninstitutionalised-thresholds do not come about as of simplistic continuity but rather as of epistemic-breaks/epistemic-resetting, involving successive ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ instigated-and-upheld by the associated successive prospective ‘concurrent ontological-primemovers-totalitative-framework’ paradigms of ‘reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’, as of successive prospective relative-ontological-completeness-of-reference-of-thought. The implication of such an indirect nature of human social-stake-contention-or-confliction framework validation of transcendental knowledge as of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ and not just direct ‘concurrent ontological-primemovers-totalitative-framework’ implies that just as prospective paradigmatic transcendental knowledge prospective ‘concurrent ontological-primemovers-totalitative-framework’ could be ‘objected to as of human social-stake-contention-or-confliction framework’ notwithstanding its inherent prospective relative-ontological-completeness-of-reference-of-thought given its prior lack of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’; any such prospective paradigmatic transcendental knowledge must be construed and thought-out strategically as of its ultimate establishment of ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’ that as of its prospective relative-ontological-completeness-of-reference-of-thought supersedes the prior relative-ontological-incompleteness-of-reference-of-thought, just as positivism/rational-empiricism superseded non-positivism/medievalism scholasticism. Likewise ‘concurrent ontological-primemovers-totalitative-framework’ ontologically-flawed knowledge can be legitimately overlooked where such knowledge is implied as of priorly

established ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. This latter cases arise with many a bogus social or natural science study and methodology grounded on the ‘mystifying imprimatur’ of positivistic science, as ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’, but then on closer examination turns out to be poorly designed as well as the prevalence of institutional-being-and-craft suboptimal dispositions with regards to truly upholding the science ethos in many situations with regards to the ideal operation and promotion of scientific research; and so, as of human temporal-to-intemporal ontological-performance of any ‘reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’. Already, postmodern interpretations have increasingly been much more relevant practically to many subject-matter domains and activities, with even greater potential for transformative implications if fully acted upon. Furthermore, the ‘prospective/new postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care–and–episteme’ warrants that postmodern-thought hitherto articulated beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought in terms-as-of-axiomatic-construct of the ‘modern take attitude/mental-disposition/care–and–episteme’, need to be translated-as-reconceptualised into its very own ‘postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care–and–episteme’ as of its own truly postmodern organic-knowledge. The fact is that organic-knowledge is fundamentally driven as of attitude/mental-disposition/care–and–episteme, wherein for instance Newtonian Physics as of positivism/rational-empiricism attitude/mental-disposition/care–and–episteme organic-knowledge makes little sense and is

of little potential if construed as of a medieval or animistic social-setup alchemic or mystical attitude/mental-disposition/care-and-episteme. In this regard, attitude/mental-disposition/care-and-episteme is fundamentally the apriorising/intelligibilitysetup/measuringinstrument/axiomatising notional-conflatedness as implied by its ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence totalising/circumscribing/delineating reference-of-thought-devolving’ in reflecting the ‘incisive-and-intransigent nature of existence as the absolute a priori’ for the given attitude/mental-disposition/care-and-episteme true meaningfulness-and-teleology ontological-performance. Where beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, the new/prospective attitude/mental-disposition/care-and-episteme given its prospective relative-ontological-completeness-of-reference-of-thought is wrongly construed as deriving posteriorly from the prior relative-ontological-incompleteness-of-reference-of-thought, this induces constitutedness ‘as has been the case with prior postmodern-thought construed as of a modern take attitude/mental-disposition/care-and-episteme’; thus leading to a sort of postmodern-thought mechanical knowledge that is in many ways just budding and poorly acted upon. Ultimately, a ‘new/prospective postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme’ cross-generational development, which is its very own apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme, as of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought is rather a notional-conflatedness as of deneuterising protensive-consciousness. The practical implications as well should be that meaningfulness and definitions often articulated about postmodern-thought that do not capture the postmodern—

deprocripticism-or-preempting-of-disjointedness-as-of-reference-of-thought

apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-
disposition/care-and-episteme should be rejected; as the tendency for postmodern-thought to
be misconstrued or perverted is not accidental, given the very fact that at its very core
postmodern-thought is implying a prospective/new prospective relative-ontological-
completeness-of-reference-of-thought requiring its own
apriorising/intelligibilitysetup/measuringinstrument/axiomatising. In this regard, central to
translating-as-reconceptualising prior and new postmodern-thought as of its very own
‘postmodern—deprocripticism-or-preempting-of-disjointedness-as-of-reference-of-thought
apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-
disposition/care-and-episteme’ organic-knowledge is the requirement for an affirmative
mental-reflex with postmodern-thought construed ‘as the appraisal and supplanting of
ontologically flawed metanarratives and its pursuit for the most profound-and-complete
objectivity of meaning, by renewing appraisal of intrinsic-reality/ontological-veridicality
involving its human-subject-emancipatory-relativism-driven-recomposuring-constructivism-
towards-singularisation as of human existential-contextualising-contiguity’. The
‘postmodern—deprocripticism-or-preempting-of-disjointedness-as-of-reference-of-thought
apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-
disposition/care-and-episteme’ should equally enable the avoidance of the erroneously
implication that postmodern human-subject-emancipatory-relativism-driven-recomposuring-
constructivism-towards-singularisation is so with regards to the inherent nature of
existence/intrinsic-reality/ontological-veridicality, and rather emphasise that it is actually
with regards to the need for human limited-mentation-capacity-deepening-in-
recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-
contiguity/ratiocination. We can garner insight about how we tend to misconstrue any

attitude/mental-disposition/care-and-episteme that is different from our own 'present attitude/mental-disposition/care-and-episteme', whether it is a 'prior/old/superseded attitude/mental-disposition/care-and-episteme' or a 'prospective/new/superseding attitude/mental-disposition/care-and-episteme'. For instance, in the previous articulation of the existential-contextualising-contiguity-lowest-level-reification perceptivity-as-of-bad-omen with 'recurrent-utter-uninstitutionalisation attitude/mental-disposition/care-and-episteme' given its 'non-rules-as-impulsive-or-accidentated-or-random-mental-disposition', the reality is that our mental-representation still remains in our 'present positivism-procrypticism attitude/mental-disposition/care-and-episteme' as of its 'perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation', and only 'ad hocly-and-scantly identifies' the 'recurrent-utter-uninstitutionalisation attitude/mental-disposition/care-and-episteme' as it is wholly immersed-and-engrossed in its 'positivism/rational-empiricism attitude/mental-disposition/care-and-episteme for the construal of meaningfulness-and-teleology'; which it 'skewedly construes as the apriorising/intelligibilitysetup/measuringinstrument/axiomatising' while tempering down any prior/old/superseded or prospective/new/superseding apriorising/intelligibilitysetup/measuringinstrument/axiomatising implied as of 'the reality of human shallow-to-deeper limited-mentation-capacity apriorising/intelligibilitysetup/measuringinstrument/axiomatising implications' on the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, in defining which reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme is 'relevant as the attitude/mental-disposition/care-and-episteme of wholly immersed-and-engrossed meaningfulness-and-teleology'. The point being made here is that our natural inclination is never meant to truly-and-comprehensively reflect

any prior/old/superseded or prospective/new/superseding attitude/mental-disposition/care-and-episteme by itself but rather in any such exercise always apriorises the ‘present attitude/mental-disposition/care-and-episteme’ and then reflect the other attitude/mental-disposition/care-and-episteme referred to posteriorly, and hence the latter is adhocly-and-scantly identified. We can grasp this insight about this natural inclination to uphold-as-apriorising/intelligibilitysetup/measuringinstrument/axiomatising the ‘present attitude/mental-disposition/care-and-episteme’ from the fact that ‘originary contacts’ between two cultures of prospective relative-ontological-completeness-and-incompleteness-of-reference-of-thought doesn’t mean a wholly immersed-and-engrossed meaningfulness-and-teleology between the cultures, since their natural inclination is to both apriorise ‘their own present attitude/mental-disposition/care-and-episteme’ and respectively posteriorise the other culture attitude/mental-disposition/care-and-episteme as of their respectively apriorising/intelligibilitysetup/measuringinstrument/axiomatising present attitude/mental-disposition/care-and-episteme; and so, as the framework of any subsequent cultural diffusion metaphoricity. Thus to fully grasp what is implied here ontologically by attitude/mental-disposition/care-and-episteme, beyond the natural inclination, is to understand that attitude/mental-disposition/care-and-episteme as ‘assumed-and-unflinching apriorising/intelligibilitysetup/measuringinstrument/axiomatising transversality/logical-incongruence’ implies a mental-projection exercise ‘reflecting-and-contemplating a wholly immersed-and-engrossed meaningfulness-and-teleology’ as of their given neuterising-as-of-prior-relative-ontological-incompleteness-of-reference-of-thought if a ‘prior/old/superseded attitude/mental-disposition/care-and-episteme’ or deneuterising-as-of-prospective-relative-ontological-completeness-of-reference-of-thought if a ‘prospective/new/superseding attitude/mental-disposition/care-and-episteme’, whilst the ‘present attitude/mental-disposition/care-and-episteme’ is then rather adhocly-and-scantly identified now as either

deneuterising if it in relation to the prior/old/superseded or neuterising if it is in relation to the prospective/new/superseding. In other words, when it comes to registry-worldview/dimension implications, ontologically-veridical representation of attitude/mental-disposition/care-and-episteme means ‘to be or exist as of the given registry-worldview/dimension reference-of-thought’ rather than ‘to refer to it’; as the ‘referring to’ natural inclination is ontologically-flawed as it registers into the ‘present attitude/mental-disposition/care-and-episteme’ unlike the ‘to be or exist as’ approach which is ontologically-veridical but is not the natural inclination of representation as it overrides the ‘present attitude/mental-disposition/care-and-episteme’. ‘Postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme’ construed as of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought is thus in its potentiation the very summum for the ‘conception of human-subpotency existential scope’ implied as of Being-development/ontological-framework-expansion. Across the entire human institutionalisation process as of Being-development/ontological-framework-expansion, successive institutionalisations reflect ‘successive and changing conceptions of human-subpotency existential scope’, and so from recurrent-utter-uninstitutionalisation as ‘the most supernatural/mythical/idolised conception of human-subpotency existential scope’ to futural Being-development/ontological-framework-expansion as of prospective deprocrypticism as the most ‘realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of human-subpotency existential scope’. Insightfully, what is critical about ‘the conception of human-subpotency existential scope’ is the paradoxical fact that the more waywardly supernatural/mythical/idolised it is, the least potent has been human-subpotency mastery of the the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, while the more waywardly realistic/authentic/unexceptional-

as-of-the-mediocrity-principle it is, the more potent has been human-subpotency in its mastery of the the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality. Effectively, ‘postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care–and–episteme’ implied deprocrypticism is about a radicalisation of the ‘realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of human-subpotency existential scope’ as of its maximum potency for human subpotent mastery of the the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality. This radicalisation is grounded on the rational-realism postulate that humankind as of its limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination has always encountered its uninstitutionalised-thresholds along the institutionalisation process retrospectively and prospectively, reflecting the reality that humankind is of both a temporal/shortness-of-register-of-meaningfulness-and-teleology and intemporal/longness-of-register-of-meaningfulness-and-teleology nature at uninstitutionalised-thresholds, as of prospective institutionalisation prospective relative-ontological-completeness-of-reference-of-thought and uninstitutionalised-threshold prior relative-ontological-incompleteness-of-reference-of-thought. This departs from the ‘modern take attitude/mental-disposition/care–and–episteme’, which poorly appreciates the continuity implied by ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications’ as of Being-development/ontological-framework-expansion and is rather caught up, beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, in

the reasoning-from-results/afterthought effect of the positivism/rational-empiricism institutionalisation outcome as of its transcendence from non-positivism/medievalism, and as it construes of that outcome as the absolute possibility of human existential emancipation failing to factor in the positivism/rational-empiricism prior relative-ontological-incompleteness-of-reference-of-thought, such that the latter is construed as not having its own uninstitutionalised-threshold which then implies its failure to apriorise the notion of a human temporal-to-intemporal nature at its ontologically-veridical uninstitutionalised-threshold. Consequently, by assuming such a positivism/rational-empiricism transcendental outcome reasoning-from-results/afterthought predisposition as the complete basis for construing humankind existential emancipation, ‘the modern take attitude/mental-disposition/care—and—episteme’ adopts an ontologically-flawed ‘conception of human-subpotency existential scope’ that is construed essentially as-of-totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal-intemporality at its ontologically-veridical uninstitutionalised-threshold, as it doesn’t even and fails to recognise any such uninstitutionalised-threshold pointing to its prior relative-ontological-incompleteness-of-reference-of-thought. Thus, the manifestations of temporality at its unrecognised ontologically-veridical uninstitutionalised-threshold are construed as aberrations/oddities going from this wrongly implied intemporal/longness-of-register-of-meaningfulness-and-teleology posture in totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, rather than a recognition of it prior relative-ontological-incompleteness-of-reference-of-thought, implying recognising its uninstitutionalised-threshold with the temporal-to-intemporal implications as of knowledge notionalisation; thus providing the potency/empowering-consciousness for prospective transcendence-and-sublimity, as knowledge notionalisation not only factors in conceptual knowledge dynamics but equally the dynamics of the conceptual ignorances to better skew

meaningfulness-and-teleology towards intemporality as of organic-knowledge. The paradox here is that by its 'most realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of human-subpotency existential scope' as of its maximum potency/empowering-consciousness for human subpotent mastery of the the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, the 'postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme' grounded on such rational-realism recognition of humankind temporal-to-intemporal nature at its uninstitutionalised-threshold is actually 'effectively empowered' to incisively tackle issues arising from human temporality as of its prospective structural/paradigmatic prospective relative-ontological-completeness-of-reference-of-thought; and so beyond just totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag and ad-hoc palliative resolution of a 'modern take attitude/mental-disposition/care—and—episteme' very much inclined to aberrational/oddities conceptioning of such temporality manifestations thus leading to their endemisation/enculturation from 'ontologically-flawed and inevitability analyses' conception. Thus a 'modern take attitude/mental-disposition/care—and—episteme' is structurally/paradigmatically disempowered .to address issues of its temporality as of the vices-and-impediments at its uninstitutionalised-threshold. So because its presencing—or—totalising-self-referencing-syncretising-forward-facing-self-consciousness is 'existentially invested' in modern social-stake-contention-or-confliction framework of meaningfulness-and-teleology as of procrypticism/disjointedness-as-of-reference-of-thought from where it derives its value-construct and value-reference, as it hardly countenances that prospective transcendental knowledge implied value-construct and value-reference is not meant to be of 'idle' relevance to the modern social-stake-contention-or-confliction framework but rather

redeploy an altogether empowering perspective of prospective relative-ontological-completeness-of-reference-of-thought postmodern social-stake-contention-or-confliction framework of meaningfulness-and-teleology of value-construct and value-reference at the procrypticism uninstitutionalisation. Such prospective change as of ontological-dementation/dialectical-dementation stranding dialectics of attitude/mental-disposition/care—and—episteme can be appreciated retrospectively with respect to non-positivism/medievalism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme which from our modern take attitude/mental-disposition/care—and—episteme we rather construe as vague scholastic pedantic dogmatism with regards to budding positivism/rational-empiricism, but then such a conclusion as of their non-positivism/medievalism habits and traditions is not necessarily obvious to the non-positivism/medievalism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme. Ultimately, a deprocrypticism coherent ‘postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme’ is one that comes into terms-as-of-axiomatic-construct in conceiving of the implied prospective need for deneuterising—referentialism. Put another way across the institutionalisation process ontological-dementation/dialectical-dementation stranding dialectics with regards to reference-of-thought, dispensing-with-immediacy-for-relative-ontological-completeness-of-reference-of-thought-by-reification/contemplative-distension as from the-most-immediateness/shallowness-of-‘apriorising/intelligibilitysetup’-for-aposteriorising/intelligising/measuring/logicising of meaningfulness-and-teleology with recurrent-utter-uninstitutionalisation by its ‘non-rules-as-impulsive-or-accidented-or-random-mental-disposition’ right up to the-most-unimmediateness/profoundness-of-‘apriorising/intelligibilitysetup’-for-aposteriorising/intelligising/measuring/logicising of

meaningfulness-and-teleology with deprocrypticism by its ‘pre-emption-of-disjointedness-as-of-reference-of-thought’ is what, so-construed comprehensively as notional-deprocrypticism as of notional-conflatedness, increasingly induces corresponding meaningfulness-and-teleology convergence of human-subpotency with the full-potency that is existence; thus reflecting that dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension is rather the human empowering potential inducing Being-development/ontological-framework-expansion as of the institutionalisation process. We can appreciate with respect to the ‘ill-health totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ that as of ontological-primemovers-totalitative-framework, it is rather ‘relatively realistic/authentic/unexceptional-as-of-the-mediocrity-principle conception of human-subpotency existential scope’ which have the relative potency for human greater subpotent mastery of the ‘ill-health totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, as implied successively as of:

- recurrent-utter-uninstitutionalisation random-as—uncircumscribing/undelineating-as-totality existential-totalisation-scheme-of-meaningfulness-and-teleology trepidatious-consciousness ‘omnidimensional’ systemic-recomposuring construal of ill-health, existential-contextualising-contiguity-lowest-level-reification perceptivity-as-of-bad-omen;

– deprocrypticism referentialism–circumscribing-as-totality-or-delineating-as-totality existential-totalisation-scheme-of-meaningfulness-and-teleology protensive-consciousness ‘transdimensional’ referentialism-recomposuring categorising-circumstantiating-seclusive-systemic construal of ill-health, further existential-contextualising-contiguity-full-reification perceptivity-as-of-factoring-in-socioeconomic,-education,-information,-environmental,-gender-and-power-relations-issues-underlying-healthcare-and-medical-delivery. And so, as of intemporal nonextirpation-existential-preempting-of-existential-unthought attitude/mental-disposition/care–and–episteme as dispensing-with-immediacy-for-relative-ontological-completeness-of-reference-of-thought-by-reification/contemplative-distension thus transcendentally enabling the successive registry-worldview’s/dimension’s ontological possibilities construed as of human intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm. This underscores Being-development/ontological-framework-expansion implied notion of responsibility as reflected by the Nietzschean metaphor ‘God is dead’, castigatory of ‘beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought attitude/mental-

disposition/care-and-episteme' which is inclined to pass on to 'a certain Messiah' the possibility of our Being-development/ontological-framework-expansion with the paradox of assuming the pretence of understanding Being-development/ontological-framework-expansion on that basis on the naivety that such passing on is teleologically-elevating and exonerating of our mortal-as-temporal manifestations so-construed as a ridiculous temporal-intemporality notion. This equally points to what is the central ethos of aetiologisation/ontological-escalation implied as of 'deprocrypticism nonextirpatory-existential-preempting-of-existential-unthought attitude/mental-disposition/care-and-episteme'; as much more than just with regards to a resolutive conception of acts and miscuings in temporality as of themselves circumstantially, but rather as of the relevance to myriad human social situations is much more critically an issue of universal import, escalated as of humankind's temporal ontological-contiguity as beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought attitude/mental-disposition/care-and-episteme with its apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of existential-contextualising-contiguity-in-dereification cognisant-and-integrative of such acts and miscuings in temporality, thus endemising and enculturating the reference-of-thought vices-and-impediments. Thus such Being underdevelopment, construed as of dynamic social-chainism of human temporality endemisation and enculturation as of the universal implications of such endemising and enculturating paradigm/structure in ontological-contiguity, warrants corresponding aetiologisation/ontological-escalation superseding ethos as of 'deprocrypticism nonextirpatory-existential-preempting-of-existential-unthought attitude/mental-disposition/care-and-episteme' notional-discontiguity/epistemic-discontiguity. The fact is any registry-worldview/dimension as of its 'present attitude/mental-disposition/care-and-episteme' is structurally/paradigmatically oblivious-to and does-not-

reflect its very own prospective relative-ontological-completeness-of-reference-of-thought as the underlying basis of its own specific-level induced vices-and-impediments, and is rather palliative as of its selecting, triaging, mutually-concurring-and-accommodating and power-relations driven palliating virtue constructs. The question can actually be asked, as of prospective relative-ontological-completeness-of-reference-of-thought in notional-discontiguity/epistemic-discontiguity with this ‘made-up’ normativity ontological-contiguity, whether such a prior relative-ontological-incompleteness-of-reference-of-thought as totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag is actually as of Being-development/ontological-framework-expansion at its uninstitutionalised-threshold, and in a position, on the basis of such palliation, to address the actual fundamental grounding of its vices-and-impediments; which in reality are actually ontologically addressable/resolvable as of existence’s non-presencing so-implied as of prospective relative-ontological-completeness-of-reference-of-thought. What is particular with notional-discontiguity/epistemic-discontiguity is this insight that fundamentally the appropriate prospective relative-ontological-completeness-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care–and–episteme precedes-and-is-the-apriorising/intelligibilitysetup-to its requisite meaningfulness-and-teleology as prospective aetiologisation/ontological-escalation. This reflects the salient and underlying idea about Being-development/ontological-framework-expansion that a given reference-of-thought meaningfulness-and-teleology cannot be apriorised as of a prior/old prior relative-ontological-incompleteness-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care–and–episteme to that given reference-of-thought. Insightfully, we can thus grasp that the non-positivism/medievalism scholastic pedantic dogmatism attitude/mental-disposition/care–and–episteme

apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-

 that a reference-of-thought requisite
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-

and—episteme apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-imperatives/axioms/registry-teleology for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology that is positivistically intelligible. This insight about Being-development/ontological-framework-expansion, that a reference-of-thought requisite apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme necessarily precedes-or-apriorises its aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology, equally applies prospectively whereby at our prospective positivism—procrypticism/disjointedness-as-of-reference-of-thought uninstitutionalisation, the idea of prospective institutionalisation as of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought implies that the latter's apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme as reflected by the prospective 'postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme' is the requisite appropriate attitude/mental-disposition/care—and—episteme apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-imperatives/axioms/registry-teleology in preempting-of-disjointedness-as-of-reference-of-thought as so implied by postmodern human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation, for prospective postmodern-deprocrypticism aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology referencing. A further naïve misconstrual about Being-development/ontological-framework-expansion is one that ignores this bigger picture of attitude/mental-disposition/care—and—episteme apriorising/intelligibilitysetup/measuringinstrument/axiomatising preceding aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology, and thus

apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-imperatives/axioms/registry-teleology for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology, and thus naively implying its said given registry-worldview/dimension reference-of-thought is unaffected by any such notion of its prior relative-ontological-incompleteness-of-reference-of-thought since it doesn't factor in that it is operating by a corresponding uninstitutionalised-threshold deficient apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme. Consider in this regard, the totalising—self-referencing—syncretising/circularity/interiorising/akrasiatic-drag certitude of the aposteriorising/intelligising/measuring/logicising mental-states of medieval-scholasticism-pedants—ideal-type-or-individuation articulating aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology as of non-positivism/medievalism pedantic dogmatism attitude/mental-disposition/care—and—episteme apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-imperatives/axioms/registry-teleology. Such an orientation is no more different from an interpretation that every registry-worldview/dimension reference-of-thought is the absolute framework of meaningfulness-and-teleology as of its given practices and habits failing to account retrospectively and prospectively for the succession of institutional-recomposures/institutional-cumulations of 'intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative—implications' as of Being-development/ontological-framework-expansion underscored by ontological-dementation/dialectical-dementation stranding

It is this naivety that underlines the Heideggerian techne concern as we fail to appreciate that the technical and organisational possibilities preceding and associated with a registry-worldview/dimension prospective institutionalisation transitioning of meaningfulness-and-teleology need to be rethought as of the prospective institutionalisation attitude/mental-disposition/care-and-episteme

apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-imperatives/axioms/registry-teleology for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology, and so superseding that of the uninstitutionalised-threshold. We can appreciate in this regard that budding positivism/rational-empiricism and its associated liberality that was the backdrop for technical and organisation possibilities that actually required their interpretation in terms-as-of-axiomatic-construct of advancing human emancipation and bringing an end to serfdom in Europe for instance, but as of a perverted twist due to poor appreciation of Being-development/ontological-framework-expansion led to the opportunistic undermining of human emancipation elsewhere not as of positivistic/rational-empiricism attitude/mental-disposition/care-and-episteme apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-imperatives/axioms/registry-teleology for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology but retrograde non-positivism attitude/mental-

apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-

emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation for
prospective postmodern-deprocrypticism aposteriorising/intelligising/measuring/logicising
meaningfulness-and-teleology. But then with respect to the possibility of prospective human
transcendence, the question arises as to how it is possible for human transcendence to occur
given its ‘outlier metaphoricity instigation’ in the face of any registry-worldview/dimension
averaging-of-thought natural inclination rather for construing meaningfulness-and-teleology
as ‘wholly of its cloistered-consciousness living experience only’ whether as of recurrent-
utter-uninstitutionalisation only, base-institutionalisation–ununiversalisation only,
universalisation–non-positivism/medievalism only or in our case positivism–procrypticism
only, with a rather poor inkling for appreciating meaningfulness-and-teleology as of a
protracted-consciousness associated with grasping Being-development/ontological-
framework-expansion. This brings home the fact that however the human
intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-
for-relative-ontological-completeness/transvaluating paradigm implied as of a protracted-
consciousness, and specifically the prospective protensive-consciousness of

deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought, Being-development/ontological-framework-expansion is practically inevitably constrained-and-potentially-jeopardised as of the framework of the totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag cloistered-consciousness of any of the successive registry-worldviews/dimensions in their respective reasoning-from-results/afterthought logocentric constitutedness; as the ‘reasoning enframing’ of the registry-worldview/dimension apriorising/intelligibilitysetup/measuringinstrument/axiomatising is underdeveloped for contemplating-and-construing of prospective Being-development/ontological-framework-expansion as of the prospective institutionalisation. A registry-worldview/dimension as of its averaging-of-thought is structurally/paradigmatically bound to existential-extirpation-as-of-existential-unthought rather than nonextirpatory-existential-preempting-of-existential-unthought; such that articulation of Being-development/ontological-framework-expansion as of prospective transcendence is beyond its reasoningness as of its ‘reasoning-from-reasults’/afterthought logocentric constitutedness conceptualisation of meaningfulness-and-teleology. Inevitably thus this conundrum points out that the instigating of Being-development/ontological-framework-expansion is as of intemporal/longness-of-register-of-meaningfulness-and-teleology solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity individuation reasoning-through/messianic-reasoning, more like Derridean messianic reasoning, arising as of intellectual-and-moral inequivalence and thus implying the dialogical inequivalence of intemporal and temporal averaging-of-thought; given that no second-natured institutionalisation grounding of meaningfulness-and-teleology exists for prospective transcendence. The ontological-veracity of such a solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity individuation reasoning-through as of Derridian messianic

reasoning can be grasp when we contemplate that in a second-natured institutionalisation framework of deferential-formalisation-transference we give pre-eminence to say a professional or technician for resolving a technical problem, and as non-technicians we don't get involve in averaging-of-thought exercise to resolve the technical problem. This outlook is actually 'seeded' within the solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity individuation reasoning-through that is instigative of Being-development/ontological-framework-expansion. Thereof, what is critical for enabling human successive transcendence is 'appropriate prospective institutionalisation second-naturing metaphoricity'. Consider in this regard, that the instigative mimesis universalis metaphoricity by the Galileos, Descartes, etc. of budding positivism/rational-empiricism is structurally/paradigmatically 'not a reasoning with non-positivism/medievalism' but rather 'reasoning-through or Derridian messianic reasoning' over non-positivism/medievalism scholasticism's pedantry as of its averaging-of-thought reasoning-from-results/afterthought logocentric constitutedness. Such altogether new metaphoricity as of its instigating 'out of thin air' the budding positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme further inspired its subsequent radicalisation by latter thinkers; wherein for instance, the more thoroughly positivism/rational-empiricism development of 'the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality' was undertaken by Newton and Leibniz, extending the metaphoricity further even when we contemplate that in many ways these metaphoricity relaying scientists were still imbued with non-positivism/medievalism mystical and alchemic ideas. This 'out of thin air' metaphoricity possibility arises because the 'full-potency of existence in relation to human-subpotency-as-human-knowledge grasp of that full-potency of existence' is ever one of non-presencing; as the very notion of 'human-

subpotency-as-human-knowledge grasp of the full-potency of existence' given human limited-mentation-capacity implies that such a grasp only opens up a 'limited framework of the full-potency of existence' for new human existential and knowledge possibilities as of new/prospective habits-and-tradition. But then this 'limited framework of the full-potency of existence' as of new habits-and-tradition construed as 'reason-from-results/afterthought framework, 'doesn't induce a commitment upon the absolute transcendental possibility in the full-potency of existence'. Such that by dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension with respect to Being-development/ontological-framework-expansion, the further insight of 'out of thin air' metaphoricity as of human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination comes with the possibility of its ontological-primemovers-totalitative-framework validation by existence's non-presencing. In this regard, the ontologically-veridical 'postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme' with respect to our modern take averaging-of-thought reasoning-from-results/afterthought logocentric constitutedness is rather as of 'reasoning-through or Derridian messianic reasoning' over our positivism—procrypticism/disjointedness-as-of-reference-of-thought, and so as of a postmodern affirmatory stance of dialogical inequivalence that goes beyond idling in the 'modern take rigmarole language', just as we can appreciate how budding positivism obviate non-positivism/medievalism pedantic dogmatism language to affirm meaningfulness-and-teleology weeding out ornate pedantic detours, to articulate blunt reality as of deprocrypticism prospective relative-ontological-completeness-of-reference-of-thought. Insightfully, and as is the case with all prospective transcendence implied meaningfulness-and-teleology, we can appreciate that the foremost

goal of budding positivists ‘was not to elicit the direct approval’ of the non-positivism/medievalism established arrangement, as in many ways they adopted a ‘presencing consummated/forfeiting posture’ with respect to establishment social stakes, but rather sought to induce the requisite metaphoricity of budding positivism for the destruction-deconstruction of non-positivism/medievalism for prospective positivism, as their conception of achievement motive were tied down to prospective positivism institutionalisation as of Being-development/ontological-framework-expansion. Likewise, the prospective ‘postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme’ is well beyond the notion of eliciting the approbation of the modern take established arrangement in terms-as-of-axiomatic-construct, but rather is of ‘presencing consummated/forfeiting posture’, in inducing budding postmodern metaphoricity for the destruction-deconstruction of the modern take for prospective postmodern-deprocrypticism institutionalisation as of prospective Being-development/ontological-framework-expansion. In both cases, the prospective institutionalisation attitude/mental-disposition/care-and-episteme is ontologically validated as of its prospective relative-ontological-completeness-of-reference-of-thought, divulging the totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag vagueness and futility of the pretences and judgments of the uninstitutionalised-thresholds/uninstitutionalised-thresholds. We can equally appreciate here that such a conception of transcendence is rather as of organic-knowledge and not mechanical knowledge, in the sense that what is critical is the induced apriorising/intelligibilitysetup/measuringinstrument/axiomatising metaphoricity for prospective institutionalisation as of prospective ontological-primemovers-totalitative-framework and not simply a mechanical knowledge conception possibly tolerated as of a stale a posteriori adjunctiveness as with the Copernican heliocentric idea initially, needing a

latter apriorising/intelligibilitysetup/measuringinstrument/axiomatising metaphoricity reinvigoration as of the overall renewal of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’.

It should be noted that such metaphoricity rather points to psychoanalytic-unshackling/prospective-grounding/prospective-reification organic-knowledge nature of such prospective institutionalisation transcendental meaningfulness-and-teleology, which in its prospective relative-ontological-completeness-of-reference-of-thought is ‘a solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity inventing’ of the prospective notion of ‘thinking/dialectical-thinking’ as positivism/rational-empiricism thinking or deprocrypticism thinking respectively, and so as their successive prospective reasoning-from-results/afterthought. In both cases, such metaphoricity as of its reasoning-through/messianic-reasoning cannot be construed as grounded-as-intelligible on the superseded/transcended registry-worldview’s/dimension’s attitude/mental-disposition/care—and—episteme of medievalism—non-positivism or positivism—procrypticism/disjointedness-as-of-reference-of-thought, but rather as of its very own transcendental-enabling/existence-potency prospective institutionalisation attitude/mental-disposition/care—and—episteme of positivism or deprocrypticism respectively. Thus such metaphoricity is rather induced as of the framework of prospective concurrent ontological-primemovers-totalitative-framework in establishing its prospective ‘detour to social goodwill deferential-formalisation-transference to perceived overwhelming-relative-effectiveness’. Thus such metaphoricity as of its reasoning-through/messianic-reasoning is more aptly and consciously articulated at a dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension depth/profoundness of human posterity; projecting well beyond the narrow and decadent obsessions of shallow as of extirpatory/temporal paradigms of social-stake-contention-or-

confliction, as it actively strives as of its prospective reference-of-thought–categorical-
 imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-
 meaningfulness-and-teleology to supersede such enframing and their associated institutional-
 anchoring and pedantry/mandarinism temporally induced denaturing of meaningfulness-and-
 teleology, and so as of human
 intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-
 for-relative-ontological-completeness/transvaluating paradigm. Reasoning-
 through/messianic-reasoning metaphoricity brings about the prospectively renewed
 reasoning-from-results/afterthought instigating the second-naturing of prospective
 institutionalisation, and so as of implied reference-of-thought/axiomatic-constructs reflection
 of the pre-eminence of the full-potency of existence as of prospective ontological-
 primemovers-totalitative-framework over human-subpotency with the latter adjusting to
 existence as-of-ontological-dementation/dialectical-dementation-stranding-dialectics enabling
 its prospective relative-ontological-completeness. The solipsistic—first-
 naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-
 recollection)/transepistemicity intemporal articulation of reasoning-through/messianic-
 reasoning cannot be construed as amenable to the contending disposition of prior deferential-
 formalisation-transference second-natured institutionalisation, thus the
 irrelevance/impertinence of any such implied contending as of prior reasoning-from-
 results/afterthought, as any such contention can only re-arise as of the reasoning-
 through/messianic-reasoning renewing of second-natured prospective ‘reason-from-
 results’/afterthought. Thus the direct implication of reasoning-through/messianic-reasoning as
 of its solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-
 mythical-recollection)/transepistemicity intemporal is that it can only call upon ‘a kindred
 sense of things’, as of solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-

integrity-(not-mythical-recollection)/transepistemicity intemporal contemplation that can surpass/overcome temporal nihilistic resentment as of a protracted-consciousness cognisant of the prospective ontological-performance-including-virtue-as-ontology and human emancipation implications of Being-development/ontological-framework-expansion. It should be noted here that the notion of resentment as of its nihilism rather speaks to social apathy towards veridical prospective ontological possibilities of emancipation as of aetiologisation/ontological-escalation implications going by the very implications of knowledge-reification as being as of the relative-ontological-completeness perspective, and is not to be confused with naïve and literal interpretations in ‘temporal-intemporality non-ontological terms of social-stake-contention-or-confliction conceptualisations’ that wrongly seem to imply that knowledge-reification can be contemplated paradoxically as being as of the relative-ontological-incompleteness perspective as may be reflected by mere conceptual-patterning in absolutising-identitive-constitutedness without contemplating that the underlying knowledge-reification process/gesturing implications is definitely as of the relative-ontological-completeness perspective since a temporal-intemporality non-ontological interpretation will rather imply knowledge dereification and endemising/enculturating of temporal-dispositions as of vices-and-impediments for the simple reason that the latter ‘cannot be ignored and then by magic become virtue’ as the overall for knowledge-reification is to understand human destructuring-threshold-of-ontological-performance/uninstitutionalised-threshold and then bring about prospective constructiveness-of-ontological-performance as of human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence. This tendency to misconstrue the meaning of resentment and associated philosophical notions like leveling, critically arises because of a poor construal of philosophy as ontologically-driven just like any other knowledge as of ‘baseline originary up-to-date knowledge-reification process/gesturing of the specific

knowledge area as of inherent existence/existence-potency/ontological implications' subject to validation and falsifiability rather than a naïve construal of philosophy as an imprimatur discretion/whim-of-thought exercise on the basis of 'relic-or-orthodoxy knowledge' induced disparateness-of-conceptualisation. This author contends that the critical notion underlying resentment and leveling specifically with reference to Heideggerian and Nietzschean thought can actually be interpreted critically as relating rather to 'originariness-parrhesia,—as—spontaneity-of-aestheticisation over the human atrophying tendency for prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation' with regards to ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,—to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy. But then Heidegger failed to realise that the induced transcendence-and-sublimity of the Socratic philosophers universalising idealisation as well as that of Descartes and other budding-positivists rational-empiricism/positivism were both originariness-parrhesia,—as—spontaneity-of-aestheticisation disseminative events induced as of ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,—to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy involving transcendence from non-universalising sophistry and medieval-scholasticism pedantic dogmatism respectively. These induced transcendences later on became prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation as of their mere 'atrophying mechanical practice' with succeeding generations, and so just as Nietzsche equally appreciated that Christianity was becoming a mere 'atrophying mechanical practice' of succeeding Christian generations as for instance

with ascetic practices become more of symbolism/aura and losing their inceptive emancipatory inspiration. Thus with all these instances rather warranting renewed originariness-parrhesia,—as—spontaneity-of-aestheticisation and so as of prospective projection as implied with the human institutionalisation process, but instead Heidegger will elicit a naïve turn to the pre-Socratics while Nietzsche will express admiration of Buddhism as both being of grander originariness and authenticity. However going beyond a ‘relic-or-orthodoxy knowledge’ disparateness-of-conceptualisation notion of philosophy, this author contends that this relatively deficient analysis reflects the fundamental ontological-deficiency of subsequent philosophies influenced by Kantian philosophy which is rather ‘as a projection within the very same intelligible Cartesian/budding-positivists induced rational-empiricism/positivism registry-worldview’s/dimension’s edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising’ failing to conceive of the ontological-veracity of the human institutionalisation process’s anamnestic-residuality as to difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative—implications successiveness of registry-worldviews/dimensions, with the result that Kantian implied transcendental idealism is veridically ‘phenomenal-abstractiveness within the very same intelligible rational-empiricism/positivism registry-worldview/dimension’ (as the reality of transcendence is rather one of ‘human mental-disposition successive apriorising/axiomatising reprojection-or-reanticipation capacity inducing human limited-mentation-capacity-deepening as of the very same existence/existence-potency/existential-reality’ so-reflected as the ‘difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism of successive registry-worldviews/dimensions as of their successive reference-of-thought imbued apriorising/axiomatising—psychologism’ construed ‘as the successive mathesis/motif/thrownness-disposition edginess/incisiveness—of-

apriorising/intelligibilitysetup/measuringinstrument/axiomatising for
aposteriorising/intelligising/measuring/logicising of meaningfulness-and-teleology in
existence’, and so-construed as the successive registry-worldviews/dimensions
consciousness-enabled phenomenal-abstractiveness), and this basic deficient and vacuous
assumption fundamentally disorientated Nietzschean and Heideggerian thought wherein a
more complete appraisal of Nietzschean transvaluation should rather be as of relative-
ontological-completeness implications of the institutionalisation process’s anamnestic-
residuality implications beyond just ‘transformation from
Roman/Master/Hierarchising/Aristocratic value-construct to Judeo-Christian-Islamic-
monotheisms/Slave/Dehierarchising/Commoner value-construct as of the very same
universalising idealisation’ speaking rather more of revaluation than transvaluation. It is this
underlying misconception that induces subsequent philosophical misinterpretations of notions
like ressentiment and leveling failing to appreciate that these are ontologically-driven as of
underlying relative-ontological-completeness knowledge-reification basis of such
conceptualisations arising as to the need for prospective emancipatory inspiration of
prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation inducing human
limited-mentation-capacity-deepening. Thus ressentiment is herein rather construed as
closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-
regards-to-prospective-apriorising-implications or ontological-bad-faith with respect to
‘mechanical practice’ of prior reproducibility—mathesis/motif/throwness-disposition,—as—
reproducibility-of-aestheticisation. In this regards, we can appreciate that all human
meaningfulness-and-teleology arises as of aestheticisation before converging towards
ontologisation, just as rightfully implied by Nietzsche’s genealogy of morals, but this doesn’t
imply valuelessness (as is often naively implied with Nietzschean thought) since
aestheticisation convergence towards ontologisation leads to grander ontological-

performance-including-virtue-as-ontology. In this regards, we can appreciate that while from our vantage modern perspective the ontological-veracity of the Egyptian cultural system aestheticisation behind the construction of the pyramids will seem inherently impertinent, but that specific human aestheticisation induced technical, scientific and mathematical innovations were of lateral civilisational ontological-pertinence; likewise we can appreciate that while for the atheist the ontological-veracity of religion is unproven, however various specific religions human aestheticisation in many ways relayed laterally the ontological-veracity of universalising idealisation thinkers as of the relatively conducive social conditions allowing for the arrival of medieval thinkers who then instigated the possibility for modern day science ontologisation; and besides, it can equally perfectly be claimed that even our modern day positivistic civilisation is not beyond a critique of ‘deficient ontologisation’ as we can appreciate the reality of the human aestheticisation of many modern activities (even those associated with technological development) held as of higher interest/worth which ontologisation value is questionable with respect to other possible activities of grander ontologisation but not necessarily held as of higher interest/worth (with the very worst case being media-driven merchandising associated with a generalised dumbing-down and de-intellectualisation increasingly and surreptitiously substituting for reifying intellectualism, increasingly undermining the citizenry capacity for democratic sovereign judgement). This analysis points to the convoluted relationship between human aestheticisation and ultimate ontologisation value. Rather than naïve and simplistic analysis, it is such an insight that better informs Heideggerian and Nietzschean thought with regards to resentment and leveling; pointing to the centrality of originariness-parrhesia,—as—spontaneity-of-aestheticisation as more critically about inducing the necessary human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation transformation

towards prospective ontologisation rather than the mere critique of any given human aestheticisation as of its inherence, as the fact is all human aestheticisations including religion (which is often a target in modern times, however rightly so on many an occasion) are sub-ontologising and the more salient point is in instigating their more profound ontologisation/ontological-veracity/aestheticisation-towards-ontology as of relative-ontological-incompleteness/relative-ontological-completeness projective-totalitative-implications. Such a possibility recurrently arises mainly as of human value-ricochetting/transvaluation—as-to-prospective-relative-ontological-completeness implications. Transvaluation notionally refers to the structural/paradigmatic referencing basis of human value structure as of social-stake-contention-or-confliction, and is what critically defines the variation of human ontological-performance-including-virtue-as-ontology as from ‘totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal inclination for human-subpotency as of the suprasocial-construct or averaging-of-thought determination’ to ‘ascetic intemporal inclination for existence-potency determination’. Transvaluation as of existence-potency implies the ontological-veracity of all values is derived from their relative-ontological-completeness implications as of the human institutionalisation process’s anamnestic-residuality as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications (that doesn’t allow for any nondescript/ignorable void to allow for notional-contiguity) while the value proposition as of human-subpotency is one that is based on absolutising the present categorical-imperatives/axioms/registry-teleology as of absolutising-identitive-constitutedness/identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism (allowing for nondescript/ignorable void inducing notional-discontiguity/epistemic-discontiguity); and this basic human value dichotomy explains the outlier and epistemic-ricochetting/transepistemicity nature of human

transcendence-and-sublimity instigation as of prospective solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity originality-parrhesia,—as—spontaneity-of-aestheticisation and subsequent prospective second-natured reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation. In this regards, it is important to grasp that human second-naturing capacity is just as critical as human solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity capacity for the institutionalisation process to be able to materially/substantively arise, notwithstanding the contradiction that second-natured reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation is ‘bound to be reflected as degraded’ prospectively as a destructuring-threshold-of-ontological-performance/uninstitutionalised-threshold as of mere ‘mechanical practice’ that fails prospective anamnesis as of ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,—to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy from such human-subpotency prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation. In this regards, we can appreciate that when base-institutionalisation ‘rulemaking-over-non-rules’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising arises, the value structure of recurrent-utter-uninstitutionalisation collapses, and likewise across all the prospective registry-worldviews/dimensions, with the implication that our naïve conception of value as of mere-and-vague impression-driven/good-naturedness/wishfulness is not what is structurally/paradigmatically deterministic but rather the-Good/understanding/knowledge-driven/ontological-primemovers-totalitative-framework lies in the structural/paradigmatic

effectuation of transcendence-and-sublimity in the bigger social construct as of the psychoanalytic-unshackling/memetic-reordering/institutional-recomposure involving the prospective construction-of-the-Self from trepidatious-consciousness, warped-consciousness, preclusive-consciousness, occlusive-consciousness and prospectively protensive-consciousness so-implied with the institutionalisation-process projective-totalitative-implications induced prior to prospective registry-worldviews/dimensions transvaluation 'reflecting deterministically the structure of human meaningfulness-and-teleology as of ontological-primemovers-totalitative-framework'. Transvaluation thus speaks to human value-construct unification-of-explanations on the reference basis of the projective-totalitative-implications of the human institutionalisation process's anamnesis as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism, as undermining the successive registry-worldview's/dimension's implied temporal/sophistic absolutising-identitive-constitutedness ontologically-flawed disparateness-of-conceptualisation value-construct conceptions. Transvaluation rather reflects human value-construct as derivational as from the very enabling fundamental self-consciousness instigation for the possibility of 'human self-conscious awareness of value-construct' to arise in the first place as of apriorising/axiomatising-psychologism implied reference basis-of/base meaningfulness-and-teleology infrastructure. Thus the more critical contribution to human value-construct has to do with the requisite value-construct instigating as of dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension associated with the successive registry-worldview's/dimension's self-conscious meaningfulness-and-teleology infrastructure so-implied successively as of trepidatious-self-consciousness, warped-self-consciousness, preclusive-self-consciousness, occlusive-self-consciousness and prospectively protensive-self-consciousness; as the human proclivity to even recognise and pursue any value-construct can only arise in the very first place with its

correspondingly induced self-consciousness. But then, the fact remains that such solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity induced self-consciousness meaningfulness-and-teleology infrastructure as instigative of the human reference basis reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation of value-construct tend to be related to by the suprasocial-construct and averaging-of-thought dispositions as being beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought (as to when the inherent ontologisation/ontological-veracity/aestheticisation-towards-ontology implications of prospective relative-ontological-completeness as of human limited-mentation-capacity-deepening is blanked out as nondescript/ignorable void), and rather tends to come at ‘solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity induced self-consciousness meaningfulness-and-teleology infrastructure’ in a second-natured positive-opportunism disposition and so across the human institutionalisation process; explaining the inclination of all successive registry-worldviews/dimensions to be engrossed in a closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications in totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag difficultly recognising the idea of prospective destructuring-threshold-of-ontological-performance/uninstitutionalised-threshold, and wary of prospective transcendence-and-sublimity implications that can be instigated as of prospective ‘solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity induced self-consciousness meaningfulness-and-teleology infrastructure’. It is thus not odd that as of human emotional-involvement implications, universalising idealisation Socratic philosophers and budding positivists projected

meaningfulness-and-teleology infrastructure rather met initially with the antipathy of their
 suprasocial-construct and averaging-of-thought and specifically had to face up respectively
 with the value-construct conception of their temporal/sophistic absolutising-identitive-
 constitutedness ontologically-flawed disparateness-of-conceptualisation whether with the
 Ancient Sophists or medieval-scholasticism pedants. We can further appreciate the critical
 impact of the universalising idealisation meaningfulness-and-teleology infrastructure of the
 Socratic philosophers and their successors as providing the appropriate meaningfulness-and-
 teleology infrastructure for the Roman Empire and subsequent religio-political developments
 unlike the case with say Ancient Egypt and Persia whose non-universalising sectarian cults
 perpetual ideological conflicts ultimately sapped their stability despite their technical
 advancement, and likewise Western enlightenment effectively arose as of the induced
 meaningfulness-and-teleology infrastructure of budding positivists, with perverted
 consequences like annihilation of Native Indians in the New World and the Transatlantic
 slavery rather arising as of their outlying societies opportunistic activities distortive of
 budding positivism meaningfulness-and-teleology infrastructure as so-construed in their core
 societies in Europe with respect to the ending of serfdom, nascent socioeconomic
 emancipation and human rights. Thus basically the idea of human value-construction is ever
 always caught up between on the one hand human limited-mentation-capacity to come to
 terms with 'transvaluation as projective-totalitative-implications of the human
 institutionalisation process's anamnesis as of difference-conflatedness-as-totalitative-
 reification-in-singularisation-as-veridical-epistemic-determinism underlying the human
 construction-of-the-Self' and on the other hand 'the effective ontological-
 impertinence/dereification arising in the conceptualising of human value-construction as of a
 closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-
 regards-to-prospective-apriorising-implications in totalising-self-referencing-

syncretising/circularity/interiorising/akrasiatic-drag as construing of value-construction within any given registry-worldview's/dimension's absolutising-identitive-constitutedness of meaningfulness-and-teleology and so whether as of trepidatious (recurrent-utter-uninstitutionalisation), warped (base-institutionalisation–ununiversalisation), preclusive (universalisation–non-positivism/medievalism) or occlusive (positivism–procrypticism) implications'. This discrepancy (between the human capacity to achieve transvaluation and effective social–value-construction narrative as of any given registry-worldview/dimension) is reflected in the underlying reality that effectively practised human value-construction is the 'outcome of privileged institutional end-purpose perspective/framing/reference/horizon'; wherein social–value-construction across the successive registry-worldviews/dimensions arises as a functional necessity that is meant to reflect 'supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence' and so in order to elicit stable social-functioning-and-accordance for social-stake-contention-or-confliction, whether such social–value-construction is ontologically-pertinent or not. In this respect, the reality of the human institutionalisation process points to changing 'structural/paradigmatic marginal equity of social–value-construction', so-construed as 'expected equity of all individuals for social–value-construction' and so rather as from the structural/paradigmatic reference basis of 'priorly implied-and-justified inequity' whether the latter is implied-and-justified as of talent, royalty, class, productivity, mere traditional and cultural practice justification, etc.; thus effectively reflecting the overall consequence of social–value-construction as the 'outcome of privileged institutional end-purpose perspective/framing/reference/horizon'. In this regards, social–value-construction arises from two levels; as of the inherent structural/paradigmatic implication of 'outcome of privileged institutional end-purpose perspective/framing/reference/horizon' as of 'priorly implied-and-justified inequity' and this

in conjugation then with the individual inherently appraisable social–value-construction as of ‘expected equity of all individuals for social–value-construction’. In this respect, we can appreciate that an autocrat is more capable of ‘displaying greater social–value-construction’ than an ordinary denizen by the former’s mere social–value-construction ‘priorly implied-and-justified inequity’ as of its status in the autocracy (however an autocrat’s apparent magnanimity on the basis of the prior perspective of the autocratic society will rather be construed as of deficient value-construction as from a prospective perspective of projective-totalitative-implications comparison to the overall social and virtue progress implications of a better accountable political system, while on the other hand individuals effectively advocating for such a prospective political system may be construed as of deficient value-construction in the prior autocracy), while modern day social–value-construction ‘priorly implied-and-justified inequity’ arises as of politico-bureaucratic, talent, entrepreneurial, socio-historical, traditional and cultural practice justification, etc. implications (but is just as well subject to transvaluation analysis as of projective-totalitative-implications, as it can perfectly be argued that the apparent magnanimity of plutocrats as of a capitalistic economic value-distributive system ‘excessively skewed towards final product/service/financial delivery as-of-first-come-near-monopoly and institutionally-skewed-possibility-for recurring wealth accumulation’ while excessively overlooking/devaluing the return to massive public externalities/external-resources contributions to economic production such as public education, human and social development, infrastructure, basic research, technological research, etc. rather speaks of deficient social–value-construction, especially as such a system ‘priorly implied-and-justified inequity’ as of its occlusive absolutising-identitive-constitutedness is geared towards propping special interests, warfare spending, anti-taxation, anti-immigration, trivial interest in global human development, co-opted media narrative, etc. as of a suboptimal social–value-construction). But this doesn’t cancel the fact that individuals

throughout human historicity/ontological-aesthetic-tracing notwithstanding any disadvantaged 'priorly implied-and-justified inequity' for social-value-construction, intuitively cognisant of the pertinence of human transvaluation have elicited the underlying ontological-veracity/ontological-impertinence of their social-construct value-construction as of its 'supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence' to induce the transformation of the social-setup value-construction; such that at various critical times the more salient 'priorly implied-and-justified inequity' for social-value-construction had thus been basically intellectual-pertinence-as-of-ontological-veracity such that all other 'priorly implied-and-justified inequity' for social-value-construction have tended critically to ultimately be grounded on intellectual-pertinence-as-of-ontological-veracity whether of genuine or surreptitious justification. The more salient issue then for the knowledge-reification of social-value-construction thus lies with its 'priorly implied-and-justified inequity' narrative(s) with respect to underlying knowledge-reifying transvaluation implications projection as being of most profound intellectual-pertinence-as-of-ontological-veracity. In this regards, our present rational-empiricism/positivism occlusiveness warrants prospective meaningfulness-and-teleology infrastructure transvaluation so-implied as of notional-deprocrypticism/notional-preempting-of-disjointedness-as-of-reference-of-thought appropriate unification-of-explanations; and so as the disparateness-of-conceptualisation of our rational-empiricism/positivism occlusiveness in its closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications tend to rather reflect our totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag. The occlusiveness of our positivism/rational-empiricism social-value-construction as such from the prospective perspective of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought can

be analysed-and-construed as imbued with occlusive collateral aspects of rather nondescript/ignorable void falsely implying ‘the appropriate exhaustiveness of our rational-empiricism/positivism stances’ thus speaking rather of ideology than ontological-veracity as aptly reflected upon by postmodern thought. Such occlusive collateral aspects take the form of economic dysfunction and inequities as collateral to economic ideologism, social dysfunction and discriminations as collateral to domineering and secluding social narratives, sophistic and vested interest undermining genuine sovereignty paradoxically as of obscured-and-deluding knowledge and misinformation that undermines individuals sovereign competence and choice with regards to increasingly skewed-contrived-and-limited stakes of the democratic process thus eliciting protest voting, and in the bigger global framework of competing politico-cultural values with individuals and societies rather construed as collateral damages. Transvaluation analysis thus ensues from the human akrasia-susceptibility-or-akrasiatic-drag complex which implies that the very state of unwariness with respect to prior relative-ontological-incompleteness as of a nihilistic disposition is structurally/paradigmatically potently conducive/endemising/enculturating of its vices-and-impediments. But then while such an abstract transvaluation perspective for the construal of social-value-construction is cogently obvious, however the fact remains that the human subject as of its limited-mentation-capacity exists in circumstances of human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint as of its given mathesis/motif/throwness-disposition inducing its deficient ontological-performance-including-virtue-as-ontology thus explaining its given registry-worldview/dimension vices-and-impediments. Thus the transvaluation of the successive registry-worldviews/dimensions of the human institutionalisation process is critically of solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity psychoanalytic-unshackling/memetic-reordering/institutional-

recomposure implications of dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as of successive human construction-of-the-Self as from based animality to trepidatious–self-consciousness, warped–self-consciousness, preclusive–self-consciousness, occlusive–self-consciousness and prospectively protensive–self-consciousness. Thus human limited-mentation-capacity implies that ‘more than just a thought-of ontological notion’ as of transvaluation, social–value-construction is rather accomplished phronetically/in-practicality as of the specific social-setup universal-transparency of ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ with respect to social-stake-contention-or-confliction; and is bound rather to be highly infused with ‘priorly implied-and-justified inequity’ narrative(s) where such universal-transparency is muted and where such universal-transparency is unmuted rather infused with ‘expected equity of all individuals for social–value-construction’ narrative(s). Basically, thus the reality of prospective social–value-construction critically arises as of the intemporal ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen reasoning-through/messianic-reasoning induced originariness-parrhesia,—as-spontaneity-of-aestheticisation with respect to the prospective human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint, which when naively construed in absolutising-identitive-constitutedness as of prior reproducibility—mathesis/motif/throwness-disposition,—as-reproducibility-of-aestheticisation simply reflects the totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of the prior registry-worldview/dimension as reflected with its social value-construct dilemmas. Consider in this regards the implications for an individual having to respond to an accusation of sorcery in a non-positivism social-setup as the individual and the social-setup both effectively believe in

superstition. Transvaluation insight will point out that ontological-veracity as of unification-of-explanations lies with the-Good/understanding/knowledge-driven/ontological-primemovers-totalitative-framework as of ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,-to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy required prospective rational-empiricism/positivism registry-worldview/dimension construction-of-the-Self in deflating the non-positivistic social-setup value-construction dilemmas as impression-driven/good-naturedness/wishfulness averaging-of-thought in social-aggregation-enabling of the prior non-positivistic registry-worldview/dimension so-associated with notions-and-accusations-of-sorcery. Likewise implied social-value-construction dilemmas in our positivism-procrypticism are ontologically deflated as of unification-of-explanations with the-Good/understanding/knowledge-driven/ontological-primemovers-totalitative-framework as of ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,-to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy required prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought registry-worldview/dimension construction-of-the-Self (as of deprocrypticism protensive-self-consciousness over our procrypticism/disjointedness-as-of-reference-of-thought occlusive-self-consciousness social-value-construction induced dilemmas). Basically, as highlighted above such a transvaluation knowledge-reification of social-value-construction reflects the prospective human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of any relative-ontological-incompleteness registry-worldview's/dimension's-reference-of-thought-

for-social-functioning-and-accordance as of its ontologically-flawed implied ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’; pointing to the ontological-veracity of a ‘direct bilateral relation of appropriate construction-of-the-Self for appropriate cognisance-and-integration of prospective relative-ontological-completeness meaningfulness-and-teleology’. This ontological reality basis of social–value-construction, it is often claimed, needs to account for the reality of human sovereignty and free-will as to the ‘autonomy and independence of human disposedness’. But then such a conception of human sovereignty and free-will seems to imply an ‘existence-in-existence constitutedness ontologically-flawed paradigm’ as to imply human sovereignty and free-will supersede-and-override existence/existence-potency as the absolute a priori so-reflected as of totalisingly-preceding-and-redefining-existential-contextualising-contiguity. We can effectively appreciate that such human sovereignty and free-will implied ‘autonomy and independence of human disposedness’ say with regards to a mystical cause of disease in a non-positivistic society doesn’t stop existence/existence-potency as reflecting bacteria theory or any other biological reason from being the cause of disease and such a reference-of-thought-devolving-level manifestation of the primacy of existence/existence-potency equally extends to reference-of-thought-level wherein overall existence/existence-potency ‘as transcendental-enabling’ for a rational-empiricism/positivism registry-worldview/dimension as of its edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising ‘is more effective’ with respect to human grasp of existential reality manifestations than a non-positivism registry-worldviews/dimension, just as a prior universalisation registry-worldview/dimension ‘is more effective’ as of its edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising in grasping existential reality manifestations than a preceding ununiversalisation registry-worldview/dimension.

This however doesn't implies the elimination of human sovereignty and free-will but rather effective speaks of human-subpotency within existence-potency, so-construed as 'human-subpotency ontological-performance within the full-potency-of-existence-as-of-its-coherence/contiguity'; and specifically speaks of 'the specific human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence', wherein within the absolute a priori framework that is existence, humankind can construe of existence becoming/emanance manifestations allowing for human knowledge-reification and empowerment from the knowledge-reification within existence, with this in itself inducing a human reflexivity as of a human reflexive influence within existence (wherein for instance, a positivistic disease theory of bacteria and biological causation structurally/paradigmatically induces a whole set of human existential disposedness of emancipatory and curative implications in existence as of human sovereignty and free-will, but also in the very first place the fundamental human existential disposedness at reference-of-thought-level to rational-empiricism/positivism is structurally/paradigmatically conducive/preparatory for the possibility of such a positivistic disease theory of bacteria and biological causation to be construed by such humans). This then speaks to the fact that 'human sovereignty and free-will is deflated going by the ontological-veracity of human thrownness in existence' as of 'the specific human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence' implications; and so, as it applies to human knowledge-reification and empowerment from such knowledge-reification within existence as this defines human ontological-performance reflected as of constructiveness-of-ontological-performance and destructuring-threshold-of-ontological-performance. In this regards, the broader and more profound conception of human sovereignty and free-will as reflected by human thrownness in existence is rather grounded in the reality that all humans come into existence as of an overall framework of living-development, institutional-development and Being-

development/ontological-framework-expansion within which the notion of human sovereignty and free-will then arises in the very first place; such that in many ways human sovereignty and free-will is collectively predicated to the social-setup social-functioning-and-accordance as of its implied ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’. Thus, on this basis, the reality of human ontological-performance (reflected as of constructiveness-of-ontological-performance and deconstructing-threshold-of-ontological-performance) towards the effective articulation of human sovereignty and free-will is actually one that involves, with respect to human limited-mentation-capacity: ‘the deferential-formalisation-transference overall and underlying social-setup conception of knowledge-reification and empowerment from such knowledge-reification as enabling the framework of living-development, institutional-development and Being-development/ontological-framework-expansion’ and then ‘the individual notional—solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity mental-disposition and expression’ within the former (and it is the latter that often comes to the mind when speaking of human sovereignty and free-will as ‘autonomy and independence of human disposedness’, while naively ignoring/overlooking the underlying ‘superseding existence/existence-potency as the absolute a priori reflected in totalisingly-preceding-and-redefining-existential-contextualising-contiguity implications upon human sovereignty and free-will’). Interestingly, such a broader conception of the manifestation of human sovereignty and free-will will recognise that the overall human deferential-formalisation-transference actually has a historicity/ontological-aesthetic-tracing character that extends right up to the very first humans and as with the production of language and human institutions, with regards to constraining existence-potency/existence as the absolute a priori, and as these institutions and institutional practices undergo

metaphoricity all along towards our present, and carries effective/ontologically-veridical teleological implication as of the human institutionalisation process's anamnestic-residuality as to difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications successiveness of registry-worldviews/dimensions. The point here is that, 'the individual notional—solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity mental-disposition and expression' driving the deferential-formalisation-transference knowledge-reification and empowerment from the knowledge-reification as of historicity/ontological-aesthetic-tracing, even as of poor ontological-performance of social-value-construction so-construed as deconstructing-threshold-of-ontological-performance, can only achieve social-functioning-and-accordance by a claim to be as of 'supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence', whether relatively real or surreptitious; and it is this preceding broader human sovereignty and free-willing disposedness for claiming social-value-construction for social-functioning-and-accordance as of 'supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence' that gives the teleological orientation of human meaningfulness-and-teleology as the human institutionalisation process, as it then exposes human meaningfulness-and-teleology as of human limited-mentation-capacity-deepening to the prospective constraint to be as 'supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence' thus inducing the possibility for prospective transcendence-and-sublimity when it is discovered/shown not to be that way with effective human limited-mentation-capacity-deepening. Thus the bigger picture here with regards to

social–value-construction for social-functioning-and-accordance as of human sovereignty and free-will implications speaks to relative-ontological-completeness as of ontological-normalcy/postconvergence, and so as of existence/existence-potency constraint implied human institutionalisation process’s anamnestic-residuality as to difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications in reflecting both destructuring-threshold-of-ontological-performance/uninstitutionalised-threshold as of prior relative-ontological-incompleteness implied dementing–qualia-schema and constructiveness-of-ontological-performance as of prospective relative-ontological-completeness implied dialectical-thinking–qualia-schema as elucidation of ontological-primemovers-totalitative-framework. Ultimately, the naïve articulation of human sovereignty and free-will as of strict ‘autonomy and independence of human disposedness’ rather speaks of a poor ontological sense-of-things, and as such ontological-veracity ensues the notion of human sovereignty and free-will is rather subsumed as of human-subpotency knowledge-reification and derived empowerment reflexivity in existence; and as apparent in the sciences, we can’t imply that we have a choice of gravity on earth as 6 m/s^2 rather than the existence-potency manifestation of 9.8 m/s^2 and our human sovereignty and free-will is then enabled reflexively with the latter and not the former where we develop and operate technology on that basis for instance, the same equally applies with respect to the social domain in other to avoid mere disparateness-of-conceptualisation. The conception of human sovereignty and free-will so-implied as of ‘the specific human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence’ basically underlies all human knowledge-reification whether with regards to philosophy as first-level ontology pertaining to ‘overall existence phenomenal appraisal of meaningfulness-and-teleology’ as of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality or with regards to second-level ontologies

‘specific epiphenomenon–(in-the-overall-ecstatic-existence-supervening-conflatedness) appraisal of meaningfulness-and-teleology’ as of totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality; differentiated by the fact that ‘overall existence phenomenal appraisal of meaningfulness-and-teleology’ across human generations as of ‘cumulative reference-of-thought relative-ontological-completeness implications’ is surprisingly of high ontological-contiguity explaining the cross-generational relative intelligibility of philosophical meaningfulness-and-teleology (for instance the questions and answers/contemplations about the why and how of human existence phenomena from the very first humans are just as relevant today even as of the differing contextual discernments, and so with regards to virtue, value attribution, aesthetics, episteme and Being) while ‘specific epiphenomenon–(in-the-overall-ecstatic-existence-supervening-conflatedness) appraisal of meaningfulness-and-teleology’ as of ‘reference-of-thought-devolving relative-ontological-completeness implications’ is of high notional-discontiguity/epistemic-discontiguity explaining the unintelligibility of the explanation of epiphenomena as contrasted cross-generationally with various superstitious beliefs in the past compared with modern day science epiphenomenal explanations (for instance with the appraisal of ‘health epiphenomena of existence’ as of historicity/ontological-aesthetic-tracing ranging from perceptivity-as-of-bad-omen, perceptivity-as-of-a-specific-place-or-specific-evil-people-or-specific-evil-period, perceptivity-as-of-failure-to-follow-the-heeding-of-the-Deity-or-failure-to-adhere-to-a-certain-mysticism-or-failure-to-pay-reverence-to-an-ancestor, perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation, and perceptivity-as-of-factoring-in-socioeconomic,-education,-information,-environmental,-gender-and-power-relations-issues-underlying-healthcare-and-medical-delivery). Insightfully, the very essence of ‘overall existence phenomenal appraisal of meaningfulness-and-teleology’ as associated with philosophical aspects (beyond the our

artificial subject-matter divisions referring to aspect where virtue, value, ontological principles and epistemic issues are of central concern) is one of interpretation given that the ordinary human-framework-of-experiential-existence is ‘a directly comprehensive and fulsome framework amenable to interpretation’ whereas ‘specific epiphenomenon–(in-the-overall-ecstatic-existence-supervening-conflatedness) appraisal of meaningfulness-and-teleology’ especially as of their unordinary human-framework-of-experiential-existence like natural sciences while informed by ordinary human-framework-of-experiential-existence background/sense-of-things further require and accentuate their epiphenomenal manifestations (which are beyond ordinary human-framework-of-experiential-existence) with the devising of experimentations (as providing the prolongation for human interpretation capacity with respect to such epiphenomenal manifestations, as in reality even the natural sciences are fundamentally interpretative as ‘specifically aphoristic/cogent/pointed extensions of the underlying human philosophical interpretative disposition for knowledge-reification’). It is important to grasp here that mere experimentations, as often practised in many domains, that do not arise because of the veridical need to effectively accentuate epiphenomenal manifestations as of unordinary human-framework-of-experiential-existence but rather ‘on the vagueness and naivety that experimentations by themselves demonstrate profoundness’ are ontologically-impertinent (in the sense that the ordinary human-framework-of-experiential-existence as ‘a directly comprehensive and fulsome framework amenable to interpretation’ is the more critical basis for a profound knowledge-reification interpretation than any such ad-hoc and simplistic experimentation vagueness and naivety); and in many ways this explains experimental delusions in many domains associated with poor reproducibility as to the misunderstanding that experimentation should focus on the very critical epiphenomenal manifestations that are not amenable to the ordinary human-framework-of-experiential-existence as ‘a directly comprehensive and fulsome framework

amenable to interpretation'. However, as of underlying human-subpotency sovereignty and free-will, what is definitely central to knowledge-reification is that it is grounded on human empowering reflexivity from prospective knowledge as of 'ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,-to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy from such human-subpotency prior reproducibility—mathesis/motif/throwness-disposition'. This reflects the ontological-veracity that human sovereignty and free-will can only be construed in conflatedness as of human throwness in existence revealing the epistemic-impertinence of dispositions for 'absolutising-identitive-constitutedness as wrongly implying human sovereignty and free-will supersedes existence-potency' rather than the epistemic-veracity of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications of human meaningfulness-and-teleology. We can garner for instance that there is and has never been any truly 'absolutising-identitive-constitutedness' of the sciences as often wrongly implied by science ideologues, but that scientists across the times have allowed existence-potency to manifest itself in determining ontological-primemovers-totalitative-framework; and so, as from the budding science of the days of Galileo and Copernicus, to Newtonian science, to Lavoisier laboratory science, to Einsteinian science to modern day institutional practices of science, with all fundamentally driven not by any 'purported science ideology' but rather the practicality of results as of the constraint of the subject-domains of scientific study together with human limited-mentation-capacity-deepening implications in transforming the conceptualisation within any such specific subject-domains of scientific study as of their existential-contextualising-contiguity knowledge-reification rather than 'any implied notion that naively supersede existence as the absolute a priori'. A further twist to such a poor

conception of human sovereignty and free-will in the social arises as of an improper appraisal of the ‘implications of deferential-formalisation-transference as being structurally/paradigmatically both-intensional-and-extensional to the fulfilment of human sovereignty and free-will’. The fact is human sovereignty and free-will is more critically about its ‘fulfilment as of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’ rather than ‘mere appearance-of-fulfilment usurping-the-sense of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’. For instance, a plumber who draws up the costing for a plumbing job explaining to the customer what is advantageously entailed in a convincing manner (as of ‘mere appearance-of-fulfilment usurping-the-sense of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’) as they fail to ensure that their professional assessment will truly resolve the technical issue (as they are just looking to contract the job) is not really advancing the sovereign choice of the customer compared to another plumber who undertakes a candid professional assessment that may not sound advantageous with the customer (as they are more critically interested in the ‘fulfilment as of sound-operating-of-human-sovereignty-and-free-will-towards-its-fulfilment’) but does solve the technical issue; as any such customer in a deferential-formalisation-transference situation will most likely agree. Such operation of human sovereignty and free-will, beyond more or less simplistic social situations as the case highlighted above, is supposedly implied in the operation of all human institutions as of their inherent deferential-formalisation-transference proxy nature; but in many ways such a notion of ‘implications of deferential-formalisation-transference as being structurally/paradigmatically both-intensional-and-extensional to the fulfilment of human sovereignty and free-will’ gets sunk with the increasing complexity and size of human institutions as to what such implications really are, and so especially as the idea of human sovereignty and free-will increasingly becomes abstracted and diffused in the overall social-

construct and its institutions as so-associated with ‘the protraction of political and institutional performance, evaluation and accountability’ as reflective of human sovereignty and free-will. However, with regards to the latter as of social protraction of political and institutional action, the possibility of protracted human sovereignty and free-will while indirect comes to be increasingly associated with the sense of ‘equanimity/balance of institutions’ as to their expected ‘equanimity/balance of contending frameworks and policy frameworks as reflexive of socially-perceived commendation and disapprobation’, whether as garnered ‘politically from the equanimity/balance of competing policies and politics as from polling and/or polls trends’ and ‘professionally with the equanimity/balance of mainstream/conventional complementary professional policy-recommendations and professional practices’. The question about the effectiveness of such implied equanimity/balance as reflecting of human sovereignty and free-will is often raised critically with regards to political and institutional performance particularly during crises. In many ways, the systemic interrelatedness of large institutions as to their complementary end purposes and practices, renders such an assessment of implied equanimity/balance rather structural/paradigmatic to the overall politico-institutional system itself; and particularly so as in many ways the possibility of readjustment is much more practically instigated politically especially as with public institutions the individual manifestation of sovereign choice is much more rigidly tied to political action unlike the relative ability for direct disengagement from private entities. However, the fundamental fact that human sovereignty and free-will is ever always a question of the ‘transverse relation of all humans sovereignty and free-will in society’ inherently implies the underlying possibility for the undermining of human sovereign choice as of inherent social differentiation. Beyond transvaluation implications as of the broader overall ‘expected equity of all individuals for social–value-construction’ in relative-ontological-incompleteness/relative-ontological-completeness projective-totalitative–

implications as of the human institutionalisation process; going by the phronesis/practicality as of our positivism–procrysticism occlusiveness, the assessment of institutionally implied ‘equanimity/balance of contending frameworks and policy frameworks as reflective of socially-perceived commendation and disapprobation’, as advancing human sovereignty and free-will as of deferential-formalisation-transference implications, can be rather straightforward with regards to relatively compact/self-contained institutional functions and roles usually involved in direct public service delivery but it is much more difficult with spurious/supporting institutional functions and roles. We can appreciate in this regards that public scandals generally tend to arise out of public services and private services delivery institutional frameworks as of their relatively compact/self-contained institutional functions and roles, and that issues of transparency rendering such assessment difficult generally arise with regards to underlying spurious/supporting/supervisory/regulatory institutional functions and roles. In another respect concerning the modern day media, the need for relevant and balanced/equanimous communication and information delivery to the general public has increasingly been taking a backseat, and so fundamentally as the media becomes more of a business-making institution and rather plays a weaker and ancillary/perfunctory role in public policies and politics accountability. This is paradoxically reflected in the reality that despite the huge choice of media today, strangely enough this has rather been associated with greater public muddlement with regards to political stakes and public policies; undermining the political process as increasingly public policies are paradigmed/structured to default/revert into the interests of powerful groups and corporations with the support of increasingly astute, surreptitious and media-savvy political and economic think-tanks, as their media underhandedness in many ways foil the possibility for credible and effective public interest debate as of the distractedness of media reflexive anchoring on a stale, traditional, simplistic and increasingly irrelevant age-old left and right political narrative (and its derived politics

and policies narratives) poorly reflecting the sophistication of the electorate that ‘doesn’t live in left and right worlds but a realistic world in want for solutions’! Strangely enough, such a media environment is now laden with public gurus holding outlandish views increasingly given the forum for their opinions (presented as reified-knowledge) not only in marginal media but mainstream media as well out of all proportion with the social and/or relevant expertising academic/professional resonance of such ideas, and so as of the underlying pretence of freedom-of-speech; as the notion of freedom-of-speech is increasingly being portrayed rather as the rationalising foundation for all sorts of discreetly, whimsically/fancifully and strategically prejudiced influences on media orientation. In this regards, the notion of freedom-of-speech as of such consequentially biased and disproportionate representation undermining ‘equanimity/balance of contending frameworks and policy frameworks as reflective of socially-perceived commendation and disapprobation’ (as thusly failing to advance human sovereignty and free-will as of deferential-formalisation-transference implications), is increasingly becoming the unbecoming/undoing of the modern day democratic political process. Direct media surreptitious drumming-up of specific policy stances and political movements have often interfered with political governance as with the tea-party movement for instance; when considering how political orientations are ‘strategically advanced/framed’ in the media at critical moments for upholding favourable political policies or foiling unfavourable political policies while undermining sound analytic public debate. It is no small wonder that a public opinion increasingly exposed to such media-driven ‘subterfuges’, overlooking the age-old party politics narrative entrapment, has been turning to protest voting as an expression of political disdain. Furthermore, the idea of human sovereignty and free-will across all times is intimately tied down to human limited-mentation-capacity-deepening as to the relative-ontological-completeness implications for knowledge-reification underlying human historicity/ontological-aesthetic-tracing as of the

specific human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence; as the fact is the conception of human sovereignty and free-will effectively varied across the human institutionalisation process as from the specific human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence of recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism, our positivism–procrypticism and will equally vary with prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought as of human limited-mentation-capacity-deepening. This effectively brings up the centrality of causality, as implied with ontological-primemovers-totalitative-framework conflating towards the inherent ontological-normalcy/postconvergence of ecstatic-existence/existence-potency/transcendental-signifier, wherein human sovereignty and free-will is construed as of the ‘structural/paradigmatic implications of relative-ontological-completeness in superseding/overcoming/transcending human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of relative-ontological-incompleteness’, reflecting a human-causative-construction conception in conflatedness/projective-conflating apriorising/axiomatising about existence as ontologically-veridical (as it is the ‘totalitative projective perspective’ that points out the veridical conception of causation) and so over a traditional reflex construal of human causation in constitutedness as of any given presencing absolutising-identitive-constitutedness apriorising/axiomatising in prospective relative-ontological-incompleteness. This insight about human sovereignty and free-will effectively points to the ontological-flaw of absolutising-identitive-constitutedness conceptions whether as of the past, present or future, inherently as of failing to account for relative-ontological-completeness implications that effectively and empirically underline human historicity/ontological-aesthetic-tracing; and so especially as it is often implied by a ‘naïve type of philosophising that the conception of human sovereignty and free-will can be

abstracted outside existential-contextualising-contiguity as to the underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ in wrongly implying that ‘human sovereignty and free-will is rather veridically underlied by contract/political-arrangement-or-political-coercion/social–value-construction outside existential-contextualising-contiguity implications of relative-ontological-incompleteness to relative-ontological-completeness’. But then such pretence of absolutising-identitive-constitutedness veracity of contract/political-arrangement-or-political-coercion/social–value-construction is both theoretically and empirically non-veridical, speaking more of the reality of power-grabbing/appropriating/usurpatory/arrogating implications than truly rational argumentations as of knowledge-reification implications. Such contract/political-arrangement-or-political-coercion/social–value-construction argumentations are often intimately associated with providing the meaningfulness-and-teleology infrastructure for the powerful and vested-interests, and their insinuations of contract/political-arrangement-or-political-coercion/social–value-construction as ‘outside existential-contextualising-contiguity implications of relative-ontological-incompleteness to relative-ontological-completeness’ is in effect not truly about the irrelevance of existential-reality implications of relative-ontological-incompleteness and relative-ontological-completeness but rather more critically ‘is in effect about defaulting to specific convenient/advantageous interpretations about existential-contextualising-contiguity which are not to be subjected to a fulsome analysis for ontological-veracity as of implications of relative-ontological-incompleteness and relative-ontological-completeness and so on the basis of merely projecting the term contract/political-arrangement-or-political-coercion/social–value-construction and thereof implying logical-dueness and articulating logic on the so-narrowed framework’. The reason why such a contract/political-arrangement-or-political-coercion/social–value-construction supposedly pertinent argumentation about

human sovereignty and free-will cannot hold is that all meaningfulness-and-teleology (as implied with the logical operation of any such projected contract/political-arrangement-or-political-coercion/social-value-construction) operate on priorly established apriorising/axiomatising and inherently all apriorising/axiomatising purport to be as of existential-contextualising-contiguity thus subject to analysis as of relative-ontological-incompleteness and relative-ontological-completeness implications, such that fundamentally such contract/political-arrangement-or-political-coercion/social-value-construction argumentation about human sovereignty and free-will are rather ‘internally inconsistent’ and more aptly reflect manifestations of power-grabbing/appropriating/usurpatory/arrogating implications when analysed as of relative-ontological-completeness. Consider in this regards for instance as of the absolutising-identitive-constitutedness notion of contract/political-arrangement-or-political-coercion/social-value-construction underlying slavery, such an implied contract/political-arrangement-or-political-coercion/social-value-construction is inherently making a claim on existential-reality which rather more aptly reflect a manifestation of power-grabbing/appropriating/usurpatory/arrogating implications as of its apriorising/axiomatising that one human being has the right to own another human being (as actually not even the logical-dueness of such a contract/political-arrangement-or-political-coercion/social-value-construction argumentation can arise from the perspective of relative-ontological-completeness as what is then implied from the relative-ontological-completeness perspective is the edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising in unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing of any such implied slavery contract/political-arrangement-or-political-coercion/social-value-construction). The proof that this is priorly ‘a power-

grabbing/appropriating/usurpatory/arrogating implications of apriorising/axiomatising and not of veridical logical-dueness' lies in the fact that for instance the Haitian slave revolters wouldn't countenance the logical-dueness of any such implied logic of contract/political-arrangement-or-political-coercion/social-value-construction underlying their enslavement but merely as of their relative-ontological-completeness perspective of apriorising/axiomatising undertake in revolt the unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing of any such implied slavery contract/political-arrangement-or-political-coercion/social-value-construction. This points to the reality that contract/political-arrangement-or-political-coercion/social-value-construction argumentation do not truly escape the ontological prism as of existence being the absolute a priori, and rather speak of epistemic situations in epistemic-abnormalcy with the possibility for true causality implications to be drawn in relative-ontological-completeness as of ontological-primemovers-totalitative-framework construable 'structural/paradigmatic implications of relative-ontological-completeness in superseding/overcoming/transcending human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of relative-ontological-incompleteness'. The confusion here arises because of the habituation of any such contract/political-arrangement-or-political-coercion/social-value-construction which is then taken to be natural to the point of 'forgetting/overlooking that it is underlied by apriorising/axiomatising power-grabbing/appropriating/usurpatory/arrogating implications' to which even the weaker party might end up getting habituated to (over years, decades or centuries) as of little alternate existential choice and possibilities, and from which point an absolutising-identitive-constitutedness false sense of logical-dueness as of relative-ontological-completeness implications may seem to arise; but as with say the American civil war and the Haitian slave revolt, the reality that such implied contract/political-arrangement-or-political-

coercion/social–value-construction is rather of flawed apriorising/axiomatising power-grabbing/appropriating/usurpatory/arrogating implications is met not with logical-engagement in wrongly validating any such apriorising/axiomatising but is rather meted with relative-ontological-completeness perspective edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising in unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing. In fact, besides the more starkly demonstrable case with respect to say slavery this equally applies with less starkly obvious situations having to do with human social differentiation as well as any other situations requiring prospective knowledge-reification as the possibility for all human progress arises effectively as a result of the transcending of all such human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint power-grabbing/appropriating/usurpatory/arrogating implications construed as contract/political-arrangement-or-political-coercion/social–value-construction as well as their socially attendant situations in need for prospective knowledge-reification; and so not as of a flawedly implied logical-dueness and logical engagement that wrongly validate the relative-ontological-incompleteness apriorising/axiomatising of contract/political-arrangement-or-political-coercion/social–value-construction as being of existential-reality in relative-ontological-completeness, but rather as of the relative-ontological-completeness perspective edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising in unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing of such implied contract/political-arrangement-or-political-coercion/social–value-construction argumentation. In fact, such an interpretation about the ontological-veracity of contract/political-arrangement-or-political-coercion/social–value-construction argumentation

is not only relevantly undermined with respect to say highlighting the supposed weaker party perspective in such a framework of power-grabbing/appropriating/usurpatory/arrogating implications of apriorising/axiomatising but is equally undermined/subverted when conveniently so by the stronger party for instance in the case of the various allied powers of the second-world war overlooking Nazi scientists direct or indirect participation in war crimes on the rationale of strengthening themselves to ensure future security, and one can imagine the same with regards with many ad-hoc arrangements having to do with spying activities, etc.; thus pointing fundamentally to the ascendancy of the ontological implications of human limited-mentation-capacity as to human limited-mentation-capacity-deepening possibilities over the absolutising of contract/political-arrangement-or-political-coercion/social-value-construction argumentation. Thus any such pretence that contract/political-arrangement-or-political-coercion/social-value-construction argumentation is absolute as of absolutising-identitive-constitutedness and not subject to prospective relative-ontological-completeness implications with regards to an animal of limited-mentation-capacity requiring its prospective limited-mentation-capacity-deepening (and thus paradoxically in want of its very own ‘prospective anamnestic-residuality/transepistemicity magnanimity induced originariness-parrhesia,—as-spontaneity-of-aestheticisation’ as to cohere with ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,-to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy) is effectively bound not to be able to address the very central/critical implications to prospective knowledge-reification of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor (with the latter involving ‘direct bilateral relation of

appropriate construction-of-the-Self for appropriate cognisance-and-integration of prospective relative-ontological-completeness meaningfulness-and-teleology’ as implied prospective in ‘construing of both the right apriorising/intelligibilitysetup/measuringinstrument/axiomatising mindset-as-of-prospective-deprocrypticism-dissemination and thus the knowledge for that right mindset-as-of-prospective-deprocrypticism-dissemination’). Even with the modern day polity and law, the reality of human sovereignty and free-will implied in human rights takes precedence over any contract/political-arrangement-or-political-coercion/social-value-construction practicalities and is the basis for continual social and governmental reforms; and as so-implied by the ‘structural/paradigmatic implications of relative-ontological-completeness in superseding/overcoming/transcending human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint of relative-ontological-incompleteness’ and this is the very legitimation for any intellectualism purporting knowledge-reification. Ultimately, the very possibility for prospective knowledge-reification as providing the illumination for prospective human sovereignty and free-will conceptualisation is itself bound to be undermined, and so as of human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, in the interplay of human absolutising-identitive-constitutedness inclinations for vested postures and interests poorly appreciating relative-ontological-completeness implications in contrast to anamnestic-residuality inclinations very much appreciative of relative-ontological-completeness implications as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative—implications. In this regards, one can appreciate the human sovereignty and free-will expansion drive of the prospective knowledge-reification associated with the Socratic universalising philosophers, budding positivists/rational-empiricists and today’s

postmodern critical thinkers emancipatory meaningfulness-and-teleology infrastructure while on the other hand the prospective dereification as reflected in wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of non-universalising sophists, non-positivising/non-rational-empiricist medieval scholasticism pedants and today's manifestations of institutional-being-and-craft muddlement as providing the meaningfulness-and-teleology infrastructure for their respective present-day vested postures and interests. The paradox here is that the lack of anamnestic-residuality of such absolutising-identitive-constitutedness 'contract/political-arrangement-or-political-coercion/social-value-construction reasoning' as of its 'ontologically-flawed supposedly superseding of existential-contextualising-contiguity relative-ontological-incompleteness and relative-ontological-completeness implications' construes such 'solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity ontological-faith-notion-or-ontological-fideism seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity' as teleologically-degraded, even as it is the previous same anamnestic-residuality originariness-parrhesia,—as—spontaneity-of-aestheticisation meaningfulness-and-teleology that absolutising-identitive-constitutedness formulaic interpretation adopt as the wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of categorical-imperatives/axioms/registry-teleology; and so equating such 'prospective anamnestic-residuality/transepistemicity magnanimity induced originariness-parrhesia,—as—spontaneity-of-aestheticisation' with teleological-degraded meaningfulness-and-teleology as of blatant two-facedness/falseness that would hardly contemplate that 'the absolutising-identitive-constitutedness institutional framework structurally/paradigmatically undermines in many ways the possibility for veridical prospective human transcendence-and-sublimity as

of its apriorising/axiomatising totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag’. In other words, the notion of ‘the other’ as aetiologisation/ontological-escalation is much more than ‘magnanimity towards the other’ but more fully a stance that ‘calls upon a principled commitment to the notion of the other’ by the other as enabling the completeness of universal responsibility. Paradoxically, viewed from this angle as of the possibility of inducing notional-discontiguity/epistemic-discontiguity for ontologically-veridical virtue transcendence-and-sublimity, a different interpretation can be made about the posture of a thinker like Heidegger during the troubled years of the 1930s; as effectively, the implication of Heidegger’s analysis of the situation which he associated with Being-development/ontological-framework-expansion projective-totalitative–implications points to ‘a conception emphasising ontology as defining virtue thus ultimately geared towards notional-discontiguity/epistemic-discontiguity as of the need for prospective relative-ontological-completeness-of-reference-of-thought’, but failing not because of the said orientation but with regards to the wrong conclusion about Being-development/ontological-framework-expansion misunderstood as implying that it lies with an originary tradition like the Ancient Greece tradition or German Folk tradition rather than lying with an underlying transcendental universal notion construed as ‘going beyond them-and-us logic’ as of the implications of universal human emancipatory potential, and this fundamentally scuppered his possibility of ‘attaining a conception of notional-discontiguity/epistemic-discontiguity as of the need for prospective relative-ontological-completeness-of-reference-of-thought’, rather than an ‘ontologically-flawed idea as of any given tradition’. Likewise, but with regards to virtue analysts analyses that are naively articulated on the basis of the ontological-contiguity of our ‘modern take attitude/mental-disposition/care–and–episteme’ as of our totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag prior relative-ontological-

incompleteness-of-reference-of-thought leading to palliation as of selecting, triaging, mutually-concurring-and-accommodating and power-relations driven palliating virtue constructs, an altogether different drawback is decisively apparent as we know that since those troubled years, wars, genocides, and other crimes against humanity have still been taking place and will probably continue to take place, as of the structural/paradigmatic consequence arising with such manifestations in ontological-contiguity of our ‘modern take attitude/mental-disposition/care-and-episteme’; divulging that conceptualising virtue in ontological-contiguity is at best only of palliative consequence and not truly aetiologisation/ontological-escalation which rather warrants notional-discontiguity/epistemic-discontiguity as of prospective relative-ontological-completeness-of-reference-of-thought. The fact is well-meaningness, good-intentions and/or good-naturedness however comforting to contemplate about doesn’t substitute for ontology/ontological-veridicality as of the need to truly understand the human limited-mentation-capacity dynamics behind human action for appropriate aetiologisation/ontological-escalation that brings an end to the endemisation and enculturation of any given registry-worldview’s/dimension’s vices-and-impediments. This existential reality about ontological-primemovers-totalitative-framework is no more different between the social world and the natural world, and so as of existence as the absolute a priori inherent ontological coherence/contiguity. This insight about virtue as lying with ontology has been to varying degrees implicitly understood by many postmodern thinkers, beginning with Heidegger pointing to a sophistication of thought but for the poor development and poor conclusions of his analysis during the troubled years of 1930s; and rather poorly interpreted by virtue critiques adopting a ‘modern take attitude/mental-disposition/care-and-episteme’ in ontological-contiguity as of its totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag prior relative-ontological-incompleteness-of-reference-of-thought perspective construed-as reasoning-from-

results/afterthought of modernity. Such sophistication of thought to think in terms of inherent ontology, however ontologically-flawed with respect to Heidegger, has been further implicitly pursued by latter postmodern thinkers as of quasi-transcendental implications for construing virtue from the orientation of notional-discontiguity/epistemic-discontiguity as of prospective relative-ontological-completeness-of-reference-of-thought, as implicated with the case of Derrida's spirit insight. Ultimately, the 'postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme' should ontologically nurture the requisite psychoanalytic-unshackling/prospective-grounding/prospective-reification for notional-discontiguity/epistemic-discontiguity as of prospective relative-ontological-completeness-of-reference-of-thought implied as of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought as implied by postmodern human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation thus inducing the aetiologisation/ontological-escalation addressing/resolving our 'modern take attitude/mental-disposition/care—and—episteme' vices-and-impediments. As a further elucidation, notional-discontiguity/epistemic-discontiguity as of prospective relative-ontological-completeness-of-reference-of-thought actually points out that the uninstitutionalised-threshold is rather a point of ontological-dementation/dialectical-dementation stranding dialectics which is what justifies the pre-eminence of the prospective institutionalisation attitude/mental-disposition/care—and—episteme over the uninstitutionalised-threshold attitude/mental-disposition/care—and—episteme. We can effectively grasp why Heidegger's implicated insight as of notional-discontiguity/epistemic-discontiguity but rather being associated with a given tradition actually couldn't break through the barrier of perceiving notional-discontiguity/epistemic-discontiguity as 'futural way of thinking', as it misperceived that any

tradition can reveal as of its inherent nature the ‘futural way of thinking’, rather than that this lies with ‘a universal principle understanding of the transformation of traditions’ and thus how such universal principle understanding as of its universal implications informs about the ‘futural way of thinking’. In this regard, we can equally understand why Heidegger’s supposed criticism of Cartesianism was altogether a misplaced analysis given that ‘a universal principle understanding of the transformation of traditions’ as herein implied by this author as of the institutionalisation process, would have provided the insight that Descartes was actually ‘establishing a positivism tradition as of futural way of thinking’ breaking away from non-positivism/medievalism; such that budding positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising becomes intelligible, thus revealing that Heidegger notional-discontiguity/epistemic-discontiguity why intending to be of prospective apriorising/intelligibilitysetup/measuringinstrument/axiomatising is actually of a totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag aposteriorising/intelligising/measuring/logicising with prior positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care–and–episteme, even though in its attempt it effectively elicits many insights for the prospect of ontologically-veridical prospective postmodern apriorising/intelligibilitysetup/measuringinstrument/axiomatising with its corresponding postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care–and–episteme. In other words, Heidegger’s issue should have actually been about future Being-development/ontological-framework-expansion just as Descartes issue in articulating budding positivism construed-as-rationalism was not with setting up its meaningfulness-and-teleology in contention with prior non-positivism/medievalism as of its then future Being-development/ontological-framework-expansion, apart from mere

intellectually contrastive elucidation, but rather implied affirming prospective positivism as of its very own apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme; and so as of the fundamental implication of positivism prospective relative-ontological-completeness-of-reference-of-thought over non-positivism/medievalism prior relative-ontological-incompleteness-of-reference-of-thought. We thus see why the future redevelopment of Heideggerian misconceived notional-discontiguity/epistemic-discontiguity as of prospective relative-ontological-completeness-of-reference-of-thought as undertaken by latter thinkers like Foucault, Derrida, Deleuze, Lacan, Lyotard and others are full of prospective quasi-transcendental ‘structural/paradigmatic disseminative implications’ as reflecting an underlying reality of prospective reference-of-thought ontological-dementation/dialectical-dementation stranding dialectics construed herein as of prospective postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme, and so just as searing with ‘structural/paradigmatic disseminative implications’ was the mathesis universalis metaphoricity extended development/influence on the works of the Galileos, Descartes, Newtons, Leibnizes and others that ultimately reflected an underlying reality of prospective reference-of-thought ontological-dementation/dialectical-dementation stranding dialectics implied as of prospective positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme in superseding/transcending non-positivism/medievalism. In effect this author contends that what is implicitly missed about the Cartesian proposition ‘I think therefore I am’ is not the idea that Descartes contemplates that he is the first person to be self-conscious about his thinking; rather his underlying reasoning is ‘more than just speculative doubting’ but ‘motivated doubting’ that is highly contextual-as-of-the-non-

positivism/medieval-epoch and highly prefigurative-as-to-what-Descartes-wants-to-do-of-
 transformative-with-thinking-given-that-context. That is, Descartes seeks to affirm the
 ‘mereness of thought’ beyond any existing habit-and-tradition-of-thought as of non-
 positivism/medievalism scholasticism pedantic dogmatism reasoning-from-
 results/afterthought, and so liberated rearticulate thought ‘out of thin air’ as of prospective
 reasoning-through/messianic-reasoning as reflected by his novel mathesis universalis
 metaphoricity rationalism schema/dissemination that permeates all of his works such that
 even with his ontological argument something subtle and more original is happening, in that
 unlike many medieval scholasticism dogmatic interpretations that construe of a supernatural
 permeation into the natural, in affirming the ontological argument Descartes blocks-
 out/passivises the supernatural from the natural with the metaphoricity implication that the
 natural can be thought of in its own terms-as-of-axiomatic-construct. Thus Descartes ‘I think
 therefore I am’ is rather a statement of intent as of a ‘futural way of thinking’ and its budding
 positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-
 disposition/care—and–episteme, that is unique as ‘consciously setting up the pre-eminence of
 thinking in eliciting-and-resolving systemic doubting and structuring/paradigming the
 possibility of elucidation of any subject on this basis’. In effect Descartes project is actually
 as of prospective existence’s non-presencing as of positivism, and so from the presencing of
 non-positivism/medievalism. With both the budding positivism
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-
 disposition/care—and–episteme and postmodern—deprocrypticism-or-preempting-of-
 disjointedness-as-of-reference-of-thought
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-
 disposition/care—and–episteme, we may be forgiven to confuse-and-dismiss their
 schema/structural-or-paradigmatic-disseminative-implications as of prospective reasoning-

through/messianic-reasoning as incoherent from a shallow-and-immediate un insightful analytical perspective on the basis of the respectively prior reasoning-from-results/afterthought of non-positivism/medievalism and positivism—procrysticism/disjointedness-as-of-reference-of-thought; thus failing to perceive that dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension, as of deneuterising ‘exteriorisation attitude/mental-disposition/care—and–episteme’ of meaningfulness-and-teleology superseding/overriding prior reference-of-thought temporally neuterising ‘interiorisation attitude/mental-disposition/care—and–episteme’ of meaningfulness-and-teleology, reflects Being-development/ontological-framework-expansion as of human limited-mentation-capacity implications wherein ontological-faith-notion-or-ontological-fideism is rather about a ‘seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’ that comes out short and which ‘reinvigoration as of furthered ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen for originary/as-of-event reasoning-through/messianic-reasoning’ induces the successive prospective relative-ontological-completeness-of-reference-of-thought of the human ‘institutionalisation process as of reference-of-thought différance/internal-dialectics/difference-deferral’. The appropriate contemplative perspective for the appreciation of their schema/structural-or-paradigmatic-disseminative-implications is effectively cross-generational as of the amplitude/breadth of reference-of-thought implied transcendence-and-sublimity; as we can effectively appreciate that the very mathesis universalis schema/disseminative metaphoricity engendering our positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and–episteme is still ongoing today even as it is more clearly demarcated as initiated about 500 years ago. The overall logic of this notional-discontiguity/epistemic-

discontiguity analysis, implied as of prospective relative-ontological-completeness-of-reference-of-thought, can be understood simply as of the relation between existence which is already given and human-subpotency which as of prospective relative-ontological-completeness-of-reference-of-thought grasp more and more what is of the full-potency of existence by way of its axiomatic-constructs of existence or of purviews/domains of existence, with its grandest axiomatic-construct as a totalising/circumscribing/delineating construct being the reference-of-thought. We can grasp that it is not existence and purviews/domains of existence which will adjust to human-subpotency for ontologically-veridical meaningfulness-and-teleology but rather human-subpotency adjusting as of existence's non-presencing; with such adjusting being construed as of prospective relative-ontological-completeness. But then humankind as of its developed-and-invested habits and traditions about existence counterintuitively relates to existence and purviews/domains of existence as if it supersedes them, and thus do not or poorly construes of prospective relative-ontological-completeness-of-reference-of-thought/relative-ontological-completeness-of-axiomatic-construct as an issue of human-subpotency adjustment as of psychoanalytic-unshackling/prospective-grounding/prospective-reification, implied as of ontological-dementation/dialectical-dementation stranding dialectics with regards to the reference-of-thought transcendence. In lieu the poor intuition is to imply that we are already well grounded and that prospective meaningfulness-and-teleology is an incrementalism-in-relative-ontological-incompleteness to our already established psychoanalytic disposition rather than a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating in resetting-our-psychoanalytic-disposition/prospective-grounding as of totalising-renewing-realisation/re-perception/re-thought in conflatedness, such that this leads to constitutedness when so poorly psychoanalytically grounded on the naïve and ontologically-flawed basis that it is existence and purviews/domains of existence that adjust to our human-subpotency. Thus

however counterintuitive, this overall conception structures the fact that it is as of ontological-dementation/dialectical-dementation stranding dialectics that our human totalising/circumscribing/delineating reference-of-thought is transcended for prospective relative-ontological-completeness-of-reference-of-thought implied as of notional-discontiguity/epistemic-discontiguity. In this regard, ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ as of Being-development/ontological-framework-expansion is essentially one of shifting attitude/mental-disposition/care-and-episteme by the successive institutionalisations reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology, even though beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought human induced bias leads to a wholly immersed-and-engrossed focussing only at its given present institutionalisation’s reference-of-thought ‘present attitude/mental-disposition/care-and-episteme’ as if other retrospective-and-prospective institutionalisations’ reference-of-thought do not have their own attitude/mental-disposition/care-and-episteme as of their underlying relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-thought. This phenomenological insight in recognising that there is ‘an underlying metaphoricity-induced relative-emancipatory migration’ from the mindset of the early hunter-gathers as of recurrent-utter-uninstitutionalisation towards modern man as of positivism-procrypticism to the prospective postmodern man as of deprocrypticism, calls for a full appreciation of this most profound phenomenological transcendental process of corresponding ‘human attitude/mental-disposition/care-and-episteme migration’ inducing successive apriorisings/apriorising/intelligibilitysetup/measuringinstrument/axiomatisings of

human meaningfulness-and-teleology as of prospective relative-ontological-completeness-of-reference-of-thought; and so, as of retrospective and prospective meaningfulness-and-teleology interpretation construed as ontological-aesthetic-tracing. Such a conception that goes beyond our natural inclination of ‘referring to’ and ‘ad hocly-and-scantly’ identify other retrospective and prospective registry-worldviews/dimensions reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme from our present attitude/mental-disposition/care-and-episteme, towards an ontologically-veridical transparent ‘to be or existing as wholly immersed-and-engrossed’ existential projection insight about all registry-worldviews/dimensions attitude/mental-disposition/care-and-episteme is what underlies the protensive-consciousness of deprocrypticism, from which standpoint as of its ontological-completeness-of-reference-of-thought such an ontologically-veridical analysis of ‘human attitude/mental-disposition/care-and-episteme migration’ can be undertaken, for retrospective and prospective attitude/mental-disposition/care-and-episteme conception, and specifically as relevant for understanding prospective ‘postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme’. In this regard, ‘human attitude/mental-disposition/care-and-episteme migration’ as of the institutionalisation process induced Being-development/ontological-framework-expansion is instilled as of ontological-dementation/dialectical-dementation stranding dialectics wherein the prospective reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme is intemporally induced as deneuterising ‘exteriorisation attitude/mental-disposition/care-and-episteme’ of meaningfulness-and-teleology superseding/overriding the prior reference-of-thought temporally neuterising ‘interiorisation

attitude/mental-disposition/care-and-episteme' of meaningfulness-and-teleology. The 'exteriorisation attitude/mental-disposition/care-and-episteme' implies meaningfulness-and-teleology as not registered-as-ascribed/neuterised as of a prior reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology, that is, not as of the prior reference-of-thought 'interiorisation attitude/mental-disposition/care-and-episteme', but rather registered-as-deascribed/deneuterised as of the prospective reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology; with the latter construed as dialectical-thinking and the former construed as dialectically-dementing. Thus a registry-worldview/dimension institutionalisation reference-of-thought always operates as if it is the absolute framework of meaningfulness-and-teleology, that is, by its 'interiorisation attitude/mental-disposition/care-and-episteme', notwithstanding the ontological-veridicality of its prior relative-ontological-incompleteness-of-reference-of-thought at its uninstitutionalised-threshold, as reflected by the prospective registry-worldview/dimension institutionalisation reference-of-thought in an 'exteriorisation attitude/mental-disposition/care-and-episteme' towards it. Consider in this regard the ontologically-veridical reflected immersed-and-engrossed attitude/mental-disposition/care-and-episteme with respect to the 'ill-health totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality' wherein the 'to be or existing as wholly immersed-and-engrossed' recurrent-utter-uninstitutionalisation existential-contextualising-contiguity-lowest-level-reification perceptivity-as-of-bad-omen attitude/mental-disposition/care-and-episteme could involve a conversational stance of the sort, 'I have been stricken by a spirit', in an effusive-conversational-as-of-existential articulating of what can be done to allay such a spirit; or with respect to our positivism—

procrypticism, in an effusive-conversational-as-of-existential articulating of a clinical analysis mainly as a patient ill-health state; or with respect to prospective postmodernism, in an effusive-conversational-as-of-existential articulating of associated socio-economic and socio-political factors behind a patient's ill-health. Basically, 'exteriorisation attitude/mental-disposition/care-and-episteme', as relevant for the conception of a 'postmodern exteriorisation attitude/mental-disposition/care-and-episteme relative to our modern take interiorisation attitude/mental-disposition/care-and-episteme', as of notional-deprocrypticism protensive-consciousness in ontological-completeness-of-reference-of-thought encapsulates: - underlying relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-thought as of relative-nonextirpation-existential-preempting-of-existential-unthought over relative-existential-extirpation-as-of-existential-unthought; - notional-discongruity of the prospective reference-of-thought over the prior reference-of-thought; - and prospective deascription/deneuterising psychologism/apriorising/intelligibilitysetup/measuringinstrument/axiomatising over prior ascription/neuterising

psychologism/apriorising/intelligibilitysetup/measuringinstrument/axiomatising. When so-construed prospectively, 'postmodern exteriorisation attitude/mental-disposition/care-and-episteme' is all about such a deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought as implied by its human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation 'originary postmodern-thought-process and other postmodern creative-processes avant-gardism' that are not in a reasoning-from-results/afterthought ontological entanglement with our 'modern take attitude/mental-disposition/care-and-episteme'. Consider in this regard the reasoning-through/messianic-reasoning prospective structural/paradigmatic disseminative implications as of Derridean *différance*/internal-dialectics/difference-deferral, Foucauldian genealogy-knowledge-and-

power-discourse and Deleuzian immanence experimentation that can all be construed (and as equally implied by this author's ontological-normalcy/post-convergence referentialism conception of ontological-aesthetic-tracing), as of prospective transcendence-and-sublimity singularisation/epistemic-immanence/veridical-epistemic-determinism for perpetuated/disseminative pre-emption of conceptual disjointedness. Thus ultimately the deprocripticism registry-worldview/dimension is one that will be marked by sharper and sharper singularisation/epistemic-immanence/veridical-epistemic-determinism, construed as of its perpetuating/disseminating of the pre-emption of disjointedness. In this regard, singularisation/epistemic-immanence/veridical-epistemic-determinism retrospectively and prospectively reflects the notional conflatedness/conflatedness implied as of ontological-faith-notion-or-ontological-fideism but with the latter as a 'seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity' ever always coming short due to human temporal ontological-performance denaturing as of temporal/shortness-of-register-of-meaningfulness-and-teleology pedantic/formulaic alignment to apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-imperatives/axioms/registry-teleology for aposteriorising/intelligising/measuring/logicising meaningfulness, so-construed at the uninstitutionalised-threshold as constitutedness, thus requiring prospective intemporal/longness-of-register-of-meaningfulness-and-teleology institutionalisation renewing of reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology that overcome the distortional implications of such pedantic/formulaic denaturing; by way of 'reinvigoration as of furthered ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen' for originary/as-of-event reasoning-through/messianic-reasoning. singularisation/epistemic-immanence/veridical-

epistemic-determinism as such is a conception that grasps that ‘axiomatic-constructs as of totalising/circumscribing/delineating reference-of-thought-devolving’ is the meaningfulness-and-teleology format implied by the ontological-faith-notion-or-ontological-fideism ‘seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’ with respect to any given ‘totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, with potentially divergent meaningfulness-and-teleology implications as of underlying relative-ontological-incompleteness/relative-ontological-completeness arising from human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination; with relative completeness increasingly attained, by way of ‘reinvigorating as of furthered ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen’ for originary/as-of-event reasoning-through/messianic-reasoning. Thus singularisation/epistemic-immanence/veridical-epistemic-determinism by its implied notional-conflatedness highlights that ‘axiomatic-constructs as of totalising/circumscribing/delineating reference-of-thought-devolving’ in reflecting of ‘human-subpotency ontological-performance correspondence with the full-potency of existence in its coherence/contiguity’ as of implied human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation, is effectively as of dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism to singularisation/epistemic-immanence/veridical-epistemic-determinism. That is singularisation/epistemic-immanence/veridical-epistemic-determinism points out that there is no inherent meaning of existence about existence as existence is tautologically what it is as existence, rather the notion of meaning arises as of the notion of human-subpotency strife to ‘grasp what is existence’, and that latter notion is all about human-subpotency ‘axiomatic-

constructs as of totalising/circumscribing/delineating reference-of-thought-devolving’ human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation. In other words, meaning is always a human project to construe existence as of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination of ‘axiomatic-constructs as of totalising/circumscribing/delineating reference-of-thought-devolving’. singularisation/epistemic-immanence/veridical-epistemic-determinism, and as reflected by this author’s notion of ontological-normalcy/post-convergence referentialism conception of ontological-aesthetic-tracing, points out that dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism as of human-subpotency ontological-performance correspondence with the full-potency of existence/intrinsic-reality/ontological-veridicality is ontologically-flawed, and that prospective relative-ontological-completeness reflects that singularisation/epistemic-immanence/veridical-epistemic-determinism as of human-subpotency ontological-performance correspondence with the full-potency of existence/intrinsic-reality/ontological-veridicality is what is rather ontologically-veridical. It is this prospective singularisation/epistemic-immanence/veridical-epistemic-determinism that reflects the effective possibility of a ‘seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’ as implied by ontological-faith-notion-or-ontological-fideism; attainable as of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination of ‘axiomatic-constructs as of totalising/circumscribing/delineating reference-of-thought-devolving’, and so reflected by the notion of dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension. This reality of the need to construe of human-subpotency ontological-performance correspondence with the full-

potency of existence/intrinsic-reality/ontological-veridicality as of singularisation/epistemic-immanence/veridical-epistemic-determinism over dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism has increasingly been revealed as from the ‘strangely axiomatic teleologically-thorough singularisation/epistemic-immanence/veridical-epistemic-determinism manifestations’ of quantum entanglement, relativity theory implications, the teleologically constrained nature of biological processes as more than just the parsimonious-or-disparate nature of organic matter but rather singularisation/epistemic-immanence/veridical-epistemic-determinism as of whole living organisms, and likewise human meaningfulness itself is a structuring/paradigming singularisation/epistemic-immanence/veridical-epistemic-determinism as of sharply defined teleological possibilities of social and individuals existence with respect to the different registry-worldviews/dimensions specific institutionalisations, etc. [Interestingly, as of this author’s conception of such a teleological perception of existence as of its singularisation/epistemic-immanence/veridical-epistemic-determinism, as of the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation insights of postmodern-thought has been subject to naïve obfuscation grounded on the supposed privilege of ‘science ideology’ over science-in-practice as an opened construct of scientific knowledge as of cause-and-effect constraint, and with the form of science at various times continually moulting as from the budding science of the days of Galileo and Copernicus, to Newtonian science, to Lavoisier laboratory science, to Einsteinian science to modern day institutional practices of science, with all fundamentally driven not by any ‘purported science ideology’ but rather the practicality of results as of the constraint of the subject-domains of scientific study as of their existential-contextualising-contiguity knowledge-reification rather than ‘any implied notion that naively supersede existence as the absolute a priori’. In this regard, it is interesting to note that the notion of science practised by the successive pioneers cited above are markedly

different from each other and all subjected rather to the implications of existential-contextualising-contiguity knowledge-reification of their purview/domain of existence/intrinsic-reality/ontological-veridicality. It is interesting as well to note for example that when equations didn't work out in reflecting existential-contextualising-contiguity, Einstein rather rethought and subjected human assumptions to existence as the absolute a priori for his science, with such notions as space-time rather than traditional space and time; pointing out that there cannot be any ideology about science and it is rather the constraint for existential-contextualising-contiguity knowledge-reification that determines science practice, and so in existential conflatedness. Further, it had long dawned on this author that scam studies meant to undermine the validity of underlying constructivist and relativist insights about existential reality as implied by postmodern-thought including with respect to such implications in the natural sciences are rather 'supposedly invalidating' wholly with respect to the authors of such scam studies coming out with the arguments of their 'intendedness of invalidation'; with the legitimate contention that such ploys are thus surreptitious manoeuvres for pre-empting a given orientation of thought 'not because of the inherent invalidity of such orientations as of inherent theoretical knowledge arguments in undermining such orientations' but rather as a ploy of 'inducing popularised scientific ideology' to surreptitiously stifle such orientations without truly engaging in undermining its theorisation. Bogusness or non-bogusness is not a relevant scientific criteria, though granted it can be a relevant criteria for 'surreptitious media-driven invalidation', as science-in-practice is about ultimate cause-and-effect relationships, and in practical terms many scientific studies are rather elaborated as of 'deferred cause-and-effect constraint' as a reifying gesture for ultimate cause-and-effect determination. The fact that similar scam studies for the 'intendedness of invalidation' cannot be construed as scientifically valid with respect to any given orientation of study renders such manoeuvres intellectually void, and whatever their underlying 'covert

goals’ and however genuine their authors are of intent. It is very much important in this regard that intellectuals, whether in the natural sciences or in the social and humanities, not be covered/enframed by non-intellectual/extra-intellectual approaches to ‘acknowledged intellectual ways and approaches for intellectual argumentation’, and not even if such approaches are media-driven, so because much that is central and critical to intellectualism is about exploring all possibilities.] All these highlight an underlying ontology’s-directedness-as-Being that bears notional-conflatedness singularisation/epistemic-immanence/veridical-epistemic-determinism implications, as of ontologically-veridical singularisation/epistemic-immanence/veridical-epistemic-determinism of human-subpotency ontological-performance correspondence with the full-potency of existence/intrinsic-reality/ontological-veridicality over ontologically-flawed dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism; and yet our psychological disposition is more often than not geared to ontologically-flawed dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism that tend to be absolutised in constitutedness of prior reasoning-from-results/afterthought mental-reflexes of wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of categorical-imperatives/axioms/registry-teleology, and so failing to grasp that the very principle of human institutional-cumulations/institutional-recomposures as of the institutionalisation process itself is one driven by the future as of its own reasoning-through/messianic-reasoning attitude/mental-disposition/care—and—episteme’ which reflects an increasing orientation away from identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as-cloistered-within-the-same-reference-of-thought towards difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process-‘notional—singularisation/epistemic-immanence/veridical-

epistemic-determinism', and so because the future is as of prospective relative-ontological-completeness-of-reference-of-thought and takes precedence for its apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of increasing axiomatic teleological wholeness/nested-congruence or prospective relative-ontological-completeness-of-reference-of-thought. For instance, with regards to 'the very same ill-health totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality/ontological-veridical', with the successive reference-of-thought ontological-dementation/dialectical-dementation stranding dialectics at their uninstitutionalised-thresholds inducing successive displacement of human-subpotency reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology, it is rather singularisation/epistemic-immanence/veridical-epistemic-determinism ontologically-veridical reference-of-thought-level difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process-'notional—singularisation/epistemic-immanence/veridical-epistemic-determinism' that effectively reflects the ontological-aesthetic-tracing (and so over identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as-cloistered-within-the-same-reference-of-thought that will simply imply the obliviousness of one reference-of-thought from the other since 'identity of meaningfulness-and-teleology' is wrongly fixed-and-set as of each registry-worldview's/dimension's reference-of-thought cloistered-consciousness). As it is prospective relative-ontological-completeness-of-reference-of-thought of human-subpotency that brings about 'better and better axiomatic teleological wholeness/nested-congruence of meaningfulness-and-teleology' increasing human-subpotency ontological-performance correspondence with the full-potency of existence/intrinsic-reality/ontological-veridicality,

and so from: existential-contextualising-contiguity-lowest-level-reification perceptivity-as-of-bad-omen with recurrent-utter-ininstitutionalisation, to existential-contextualising-contiguity-second-level-reification perceptivity-as-of-a-specific-place-or-specific-evil-people-or-specific-evil-period with base-institutionalisation–ununiversalisation, to existential-contextualising-contiguity-third-level-reification perceptivity-as-of-failure-to-follow-the-heeding-of-the-Deity-or-failure-to-adhere-to-a-certain-mysticism-or-failure-to-pay-reverence-to-an-ancestor with universalisation–non-positivism/medievalism, to existential-contextualising-contiguity-fourth-level-reification perceptivity-as-of-full-disease-and-scientific-theory-construct-as-the-exclusive-cause-and-effect-conceptualisation with positivism–procrypticism, and prospectively to existential-contextualising-contiguity-full-reification perceptivity-as-of-factoring-in-socioeconomic,-education,-information,-environmental,-gender-and-power-relations-issues-underlying-healthcare-and-medical-delivery with deprocrypticism that then achieves difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process-‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’. This insight about ontological-performance as of prospective relative-ontological-completeness of human-subpotency can be garnered with respect to any axiomatic-construct as the meaningfulness-and-teleology representation of human-subpotency ontological-performance correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity or a purview/domain of existence/intrinsic-reality/ontological-veridicality, and so not only with regards to the reference-of-thought as the grandest axiomatic-construct. This fundamentally points out that at uninstitutionalised-thresholds, human cognition which is rather in ‘excogitative-blanking of prospective institutionalisation existential-contextualising-contiguity-in-reification’ suffers-and-fails to relay the ‘seeding promise of human-subpotency ontological-performance

equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’ for prospective institutionalisation as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process-‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’; since this potential for such singularisation/epistemic-immanence/veridical-epistemic-determinism is denaturing as of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as-cloistered-within-the-same-reference-of-thought at its uninstitutionalised-threshold. We can appreciate that with regards to ‘the very same ill-health totalising-devolved—purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality’ highlighted above, the various successively human-subpotency ontological-performance of prior perceptivities as successive uninstitutionalised-thresholds are rather in ‘excogitative-blanking of the prospective institutionalisation existential-contextualising-contiguity-in-reification’ (by their identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as-cloistered-within-the-same-reference-of-thought), as overlooking their successively prospective perceptivities which are actually in prospective relative-ontological-completeness-of-reference-of-thought as enabling/cogent-with difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process-‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’. The notion of human ‘excogitative-blanking of the prospective institutionalisation existential-contextualising-contiguity-in-reification’ can equally be elucidated with regards to a devolved axiomatic-construct of the reference-of-thought. For instance, we can grasp that with regards to ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’,

the perceptivity of ‘traditional classical mechanics axiomatic-construct’ had rather been in ‘excogitative-blanking of the prospective construal of existential-contextualising-contiguity-in-reification’ reflected by the prospective ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ as the latter’s prospective relative-ontological-completeness reflects the former’s prior relative-ontological-incompleteness as dialectically out-of-phase/dementing. This insight about human ‘excogitative-blanking of the prospective institutionalisation existential-contextualising-contiguity-in-reification’ at uninstitutionalised-thresholds actually highlights that from a prospective perspective of prospective relative-ontological-completeness-of-reference-of-thought our positivism–procrypticism registry-worldview/dimension is very much imbued with a flawed ontological-performance, as is the case with all other prior registry-worldviews/dimensions, ‘when we seem to perceive-and-think that our social world of meaningfulness-and-teleology is coherent, failing to factor in that it is dementing at its uninstitutionalised-threshold as reflected as disjointedness-as-of-reference-of-thought dementing by futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought’; as this false sense of coherence is actually the effect of our prior relative-ontological-incompleteness-of-reference-of-thought

apriorising/intelligibilitysetup/measuringinstrument/axiomatising totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag which we necessarily relate to as if of ontological-completeness-of-reference-of-thought, and this further explains as reflected from their prospective relative-ontological-completeness-of-reference-of-thought the notional-procrypticism/notional-disjointedness of all registry-worldviews/dimensions as of their prior relative-ontological-incompleteness-of-reference-of-thought denaturing meaningfulness-and-teleology as of their identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as-cloistered-within-the-same-reference-of-thought.

Concretely, the latter translates at the uninstitutionalised-threshold as of human-subpotency temporality or shortness-of-register-of-meaningfulness-and-teleology flawed ontological-performances, 'being construed temporally as determinative by wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of categorical-imperatives/axioms/registry-teleology, of a given registry-worldview/dimension reference-of-thought supposedly intemporal/longness-of-register-of-meaningfulness-and-teleology reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology, as of temporal dynamic manifestations of postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of 'reference-of-thought-devolving-level difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism reflected as the divergent ontological-performances of the ontological-aesthetic-tracing' beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. This arises because within the institutionalisation framework of a registry-worldview/dimension human construal of its existential-contextualising-contiguity knowledge-reification is only as effective as of the institutionalisation reference-of-thought reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology' in universal-transparency, thus providing a 'perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about its existential-contextualising-contiguity knowledge-reification'. But then at uninstitutionalised-thresholds where meaningfulness-and-teleology is denaturing, this prior institutionalisation 'perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about existential-contextualising-contiguity' gives a false

certainty/assurance, such that human-subpotency existentially-constrained temporal ontological-performances as of wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the categorical-imperatives/axioms/registry-teleology in usurpation of that ‘perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about its existential-contextualising-contiguity knowledge-reification’ tend to be overlooked as of mental-reflex since existentially the bulk of meaningfulness-and-teleology within the given registry-worldview/dimension as of its institutionalisation conforms-to/complies-with its ‘perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about existential-contextualising-contiguity knowledge-reification’, but with a shadowy uninstitutionalised-threshold always eloping to such institutionalisation conforming/complying as of prior relative-ontological-incompleteness-of-reference-of-thought, and as lack of universal-transparency as to ‘excogitative-blanking of prospective existential-contextualising-contiguity-in-reification’ elicits human temporal/shortness-of-register-of-meaningfulness-and-teleology uninstitutionalised mental-dispositions. Such ‘excogitative-blanking of prospective existential-contextualising-contiguity-in-reification’ can be construed as to when say the non-positivistic mindset goes about articulating meaningfulness-and-teleology falsely as if superstitious notions ontologically-veridical out of prospective positivism existential-contextualising-contiguity-reification, and likewise with regards to a positivism—procrypticism/disjointedness-as-of-reference-of-thought mindset construal of meaningfulness-and-teleology that utterly overlooks the structural/paradigmatic reference-of-thought denaturing implications of its prospective disjointedness of meaningfulness-and-teleology out of prospective existential-contextualising-contiguity-reification, as such disjointedness-as-of-reference-of-thought can be instigated originally from a postlogism-slantedness mental-disposition and the developing social dynamics with human temporality.

We can appreciate in this sense that even within a non-positivistic social-setup as animistic or medieval for instance, despite the fact that it is susceptible to ontologically-flawed superstitious beliefs like notions-and-accusations-of-sorcery, the bulk of human action will be in good intent as of its institutionalisation framework ‘perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about existential-contextualising-contiguity’; but then at its uninstitutionalised-threshold where its reference-of-thought structural/paradigmatic ontological-flawed implications of believing in superstition set in as of its prior relative-ontological-incompleteness-of-reference-of-thought, it always systemically faces notional-procrypticism/notional-disjointedness as of vices-and-impediments arising from non-positivism/superstitious human-subpotency existentially constrained temporal ontological-performances as wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the categorical-imperatives/axioms/registry-teleology in usurpation of the prior institutionalisation ‘perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about existential-contextualising-contiguity’ now in false certainty/assurance. This points out that when consciously aware of uninstitutionalised-threshold manifestation, we can’t naively operate as of our prior institutionalisation ‘perceptual perspective/framing/reference/horizon of meaningfulness-and-teleology about existential-contextualising-contiguity’, as of the fact of the beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought dementing human-subpotency existentially constrained temporal ontological-performances as wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the categorical-imperatives/axioms/registry-teleology in usurpation; such that an enlightened insight is able to bring up and examine a dementing representation as temporal denaturing ontological-performances of the prior institutionalisation ‘perceptual

perspective/framing/reference/horizon of meaningfulness-and-teleology about existential-contextualising-contiguity'. But this conception is a reflection of more than just ad-hoc temporal manifestations at uninstitutionalised-thresholds but rather points out, besides the trite or more grave consequences of this state of affairs as a result of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, that the possibility for all prospective institutionalisations necessarily passes through understanding 'human-subpotency existentially constrained temporal ontological-performances as wooden-language—of-temporal—mere-form/virtualities/dereification/akrasitic-drag-denatured-and-dementing-narratives of the prior institutionalisation categorical-imperatives/axioms/registry-teleology in usurpation', which understanding is actually what empowers the possibility of prospective institutionalisations that supersede/transcend it. In other words, humans in the various prior institutionalisations before our positivism were not limited to their various registry-worldviews/dimensions as recurrent-utter-uninstitutionalisation, base-institutionalisation, universalisation and our positivism just because they were inherently different from us as a species, but because of the need for the necessary institutional-cumulation/institutional-recomposuring of understanding as of its organic-knowledge to enable the very same species to accede prospective institutionalisations as of human-subpotency adjusting to the full-potency of existence, and not the false certainty/assurance that any human registry-worldview/dimension is fully developed and that existence/intrinsic-reality/ontological-veridicality will adjust to it, however our myopic/cloistered 60 – 100 years of living perspective. That is, grounding of meaningfulness-and-teleology is certainly required, but as of transcendence-and-sublimity it is not about grounding as of the present but rather as of psychoanalytic-unshackling/prospective-grounding/prospective-reification for prospective relative-ontological-completeness-of-reference-of-thought; and as highlighted

elsewhere it is ontological-completeness-of-reference-of-thought (of human-subpotency as of its limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination) that can imply human-subpotency ontological-performance correspondence with the full-potency of existence. It should be noted here that this ontology's-directedness-as-Being/ontologically-veridical notion of human-subpotency singularisation/epistemic-immanence/veridical-epistemic-determinism ontological-performance correspondence with the full-potency of existence is a notion of teleology in notional conflatedness as of ontological-normalcy/post-convergence, as utterly different from a traditional conception of teleology as of dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism that is rather in constitutedness as it reflects prior relative-ontological-incompleteness-of-reference-of-thought as of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism cloistered reference-of-thought apriorising/intelligibilitysetup. The operant insight here can be articulated as follows: singularisation/epistemic-immanence/veridical-epistemic-determinism speaks of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism as-of-the-trace-or-'ontological-aesthetic-tracing'-of-dialectically-thinking-'apriorising-teleological-elevation-in-ontological-contiguity'-as-intemporality-and-dialectically-dementing-'apriorising-teleological-degradation-in-notional-discontiguity/epistemic-discontiguity'-as-temporalities,-given-human-limited-mentation-capacity-dynamic-implications-of-ontological-performance-that-are-respectively-thinkingly-and-dementatively-traceable-as-of-ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism and so in contrast with dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism which speaks of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as-of-'no-

apriorising-teleological-variance'-by-elevation-as-intemporality-and-degradations-as-temporalities,-on-the-'flawed-axiomatic-mental-reflex-of-no-human-limited-mentation-capacity-dynamic-implications'-on-ontological-performance-which-is-falsely-construed-identitively-as-of-identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism. We can appreciate that the entire institutionalisation process as of Being-development/ontological-framework-expansion speaks of increasing human limited-mentation-capacity ontological-performance as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality; thus validating registry-worldviews/dimensions reference-of-thought-level meaningfulness-and-teleology differentiation as 'ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism as of singularisation/epistemic-immanence/veridical-epistemic-determinism. It is exactly because any given registry-worldview/dimension as of its given reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology is a cloistered-consciousness (as wholly set/focusing only on its categorical-imperatives/axioms/registry-teleology as of temporal-to-intemporal ontological-performances failing to appreciate meaningfulness-and-teleology as of the prospective projective-totalitative-implications of prospective relative-ontological-completeness-of-reference-of-thought implied by the institutionalisation process) that its postlogism-slantedness manifestation as temporal manifestation, whether with regards to notions-and-accusations-of-sorcery in a non-positivism social-setup or psychopathy and social psychopathy in a positivism-procrypticism social-setup, arises as ontologically-flawed identitive-constitutedness-as-totality-dereification meaningfulness-and-teleology, so because the given registry-worldview/dimension beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought meaningfulness-and-teleology isn't

cognisant of the institutionalisation process as of its prospective relative-ontological-completeness-of-reference-of-thought projective-totalitative-implications, and hence ‘wholehearted identify meaningfulness-and-teleology as absolute as of the specific registry-worldview/dimension categorical-imperatives/axioms/registry-teleology with little or no sense of mental projection as to the reality of ‘differentiation of meaningfulness-and-teleology categorical-imperatives/axioms/registry-teleology occurring with prospective relative-ontological-completeness-of-reference-of-thought’. Hence, the reference-of-thought-devolving in its totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag existential-instantiations as of human living and institutional disposition is inherently inclined to identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism for construing meaningfulness-and-teleology with a correspondingly weak existential disposition for dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension warranting an ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism strong existential disposition for dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension. Thus the fundamental operant insight for reflecting reified human meaningfulness-and-teleology as of ‘disambiguation of veridical/intemporal ontological-performance from flawed/temporal ontological-performances’ as of prospective relative-ontological-completeness over prior relative-ontological-incompleteness is: one that is as of ‘difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism underlying ontologically-veridical totality of meaningfulness-and-teleology in a subsuming wholeness/nested-congruence/contiguity-as-of-prospective-relative-ontological-completeness’ (so-construed as of singularisation/epistemic-immanence/veridical-epistemic-determinism); that reflects ‘human susceptibility as of identitive-constitutedness-as-totality-

dereification-in-dissingularisation-as-flawed-epistemic-determinism to ontologically-flawed parsimony/disparateness/discontiguity-as-of-prior-relative-ontological-incompleteness in distractiveness from the ontologically-veridical totality of meaningfulness-and-teleology' and the latter so-reflected as of human limited-mentation-capacity temporal dynamic implications of postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of 'reference-of-thought-devolving-level difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism reflected as the divergent ontological-performances of the ontological-aesthetic-tracing' reflecting the trace/ontological-aesthetic-tracing of meaningfulness-and-teleology denaturing (so-construed as of dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism). In the bigger scheme of things singularisation/epistemic-immanence/veridical-epistemic-determinism and dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism notionally reflect respectively the profoundness and shoddiness associated with human intemporal/longness-of-register-of-meaningfulness-and-teleology and temporal/shortness-of-register-of-meaningfulness-and-teleology ontological-performances. singularisation/epistemic-immanence/veridical-epistemic-determinism fully-reflects-abstractly the ontological-faith-notion-or-ontological-fideism 'seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity', as existence as the absolute a priori is being so at the exclusion-and-surpassing of any apriorising/axiomatising notion including the often misconstrued apriorising/axiomatising notions of space and/or time, as all such notions are rather in constitutedness since such notions seem to apriorise as if superseding the apriorising/axiomatising precedence of existence itself as the absolute a priori; construed herein rather as 'ecstatic' but not as of Heidegger's 'time/period ecstatic' analysis, as this

author contends that existence as the absolute a priori construed as ‘ecstatic apriorising’ subjects even time and any other notion, with the implication that the phenomenality of the analysis herein is not time-bound but solely existential more like the principles of physics are abstractly existential and so beyond the time-archaeology of astronomical manifestations reflecting such physics principles. singularisation/epistemic-immanence/veridical-epistemic-determinism thus speaks of how human subpotent prospective relative-ontological-completeness-of-reference-of-thought as of its limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination induce transcendence-and-sublimity, with the ‘ecstatic releasement of existence to human-subpotency’ as of existence’s non-presencing. This ‘ecstatic releasement of existence to human-subpotency’ as of existence as the absolute a priori is what has ever always debunked human subpotent dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism as from the human subpotent reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of recurrent-utter-uninstitutionalisation to our present positivism–procrypticism, as of an ‘ecstatic releasement of existence to human-subpotency’ that is increasingly in teleological nested-congruence along ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications’, pointing to the ontological-veracity of human-subpotency ontological-performance correspondence with the full-potency of existence as of singularisation/epistemic-immanence/veridical-epistemic-determinism, and so beyond just the seeding promise of such ontological-performance correspondence solely as of intemporal ontological-faith-notion-or-ontological-fideism. Such singularisation/epistemic-immanence/veridical-epistemic-determinism conceivable human-subpotency ontological-

performance correspondence with the full-potency of existence for futural Being-development/ontological-framework-expansion as of prospective deprocrypticism registry-worldview/dimension avoids human temporal individuations denaturing of ontological-performance, as of temporal denaturing of prior registry-worldviews/dimensions reference-of-thought categorical-imperatives/axioms/registry-teleology of meaningfulness-and-teleology, behind the successive registry-worldviews/dimensions logocentric constructs of meaningfulness-and-teleology. So because it requires going beyond just second-naturing of ‘mathesis/motif/throwness-disposition—as-of-ontologically-compromised—categorising-or-qualifying-or-tendentious-or-impulsive’

apriorising/intelligibilitysetup/measuringinstrument/axiomatising categorical-imperatives/axioms/registry-teleology induced for the successive prior institutionalisations in order, in Foucauldian terms of parrhesiastic askesis-or-acumen, to reflect the intemporal solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity ontological-faith-notion-or-ontological-fideism ‘seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’ towards its potentiative-attainment of singularisation/epistemic-immanence/veridical-epistemic-determinism, and so construed as of ‘ontologically-uncompromised—referentialism deprocrypticism emancipated apriorising/intelligibilitysetup/measuringinstrument/axiomatising self-consciousness’ ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’. Thus the very essence of ‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’ is the idea of ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’ strive for potentiative-attainment of singularisation/epistemic-immanence/veridical-epistemic-determinism construed as of

‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’ strive for potentiative-attainment of singularisation/epistemic-immanence/veridical-epistemic-determinism construed as of ‘ontologically-uncompromised—referentialism deprocrypticism emancipated apriorising/intelligibilitysetup/measuringinstrument/axiomatising self-consciousness’ ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’, highlights the ontological-veracity as of existence as

the absolute a priori, of singularisation/epistemic-immanence/veridical-epistemic-determinism which is ever always sought-and-resought by ontological-faith-notion-or-ontological-fideism (that is, as of the teleological wholeness/nested-congruence from non-rules of recurrent-utter-ininstitutionalisation towards prospectively pre-emption-of-disjointedness-as-of-reference-of-thought of deprocrypticism); with ontologically-veridical-singularisation/epistemic-immanence/veridical-epistemic-determinism further implying, as of its potentiative-attainment of ontological-performance-including-virtue-as-ontology correspondence with existence/intrinsic-reality/ontological-veridicality, that existence as the absolute a priori is as of ‘ecstatic singularity’. This ‘ecstatic singularity’ about existence as the absolute a priori can be delineated as of singularisation/epistemic-immanence/veridical-epistemic-determinism, and so-construed as of human textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence différance/internal-dialectics/difference-deferral for transcendence-and-sublimity in ‘phenomenological ecstatic releasement’. Thus our logocentric sense of certainty as marked by our ‘pervasively enframed logocentric constructs of meaningfulness-and-teleology’, as with all the prior logocentrisms of prior successive registry-worldviews/dimensions, as of their relatively ontologically-flawed dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism is misplaced manifestation of ignorance, and thus in our case in need for our prospective intellectual-and-moral maturing as of prospective ontological-dementation/dialectical-dementation stranding dialectics for the deprocrypticism/pre-emption-of-disjointedness-as-of-reference-of-thought registry-worldview/dimension. Thus the totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag reality of human meaningfulness-and-teleology as ever always subjected to its successive registry-worlds/dimensions relatively ontologically-flawed dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism distortion, come with the ontologically-veridical implication that human-

subpotency ontological-performance correspondence with the full-potency of existence has ever always been as of an ‘reifying-totalising-metaphoricity-conception of existential-contextualising-contiguity’ construed as ontological-aesthetic-tracing, and so-reflected from the supposed ontological-normalcy/post-convergence perspective of ontological-completeness-of-reference-of-thought as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process-‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’ construal of meaningfulness-and-teleology; with the implication here that hitherto identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as-cloistered-within-the-same-reference-of-thought as implied with historical accounts and representations are incomplete, as ontologically-veridical meaningfulness-and-teleology is as of the aforementioned ‘reifying-totalising-metaphoricity-conception of existential-contextualising-contiguity’ elaborateness of meaningfulness-and-teleology as dynamic differentiated transversality/logical-incongruence/mutual-unintelligibility/disambiguated-binarity-of-reference-of-thought-apriorising/intelligibilitysetup/measuringinstrument/axiomatising-as-of-thinking-and-dementing of the ontological-performance-including-virtue-as-ontology of intemporality over temporality. The articulation of human historicity/ontological-aesthetic-tracing accounts of meaningfulness-and-teleology failing to highlight this process of human-subpotency ontological-performance differentiation are rather incomplete and misrepresenting of human nature in the ‘dynamic human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor as of both solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity mental-

dispositions and second-natured institutionalisation mental-dispositions’ as the complete operant framework of human-subpotency, and so-construed from an ontological-normalcy/post-convergent ontological-completeness-of-reference-of-thought perspective (in difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process-‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’). This is ontologically critical to understand because the wrong mental-reflex conception of uninstitutionalised-threshold as mainly being as of ‘human intemporal second-natured institutionalisation mental-disposition’ will wrongly imply a human nature that is only intemporal and so as of the second-natured intemporality of the prior institutionalisation. This fails to factor in that all uninstitutionalised-thresholds are rather a framework of ‘recurring solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity temporal-to-intemporal ’ requiring prospective institutionalisation prospective relative-ontological-completeness-of-reference-of-thought, and so without any intemporal second-natured institutionalisation induced universal-transparency, deferential-formalisation-transference and habituation as of positive-opportunism; and thus fully reflecting the ontological-veridicality of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor. It is this ‘recurring solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity temporal-to-intemporal ’ reality at all the successive uninstitutionalised-thresholds that fundamentally reflect ‘the same fundamental human potentiation as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor’ across all the registry-worldviews/dimensions

notwithstanding the institutionalisation-level but for the fact that this same ‘recurring solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity temporal-to-intemporal ’ rather operates on different registry-worldviews/dimensions institutionalisations second-natured categorical-imperatives/axioms/registry-teleology at their uninstitutionalised-thresholds; whereby the successive prior registry-worldviews/dimensions institutionalisations fall short, as of their apriorising/intelligibilitysetup/measuringinstrument/axiomatising ontological-performance correspondence with the full-potency of existence, in construing existential-contextualising-contiguity knowledge-reification as of successive prospective institutionalisation prospective relative-ontological-completeness-of-reference-of-thought. This insight fundamentally explains ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ as involving successive reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as of limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination; geared towards more and more robust second-natured institutionalisation categorical-imperatives/axioms/registry-teleology even though in the face of the very same ‘recurring solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity temporal-to-intemporal ’. Insightfully, ontologically-veridical ‘reifying-totalising-metaphoricity-conception of existential-contextualising-contiguity’ as ontological-aesthetic-tracing by its elaborateness of meaningfulness-and-teleology as a differentiated transversality/logical-incongruence/mutual-unintelligibility/disambiguated-binarity-of-reference-of-thought-

apriorising/intelligibilitysetup/measuringinstrument/axiomatising-as-of-thinking-and-dementing selectivity of the ontological-performance-including-virtue-as-ontology of intemporality over temporality can be reflected by the operant technique of ‘partialisation of meaningfulness-and-teleology’. This ‘partialisation of meaningfulness-and-teleology’ operant technique of ‘reifying-totalising-metaphoricity-conception of existential-contextualising-contiguity’ as ontological-aesthetic-tracing is convenient because by mental-reflex every registry-worldview/dimension will necessarily reflect its meaningfulness-and-teleology as of singularisation/epistemic-immanence/veridical-epistemic-determinism as it wrongly implies and operates in its totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as if it is in ontological-normalcy/post-convergence as of ontological-completeness-of-reference-of-thought. For phenomenological analytical insight, ‘partialisation of meaningfulness-and-teleology’ operant technique for construing dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism as of defective representation of singularisation/epistemic-immanence/veridical-epistemic-determinism brings to a registry-worldview’s/dimension’s reference-of-thought self-consciousness its structural/paradigmatic/systemic dialectical-dementing state at its uninstitutionalised-threshold as so registered/reflected from the prospective registry-worldview’s/dimension’s institutionalisation reference-of-thought self-consciousness rather in dialectical-thinking state given its prospective relative-ontological-completeness-of-reference-of-thought. ‘Partialisation of meaningfulness-and-teleology’ as such simply involves representing the structural/paradigmatic/systemic incongruence that arises, as the prior registry-worldview/dimension institutionalisation falls short in construing existential-contextualising-contiguity knowledge-reification as of prospective institutionalisation prospective relative-ontological-completeness-of-reference-of-thought in its apriorising/intelligibilitysetup/measuringinstrument/axiomatising ontological-performance

 nested-congruence and harmony is brought about as of prior institutional second-naturing,
 this should not be naively expected at uninstitutionalised-thresholds as we very much know
 that all uninstitutionalised-thresholds are conflicted as of their framework of ‘recurring

 implication here is that solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-

integrity-(not-mythical-recollection)/transepistemicity intemporal individuation prospective
 transcendental meaningfulness-and-teleology is not directly intelligible in the narrow
 framework of temporal-to-intemporal social-stake-contention-or-confliction at
 uninstitutionalised-thresholds, but rather as a dispensing-with-immediacy-for-relative-
 ontological-completeness-by-reification/contemplative-distension constraining of the
 existential-contextualising-contiguity knowledge-reification framework as of ontological-
 primemovers-totalitative-framework. The constraining implications of existential-
 contextualising-contiguity knowledge-reification as of human totalising—thrownness-in-
 existence/I-exist-therefore-existence-is-transcendental-enabling/existence-potency-to-my-
 subpotency/hyperbole-of-temporal-to-intemporal-ontological-performance means that it is
 wrong to construe the institutionalisation process as of a human temporal solipsistic—first-
 naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-
 recollection)/transepistemicity transformation, and so fundamentally because of human
 limited-mentation-capacity and the correspondingly constraining consequences on its
 ontological-performance-including-virtue-as-ontology. Rather it is more candid to relate to
 the institutionalisation process as of human limited-mentation-capacity-deepening—in-
 recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-
 contiguity/ratiocination, and so as of prospective intemporal second-natured
 institutionalisation induced universal-transparency, deferential-formalisation-transference and
 habituation in positive-opportunism. Central to any such prospective institutionalisation
 transcendental-enabling/existence-potency meaningfulness-and-teleology is the fact that the
 human mind is not necessarily geared to come to terms with prospective relative-ontological-
 completeness-of-reference-of-thought without the necessary psychoanalytic-
 unshackling/prospective-grounding/prospective-reification as of the developed disposition to
 register such implications as of their intemporal/longness-of-register-of-meaningfulness-and-

teleology pertinence; as the notion of cross-generational ontological-dementation/dialectical-dementation stranding dialectics herein highlighted has ever always been an unconscious human mental process, wherein the mental-disposition hardly places itself in a situation of explaining how its own very present mental-disposition comes about from preceding generations mental-dispositions and drawing the implications, in going beyond excogitative-blanking as of the present in a cloistered-consciousness but which is paradoxically necessarily the framework of such transcendently implying meaningfulness-and-teleology. Thus the metaphoricity exercise of transcendence is not one of necessarily eliciting instant meaningfulness-and-teleology universal approbation but rather instigating universal untenability as of ontological-primemovers-totalitative-framework for prospective universal positive-opportunism; as we can appreciate that in reality the possibility of the successive institutionalisations was not the outcome of every human soul grasping the implications as of the successive transcendence but rather as of a generative dynamics as of critical drift/gravitating effect in reflection of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process-‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’. Furthermore, the implications of ‘notional-discontiguity/epistemic-discontiguity-with/falling-short-of prospective institutionalisation existential-contextualising-contiguity-in-reification’ as of singularisation/epistemic-immanence/veridical-epistemic-determinism as the latter reflects ontological-completeness-of-reference-of-thought, with regards to the construal of meaningfulness-and-teleology as teleologically-elevated or teleologically-degraded, is that the conception of ontological-veracity of meaningfulness-and-teleology varies as of underlying relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-thought; for instance with regards to the-very-same-totalising—purview-of-construal-as-existence/existence-

potency/intrinsic-reality/ontological-veridicality, the meaningfulness-and-teleology of a positivistic mindset with the idea of going into a supposed evil forest to collect a plant root as a cure in say an animistic social-setup will probably be construed as ridiculous as of its prior relative-ontological-incompleteness-of-reference-of-thought despite the existential-contextualising-contiguity knowledge-reification ontological-veracity that the possibility of curing ailments in the animistic social-setup lies with the positivistic mindset prospective relative-ontological-completeness-of-reference-of-thought. The fundamental implication here is that transcendental meaningfulness-and-teleology is hardly construed in any presence registry-worldview/dimension reference-of-thought as of its rather prospective relative-ontological-completeness-of-reference-of-thought, and thus elicits the presence prior relative-ontological-incompleteness-of-reference-of-thought totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag; with the possibility of transcendence arising as of cross-generational induced metaphoricity. In a further analysis of ‘notional-discontiguity/epistemic-discontiguity-with/falling-short-of prospective institutionalisation existential-contextualising-contiguity-in-reification’ as of singularisation/epistemic-immanence/veridical-epistemic-determinism as the latter reflects ontological-completeness-of-reference-of-thought, with regards to the dialectical-thinking and dialectical-dementing ‘ontologically-veridical representations of dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as of respectively living-development, institutional-development and Being-development/ontological-framework-expansion underdevelopment issues’; human meaningfulness-and-teleology is ever always caught up in a confusion of its dialectical-thinking or dialectical-dementing as of the ontologically-veridicality of its underlying relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-thought reflection of existential-contextualising-contiguity. Hence ‘ontologically-veridical representations of dispensing-with-immediacy-for-

relative-ontological-completeness-by-reification/contemplative-distension as of the underdevelopment issues of respectively living-development, institutional-development and Being-development/ontological-framework-expansion', are ever always dialectically-dementing as of living underdevelopment, institutional underdevelopment and Being underdevelopment when construed as of the successive uninstitutionalised-thresholds/uninstitutionalised-thresholds in prospective prior relative-ontological-incompleteness-of-reference-of-thought as of 'intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications', while these are ever always dialectically-thinking as of living-development, institutional-development and Being-development/ontological-framework-expansion when construed as of the successive registry-worldviews/dimensions institutionalisations in prospective relative-ontological-completeness-of-reference-of-thought as of 'intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications'; thus highlighting the fundamental recurrent ontological-veracity of reference-of-thought-devolving-level of human temporal individuations solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity dynamics as of postlogism-slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, so-disambiguated as of 'reference-of-thought-devolving-level difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism reflected as the divergent ontological-performances of the ontological-aesthetic-tracing' at uninstitutionalised-thresholds/uninstitutionalised-thresholds of 'notional-

discontiguity/epistemic-discontiguity-with/falling-short-of prospective institutionalisation existential-contextualising-contiguity-in-reification' thus inducing vices-and-impediments as of living underdevelopment, institutional underdevelopment and Being underdevelopment, so-construed from difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process- 'notional—singularisation/epistemic-immanence/veridical-epistemic-determinism'. Further, this 'uninstitutionalised-threshold—by—institutionalisation recurrence paradox' of 'intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative—implications' as of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination is what effectively renders the ontologically-veridical determination of 'apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme' the critical first step for construing ontologically-veridical meaningfulness-and-teleology whether as of the dialectically-dementing or dialectically-thinking representation; as in reality existence as of existential-contextualising-contiguity knowledge-reification never changes, and what is critical is grasping the ontological-performance-including-virtue-as-ontology of human limited-mentation-capacity in conceptualising existence/intrinsic-reality/ontological-veridicality as of existential-contextualising-contiguity knowledge-reification and so-construed as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process- 'notional—singularisation/epistemic-immanence/veridical-epistemic-determinism' over identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-

determinism as-cloistered-within-the-same-reference-of-thought. The very possibility of human transcendence-and-sublimity behind the institutionalisation process arises out of human intemporal individuation solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity reification. Reification as such is teleologically reflected as of singularisation/epistemic-immanence/veridical-epistemic-determinism as it reflects ontologically-veridical meaningfulness-and-teleology; as reification arises as of the structural/paradigmatic projective-totalitative—implications of the ontological-faith-notion-or-ontological-fideism potentiative-aspiration for prospective relative-ontological-completeness-of-reference-of-thought from within a prior relative-ontological-incompleteness-of-reference-of-thought. Reification here as from this singularisation/epistemic-immanence/veridical-epistemic-determinism insight, with regards to the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality implies the structural/paradigmatic projective-totalitative—implications of meaningfulness-and-teleology as of the prospective relative-ontological-completeness-of-reference-thought construed as maximalising-recomposuring-for-relative-ontological-completeness/transvaluating over the prior relative-ontological-incompleteness-of-reference-of-thought construed as incrementalism-in-relative-ontological-incompleteness; wherein the prospective relative-ontological-completeness-of-reference-thought is in a reified overlooking/superseding of the prior relative-ontological-incompleteness-of-reference-of-thought. In other words, reification is about apriorising-teleological resetting of totalising/circumscribing/delineating meaningfulness-and-teleology to the prospective relative-ontological-completeness-of-reference-of-thought. Lacking such an insight about reification will induce an ontologically-flawed apriorising-teleological-elevation-in-ontological-contiguity of the prior relative-ontological-incompleteness-of-reference-of-thought which is in dereification and the corresponding ontologically-flawed apriorising-

teleological-degradation-in-notional-discontiguity/epistemic-discontiguity of the prospective relative-ontological-completeness-of-reference-of-thought which is as of reification; wherein dereification involves teleological embrangling/muddling/underdetermining meaningfulness-and-teleology to the prior relative-ontological-incompleteness-of-reference-of-thought. This is because the lack of reification wrongly implies that the averaging-of-thought reference-of-thought framework of registry-worldviews/dimensions are the absolute determinants of intemporal value reference, such that the averaging-of-thought reference-of-thought framework of recurrent-utter-uninstitutionalisation, base-institutionalisation—ununiversalisation, universalisation—non-positivism/medievalism, positivism—procrypticism and deprocrypticism, are paradoxically-and-falsely equally the absolute determinants of intemporal value reference; whereas reification highlights that all the successive institutionalisations are as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, but of varying ontological-performance-including-virtue-as-ontology as of their prospective relative-ontological-completeness-of-reference-of-thought, as of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination. Behind this possibility of ontologically-flawed dereification of human meaningfulness-and-teleology is the fact that given the reality of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, ‘the human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative—implications’ is a second-naturing process as of elicited and second-natured positive-opportunism of instigated ‘solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-

recollection)/transepistemicity intemporal individuations dispositions as of ontological-faith-
notion-or-ontological-fideism elucidation/reification of existential-contextualising-contiguity’
as of ontological-primemovers-totalitative-framework articulation of meaningfulness-and-
teleology in skewing for universal-transparency and social deferential-formalisation-
transference. This fact about ‘intemporal ontological-faith-notion-or-ontological-fideism
instigated human institutionalisation process as of difference-conflatedness-as-totalitative-
reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-
implications’ implies that ‘solipsistic—first-naturedness/anamnestic-residuality-as-
ratiocinative-integrity-(not-mythical-recollection)/transepistemicity intemporal individuation
disposition as of ontological-faith-notion-or-ontological-fideism elucidation/reification of
existential-contextualising-contiguity’ is not the sufficient reason for prospective human
institutionalisation, but warrants a second-naturing process as of elicited and second-natured
positive-opportunism as of ontological-primemovers-totalitative-framework articulation of
meaningfulness-and-teleology in skewing for universal-transparency and social deferential-
formalisation-transference. The implication here is that the social-construct has ever always
been a threshold as of its prior institutionalisation as well as a threshold as of its
uninstitutionalised-threshold/uninstitutionalised-threshold; wherein respectively there is
positive-opportunism for prior institutionalisation and no positive-opportunism for
prospective institutionalisation, explaining the developing reality of the various successive
human registry-worldview’s/dimension’s institutionalisations, as of retrospective and
prospective implications. This fundamentally points to a ‘human psychology of positive-
opportunism as of prior-institutionalisation-reification and uninstitutionalised-threshold-
dereification’, that points out that hitherto the institutionalisation process has not been about
‘solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-
mythical-recollection)/transepistemicity temporal individuations dispositions’ transformation

into ‘solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity intemporal individuation disposition as of ontological-faith-notion-or-ontological-fideism elucidation/reification of existential-contextualising-contiguity’, but rather a constraining positive-opportunism second-naturing to emancipating reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology; and so, despite the fact that ‘solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity intemporal individuation disposition as of ontological-faith-notion-or-ontological-fideism elucidation/reification of existential-contextualising-contiguity’ is a human individuation quality that avails potentially to all individuals as temporal-to-intemporal-individuations-receptacles but as of existential-constraint of ontological-performance-including-virtue-as-ontology has not hitherto been structurally/paradigmatically defining of human institutionalisation process even as it has rather been instigative as of an outlier human intemporal-disposition. The basis for this ‘human psychology of positive-opportunism as of prior-institutionalisation-reification and uninstitutionalised-threshold-dereification’, is the fact that humankind is caught up in intemporal-reification and temporal-dereification as of existential-constraint of ontological-performance-including-virtue-as-ontology given its limited-mentation-capacity; wherein the ‘social-construct uninstitutionalised-threshold/uninstitutionalised-threshold’ as of ‘no positive-opportunism for prospective institutionalisation’ is a threshold at which there is a structural/paradigmatic lack of constraining institutionalisation to pre-empt ‘human temporal social-stake-contention-or-confliction dynamics’ assuming of ‘uninstitutionalised-threshold dereification madeupness mental-disposition as of ontologically-flawed relation with prospective institutionalisation existential-contextualising-contiguity knowledge-reification projective-totalitative—implications’. In other words, as of existential-constraint of

ontological-performance-including-virtue-as-ontology given human limited-mentation-capacity:

– at recurrent-utter-uninstitutionalisation, there is ‘no constraining prospective reification institutionalisation for rulemaking-over-non-rules’, thus allowing for ‘non-rules-as-impulsive-or-accident-ed-or-random-mental-disposition dereification behaviour’ at its prospective recurrent-utter-uninstitutionalisation uninstitutionalisation;

– at base-institutionalisation–ununiversalisation, there is ‘no constraining prospective reification institutionalisation for universalisation-directed-rulemaking-over-non-rules’, thus allowing for rulemaking-over-non-rules-that-is-not-universalisation-directed dereification behaviour’ at its prospective ununiversalisation uninstitutionalisation;

– at universalisation–non-positivism/medievalism, there is ‘no constraining prospective reification institutionalisation for positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules’, thus allowing for universalisation-directed-rulemaking-over-non-rules-that-is-not-positivising/rational-empiricism-based dereification behaviour’ at its prospective non-positivism/medievalism uninstitutionalisation;

– at our positivism–procrypticism, there is ‘no constraining prospective reification institutionalisation for pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules’, thus allowing for as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-that-is-not-pre-empting-disjointedness-as-of-reference-of-thought dereification behaviour’ at its prospective procrypticism uninstitutionalisation.

in this regard as a further elucidation, a paradigmatic/structural ‘temporal dereification madeupness mental-disposition as of ontologically-flawed relation with prospective institutionalisation existential-contextualising-contiguity knowledge-reification projective-totalitative–implications’ say on the basis of notions-and-accusations-of-sorcery is easily

elicited-as-of-dereification in a non-positivistic social-setup under existential-constraint as there is not reifying positivism/rational-empiricism institutionalisation universal-transparency. Insightfully, the possibility for deprocrypticism/pre-emption-of-disjointeness-as-of-reference-of-thought registry-worldview/dimension is necessarily one that supersedes reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’: as of the elicitation/cultivation of human solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’ strive for potentiative-attainment of singularisation/epistemic-immanence/veridical-epistemic-determinism construed as of ‘ontologically-uncompromised—referentialism deprocrypticism emancipated apriorising/intelligibilitysetup/measuringinstrument/axiomatising self-consciousness’. This is validated by the fact that as of its instigation of prospective relative-ontological-completeness-as-of-reference-of-thought behind the successive institutional-cumulations/institutional-recomposures of the institutionalisation process, the ‘solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity intemporal individuation disposition as of ontological-faith-notion-or-ontological-fideism elucidation of prospective institutionalisation existential-contextualising-contiguity-in-reification’ had-and-has ‘no reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ to go by, but for its underlying “‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning” thereof validated by prospective ontological-primemovers-totalitative-framework as of prospective institutionalisation existential-contextualising-contiguity knowledge-

reification projective-totalitative-implications; such that in lieu of positive-opportunism of second-naturing categorical-imperatives/axioms/registry-teleology, deprocrypticism in its preempting-of-disjointedness-as-of-reference-of-thought rather all about arriving-short with no positive-opportunism categorical-imperatives/axioms/registry-teleology by ‘failing to elicit any associated positive-opportunism to deprocrypticism’ as well as ‘eliciting ironic nihilism to deprocrypticism’, in order not to cultivate a mechanic-knowledge appreciation of meaningfulness-and-teleology, and rather elicit a sense of ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’ ‘as cultivating an organic-knowledge appreciation of meaningfulness-and-teleology as dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension’; and so implied for living-development, institutional-development and Being-development/ontological-framework-expansion, as the very fact of ‘mathesis/motif/throwness-disposition-as-of-ontologically-compromised—categorising-or-qualifying-or-tendentious-or-impulsive’ reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology underlies ontological-incompleteness as of human living underdevelopment, institutional underdevelopment and Being underdevelopment, as of a lack of ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’; as of the fact that meaningfulness-and-teleology is always incomplete when conceived simplistically as being all about ‘mechanical-constraints of rules without spirit’, construed as of mathesis/motif/throwness-disposition-as-of-ontologically-compromised—categorising-or-qualifying-or-tendentious-or-impulsive implied dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism. The full implications here is that a deprocrypticism ontologically-uncompromised—referentialism singularisation/epistemic-immanence/veridical-epistemic-determinism construal of

meaningfulness-and-teleology is more critically about eliciting the ‘subject intemporal sense of knowledge-and-virtue as of its ontological-dementation/dialectical-dementation stranding dialectics for a fully protracted-consciousness beyond a cloistered-consciousness’ in line with Foucauldian hermeneutics of the subject futural implications. Further, it is important to grasp that ‘reinvigoration as of furthered ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen for originary/as-of-event reasoning-through/messianic-reasoning’ is actually associated with all the transcendences of all the successive registry-worldviews/dimensions, but that what is particular with deprocrypticism summoning of ‘reinvigoration as of furthered ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen for originary/as-of-event reasoning-through/messianic-reasoning’ as implied by its ontologically-uncompromised—referentialism singularisation/epistemic-immanence/veridical-epistemic-determinism, is the fact that it achieves the potentiative-aspiration of ontological-faith-notion-or-ontological-fideism as a ‘seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’; and so, as of ‘human ontological-normalcy/post-convergence referentialism ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’’ that supplants the notion of reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology. It is untenable to construe of the ultimate potential of human emancipation without the eliciting of this more fundamentally authentic basis of human emancipation as of the overcoming of human limited-mentation-capacity temporal dynamics beyond just ‘the elicitation of positive-opportunism to existential constraining’; as implied by ontologically-uncompromised—referentialism singularisation/epistemic-immanence/veridical-epistemic-determinism mirroring ontological-completeness-of-reference-of-thought of inherent existence as ‘ecstatic

singularity', very much unlike mathesis/motif/throwness-disposition—as-of-ontologically-
 compromised—categorising-or-qualifying-or-tendentious-or-impulsive implied
 dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism as of their given
 prior relative-ontological-incompleteness-of-reference-of-thought that fail to mirror inherent
 existence as 'ecstatic singularity'. Such implied transcendental ontological-construal is rather
 originarily/as-of-event as of prospective relative-ontological-completeness-of-reference-of-
 thought reasoning-through/messianic-reasoning beyond prior reasoning-from-
 results/afterthought endemising/enculturating totalising—self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag. We can appreciate that as of the
 ordinariness/averaging-of-thought of say a non-positivistic registry-worldview/dimension,
 whether animistic or medieval, notions-and-accusations-of-sorcery as of the
 uninstitutionalised-threshold dereification of meaningfulness-and-teleology will rather as of
 'no positivism/rational-empiricism constraining prospective reification institutionalisation'
 rather elicit spurious palliative adaptive dereification dispositions as of human limited-
 mentation-capacity, however, when positivism/rational-empiricism originarily/as-of-event
 reification avails as of the potential for prospective human limited-mentation-capacity-
 deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-
 thought,-by-ratio-contiguity/ratiocination then it is more about the metaphoricity that
 portends to prospective relative-ontological-completeness-of-reference-of-thought. Such
 originarily/as-of-event reification construed futural Being-development/ontological-
 framework-expansion as of prospective deprocrypticism/pre-emption-of-procrypticism-as-of-
 reference-of-thought equally do apply with regards to our positivism—procrypticism
 dereification beyond our positivism—procrypticism ordinariness/averaging-of-thought
 spurious palliative adaptive dereification disjointedness-of-reference-of-thought mental-
 dispositions as of human limited-mentation-capacity, so-implied as of prospective human

ontological-performance-including-virtue-as-ontology potentiative-aspiration for
 singularisation/epistemic-immanence/veridical-epistemic-determinism thus enabling the
 aetiologisation/ontological-escalation behind the entire human institutionalisation process and
 specifically for futural Being-development/ontological-framework-expansion as of
 prospective deprocrypticism. Further besides this elucidated contrast articulated as of
 prospective relative-ontological-completeness-of-reference-of-thought reification and prior
 relative-ontological-incompleteness-of-reference-of-thought dereification; the concepts of
 reification and dereification equally extend within a given registry-worldview/dimension
 reference-of-thought, especially as associated with postlogism-slantedness and the dynamic
 conjugated-postlogism temporal denaturing of meaningfulness-and-teleology implications, to
 critically construe ‘uninstitutionalised-threshold dereification’ as the uninstitutionalised-
 threshold temporal-and-flawed ontological-performance as of wooden-language—of

 teleological-elevation-in-ontological-contiguity as of deeper limited-mentation-capacity
 structural/paradigmatic projective-totalitative—implications, while the conception of

dereification as of uninstitutionalised-threshold in prior relative-ontological-incompleteness-of-reference-of-thought reflects ontologically-flawed meaningfulness-and-teleology dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism in relative apriorising-teleological-degradation-in-notional-discontiguity/epistemic-discontiguity as of shallow limited-mentation-capacity structural/paradigmatic implication; wherein from a perspective of reification-dereification notionalisation, singularisation/epistemic-immanence/veridical-epistemic-determinism contemplated as of 'existentially-potentiative absolute reification' so-implied as of theoretical existentially-potentiative no-human-limited-mentation-capacity/full-human-mentation-capacity will reflect the attainment of deprocrypticism without passing through the prior institutional-cumulations/institutional-recomposures of 'intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications', while dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism existentially-implied as of 'relative notional reification-dereification' as of human shallow to deepening limited-mentation-capacity effectively reflects the institutionalisation process as of prior successive institutional-cumulations/institutional-recomposures towards the attainment of deprocrypticism. Thus reification aetiologisation/ontological-escalation is implied as of human ontological-performance-including-virtue-as-ontology potentiative-aspiration for singularisation/epistemic-immanence/veridical-epistemic-determinism. Ultimately, it is the reification of meaningfulness-and-teleology as of the prospective relative-ontological-completeness-of-reference-of-thought that reflects intemporal value reference, and not the averaging-of-thought as of the prior relative-ontological-incompleteness-of-reference-of-thought as of temporal-to-intemporal ontological-performance which is rather in totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag. Reification as such

points out intellectual-and-moral inequivalence thus dismissing as ontologically-flawed a cross-examining/mutual-contending of the prospective relative-ontological-completeness-of-reference-of-thought and the prior relative-ontological-incompleteness-of-reference-of-thought; as the latter is in ‘notional-discontiguity/epistemic-discontiguity-with/falling-short-of prospective institutionalisation existential-contextualising-contiguity-in-reification’ and so, successively as of falling-short-as-needing-rules with recurrent-utter-uninstitutionalisation to then contend with base-institutionalisation, falling-short-as-needing-universalising-rules with base-institutionalisation–ununiversalisation to then contend with universalisation, and falling-short-as-needing-positivistic-universal-rules with universalisation–non-positivism/medievalism to then contend with positivism, falling-short-as-needing-preempting-of-disjointedness-as-of-reference-of-thought with our positivism–procrypticism to then contend with futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought. Consider in this regard, the peregrinations of say a Descartes or Rousseau wherein in many ways they will fail to fulfil the mundane medieval world conception of ‘the supposedly good life’ as of its totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, as they reify meaningfulness-and-teleology by their peregrinations to construe of the paradigmatic/structural underdevelopment/unenlightenment of their society as in need of prospective positivistic notional-discontiguity/epistemic-discontiguity with non-positivism/medievalism as of their ontological-faith-notion-or-ontological-fideism singularisation/epistemic-immanence/veridical-epistemic-determinism reified insight. The insight here about reification is that all their intemporal value references are rather as subsumed in their ‘positivistic reification of meaningfulness-and-teleology’ as of their prospective relative-ontological-completeness-of-reference-of-thought with the corresponding implications of human ‘prospective positivistic transcendence-and-sublimity

ontological-performance-including-virtue-as-ontology' as aetiologicalisation/ontological-escalation, and so over non-positivism/medievalism vices-and-impediments. By that token they are effectively of the most intellectually-and-morally inclined persons of their society. Contrastively, the temporal value reference as of non-positivism/medievalism averaging-of-thought mental-dispositions of persons like 'honourable aristocrats' simply reified to the universalisation–non-positivism/medievalism registry-worldview/dimension with its prior relative-ontological-incompleteness-of-reference-of-thought vices-and-impediments, while favourably looked upon as of non-positivism/medievalism society totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag from a prospective singularisation/epistemic-immanence/veridical-epistemic-determinism insight points to such a prior registry-worldview/dimension denaturing meaningfulness-and-teleology, and implying effectively that they are of lesser intellectual-and-moral/dialogical-equivalency. This further explains why vague classification schemes of value like good-naturedness, kindness, honesty, etc. have no inherent meaning as of themselves, as all the meaningfulness-and-teleology that there is and can exist is ontological as of prospective relative-ontological-completeness, such that any such implied meaning is only ontologically intelligible with its reification as of prospective relative-ontological-completeness-of-reference-of-thought, as so implied from singularisation/epistemic-immanence/veridical-epistemic-determinism as the reflection of ontologically-veridical meaningfulness-and-teleology. This points out that as of its very own totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, a registry-worldview/dimension reference-of-thought is not the ontologically-veridical point of conceptualisation of intemporal value reference, which is rather as of prospective relative-ontological-completeness-of-reference-of-thought reification of meaningfulness-and-teleology, as we can appreciate with regards to all prior institutionalisations but will certainly be complexified/inhibited to construe the same as of our positivism–procrysticism as from

futural Being-development/ontological-framework-expansion as of prospective
 deprocrypticism/pre-emption-of-disjointedness-as-of-reference-of-thought prospective
 relative-ontological-completeness perspective. The fact is no registry-worldview/dimension
 as of its temporal/shortness-of-register-of-meaningfulness-and-teleology averaging-of-
 thought instigated prospective transcendence, is construed as ‘putting-into-question its
 existentially invested conception of meaningfulness-and-teleology’, which is rather a
 contradiction of sorts given human–aporia/undecidability/dilemma/ought-
 indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-
 dispositions–existentialism-form-factor. Rather besides cultural-diffusion pressures, all
 human transcendence as of internal processes are rather as of outlier intemporal/longness-of-
 register-of-meaningfulness-and-teleology individuations dynamic metaphoricity instigation in
 prospective relative-ontological-completeness-of-reference-of-thought reifying gestures as of
 ontological-faith-notion-or-ontological-fideism, which by this token is rather concerned with
 the beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-
 existential-unthought denaturing of the prior institutionalisation categorical-
 imperatives/axioms/registry-teleology at its uninstitutionalised-threshold in ‘notional-
 discontiguity/epistemic-discontiguity-with/falling-short-of prospective institutionalisation
 existential-contextualising-contiguity-in-reification’. However, this ‘ontologically-veridical
 reification of value reference as of prospective relative-ontological-completeness’ and the
 ‘ontologically-flawed dereification of value reference as of prior relative-ontological-
 incompleteness’ is associated with a fundamental paradox/confusion with regards to sound
 human intellection at uninstitutionalised-thresholds/uninstitutionalised-thresholds. As this
 reification/dereification of meaningfulness-and-teleology paradox/confusion has always
 provided the room for intellectual-and-moral charlatanism throughout human history as of
 lack of universal-transparency. With such charlatanism certainly knowing better but opting

for denaturing conceptions of value reference as of averaging-of-thought advancement of temporal interests in stifling the possibility of prospective human intellectual-and-moral emancipation. The idea of intellectual-bad-faith raised herein by this author is a reflection of the reality that knowledge as organic-knowledge is existentially all-committal by the mere fact of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, with the possibility of denaturing as of social-stake-contention-or-confliction, and particularly so in spurious and blurry domains of study not readily/easily constraint to ontological-primemovers-totalitative-framework reflection of existential-contextualising-contiguity. This brings up the implication of what is truly transcendental knowledge by its nature as of knowledge notionalisation and organic-knowledge. Transcendental knowledge is actually institutionalising and re-institutionalising, implying it supersedes institutional practices and constructs as to the possibility for prospective institutionalisation, and so as of its intemporal solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity inducing institutional second-naturing. It is rather not out of the question that knowledge so-construed as of prospective transcendence implications put-into-question as ‘charlatanic’ institutions and their practices construed as of prior relative-ontological-incompleteness-of-reference-of-thought specifically as extra-intellectual and pedantic orientations that undermine the advancement of their supposed prospective intellectual and emancipatory vocations. Interestingly, we can garner that positivistic knowledge arose and was cultivated as of ‘its very own apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and—episteme conception of knowledge’ that superseded and didn’t recognise-and-submit to scholastic pedantry for its validation, as it construed that the latter

wasn't meant/structured/paradigmed to uphold and perpetuate positivism implied transcendental knowledge as of prospective relative-ontological-completeness-of-reference-of-thought; and in due course, by its ontological-primemovers-totalitative-framework constraining it cross-generationally overrode scholastic pedantry. This author contends that it isn't out of the question that a creeping and slumbering institutional-being-and-craft intellectual tedium today increasingly fails to elicit the full unenframed potential for prospective intellectual emancipation, and so rather as of structural institutionally-induced and societally-induced anti-intellectualism implications. The question can further be asked whether transcendental implied knowledge can actually be construed as the subject of 'understanding' of prior relative-ontological-incompleteness-of-reference-of-thought with the latter's totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, given the psychoanalytic-unshackling/prospective-grounding/prospective-reification implications of transcendental knowledge. Is transcendental knowledge as of that token rather more a metaphoricity constraint as of ontological-primemovers-totalitative-framework for the possibility of prospective transcendence as more than just about abstract intellection but extending intellectualism to supersede the existential-investment implications that underlie excogitative-blanking to such prospectively implied 'understanding' as of transcendental knowledge. From the prior relative-ontological-incompleteness-of-reference-of-thought naïve non-transcendental totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, it may be thought/reasoned that a transcendentially projecting intemporal mental-disposition is rather uncanny about the 'existential-extirpation-as-of-existential-unthought malignity reality of existence' construed as pragmatic living, but this rather confirms the 'dereifying irresponsibility' of such temporal thought/reasoning mental-dispositions 'caught up mainly in their 60-to-100 years of existence reality of meaningfulness-and-teleology'. The intemporal 'reifying choice-and-adherence' to the 'reified assumed-responsibility' of

aetiologisation/ontological-escalation is ever always a reasoning-through/messianic-reasoning that by definition is not in a 'reasoning with' relation with reasoning-from-results/afterthought deficient prior institutionalising; and certainly explaining why uninstitutionalised-thresholds transcending has ever always been conflicted as to the necessary reality of imposing the 'superior party' that is as of the full-potency existence/existential-reality/intrinsic-reality/ontological-veridicality over the denaturing mortals that we are for our prospective emancipation. Without an insight about reification and dereification, the notion of singularisation/epistemic-immanence/veridical-epistemic-determinism as it reflects ontological-completeness-of-reference-of-thought for ontologically-veridical meaningfulness-and-teleology is easily misconstrued since denaturing of meaning in dereification will be teleologically-elevated and meaning produced as of reification will be teleologically-degraded; as so blatantly obvious particularly with the dereification manifestation of childhood psychopathy postlogism-slantedness but then takes on a wholly covert nature as of adulthood psychopathy and social psychopathy dynamics. In this regard, divergent as of temporal-to-intemporal dynamics of human ontological-performance-including-virtue-as-ontology of aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology reflecting dereified and reified construals of existential-contextualising-contiguity is to be expected, and assessable on the basis of a commonly expected apriorising/intelligibilitysetup, which then speaks of a dialogical-equivalency of both temporal mental-dispositions and the intemporal mental-disposition with no dereification and reification contrast. However, compounding this situation making relevant the need to contrast reification and dereification and imply moral-and-intellectual inequivalence together with dialogical inequivalence, and so between temporal mental-dispositions and intemporal mental-disposition, is specifically the flawed ontological-performance-including-virtue-as-ontology manifestation of psychopathy and social

psychopathy which is ‘structurally/paradigmatically associated with the denaturing of the totalising-devolved apriorising/intelligibilitysetup’, and arises so fundamentally with regards to the apriorising/intelligibilitysetup/measuringinstrument/axiomatising which is the totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag backdrop for existential-instantiations aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology; with the fundamental implication that there are thus divergent apriorising/intelligibilitysetups as of psychopathic induced postlogism-slantedness, and its social cognisance and integration as conjugated-postlogism so-conjugating as of ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation as of social psychopathy. In this latter case of contrasted reification and dereification and implying moral-and-intellectual inequivalence together with dialogical inequivalence, and so between temporal-as-psychopathic-and-social-psychopathic mental-dispositions and the intemporal mental-disposition, and so-implied as of ‘disseminative-notional-discontiguity/epistemic-discontiguity—contrastive-reification-dissemination-and-dereification-dissemination-implications’ construed as the ‘variance/discrepancy of meaningfulness-and-teleology’ as-of-prospective-relative-ontological-completeness-dialectically-thinking and as-of-prior-relative-ontological-incompleteness-dialectically-dementing respectively; it is only ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism from the projected ‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’ of the intemporal mental-disposition as-of-prospective-relative-ontological-completeness-dialectically-thinking recognising this ‘dialectically-dementing and dialectically-thinking variance/discrepancy of meaningfulness-and-teleology’ that induces an ontologically-veridical disambiguation of dereified and reified construals of existential-contextualising-contiguity as implied by the

apriorising/intelligibilitysetup as of reifying intemporal/valid/dialectically-thinking
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising in prospective relative-
 ontological-completeness apriorising-teleological-elevation-in-ontological-contiguity and as
 of dereifying temporal-as-psychopathic-and-social-psychopathic/invalid/dialectically-
 dementing apriorising/intelligibilitysetup in prior relative-ontological-incompleteness-
 apriorising-teleological-degradation-in-notional-discontiguity/epistemic-discontiguity
 (psychopathic and social psychopathic), and so before
 aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology can even be
 then articulated as ontologically-veridical exclusively as of the intemporal/valid/dialectically-
 thinking apriorising/intelligibilitysetup/measuringinstrument/axiomatising perspective or
 attitude/mental-disposition/care—and–episteme. Such a difference-conflatedness-as-of-totality
 is equally what reflects in the bigger scheme of things, at the reference-of-thought-level, the
 reality of humankind as of the successive registry-worldviews/dimensions humans
 psychological dispositions as per their corresponding apriorising/intelligibilitysetup. In this
 regard, the entire human institutionalisation process can be construed as human limited-
 mentation-capacity apriorising/intelligibilitysetup/measuringinstrument/axiomatising
 reification as ‘apriorising-teleological resetting of totalising/circumscribing/delineating
 meaningfulness-and-teleology as of futural Being-development/ontological-framework-
 expansion as of prospective deprocrypticism-as-ontological-completeness-of-reference-of-
 thought’, construed as of difference-conflatedness-as-totalitative-reification-in-
 singularisation-as-veridical-epistemic-determinism protracted-teleological-wholeness/nested-
 congruence-as-of-the-institutionalisation-process-‘notional—singularisation/epistemic-
 immanence/veridical-epistemic-determinism’; with the various prior registry-
 worldviews/dimensions institutional-cumulations/institutional-recomposures rather
 successively as lesser and lesser dereification-levels towards the deprocrypticism reification.

Consider in that with regards to ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’, its reification as ‘apriorising-teleological resetting of totalising/circumscribing/delineating meaningfulness-and-teleology to the prospective relative-ontological-completeness-of-physics-axiomatic-construct’ implies that structurally/paradigmatically ‘traditional classical mechanics axiomatic-construct’ is dereified as of its prior relative-ontological-incompleteness to ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ which is rather reified as of its prospective relative-ontological-completeness; such that interestingly to construe, as of ontological-veridicality, the reality of ‘traditional classical mechanics axiomatic-construct’ requires rather assuming/departing-from an understanding of existential-contextualising-contiguity knowledge-reification as implied by the reifying ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ in articulating ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism from this projected ‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’ as of ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ perspective or attitude/mental-disposition/care—and—episteme over ‘traditional classical mechanics axiomatic-construct’, and so-implied as of ‘disseminative-notional-discontiguity/epistemic-discontiguity—contrastive-reification-dissemination-and-dereification-dissemination-implications’ construed as the ‘variance/discrepancy of meaningfulness-and-teleology’ as of prospective relative-ontological-completeness and as of prior relative-ontological-incompleteness. Note that on the imaginary supposition that no such prospectively projected ‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’ existed as ‘providing the ontological-veridicality insight-of-completeness for reifying meaningfulness-and-teleology’, mental-dispositions in prior relative-ontological-incompleteness will falsely go on

reasoning with ‘traditional classical mechanics axiomatic-construct’ by identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as providing ontological-veridicality as of this now dereifying construal of existential-contextualising-contiguity of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’.

But then again, the reality of ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ as of prospective relative-ontological-completeness will point out that such ‘traditional classical mechanics axiomatic-construct’ identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism is in reality dialectically-dementing as of its threshold-of-ontological-incompleteness. This insight equally applies at the reference-of-thought-level, for instance, with regards to the fact that our positivism–procrypticism registry-worldview/dimension doesn’t recognise-nor-register any such notion as procrypticism/disjointedness-as-of-reference-of-thought that speaks of our prospective dialectical-dementing at our prospective positivism–procrypticism uninstitutionalised-threshold, and so as reflected from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought registry-worldview/dimension prospective relative-ontological-completeness. Interestingly, it should be noted here that with such phenomenon as psychopathy and social psychopathy that is ‘structurally/paradigmatically associated with the denaturing of the totalising-devolved apriorising/intelligibilitysetup’ as of our positivism–procrypticism/disjointedness-as-of-reference-of-thought uninstitutionalised-threshold (just as notions-and-accusations-of-sorcery in a universalisation–non-positivism/medievalism social-setup is ‘structurally/paradigmatically associated with the denaturing of the totalising-devolved apriorising/intelligibilitysetup’ as of their universalisation–non-positivism/medievalism

uninstitutionalised-threshold), ontological-veridicality is rather assumed/departs from an understanding of existential-contextualising-contiguity knowledge-reification as implied with futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought registry-worldview/dimension and not our positivism–procrypticism, in articulating ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism from this projected ‘notional—singularisation/epistemic-immanence/veridical-epistemic-determinism’ as of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought perspective or attitude/mental-disposition/care—and–episteme over our positivism–procrypticism, so-implied as of their disseminative-notional-discontiguity/epistemic-discontiguity—contrastive-reification-dissemination-and-dereification-dissemination-implications. But then just as the reflex mental state and attitude/mental-disposition/care—and–episteme in a universalisation–non-positivism/medievalism social-setup will be resistant to an elucidation of notions-and-accusations-of-sorcery adopting the perspective or attitude/mental-disposition/care—and–episteme of the reifying prospective positivism to arrive at ontological-veridicality, likewise more fundamental in undermining the elucidation of the manifestation of psychopathy and social psychopathy is the fact of an ordinariness/averaging-of-thought reflex mental state and attitude/mental-disposition/care—and–episteme in our positivism–procrypticism that will be resistant to adopting the reifying perspective or attitude/mental-disposition/care—and–episteme of futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought to arrive at ontological-veridicality that rather implies the dialectical-dementation of our positivism–procrypticism at its uninstitutionalised-threshold; and as we falsely go on to construe existential-contextualising-contiguity-in-dereification by adopting the positivism–

procrypticism dereifying perspective or attitude/mental-disposition/care-and-episteme in its
 prior relative-ontological-incompleteness in an exercise of ontologically-flawed identitive-
 constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-
 determinism. Further and insightfully again, with the manifestation of childhood psychopathy
 where the postlogism-slantedness is universally transparent there is no occurrence of
 interlocutors cognisant-and-integrative
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of existential-
 contextualising-contiguity-in-dereification as of the childhood slantedness, but with respect to
 adult psychopathy with the attendant
 maturation/indirectness/spatialisation/credulity/craftiness, such interlocutors cognisant-and-
 integrative apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of
 existential-contextualising-contiguity-in-dereification arise as of their temporal madeupness-
 threshold, which implies an invested social commitment as of thought and association that is
 then inclined to overlook inherent ontological-veridicality, as of interlocutors postlogism-
 slantedness/ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-
 discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-
 endemisation, so-disambiguated as of ‘reference-of-thought-devolving-level difference-
 conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism
 reflected as the divergent ontological-performances of the ontological-aesthetic-tracing’
 leading to the dynamics of social psychopathy, and this logic also explains how and why
 notions-and-accusations-of-sorcery are endemised/enculturated in a non-positivism social-
 setup; with the insight as articulated by this author that more critically manifestations of
 postlogism-slantedness across all the registry-worldviews/dimensions are rather revelatory of
 the fundamental prior relative-ontological-incompleteness-of-reference-of-thought, with
 transcendental implications that goes well beyond the ad-hoc conception of manifestations of

postlogism-slantedness but more broadly conceive as of the
 destructuring/aetiologisation/ontological-escalation implications arising from underlying
 relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-
 thought with regards to human living-development, institutional-development and Being-
 development/ontological-framework-expansion underdevelopment issues. This underlying
 relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-
 thought projective-totalitative-implications of analysis, as of difference-conflatedness-as-
 totalitative-reification-in-singularisation-as-veridical-epistemic-determinism protracted-
 teleological-wholeness/nested-congruence-as-of-the-institutionalisation-process-‘notional—
 singularisation/epistemic-immanence/veridical-epistemic-determinism’, highlights that
 human mental-disposition as of human-aporia/undecidability/dilemma/ought-
 indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-
 dispositions—existentialism-form-factor operates in its totalising-self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag on the ‘ontologically-flawed basis of a

 of human limited-mentation-capacity as of human-aporia/undecidability/dilemma/ought-
 indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-
 dispositions—existentialism-form-factor’. The question can then be asked with regards to the
 capacity of such a positivism-procrypticism self-consciousness psychology to attend to
 living-development, institutional-development, Being-development/ontological-framework-
 expansion underdevelopment issues/problems directly related to the lack of ‘futural Being-
 development/ontological-framework-expansion as of prospective deprocrypticism self-

consciousness psychology that recognises-and-registers the prospective metaphoricity need as of human limited-mentation-capacity due to human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor’. This insight is in effect the futural rejoinder to the Foucauldian hermeneutics of the subject with respect to human prospective reference-of-thought transcendence-and-sublimity capacity; in the sense that ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative—implications’ has always called upon a certain apriorising/intelligibilitysetup/measuringinstrument/axiomatising development of the human subject itself as enabling-and-making-available the capacity for that human subject to tackle the prospective issues of its world. In this regard, the question could be asked: what is the capacity of the universalisation–non-positivism/medievalism mindset to tackle prospective issues warranting a positivism self-consciousness psychology, and by extension what is the capacity of our positivism–procrypticism/disjointedness-as-of-reference-of-thought mindset to tackle prospective issues warranting a deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought self-consciousness psychology? The ‘postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care–and–episteme’ involves prospective reference-of-thought dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as spurring Being-development/ontological-framework-expansion metaphoricity as of protensive-consciousness that is prospectively-grounded-or-psychoanalytically-unshackling, and implying prospective existence’s non-presencing which is here construed as of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought as implied by

postmodern human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation. Overall ‘exteriorisation attitude/mental-disposition/care-and-episteme’ is ontologically validated as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought Being-development/ontological-framework-expansion metaphoricity behind the successive transcendence of registry-worldviews/dimensions in the institutionalisation process so-associated with human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination. Hence the ‘postmodern exteriorisation attitude/mental-disposition/care-and-episteme’ superseding of the ‘modern take interiorisation attitude/mental-disposition/care-and-episteme’ is what renders possible postmodern transcendence-and-sublimity as of its very own ‘postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme’ spur of prospective Being-development/ontological-framework-expansion metaphoricity. Overall, ‘exteriorisation attitude/mental-disposition/care-and-episteme’ speaks of prospective relative-ontological-completeness-of-reference-of-thought as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, while ‘interiorisation attitude/mental-disposition/care-and-episteme’ speaks of prior relative-ontological-incompleteness-of-reference-of-thought as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality. Thus the former is a reflection as of its dialectical-thinking of the Being underdevelopment of the latter as of the latter’s dialectical-dementing. Ultimately, human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination speaks to the ontological-veridicality that human meaningfulness-

and-teleology ‘is ever always about successive reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology or apriorising/intelligibilitysetup-reconceptualisation-about-existence-as-the-absolute-a-priori-for-prospective-relative-ontological-completeness inducing existential-instantiations devolved meaningfulness’, so-construed as human textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence différance/internal-dialectics/difference-deferral as of totalising/circumscribing/delineating reference-of-thought-devolving; with such apriorising/intelligibilitysetup-reconceptualisation reflected in successive ‘exteriorisation attitude/mental-disposition/care–and–episteme’ for prospective institutionalisation superseding/overriding successive ‘interiorisation attitude/mental-disposition/care–and–episteme’ at uninstitutionalised-threshold as successive Being-development/ontological-framework-expansion metaphoricity impetus in dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as of existence’s non-presencing, with base-institutionalisation from recurrent-utter-uninstitutionalisation, universalisation from base-institutionalisation–ununiversalisation, positivism from universalisation–non-positivism/medievalism and prospectively deprocrypticism from positivism–procrypticism as reflecting the overall notional-conflatedness of notional-deprocrypticism protensive-consciousness as the ‘ontologically-veridical point-of-focus-as-consciousness prospective exteriorisation attitude/mental-disposition/care–and–episteme’. Insightfully, this author further addresses the common criticism of postmodern-thought with regards to virtue, as of postmodern implied human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation. Structurally/paradigmatically a registry-worldview’s/dimension’s reference-of-thought points fundamentally to its ‘underlying reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-

meaningfulness-and-teleology' with regards to the latter's 'temporality-as-shortness-of-register-of-meaningfulness-and-teleology to intemporality-as-longness-of-register-of-meaningfulness-and-teleology ontological-performances' as of notional-contiguity/epistemic-contiguity. Such that it is fundamentally the prior relative-ontological-incompleteness-of-reference-of-thought that becomes the 'lack-of-virtue or vice issue', beyond just any associated incidental existential problems, as requiring aetiologisation/ontological-escalation as of the need for prospective relative-ontological-completeness-of-reference-of-thought to address the myriad totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag existential possibilities of the registry-worldview's/dimension's vices-and-impediments as fundamentally bound to its prior relative-ontological-incompleteness-of-reference-of-thought 'underlying reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology'; and so beyond just totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag and ad-hoc palliative resolutions. Consider in this regard the temporal ontological-performance as of say a postlogism-slantedness or any other temporal or derived-temporal mental-disposition associated with vicious accusations-of-sorcery for instance in a non-positivistic as animistic or medieval social-setup. The fact that even an intemporally-inclined mental-disposition in that social-setup has an apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of existential-contextualising-contiguity-in-dereification that is 'mutually cognisant-and-integrative beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought' with notions-and-accusations-of-witchcraft itself as of their 'underlying reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology' presents a totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag issue that

endemises notions-and-accusations-of-witchcraft in the vices-and-impediments of that given social-setup. It is the notional-discontiguity/epistemic-discontiguity as of prospective positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising as setting up the positivism 'underlying reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology', that fundamentally undermines such endemisation; and hence it is not by accident that our present positivism registry-worldview/dimension is devoid of such issues since it paradigmatically/structurally undermines temporal-to-intemporal cognisance and integrativeness of notions-and-accusations-of-sorcery as of the positivism 'underlying reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology', construed as 'transcendental human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation that reflects 'modern suprastructuralism'; just as a 'postmodern suprastructuralism' reflects deprocrypticism as of its pre-emption-of-disjointedness-as-of-reference-of-thought over our positivism–procrypticism disjointedness-as-of-reference-of-thought. This insight about the prospective need for notional-discontiguity/epistemic-discontiguity underlies a postmodern understanding, as this author contends, that it is by the exercise of prospective relative-ontological-completeness-of-reference-of-thought as of human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as of the need for futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought, and so over our positivism–procrypticism temporal-to-intemporal mental-dispositions 'mutual cognisance and integrativeness of procrypticism/disjointedness-as-of-reference-of-thought beyond-the-consciousness-awareness-teleology-in-existential-

extirpation-as-of-existential-unthought', that we provide the ontologically-veridical aetiologisation or ontological-escalation resolving the vices-and-impediments of our 'so-prospectively deprocrypticism-construed' procrypticism/disjointedness-as-of-reference-of-thought as of its underlying totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, and so beyond just our ad-hoc palliative construals of virtue. Basically when post-structuralists speak of 'the other' this translates into aetiologisation/ontological-escalation as of 'universal projection implications attitude/mental-disposition/care-and-episteme event-or-operant implications to all and sundry' as implied in the above analysis, as postmodern-thought portends to be non-ideology-driven, non-speculative, non-imaginary, theoretical, conceptual and operant. This insight is also very much conscious of the ontologically-flawed misconstrual of 'the other' that pervades human averaging-of-thought mental-dispositions as of 'mutual temporal/shortness-of-register-of-meaningfulness-and-teleology eliciting' construed as 'intemporal temporality'. Such tendencies are hardly of aetiologisation/ontological-escalation as their emphasis lies in existential-extirpation-as-of-existential-unthought, rather than nonextirpationary-existential-preempting-of-existential-unthought in enabling Being-development/ontological-framework-expansion as of 'universal projection implications attitude/mental-disposition/care-and-episteme event-or-operant implications to all and sundry'; such that fundamentally, such averaging-of-thought tendencies do not address structurally/paradigmatically defining issues of a registry-worldview/dimension as of its vices-and-impediments like the comprehensive implications of disjointedness-as-of-reference-of-thought/procrypticism with regards to our positivism-procrypticism or say the comprehensive implications of non-positivism in a medieval or animistic social-setup. Notional-discontiguity/epistemic-discontiguity thus effectively implies deneuterising 'exteriorisation attitude/mental-disposition/care-and-episteme' of meaningfulness-and-teleology superseding/overriding the prior reference-of-

thought temporally neuterising ‘interiorisation attitude/mental-disposition/care—and-episteme’ of meaningfulness-and-teleology. This fundamentally speaks of a paradigmatic/structural conception of virtue-as-ontology transcendence as of prospective relative-ontological-completeness-of-reference-of-thought. This very much differs from totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag ontological-contiguity palliative virtue constructs as of variance of the very same reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology, and thus implies temporally neuterising ‘interiorisation attitude/mental-disposition/care—and-episteme’ of meaningfulness-and-teleology. This wrongly implies the inherent exceptionalism of the conception of virtue for humans in any such registry-worldview/dimension outside/beyond the ontologically-veridical implications of virtue-as-ontology associated with Being-development/ontological-framework-expansion as of the institutionalisation process. Such a ontological-contiguity totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag virtue conception is caught up within such a registry-worldview/dimension internal social-stake-contention-or-confliction changing temporal constraints, temporal meaningfulness-and-teleology enframing frameworks and temporal mandarinism/pedantry frameworks as of the given reference-of-thought, with these elements in need for prospective transcendence as of prospective relative-ontological-completeness-of-reference-of-thought but paradoxically now defining the conception of virtue. The fact is our pretences and arguments of practice, as not critically pinned down to their ontological-veracity as of prospective relative-ontological-completeness, can similarly be meted with pretences and arguments of practice as of each and every registry-worldview’s/dimension’s reference-of-thought practices, and thus conceptualising virtue by totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag while

circumventing as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought the vices-and-impediments of each registry-worldview/dimension in want of its 'pure ontology' virtue resolution as of aetiologisation/ontological-escalation. In this regard such palliative virtue constructs overlooking fundamental underlying paradigmatic/structural ontological implications about our 'modern take attitude/mental-disposition/care-and-episteme' reflected by the 'postmodern—deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme' with regards to social-stake-contention-or-confliction changing temporal constraints, temporal meaningfulness-and-teleology enframing frameworks and temporal mandarinism/pedantry frameworks, are no different to say 'non-positivism/medievalism apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care-and-episteme' overlooking its own social-stake-contention-or-confliction changing temporal constraints, temporal meaningfulness-and-teleology enframing frameworks and temporal mandarinism/pedantry frameworks as reflected from 'positivism/rational-empiricism attitude/mental-disposition/care-and-episteme'. However, approbating we may be predisposed to such palliative virtue constructs as of lack of dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension, the fact is these are not really the underlying drivers for virtue transcendence and are peripheral to more ontologically profound theorised-or-untheorised emancipatory events driving virtue transcendence as of prospective relative-ontological-completeness-of-reference-of-thought, notwithstanding our state of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. The fact is from an ontological standpoint, we inherently are no more virtuously exceptional even with regards to the earliest of humans, and so as of the very same species potency, and thus

we can't ascribed inherent virtuous superiority by the mere token of our own practice. Rather the exceptionality behind human virtuous potential lies ontologically with 'intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications' as of Being-development/ontological-framework-expansion, reflecting the fact that pure-ontology that as of its second-naturing induces the requisite level of human virtue performance at each given registry-worldview/dimension, retrospectively to prospectively. It is rather by acting upon the inherent human institutionalisation process as of its ontological reflection in Being-development/ontological-framework-expansion that virtue transcendence comes about, whether or not beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. In this regard, any registry-worldview/dimension reference-of-thought is a closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications as of the totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag, such that prospective relative-ontological-completeness-of-reference-of-thought as required for virtue transcendence necessarily implies disrupting and superseding any such closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications vices-and-impediments, as of the prospective/new superseding reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology. Inevitably any such virtue construct is transcendental as meaning 'going beyond oneself'; and so with regards to any prospective institutionalisation relative to the uninstitutionalised-threshold. Thus the 'field of conception'/notional-conception/notion of virtue-as-ontology covers way more than its articulation within a same registry-worldview's/dimension's totalising-self-

referencing-syncretising/circularity/interiorising/akrasiatic-drag, as its implications as of Being-development/ontological-framework-expansion need to be drawn beyond a cloistered-consciousness as of retrospective and prospective transcendental illuminating implications. In this regard, a postmodern/suprastructuralism philosophical stance with regards to virtue-as-ontology very much aware of the transcendental ontological implications of existence's non-presencing: will question such reasoning-from-results/afterthought basis of palliative virtue constructs especially as of their totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag and lack of dispensing-with-immediacy-for-relative-ontological-completeness-of-reference-of-thought-by-reification/contemplative-distension implications; ask whether by definition a registry-worldview/dimension reference-of-thought is structured/paradigmed to sponsor/promote/endorse its very own prospective transcendence as of the need for the subversion of its reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology that endemise-and-enculturate its vices-and-impediments by prospective reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology for prospective transcendence-and-sublimity, more like could the Copernicuses, Galileos, Descartes, Diderots, etc. call upon the very same non-positivism/medievalism in need for prospective positivism transcendence to underwrite the subversion of its entrenched non-positivism/medievalism internal social-stake-contention-or-confliction changing temporal constraints, temporal meaningfulness-and-teleology enframing frameworks and temporal mandarinism/pedantry frameworks; and, hence the ontologically-veridical paradox of the very structuring/paradigming implications of human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination renders any registry-worldview/dimension reference-of-thought ever

deficient as of its need for psychoanalytic-unshackling/prospective-grounding/prospective-reification of meaningfulness-and-teleology. Ultimately, anti-constructivism and anti-relativism criticisms of postmodern-thought come down to our ‘modern positivism/rational-empiricism ontologically-flawed as of prior relative-ontological-incompleteness perspective/framing/reference/horizon’ constitutedness construal of categorising/taxonomising schemes that pervades the ‘modern categorising mental-disposition’ as of our occlusive-consciousness neutering, as we fail to grasp the implication of an implied apriorising/intelligibilitysetup/measuringinstrument/axiomatising that is naively superseding the true apriorising/intelligibilitysetup/measuringinstrument/axiomatising nature of existential reality as the absolute a priori’; such that the meaningfulness-and-teleology that arises is a relatively virtual-or-ontologically-flawed-construal. On the contrary it is conflatedness that ensures that our apriorising/intelligibilitysetup/measuringinstrument/axiomatising syncs with the true apriorising/intelligibilitysetup/measuringinstrument/axiomatising nature of existential reality as the absolute a priori, and so as of an ontological-normalcy/post-convergence posture which rather ‘turns the idea of analysing and conceptualising on its head’ into one of ‘grasping human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination implications as of the underlying psychoanalytic-unshackling’ for human-subpotency construal of the full-potency that is existence. This insight about the complete relationship between developing human-subpotency and its potential to fully grasp the full-potency of existence, fundamentally underlies the protensive-consciousness referentialism of the notional-conflatedness of notional-deprocrypticism. However, it is equally critical to grasp the double-gesture reification implied in such a postmodern-as-suprastructural conception of human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation. Such

a postmodern/suprastructuralism double-gesture reification holds that knowledge involving virtue-as-ontology is truly organic-knowledge as of its appropriate attitude/mental-disposition/care-and-episteme with respect to human social-stake-contention-or-confliction; with the adherence to the reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of such organic-knowledge construed as of intemporality-as-conviction, whereas mechanical-knowledge is rather predispose to adhere as of temporal-as-token-or-madeupness to the such mere reference-of-thought-categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology. The latter points to an inappropriate attitude/mental-disposition/care-and-episteme which is not beholden to the prospective institutionalisation but rather is of existential-extirpation-as-of-existential-unthought relation with it. More concretely, consider the practice of serfdom in Europe, or the annihilation of many Native American tribes and slavery and slave trade in the new world, while at the same time in a registry-worldview/dimension transitioning from the non-positivism/medievalism to the positivism/rational-empiricism registry-worldview with this contrastive mechanical-knowledge attitude/mental-disposition/care-and-episteme and organic-knowledge attitude/mental-disposition/care-and-episteme. While the full implications of a positivism/rational-empiricism organic-knowledge attitude/mental-disposition/care-and-episteme will imply an end to such practices as of universal human rights, ‘economic-opportunistic-and-then-enculturated tenants’ of such blatant moral supremacy and thus racial supremacy distorted the implications of the technical and social organisation advancement brought about from budding positivism/rational-empiricism to reconceptualise by their specific interests meaningfulness-and-teleology in terms-as-of-axiomatic-construct of the prior non-positivism/medievalism attitude/mental-disposition/care-and-episteme as of its prior relative-ontological-incompleteness-of-

reference-of-thought, and thus justify their nefarious practices; speaking of mechanical-knowledge in positivism/rational-empiricism. Whereas progressive organic-knowledge tenants construed positivism/rational-empiricism as an openness to the potential of all societies and peoples to rather arrive at the higher possibility of positivism/rational-empiricism virtue, and so as of a human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation posture that allows for universal human emancipation as expressed by the Quakers movement, Rousseaux, Diderots, etc. Incidentally, the positivism/rational-empiricism mechanical-knowledge tenants as of the economic-opportunism-and-then-enculturation of their nefarious practices, were very much countervailing the practice and trend within their own societies of origin undergoing-positivism/rational-empiricism-transformation and the underlying dual-language/split-mentality unscrupulousness was given away as of the ‘out-of-sight demeanour’ in their main societies, rather than being fully assumed as marking positivism/rational-empiricism progress. The occasional development of enlightenment and positivism/rational-empiricism by its technical and social organisation transformation implications wasn’t the opportunity for such societies to turn around and then dehumanise other societies and humanities that haven’t done likewise, but rather as of organic-knowledge called for a double-gesture reification in recognising that such positivism/rational-empiricism implications are about all of humanity, just as implied in preceding human cultural emancipations. Suprastructuralism or postmodernism double-gesturing of virtue doesn’t function on the naïve basis of ‘merely construing relative implied levels of virtue development and making relative conclusions’ but rather orientate meaningfulness-and-teleology to the more profound perspective of all of humanity’s potential as of prospective relative-ontological-completeness-of-reference-of-thought/ontological-normalcy/post-convergence and then reconstrue the possibility of all of humanity-as-of-societies to ultimately fulfil it virtuous potential; and this is the optimum and

emancipatory virtue disposition for all humankind and human societies. It adopts this orientation because it always put into question the idea of ‘grounding meaningfulness-and-teleology as of any specific human society ontological-incompleteness-of-reference-of-thought as fundamentally denaturing, and likely to induce transversal dehumanising of some cultures and societies by others’; as it recognises, however tepid, that all societies and humans are curious, predisposed to their emancipation and achieving optimum existential possibilities, and can uphold universal values, and so as of universal-transparency. Ultimately, such a double-gesturing hold out the possibility of the institutionalisation process as of Being-development/ontological-framework-expansion as pertinent for all humankind, whether as of internal social-progress, cultural diffusion or cultural-reappropriations. This practically translates, say considering an instance of a given traditional practice that is abhorrent to modern positivism/rational-empiricism attitude/mental-disposition/care-and-episteme, by implying from a postmodern perspective that emancipation truly arises when the humans come to assume as well by themselves a universal positivism/rational-empiricism attitude/mental-disposition/care-and-episteme in transforming their society. We can appreciate that supposed a space civilisation come to earth, implying for instance in a position of strength that we are too violent, disorganise, etc. and thus morally inferior, and that our best interests was just to take our cue from them. Here as well, the postmodern double-gesture reification of virtue will project that we do have the potential for further development, and that to be ourselves we cannot be utterly alienated from ourselves like robots in our relationship with them, and that our curiosity and openness will correspondingly bring about our functional moral equivalency with universal-transparency. Further arguing that if they are truly more advanced than us, then that advancement is necessarily about a greater aetiologisation/ontological-escalation as of the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation that will necessarily

subscribe to recognising ‘the other’ that we are to them; as insightfully, grander
 aetiologisation/ontological-escalation come with relative-ontologically-veridical
 attitude/mental-disposition/care-and-episteme. Claims of such grander
 aetiologisation/ontological-escalation as implying dehumanising interpretations are
 ontologically-flawed as such claims are rather surreptitiously based on prior registry-
 worldview/dimension uninstitutionalised-threshold reference-of-thought–categorical-
 imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-
 meaningfulness-and-teleology as teleological-degradations-in-notional-
 discontiguity/epistemic-discontiguity. In other words, the organic-knowledge in its true
 appreciation of ‘the other’ as of aetiologisation or ontological escalation implies a ‘universal
 projection implications attitude/mental-disposition/care-and-episteme event-or-operant to all
 and sundry’. Finally, the naivety when facing such anti-constructivism and anti-relativism
 arguments is to think that these are always about fair and objective intellectual
 disagreements; but then the history of many such criticisms has revealed its underlying
 perfidy. Further, as of organic-knowledge and knowledge notionalisation, this author holds
 that it is naïve to conceptualise of human knowledge mainly as of pure erudition warranting
 mainly sound arguments, proofs and convincing demonstrations, and that the reality all along
 ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human
 institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-
 singularisation-as-veridical-epistemic-determinism projective-totalitative–implications’
 shows that there has always been beyond-the-consciousness-awareness-teleology-in-
 existential-extirpation-as-of-existential-unthought ‘institutional investment’ that is not always
 just of eruditic ideal, inclined to undermined prospective knowledge as of its prospective
 relative-ontological-completeness-of-axiomatic-constructs-and-reference-of-thought, and that
 true knowledge especially as it portends to transcendence cannot be conceptualised losing

sight of this fact. The blunt fact is that postmodern-thought has shown itself to be more useful and applicable across the humanities with a massive potential for furthering human emancipation, however the tentativeness of many of its bold ideas, and so much more than the vagaries peddled by many such critiques surreptitious anti-intellectual media-driven waylaying who on the contrary seem to construe of institutional anchoring as the very essence of validation. Such situations are often highly liable to intellectual-bad-faith undermining of Being-development/ontological-framework-expansion due to ‘lack of social universal-transparency’. In other words, medieval charlatanic eliciting of old ways, conventioning and existence as of non-positivism/medievalism despite its prior relative-ontological-incompleteness-of-reference-of-thought as underscoring medieval vices-and-impediments with respect to prospective positivism was psychically and surreptitiously undermining of a sense of Being-development/ontological-framework-expansion; and this insight is valid across all registry-worldviews/dimensions as of the eliciting of temporal individuations self-referencing cloistered-consciousness in nihilistically undermining prospective ontological-completeness-of-reference-of-thought. It is only an organic-knowledge sense of consummation-as-not-beholden to temporal/shortness-of-register-of-meaningfulness-and-teleology stakes that human intemporal individuations as of a protracted-consciousness can contemplate of Being-development/ontological-framework-expansion as of its cross-generational transcendental implications and as reflected from the insight of the institutionalisation process. Again, it can be noted here that Einstein, Bohr and the other seminal physics contributors to the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ had no prior basis to adopt their subsequently transcendental and sublimity orientation but for their ontological-faith-notion-or-ontological-fideism as of their ‘re-projection/re-anticipation’ about ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’

which was then validated as of ontological-primemovers-totalitative-framework, and so divulged by existence's non-presencing; as prior human presencing experience wouldn't have thought about space-time, considered the ether as unreal, considered that the laws of physics are different at atomic scale, etc. In other words, there wasn't any prior 'logocentric transcendental-signifier' as of the prior 'classical-mechanics axiomatic-construct' construed as presencing enabling the obtention of any such conclusions from the given 'classical-mechanics axiomatic-construct' constitutedness, but rather it is by conflatedness with regards to 'the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality' that the prospective 'theory-of-relativity-together-with-quantum-mechanics axiomatic-construct' was construed as of non-presencing. Interestingly, as of the underlying phenomenology-driven ontology, it is rather more pertinent with respect to transcendence-and-sublimity to grasp that such ultimate decidability is construed as of human intemporal/longness-of-register-of-meaningfulness-and-teleology individuation mental-disposition in 'a tendential-deliberation-of-decidability as enabled by ontological-primemovers-totalitative-framework tendential validation as of existence's non-presencing'. Such a construal of human transcendence-and-sublimity will cover the seminal contributions prior and after the defining-threshold epistemic-break/epistemic-resetting of the 'theory-of-relativity-together-with-quantum-mechanics axiomatic-construct' by Einstein and Bohr. Such an ontological basis for construing sublimity overrides our neuterising laden modern convention ways of judging breakthroughs overemphasising singular initiative, as it is rather grounded more soundly on an abstract notion of 'intemporal-as-ontological individuation' as the basis of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination analysis; and insightfully, as reflected in the underlying conflatedness of accreting-substitutive-subsumption-as-futural-différance-freeplay, sublimity is achieved

rather out of the notional obviating of human temporal-as-non-ontological neutering as of deneutering—referentialism and with correspondent intemporal-as-ontological rearticulation/reconstrual of meaningfulness-and-teleology as of dynamics of insight of shallow-to-deeper human limited-mentation-capacity implications, and so as of protensive-consciousness of notional-deprocrpticism perspective/framing/reference/horizon. Similarly, this author’s articulation of futural-différance as of transcendence-and-sublimity is necessarily construed ontologically as of a rearticulated protractedness as futural différence that coincides-and-is-contiguous with a prior Derridean différence as of quasi-transcendence and evasiveness of sublimity. In both cases, this highlights that ‘decidability is not instantaneous as of inherent spontaneous identification and occurrence of decisional act’ but that decidability in enabling transcendence-and-sublimity is as of an ‘overall différence tendential-deliberation-of-decidability’ as of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination process. Thus sublimity is equally reflected in the deliberateness involved in cultivating artistic, educational, technical or research capabilities/skill in the final outcomes derived forthwith, as of the quality imbued on human limited-mentation-capacity to deepen itself; and this translates into human contemplation of the existential-possibilities attainable by its subpotency. Tendential-deliberation-of-decidability is thus the central ontological insight attached to différence as ‘a contiguously theoretical and operant phenomenological construct involving necessarily the deliberateness as of Derridean freeplay différence, as a putting into question exercise, and subject to ontological-primemovers-totalitative-framework validation before attaining defining-transcendence and defining-sublimity’; and différence as of such ‘existential-reality concreteness dynamics’ is scientific and utterly dissimilar from a speculative idealisation exercise à la Hegelian dialectics and well beyond the latter’s conceptual patterning. Ultimately, such tendential-deliberation-of-

decidability for attaining defining-transcendence and defining-sublimity, arises from more than just a blatant/flatminded notion of human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination or say the vague social convention idea of talent, it is more critically beyond and about a question of human mental-disposition with respect to the prescience of existence's non-presencing-or-withdrawal-or-metaphysics-of-absence-or-transcendental-reasoning-of-event-as-prospective-ontology-origination so-implied as of ontology's-directedness-as-Being. This is the very meaning of organic-knowledge beyond the conception of mechanic-knowledge as-knowledge-as-a-mere-thing-to-be-acted-upon-for-given-outcomes. Organic-knowledge as such implies priorly a conviction deference to the prescience of existence's non-presencing-or-withdrawal-or-metaphysics-of-absence-or-transcendental-reasoning-of-event-as-prospective-ontology-origination over any human-as-mortal framing of meaningfulness-and-teleology including oneself-as-human-as-mortal, as it is human mortality-as-temporality that is rather what is in need for further Being and consciousness development. Thus the paradigm of sublimity for a registry-worldview/dimension reference-of-thought, as reflected in the Derridean social ethics stance, is rather one for the 'subsumptive inventing' of the prospective ontological possibilities of prospective relative-ontological-completeness-of-reference-of-thought over human normativity/conventioning as of the latter's prior relative-ontological-incompleteness-of-reference-of-thought, and so by maximalising-recomposuring totalising-renewing-realisation/re-perception/re-thought as of organic-knowledge. A nonextirpatory existential paradigm of sublimity implying that the state of recurrent-utter-uninstitutionalisation, base-institutionalisation-ununiversalisation, universalisation-non-positivism/medievalism, and positivism-procrypticism, are successively-wanting of prospective defining-transcendence and defining-sublimity going by their successively-given mechanical-knowledge in

temporality-as-of-neuterisation/difference-in-kind/notional-contiguity-or-epistemic-contiguity/difference-in-aposteriorising-or-logicising/relative-ontological-incompleteness/existential-extirpation-as-of-existential-unthought. In other words, an intemporal-as-ontological mental-disposition projecting of the organic-knowledge as of prospective registry-worldview/dimension reference-of-thought in prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought can't sidestep such implied prospective defining-transcendence and defining-sublimity, and undertake existence as of the prior registry-worldview/dimension reference-of-thought in prior relative-ontological-incompleteness, even if it such a mental-disposition could lead to such an outcome as in H.G. Wells's country of the blind or Galileo say with the medieval Establishment; despite the fact that the possibilities of such outcomes arise out of establishment Charlatanism, which knows better, but exploits lack of 'social universal-transparency'. But then it is actually a sign of 'propounded theoretical health and pertinence' when all such Establishment charlatanism comes to dodge such substantive-and-frontal articulation of prospective knowledge, and in lieu come up with worn out refrains and sidestepping manoeuvres avowing their true 'intellectual blankness' grounded on institutional-being-and-craft; as we know that in all genuinely inclined intellectual pursuits the very central tenet has always been about theoretical disputative engagement and not acts of escapism and downgrading of intellectual arguments as of 'solo media exploits of intellectual popularity'. Thus by its prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought as futural *différance*, accreting-substitutive-subsumption-as-futural-*différance*-freeplay comes into terms with both presencing and non-presencing on the basis of the prospective relative-ontological-completeness/ontological-contiguity of the latter over the prior relative-ontological-incompleteness/notional-discontiguity/epistemic-discontiguity of the former as of the-very-same-totalising-purview-

of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality. Thus what is being correctly implied is not ‘difference-in-kind/notional-contiguity-or-epistemic-contiguity/difference-in-aposteriorising-or-logicising but rather difference-in-nature/notional-discontiguity-or-epistemic-discontiguity/difference-in-apriorising-or-axiomatising between presencing and non-presencing. Such an insight is enabled as of the fundamental awareness that human knowledge construction fundamentally involves two different exercises; with the first factoring in that at the fundamental level of knowledge construction humankind has a limited-mentation-capacity that needs to be developed as a ‘developed consciousness perspective/framing/reference/horizon as of prospective relative-ontological-completeness/notional-contiguity’ construed as its apriorising/intelligibilitysetup/measuringinstrument/axiomatising to then be able at an operative level to articulate sound-or-authentic meaningfulness-and-teleology grounded on such a developed consciousness perspective/framing/reference/horizon. This explains why it is impossible for a ‘recurrent-utter-uninstitutionalised mindset perspective/framing/reference/horizon as of trepidatious-consciousness apriorising/intelligibilitysetup/measuringinstrument/axiomatising’ to grasp base-institutionalisation meaningfulness-and-teleology without first developing a ‘base-institutionalisation mindset perspective/framing/reference/horizon as of warped-consciousness apriorising/intelligibilitysetup/measuringinstrument/axiomatising’; for a ‘base-institutionalisation–ununiversalisation mindset perspective/framing/reference/horizon’ to grasp universalisation meaningfulness-and-teleology without first developing a ‘universalisation mindset perspective/framing/reference/horizon as of preclusive-consciousness apriorising/intelligibilitysetup/measuringinstrument/axiomatising’; for a ‘universalisation–non-positivism/medievalism mindset perspective/framing/reference/horizon’ to grasp positivistic meaningfulness-and-teleology

without first developing a ‘positivistic mindset perspective/framing/reference/horizon as of occlusive-consciousness apriorising/intelligibilitysetup/measuringinstrument/axiomatising’; and prospectively for a ‘positivism–procrypticism mindset perspective/framing/reference/horizon’ to grasp deprocrypticism meaningfulness-and-meaningfulness without first developing a ‘deprocrypticism mindset perspective/framing/reference/horizon as of protensive-consciousness apriorising/intelligibilitysetup/measuringinstrument/axiomatising’. As we can get that the fundamental stake for the Copernicuses, Galileos, Descartes, etc. during the Enlightenment wasn’t just about the specific positivistic knowledge they articulated or else they would have been satisfied with just their personal curiosity and enlightenment and leave it at that, but rather they surreptitiously undermined many of the prevailing social norms and rules in trying to expound their knowledge and vision, and more critically so because they knew it is the ‘formation of a positivistic social consciousness apriorising/intelligibilitysetup/measuringinstrument/axiomatising’ that would enable the anchoring of all such prospective positivistic knowledge, and this sense of things fully underscored such a more comprehensively directed project-and-purpose undertaken later by the Encyclopédistes; with the underlying insight that while a social state of generalised prior relative-ontological-incompleteness-of-reference-of-thought is enabling to surreptitious Establishment charlatanism, however with increasing ‘social universal-transparency’ such charlatanism is exposed for what it really is, explaining the panickiness and falsehood associated with such charlatanism as with the reactionaries to the Encyclopédistes project, as if the articulation of knowledge by itself was a threat rather than subject to disputation! Underlying as the non-speculative, non-imaginary, theoretical and conceptual possibility for such futural différance consciousness development is the notion of ontological-dementation/dialectical-dementation stranding dialectics which by pointing out an epistemic-

break as of ‘difference-in-nature’/ontological-discontinuity, underscore at once ‘both as affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking of the consciousness in ontological-contiguity/relative-ontological-completeness-of-reference-of-thought and as unaffirmation/deprojection/de-assertion/undueeness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing of the consciousness in notional-discontiguity/epistemic-discontiguity/relative-ontological-incompleteness-of-reference-of-thought as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating, and not incrementalism-in-relative-ontological-incompleteness, as of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality’. As futural *différance* is enabled, unlike the case with the ‘Derridean quasi-transcendental-freeplay *différance*’, as of ontological-faith-notion-or-ontological-fideism involving human mental-disposition successive apriorising/axiomatising reprojection-or-reanticipation capacity inducing human limited-mentation-capacity-deepening; overriding the idea that the perspective/framing/reference/horizon of contemplation is absolutely given-and-determined as of the implication that all meaningfulness-and-teleology should be as of ‘difference-in-kind/notional-contiguity-or-epistemic-contiguity/difference-in-aposteriorising-or-logicising, but rather reconceptualising the possibility of difference-in-nature/notional-discontiguity-or-epistemic-discontiguity/difference-in-apriorising-or-axiomatising as of prospective relative-ontological-completeness-of-reference-of-thought bringing about transcendence-and-sublimity as of non-presencing. Thus such a phenomenology associated with accreting-substitutive-subsumption-as-futural-*différance*-freeplay further divulges, unlike the ‘Derridean quasi-transcendental-freeplay *différance*’, the full possibility of human sublimity. Consider in this regard the decisive transitions-as-sublimitys that occurred in physics: with

‘traditional classical mechanics axiomatic-construct’ and the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’; wherein the successive axiomatic-constructs in prior relative-ontological-incompleteness and prospective relative-ontological-completeness, with regards to ‘traditional classical mechanics axiomatic-construct’ and the ‘theory-of-relativity-together-with-quantum-mechanics axiomatic-construct’ as of ‘the very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’ are not as of a ‘difference-in-kind/notional-contiguity-or-epistemic-contiguity/difference-in-aposteriorising-or-logicising but rather a difference-in-nature/notional-discontiguity-or-epistemic-discontiguity/difference-in-apriorising-or-axiomatising; with human-subpotency aligning towards the full potency of existence which thus divulges the possibility of human sublimity as of the physics science implications today. It is interesting to note that the difference-in-nature/notional-discontiguity-or-epistemic-discontiguity/difference-in-apriorising-or-axiomatising bringing about the successive physics axiomatic-constructs/theories are successive ‘epistemic-breaks’ from prior reasoning and are akin to ‘leaps of faith’ which then ‘establish new reasoning’ that then becomes the internal ‘difference-in-kind/notional-contiguity-or-epistemic-contiguity/difference-in-aposteriorising-or-logicising of the new physics as the new presencing; brought about from the transcendence of non-presencing. In other words, human consciousness tends to be constraint to its presencing—or-totalising-self-referencing-syncretising-forward-facing-self-consciousness, and thus assumes a ‘difference-in-kind/notional-contiguity-or-epistemic-contiguity/difference-in-aposteriorising-or-logicising mental-disposition as of presencing. But existence/ontology’s-directedness-as-Being as of non-presencing is beyond and not constraint by human consciousness as of its presencing—or-totalising-self-referencing-syncretising-forward-facing-self-consciousness, and thus hints-at the ontological-faith-notion-or-ontological-fideism possibilities of transcendence-and-

sublimity as of ontological-primemovers-totalitative-framework validation that is at the very center of the ‘promise of correspondence between human-subpotency as of Being-and-consciousness development and existence as of ontological-veridicality’, and so despite the complexifying/inhibiting metaphysics-of-presence of any given presencing–or–totalising–self-referencing-syncretising-forward-facing-self-consciousness from a ‘difference-in-kind/notional-contiguity-or-epistemic-contiguity/difference-in-aposteriorising-or-logicising posture; such that humankind then overlooks presencing and re-projects/re-anticipates non-presencing enabling human transcendence-and-sublimity. Therefore, metaphoricity as highlighted herein is actually construed as of ‘its natural ontology implications’, and this natural ontological notion of metaphoricity is construed herein as superseding-and-englobing all other differentiated adjunctive significations including conventional figures-of-speech. Metaphoricity as such simply refers to signification adjunctiveness to ‘underlying totalising/circumscribing/delineating signifying-construct of language’ as of both the meaningfulness-and-teleology implications to the so-renewed ‘underlying totalising/circumscribing/delineating signifying-construct of language’ and the specific adjunctive-metaphoricity-signification within such renewed ‘underlying totalising/circumscribing/delineating signifying-construct of language’. Metaphoricity is very much a mirroring of existential ‘syncretising-effecting’ going by the latter’s existential implications on ‘human underlying self-referencing meaningfulness-and-teleology as a totalising/circular construal’. This ‘totalisation/circularity epistemic-breaking’ of self-referencing associated existentially with syncretising-effecting as mirrored in metaphoricity arises because of human limited-mentation-capacity, and is a reflection of the circular deepening of human limited-mentation-capacity as of growing certitude from the opening up of non-presencing by human re-projection/re-anticipation ultimately validated by existence/ontology’s-directedness-as-Being ontological-primemovers-totalitative-framework.

Further, metaphoricity as such speaks of the evasiveness of all human meaningfulness-and-teleology at uninstitutionalised-thresholds as recurrently pointed out herein as of token-as-madeupness/non-conviction or derived-token-as-madeupness/derived-non-conviction or conviction possibilities relation to reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology as of human limited-mentation-capacity implications. The implications of this reality as of metaphoricity explains why epistemes are fundamentally and necessarily constricted as of their specific registry-worldview/dimension reference-of-thought; as ultimately epistemes are as relevant as the ontological-possibilities divulgeable by presencing and non-presencing, such that in the case of the latter there is no prior insight about the veracity of any episteme before it is divulged with Being-development/ontological-framework-expansion as presencing. Consider in this regard Galileo’s implying positivistic episteme metaphoricity over a medieval Establishment scholasticism-and-mysticism episteme as of Being-development/ontological-framework-expansion as the necessary backdrop for the knowledge he articulates and all subsequent positivistic knowledge. In many ways, this author as of organic-knowledge is very much aware of the ‘drawback implications’ of our positivism–procrypticism episteme as of its constitutedness with respect to futural Being-development/ontological-framework-expansion as of prospective deprocrypticism psychoanalytic-unshackling organic-knowledge, as of the full articulation of accreting-substitutive-subsumption-as-futural-différance-freeplay with respect to our procrypticism/disjointedness-as-of-reference-of-thought uninstitutionalisation and futural Being-development/ontological-framework-expansion as of prospective deprocrypticism institutionalisation implications representation, and so beyond just our natural inclination for presencing–or–totalising–self-referencing-syncretising-forward-facing-self-consciousness. Galileo could well had possibly recasted his implied positivism meaningfulness-and-

teleology in scholasticism-mysticism terms, just as Copernicus work was held back priorly in limbo, but then the implications as he perceived would have been a degradation and lost of the essence of what he was doing, and so more than just the specific scientific knowledge but more critically it warranted a psychoanalytic-unshackling into the non-presencing-or-withdrawal-or-metaphysics-of-absence-or-transcendental-reasoning-of-event-as-prospective-ontology-origination perspective/framing/reference/horizon of positivism meaningfulness-and-teleology we entertain today. Likewise, as of such metaphoricity episteme, the meaningfulness-and-teleology herein implied as of its essence cannot do without this hermeneutic circle phenomenological ontology elucidation as of its psychoanalytic-unshackling conflatedness; and the ideal backdrop for this lies in a further developed postmodern-thought phenomenological-depth of construction, as implied herein by this author as of accreting-substitutive-subsumption-as-futural-différance-freeplay. This author conceives that at the very core to such genuine understanding of postmodern-thought is a double-gesture reification that consists of perspective/framing/reference/horizon and then contention/argumentation within such articulated perspective/framing/reference/horizon, as so implied by postmodern-thought together with other kindred though less dramatic textuality-thinkers like Gadamer and Habermas; as of the need to adopt/instigate the appropriate mindset for knowledge appraisal given the fundamental distorting effect, beyond just perception, of human limited-mentation-capacity. This double-gesture reification reality for construing human knowledge amounts to a quasi-psychoanalytic-unshackling, as it reflects the fact that The-Given as of existentialism/throwness/facticity is always an insufficiently/poorly developed perspective/framing/reference/horizon for direct instigation of contention/argumentation aspiring for profundity and completeness. Such that this double-gesture reification of the textuality-driven intellectuals involves their ‘special focus orientations’ profundity say like genealogy with Foucault, deconstruction with Derrida, etc.,

and this together with the transversal complementarity and criticisms of all such ‘special focus orientations’, go on to conjointly-and-fruitfully define what is postmodern-thought. Postmodern-thought as such can be analogised with the anecdote of the blind men striving to determine what an elephant is, but with each one saying authentically what the find in front of them in developing the relevant specific imageries and overall imagery of what an elephant is. This in itself is a milestone in theorisation, and as an overall conception postmodern-thought, besides the ‘special focus orientations’ of the specific textuality-driven intellectuals, is primarily about ‘consistently taking a best shot’ at reality and is not inherently driven at its core by ideology but rather authenticity. As such it effectively achieves a more potent construal of the human condition and knowledge especially as it is ‘driven by such transversal cumulative authenticities that augment the possibilities of human limited-mentation-capacity’ thus going a long way to open up new and coherent thought possibilities as of its grander and overall conception and spirit. Interestingly, what is central about the intellectual-bad-faith critique of postmodern-thought is the lack-of-insight/feinting-lack-of-insight about all these underlying elements of postmodern-thought construction: as failing to grasp/recognise the implied double-gesture reification as of its transcendental-enabling/existence-potency implications, and by not appreciating due to ‘flatmindedness’/banality/flimsiness the implications of perspective/framing/reference/horizon before contention/argumentation as of any given perspective/framing/reference/horizon, thus implying ‘poor critical judgment’. With such ‘flatmindedness’/banality/flimsiness further protracting into a poor grasp of postmodern theorists ‘special focus orientations’ with the tendency to engage postmodern-thought as of an un insightful literal and flatminded/banal/flimsy reading; and with the ultimate outcome that all such naïve un insightful literal and flatminded/banal/flimsy readings are cumulated and summated as the entirety of the postmodern theoretical construct, and so on a apparently

implied flawed logic that the discretion allowed for criticism doesn't engage the intellectual credibility of the critique, a notion that is especially abused within a media background. Such 'flatmindedness'/banality/flimsiness with respect to postmodern-thought fails to grasp that all subject-matter as of their inherently deferential-formalisation-transference as of institutional percolation-channelling are necessarily construed as of a double-gesture reification that supersedes the ordinariness/banality of day to day social existence analysis as of averaging-of-thought, such that as of the history of such critiques it will be naïve not to factor in the reality of intellectual-bad-faith and so particularly as it tends to shy away from genuine intellectual engagement with postmodern-thought, and highlighting that the idea of arrogance peddled about postmodernism strangely enough speaks of the 'ignoble arrogance' of such intellectual-bad-faith critiques, as structurally/paradigmatically that which attributes value judgments is that which is knowledgeable-as-of-its-prospective-relative-ontological-completeness-of-reference-of-thought-dialectical-thinking and not that which is ignorant-as-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-dialectical-dementing. Such that there is no dialogical-equivalency that then arises by the fact that the former is a nonextirpatory/intemporal/ontological relationship with meaningfulness-and-teleology while the latter is an existential-extirpation/temporal/non-ontological relationship with meaningfulness-and-teleology, in the sense that it is the former intemporal-as-ontological individuation mental-disposition that is responsible for bringing about human Being-development/ontological-framework-expansion as of the institutionalisation process retrospectively and prospectively while the latter as of its false 'temporal-intemporality' is rather existentially extirpatory and oblivious to Being-development/ontological-framework-expansion as of the institutionalisation process. As ultimately, it is the prospective relative-ontological-completeness-of-reference-of-thought pursued by the former that supersedes and dissolves human vices-and-impediments as of prospective registry-worldview/dimension

transcendence reference-of-thought. The overall insight here of such intellectual-bad-faith can be construed analogically as say in a non-positivistic social-setup where the modern disease theory is not yet socially familiar such that patients may assume that they should be cured immediately/instantly after treatment with no perspective/framing/reference/horizon of appreciation for judging medicine as optimally an over-a-time-period-bodily-reparation construed as the basis of a positivist physician practice; a notion being spread and advocated by the positivist physician in the social-setup. Now consider a competing healer very much aware of such a non-positivist social-setup ‘lack of social universal-transparency’ with regards to such over-a-time-period-bodily-reparation notion and throwing a spanner in the works by pretending that the physician should confirm that patients are cured immediately as otherwise the physician must be practising witchcraft on the patients, understanding fully well the authentic disposition of the physician to affirm a practice of over-a-time-period-of-bodily-reparation for a long term dependable notion of medicine. While they are pragmatically inclined to advanced opportunistically whatever explanation to justify that their healing is immediate/instant and so involving any such stratagem like opportunistically accusing patients or some other persons for any implied failure of immediate/instant cure having the effect on the most part of shutting-off any complain or at least negative allegations about the healer’s cure, and so-enabled on the basis of the healer priorly institutionalised deferential-formalisation-transference posture in the social-setup. Such a healer encouraging the social-setup notion of immediate/instant cure as a ploy as of the possibility of the positivistic disease theory conception subverting their own non-positivistic healing practice notwithstanding ontological-veracity. The manifest acts of many such intellectual-bad-faith critiques with respect to postmodern-thought: whether when pretending to misunderstand postmodern double-gesture reification of meaningfulness, blatantly caricaturing in the most inane terms postmodern-thought, avoiding genuine intellectual-level disputation, and so

rather opting for subversive averaging-of-thought ‘uncritical social media preaching towards sold publics-of-conquest’ paradoxically while claiming not to grasp postmodern-thought, with subterfuges of unoriginal thought usurping the notion of science and intellectualism towards such uncritical publics; and all this as a manifestation of perverted intellectual institutional-being-and-craft. While postmodern-thought is not and has never been immuned from genuine intellectual criticism not only from other schools-of-thought but among postmodern and poststructuralist thinkers themselves, and this calling out of such intellectual-bad-faith critics is much more than an issue about postmodern-thought but about all intellectualism generally as such malpractices tend to mark the beginning of intellectual teleological-decadence—as-to-lack-of-anamnestic-residuality subversion of progressive thinking and go on to permeate social practices and media practice, thus rendering social and critical thought impotent. Further knowledge as understood by this author is more than just the conception of its intemporal-as-ontological nature but knowledge is much more completely and potently notional knowledge as it understands as well the implications of temporal-as-non-ontological mental-dispositions dynamics in relation to pure ontology, and thus in the face of intellectual-bad-faith shouldn’t take the bait of overlooking and thus falsely elevating teleologically as intellectually pertinent intellectual-bad-faith rather than relating to it at its teleologically-degraded level for what it truly is, and so as part and parcel of a complete conception of knowledge. Ultimately, intellectual statuses are as pertinent as veridically enabling to human emancipation as of intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm, and intellectuals’ choice of intellectual-bad-faith is nothing less than self-inflicting irreverence and cannot thus turn around to intimate irreverence when surreptitiously undermining knowledge of universal consequential implications. This author as of metaphysics-of-absence will summate that prior

postmodern thinking is akin-and-pointing-to a proto-prospective reference-of-thought as of prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought over a presencing-or-totalising-self-referencing-syncretising-forward-facing-self-consciousness as prior reference-of-thought, and that necessarily it speaks by its double-gesture reification of quasi-psychoanalytic-unshackling thus requiring a psychoanalytic-reorientation to such an implied prospective reference-of-thought 'as of the prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought of a better knowledge perspective/reference-of-thought before/as-preceding contention/argumentative-engagement, and so avoiding 'flatmindedness'/banality/flimsiness. The underlying current of postmodern-thought is that our limited-mentation-capacity induces our prior relative-ontological-incompleteness with regards to reference-of-thought and its derived meaningfulness-and-teleology, with the implication that we need to a prospective relative-ontological-completeness-of-reference-of-thought to be able to articulate intemporal-as-ontological construal as of the internal-dialectics/différance of meaningfulness-and-teleology. In other words, all concepts, notions as of ontologically-veridical meaningfulness-and-teleology, are made to have their internal-dialectics/différance as of non-presencing for their sublimity and transcendence into more profound and more complete meaningfulness-and-teleology. For instance the 'postmodern take' about science is rather a more profound and complete notion of science than the 'modern take', such that a 'modern approach' to the conception of science naively fails to factor in unlike the 'postmodern approach' the implications of human limited-mentation-capacity and the need to deepen it, thus translated into the prior need for prospective relative-ontological-completeness; wherein the 'modern take' might naively consider medicine as simply providing medications and remedies, the 'postmodern take' by an internal-dialectics/différance of the notion of medical science will factor in socioeconomic, education, information, environmental, gender and power relations

issues underlying healthcare and medical delivery as a more profound and complete notion of medical science; construed effectively as of deprocripticism/preempting-of-disjointedness-as-of-reference-of-thought. Thus, for postmodern-thought the capacity to attain relative ontologically-veridical meaningfulness-and-teleology comes down to the capacity of arriving at the very essence of meaningfulness-and-teleology while overcoming the drawback of our human limited-mentation-capacity. This insight about the essence of things is what underlies fundamentally Heideggerian-essencing-as-of-the-ontological-difference, Sartrean-existence-precedes-essence and Derridean-différance-as-there-is-nothing-outside-the-text, all construed by this author as of existential-contextualising-contiguity; is the enabling approach for human ontological-reconstituting as of aetiologisation/ontological-escalation. Basically thus, the overall postmodern project implication is that we deepen our limited-mentation-capacity first to ensure that we go about deriving ontologically-veridical meaningfulness-and-teleology. This is in reality the ultimate scientific insight as such an internal-dialectics/différance is articulated as of non-speculative, non-imaginary, theoretical, conceptual and operant scientific implications; and this is reflected in the very initiation of the postmodern paradigm with Heidegger's criticism of Hegelian dialectics, construed by this author as 'not founded-on-and-constrained-by ontological-veridicality/intrinsic-reality as of ontological-primemovers-totalitative-framework', but rather imagination and speculation. Anecdotally, the flatmindedness of a 'modern take' in failing to recognise the postmodern double-gesture reification will simply consider the blind men reporting of an elephant as a tree-trunk, a rope, a wall, a fan or a spear as 'postmodern madness' without factoring in the underlying double-gesture reification for perspective and insight, given the problematic of human limited-mentation-capacity that itself needs to be factored in and thus actually strengthen the human thought process in its aetiologisation/ontological-escalation. In the bigger scheme of things, such an internal-dialectics/différance is what explains the institutionalisation process as of

Being-development/ontological-framework-expansion and so-construed as suprastructuralism beyond just the specific interpretation of suprastructuralism as of postmodernism with respect to modernism. This internal-dialectics/différance as of successive transcendence-and-sublimity is behind the respective registry-worldviews/dimensions as of their given reference-of-thought specific neutering as well as the ultimate deneutering—referentialism of deprocrypticism. But then intellectual-bad-faith is equally elicited by ‘lack of social universal-transparency’ as of a cynicism of institutional-being-and-craft. The transcendental implications of a registry-worldview/dimension reference-of-thought ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ arises for instance in the sense that however ‘wishful’ the ontological-primemovers-totalitative-framework transcendental-possibilities/potential as of knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue and human emancipation potential/possibilities of a prospective registry-worldview/dimension like positivism as of its ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’, cannot avail to a prior registry-worldview/dimension like non-positivism/medievalism. In this regard the Copernicuses, Galileos and Diderots of their eras, and more explicitly Descartes in his direct construal of the positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising, would have certainly sensed that their specific knowledge conceptualisations wasn’t the more critical issue but rather their insistence was an implicit understanding that the non-positivistic ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ was structurally/paradigmatically a framework that wouldn’t be enabling for their positivistic and all other positivistic knowledge conceptualisations as of its prior relative-ontological-incompleteness-of-reference-of-thought. Such conflatedness imbued in postmodern-thought address more than just constitutedness implications of knowledge construction as articulated herein but equally points critically to intellectually decadent institutional dispositions and

practices where imprimatur and the dynamics of imprimatur by themselves are increasingly construed as of more critical epistemic pertinence for knowledge constructions undermining the possibilities of breakthroughs given that the primacy of intellectualism as of the pertinence of intellectual arguments increasingly takes a back seat, with intellectual postures increasingly defended with non-intellectualism obsession of ideologies of schools-of-thought as of institutional-being-and-craft. This manifests itself in the form of many an intellectual increasing disposition ‘to misunderstand’ others works, as there are little common stakes for breakthroughs but rather the stakes are increasingly of institutions academic visibility and tenure with emphasis on likeminded networks and forums driven increasingly by influence than carefree universal intellectual curiosity. Furthermore intellectualism has increasingly been surreptitiously mingling-and-yielding to social and economic interests undermining its obligation for enabling social clairvoyance, with a resultant sense of socioeconomic and socio-political impotence as such a blurriness is increasingly undermining the relevance of intellectualism in its public discourse and enlightenment mission. Ultimately, the epistemic and structural paradigm of academic institutional setups are not dissociated from the effective possibility for transcendental-enabling/existence-potency, especially as such breakthroughs require the spontaneity of Dionysian arrangements. This author’s construes of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought ‘reference-of-thought—devolving-teleological-structure-of-meaningfulness’ conceptualisation as of ontological-escalation or aetiologisation, with respect to our present positivism—procrypticism disjointedness-as-of-reference-of-thought, as the more fundamental transcendental issue for prospective ontological-primemovers-totalitative-framework transcendental-possibilities/potential beyond self-referencing-syncretism and circular palliative knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue with regards to attending to the inherent deficient

totalising/circumscribing/delineating reference-of-thought-devolving. However, ‘madeupness/bottomline of reference-of-thought beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought disposition in covert-shallow-limited-mentation-capacity-as-uninstitutionaled-threshold-denaturing-as-of-circular-complexification’ is bound to arise anew at the prospective institutionalisation reference-of-thought uninstitutionalised-threshold as of prior relative-ontological-incompleteness-of-reference-of-thought, thus requiring again prospective institutionalisation as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating conflatedness inducing social universal-transparency as of a new prospective institutionalisation reference-of-thought to further undermine-and-overcome the ‘madeupness/bottomline of reference-of-thought beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought disposition for covert-shallow-limited-mentation-capacity-as-uninstitutionaled-threshold-denaturing-as-of-circular-complexification’ with respect social-stake-contention-or-confliction. The reason why social universal-transparency has the ‘power’ for prospective institutionalisation in superseding uninstitutionalised-threshold lies in the fact that the ‘succession of premeaningfulness-as-psyche-of-existential-stake constructs’ idiosyncrasy as of human thrownness in existence that allowed for prior institutionalisations are inherently predicated on their successive social universal-transparency such that even at presence uninstitutionalised-threshold/uninstitutionalised-threshold, involving denaturing of categorical-imperatives/axioms/registry-teleology as wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives thus failing intemporal-preservation-entropy-or-contiguity—or—ontological-preservation as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, the supposedly implied assumption though false is one of social universal-transparency as all uninstitutionalised-thresholds-or-uninstitutionalised-thresholds-are-

overtly-unassuming-and-rather-parasitic-or-coopting-of-institutionalisation-in-false-representation-as-institutionalisation such that prospective social universal-transparency elucidation of prospective institutionalisation reflecting the inherent veridicality of the uninstitutionalised-threshold in its beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought collapses it. Thus the ‘notion of limited-mentation-capacity’ is basically the ‘underlying veridical human meaningfulness-and-teleology notion’ for which ‘ontologically-compromised-mediating,-as-of-their-specific-constitutedness consciousnesses flawed conceptualisation perspectives’ construed as ontologically-flawed constructs in terms-as-of-axiomatic-construct of ‘neuterising as of totalising/circumscribing/delineating reference-of-thought-devolving’ whether beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, and so elucidated from the ontological-normalcy/ontological-completeness-of-reference-of-thought perspective of deprocrypticism ‘referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness protensive-consciousness sound conceptualisation perspective’. In so doing, the latter reflects the limited-mentation-capacity dynamism of meaningfulness-and-teleology as of notional-deprocrypticism as well as temporal-to-intemporal individuations mental-dispositions, by way of deneuterising—referentialism, in lieu of neuterising. Thus this notion of human limited-mentation-capacity as the basis of différance/internal-dialectics/difference-deferral divulges ‘ontologically-compromised-mediating,-as-of-their-specific-constitutedness consciousnesses flawed conceptualisation perspectives’ and as of their ontologically-flawed constructs of neuterising, with regards to articulating teleological elevation-as-of-upholding-ontological-veridicality or teleological degradation-as-of-failing-ontological-veridicality respectively either as of conflatedness or ontological-destructuring-constitutedness. Basically, the construal/conceptualisation of human totalising–thrownness-in-existence/I-exist-therefore-existence-is-transcendental-

enabling/existence-potency-to-my-subpotency/hyperbole-of-temporal-to-intemporal-
 ontological-performance has always involved a disparateness-of-ontologically-construed-

 reflected as the divergent ontological-performances of the ontological-aesthetic-tracing’, all

occurring as of the conjoined dynamism of conflatedness and distractive-alignment-to-reference-of-thought. This overall disparateness-of-ontologically-construed-social-reality dynamism is reflected in ‘ontologically-compromised-mediating,-as-of-their-specific-constitutedness consciousnesses flawed conceptualisation perspectives’ as of their neuterising: wherein recurrent-utter-uninstitutionalisation has the deepest reference-of-thought/structural/paradigmatic as ‘impulsive—ontologically-compromised-mediating,-as-of-its-specific-constitutedness consciousness flawed conceptualisation perspective’ neuterising by its trepidatious-consciousness, while on the other extreme in contrast deprocrypticism rather has a reference-of-thought/structural/paradigmatic deprocrypticism ‘referentialism—ontologically-uncompromised-mediating,-as-of-conflatedness protensive-consciousness sound conceptualisation perspective’ that by its ‘reference-of-thought-devolving—différance/internal-dialectics/difference-deferral’ grasp the ontologically-veridical ‘underlying human limited-mentation-capacity dynamics of totalising/circumscribing/delineating reference-of-thought-devolving, and so without being subject to any neuterising’ as is the case with all ‘ontologically-compromised-mediating,-as-of-their-specific-constitutedness consciousnesses flawed conceptualisation perspectives’. Thus by its deneuterising—referentialism construed as of ontological-aesthetic-tracing, deprocrypticism enables a complete ontology-driven ‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics’, and so superseding a naïve metaphysics-of-presence affect-driven mented or stigmatic psychology rather as of a shallow perspective and vaguely articulated as of universal import. The idea here with regards to human transcendental-enabling/existence-potency/transcendence-and-sublimity, is that from a creative perspective: the notion of a given neuterising is equinominal/equivalent with a given presencing, and as this speaks of human limited-mentation-capacity prospectively-construed ontologically-flawed implications as of ontological-normalcy/post-

convergence. It is over this neuterising that human transcendental-enabling/existence-potency/transcendence-and-sublimity is achieved from the prospective notional-conflatedness of notional-deprocrypticism and so by deneuterising—referentialism, which is equinominal/equivalent to non-presencing. In other words the historial implications of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination is that ‘as of a less and less ontologically-flawed meaningfulness-and-teleology towards ontological-normalcy/post-convergence, ‘it projectively/anticipatorily brought about the successive registry-worldviews/dimensions totalising/circumscribing/delineating reference-of-thought-devolving’ as of their given neuterisation, construed as equinominal/equivalent with their successively given neuterising. From the above insight, transcendental-enabling/existence-potency/transcendence-and-sublimity, is attainable as of deneuterising, construed as equinominal/equivalent with deneuterising—referentialism as the notional-conflatedness of notional-deprocrypticism that produces the ontologically-veridical ontological-aesthetic-tracing. Ultimately, this sociohistorial disparateness-of-ontologically-construed-social-reality dynamism comes down to the limited/incomplete association of human ‘invention’ of organic-knowledge with the reflection of ‘this organic-knowledge underlying mental-disposition as of Being-development/ontological-framework-expansion rather defectively as of mechanic-knowledge construal in existential instantiations’, inducing prospective neuterising. This disparateness is increasingly closed-down along the institutionalisation process from recurrent-utter-uninstitutionalisation to positivism–procrypticism, with the underlying tenet for achieving futural Being-development/ontological-framework-expansion as of prospective deprocrypticism as preempting-of-disjointedness-as-of-reference-of-thought being a full and cogent reflection of ‘human construal of organic-knowledge’ with ‘the mental-disposition behind that construal of organic-knowledge for Being-

development/ontological-framework-expansion in existential instantiations’ thus resolving the open-ended-incompleteness/nonachievement-of-ontological-normalcy. Overall, such a notional conflatedness reference-of-thought/structural/paradigmatic—ontological-performance-including-virtue-as-ontology ‘performance-construct of candidity/candour-capacity’ can be garnered as of metaphysics-of-absence wherein across the successive registry-worldviews/dimensions a notional-deprocrypticism insight makes obvious that it is increasing ontological-normalcy/post-convergence by increasing prospective relative-ontological-completeness-of-reference-of-thought that underlies reference-of-thought/structural/paradigmatic—ontological-performance-including-virtue-as-ontology as a wholly internal process of conflatedness, highlighting ‘the concatenation of intemporal-projection inextricably with derived-denaturing-deprojections-in-distractiveness-of-intemporal-projection, with the former in relative longness-of-register-of-meaningfulness-and-teleology and the latter in relative shortness-of-register-of-meaningfulness-and-teleology/distractiveness’ that occurs at the individuation-level and is reflected in the registry-worldview/dimension-level by the concatenation of institutionalisation inextricably with uninstitutionalised-threshold as the former is in longness and the latter in shortness/distractiveness to the former. This conceptualisation of candidity/candour-capacity associated with deprocrypticism with regards to ‘ontological-dementation/dialectical-dementation stranding dialectics implications for reference-of-thought transcendence’ is in effect a ‘more profound-and-comprehensive notion of différance construed rather with respect to the defining reference-of-thought of meaningfulness-and-teleology as of prospective relative-ontological-completeness-of-reference-of-thought’ and can be qualified as ‘futural différance’ as of its suprastructural nature, and goes beyond the limits of a Derridean perspective of différance as ‘historial différance’ rather articulated from ‘presencing-as-prospective-relative-ontological-completeness-of-reference-of-thought

as based on ontological-faith-notion-or-ontological-fideism driven organic-knowledge as setting up the successive registry-worldviews/dimensions institutionalisations reference-of-thought in their respective all-pervasiveness of transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism axiomatic-construct of meaningfulness-and-teleology ‘superseding successive defining human finitudes as uninstitutionalised-thresholds/uninstitutionalised-thresholds towards attaining successive prospective relative-ontological-completeness-of-reference-of-thought as institutionalisations’. Such a construal of futural *différance* structurally/paradigmatically answers the Heideggerian *techne* concern as construed by this author of humankind thrown in the midst of the technical as utility while without ‘matching notional philosophically developed mindset/reference-of-thought for a coherent grasp and aligning with the organic mental origination as of ontological-faith-notion-or-ontological-fideism enabling that technical knowledge to arise-and-be-elevating-of-contemplation-and-Being in the very first place and prospectively’. But rather related to as of transcendence-unenabling-uninstitutionalised-threshold in alienation—as-inauthentic/poorly-objectified/poorly-desubjectified-as-objectified/ontological-bad-faith/nihilistic marked by incoherence of contemplative mindset/reference-of-thought development in the midst of the technical world as rather literally ‘hurling along’ prospectively prospectively-underdeveloped-Being-as-of-unexpanded-ontological-framework; and so as reflected by conflatedness projective-totalitative—implications as of ‘the concatenation of intemporal-projection inextricably with derived-denaturing-deprojections-in-distractiveness-of-intemporal-projection’. Consider a metaphysics-of-absence elucidation with regards to say a remote/isolated non-positivistic animist/base-institutionalisation society for instance which by some token has sustainable-and-learned access to basic but greatly enhancing productive techniques from travellers of a positivistic culture but without a substantial corresponding

organisational and institutional diffusion associated with such greatly enhancing productive techniques due to the very brief nature of the encounter or disconnected/incoherent/perfunctory/chaotic nature of their relations, this will structurally/paradigmatically have degenerative effect on such an animistic social organisation wherein this isn't enhancing of the society's social organisation and relations and will be possibly disruptive. This example isn't that farfetched as anthropological evidence of such cases abounds with many native societies so disrupted by culturally alienating positivistic material diffusion. Human material/technical development and corresponding mentality as of Being-development/ontological-framework-expansion are inextricable and critical across the institutionalisation process including our positivism–procrysticism registry-worldview/dimension. Inevitably the disparity of being thrown in the midst of technical development associated with 'the underdevelopment of Being construed herein as of individuation-level and registry-worldview/dimension-level disjointedness-as-of-reference-of-thought with respect to our positivism–procrysticism registry-worldview/dimension' is by itself a structural/paradigmatic basis for human vices-and-impediments whether at a micro-level interactional or macro-level social and political paradigm basis, notwithstanding our inclination for totalising–self-referencing-syncretising/circularity/interiorising/akrasitic-drag where what passes as profound is our temporal mortal-to-mortal acquiescing as social-aggregation-enabling rather than a sense of intersolipsistic intemporal projection of intrinsic-reality/ontological-veridicality; with mental-dispositions rather geared towards temporal extirpation paradigm as of constitutedness, rather than intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm as of conflatedness as enabling and upholding the institutionalisation process. Without the development of Being à la Heideggerian imagination the institutionalisation process itself

comes to a halt as of failing of Being transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism as implied by ontological-faith-notion-or-ontological-fideism driven organic-knowledge; as recurrent-utter-uninstitutionalisation ‘requires the transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism of Being’ as of rulemaking-over-non-rules to attain base-institutionalisation–ununiversalisation, which requires the same as of universalisation-directed-rulemaking-over-non-rules to attain universalisation–non-positivism/medievalism, which requires the same as of positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules to attain positivism–procrypticism, and which prospectively requires the same as of pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules to attain deprocrypticism! The notion of reference-of-thought/structural/paradigmatic—ontological-performance-including-virtue-as-ontology as being a wholly internal process of conflatedness, highlighting ‘the concatenation of intemporal-projection inextricably with derived-denaturing-deprojections-in-distractiveness-of-intemporal-projection, with the former in relative longness-of-register-of-meaningfulness-and-teleology and the latter in relative shortness-of-register-of-meaningfulness-and-teleology/distractiveness’, implied with regards to Being underdevelopment across the successive registry-worldviews/dimensions also speaks to how intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency behind the institutionalisation process can and is often usurped by erudite establishments by a nombrilistic elicitation of temporal mental-dispositions as to the commonsense/social-aggregation-enabling of a given registry-worldview/dimension as a denaturing construal in terms-as-of-axiomatic-construct that are

effectively divorced and subpar to the organic-knowledge as enabling the intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency of the institutionalisation process. The idea that intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency is only the panache of the technical as of the sciences and that there is no need for Being-development/ontological-framework-expansion to be instigative-and-be-elevating-of-contemplation-and-Being in complement as of human development is nothing less than a derogation that renders such an establishment erudition no different, as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, from the mediums, shamans, witchdoctors, dogmatic scholastics of prior registry-worldviews/dimensions as vested in their ‘circular-pervasiveness closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications’ rather than moving ahead of human blithe and their platitudes, and construing the real possibility of human emancipation as of a prospective opened-construct-of-meaningfulness-and-teleology; as the masses-defined-as-non-specialists can effectively be ‘tolerated’ to be ignorant as of the focussing possibility of human limited-mentation-capacity but that which is duty bound to a human Being-development/ontological-framework-expansion domain/specialism beyond-just-an-institutional-construct-but-existentially is morally-and-intellectually bound to spearhead the effective development of that Being domain/specialism and not be involved in dithering, and so as of an intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm.) Hence prelogism at worst implies an ad hoc problem of defect of logical-processing-or-logical-implication or defect of incidenting-as-social-performance of the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance, while

postlogism implies a fundamental defining being/existential/ontological/axiomatic-construct problem of perversion-of-reference-of-thought, that is inherently in circularity/recurrence/repetition/repeatability thus requires ontological-reconstituting. Postlogism is thus an expansive construct developing into conjugated-postlogism associated with endemising/enculturationg social psychopathy, as temporal-dispositions arrive at beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought perversion-and-derived-perversion-of-reference-of-thought as mental-dispositions finalities/determinations inducing disjointedness-as-of-reference-of-thought-as-misappropriated-meaningfulness associated with procrypticism.

Prelogism can be compared to the defect arising using a ‘correct measuring-instrument/apriorising/intelligibilitysetup’ (appropriateness-of-reference-of-thought-as-of-conflatedness) to ‘measure/aposteriorise/intelligise/logicise’ (to derive meaningfulness-and-teleology) but ‘using the apriorising/intelligibilitysetup/measuringinstrument/axiomatising wrongly’ (wrong logical-processing-or-logical-implication) which specifically speaks of the possibility of reusing the ‘same correct measuring-instrument/apriorising/intelligibilitysetup’ (same appropriateness-of-reference-of-thought-as-of-conflatedness) despite the specific measuring/aposteriorising/intelligising/measuring/logicising defect (specific wrong logical-processing-or-logical-implication), to ‘measure/aposteriorise/intelligise/logicise’ (to derive meaningfulness-and-teleology). While postlogism is akin to the ‘defect of the apriorising/intelligibilitysetup/measuringinstrument/axiomatising itself’ (perversion-of-reference-of-thought) besides the ‘specific act of measuring’ (logical-processing-or-logical-implication) in deriving ‘purposeful measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose’ (meaningfulness-and-teleology) that speaks to a fundamental flaw that is bound to circularly/repetitively/recurrently give ‘erroneous purposeful measurements-as-of-aposteriorising/intelligising/measuring/logicising-

purpose’ (defective-meaningfulness-and-teleology), thus speaking of a ‘fundamental apriorising/intelligibilitysetup/measuringinstrument/axiomatising defect in deriving purposeful measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose’ [as structural/paradigmatic denaturing construed as being/ontological/existential-defect or the registry-worldview’s/dimension’s–reference-of-thought-for-social-functioning-and-accordance defect or intradimensional-defect in deriving-meaningfulness-and-teleology, thus divulging a ‘reference-of-thought existentialism construct defect’ that is comprehensively rearticulated all across the ‘reference-of-thought existentialism construct’ i.e., construed variously as of the registry-worldview/dimension (meaningfulness ‘implied specific teleological differentiation/scission/variance/disambiguation’ based on ontological-completeness-of-reference-of-thought), as of the contending-reference (meaningfulness ‘implied teleological construct’), the ontological-reference (meaningfulness ‘implied being/existential construct’), the meaningful-reference (meaningfulness ‘implied contextualisation construct’), the anchoring-of-meaning (meaningfulness ‘implied operant construal’) and the apriorising–registry (meaningfulness ‘implied basic defining construct’ in terms-as-of-axiomatic-construct of logical-duedness/profile/presumptuousness/assumptions/value-reference/teleology).] This elucidation of postlogism in comparison with the implications of a defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising provides a comprehensive insight about the underlying perversion-of-reference-of-thought associated with postlogism-as-of-non-conviction and its social derivation as conjugated-postlogism/dementing-integration as of ontological-incompleteness-of-reference-of-thought. That apparently minor twitch in the ‘defective measuring-instrument/apriorising/intelligibilitysetup’ (perversion-of-reference-of-thought) is ‘a covert negative vista’ that wrongly undermines/dismantles ‘inherent/preceding intrinsic-reality/ontological-veridicality

‘imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity’s-
 reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-
 thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-
 that-remain of-existential-reality’ (from the perspective of the ‘dialectically-thinking-
 reference-of-thought as depth-of-thought’), and so because the perversion-of-reference-of-
 thought is existentially being related to as if it is of appropriateness-of-reference-of-thought-
 as-of-conflatedness with all the derived corresponding implications with respect to perverted
 representation of meaningfulness as well as degraded/dementing-teleological-differentiation
 implications, given that all the ‘apriorising–reference-of-thought-elements/apriorising–
 registry-elements (out of existential-contextualising-contiguity’s-reifying/elucidating-of-
 prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-
 instantiative-context)’ which are implied—logical-dueness-or-scape/profile-or-
 stature/presumptuousness-or-arrogation/assumptions/value-reference/teleology
 falsely/deceptively induced by the perversion-of-reference-of-thought (defect of the
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising itself) lead to a first-order
 faulty-mentation-procedure-deception-or-urge as perversion-and-derived-perversion-of-
 reference-of-thought (inappropriateness of the defective
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising and the derived uses) and
 which subsequent implications then go on to induce a second-order level wrongly implied
 deception of logical-processing-or-logical-implication of infinite deception possibilities
 with respect to the infinite possibilities of ‘perfect logical-processing-or-logical-implication’
 on the false basis of the perversion-and-derived-perversion-of-reference-of-thought (infinite
 possibilities of errors arising measuring/aposteriorising/intelligising/measuring/logicising
 with a defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising and the
 derived uses) for producing ‘meaningfulness-and-teleology’ (purposeful measurements-as-of-

aposteriorising/intelligising/measuring/logicising-purpose) based on the perversion-and-derived-perversion-of-reference-of-thought (defect of the apriorising/intelligibilitysetup/measuringinstrument/axiomatising itself and its derived uses). Just as fundamentally not resolving the defect of a apriorising/intelligibilitysetup/measuringinstrument/axiomatising induces systematically a circularity/recurrence/repetition/repeatability of ‘erroneous purposeful measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose’ in the overall enterprise that the measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose are put to (say architectural for instance) and so ‘reflected as dementing/unsoundness-or-inauthenticity-of-reference-of-thought’ in relation to ‘appropriate purposeful measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose’ reflected as dialectically-thinking/soundness-or-authenticity-of-reference-of-thought, likewise perversion-of-reference-of-thought related to as being of appropriateness-of-reference-of-thought-as-of-conflatedness wrongly undermines/dismantles the ‘existential meaningfulness-and-teleology’ implied by ‘inherent/preceding intrinsic-reality/ontological-veridicality ‘imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality’ (from the perspective of the ‘dialectically-thinking-reference-of-thought as depth-of-thought’), and such perversion-of-reference-of-thought is ‘reflected as dementing/unsoundness-or-inauthenticity-of-reference-of-thought’ in relation to veridical ‘existential meaningfulness-and-teleology’ reflected as dialectically-thinking/soundness-or-authenticity-of-reference-of-thought. The critical importance of highlighting ‘inherent/preceding intrinsic-reality/ontological-veridicality’ here as ‘imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity’s-

reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-
 thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-
 that-remain of-existential-reality' (from the perspective of the 'dialectically-thinking-
 reference-of-thought as depth-of-thought') has to do with the fact that the language (say
 technical terminology for architecture) for construing meaningfulness-and-teleology
 (purposeful architectural measurements-as-of-
 aposteriorising/intelligising/measuring/logicising-purpose) is equally available to both the
 appropriateness-of-reference-of-thought-as-of-conflatedness (correct measuring-
 instrument/apriorising/intelligibilitysetup) and the perversion-of-reference-of-thought
 (defective measuring-instrument/apriorising/intelligibilitysetup) for expression as logical-
 processing-or-logical-implication (measuring) due to the 'covert negative vista' of the
 perversion-of-reference-of-thought as well as derived-perversion-of-reference-of-thought
 (derived relation to the defective
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising as correct measuring-
 instrument/apriorising/intelligibilitysetup). Thus technically speaking all elocution associated
 with the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising
 measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose (perversion-
 and-derived-perversion-of-reference-of-thought), as meaningfulness-and-teleology is
 structurally dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-
 caricaturing, from a ontological-normalcy/post-convergence perspective. The implication
 being that structurally reference-of-thought (as axiomatic-construct) in effect protracts into
 meaningfulness-and-teleology with appropriateness-of-reference-of-thought-as-of-
 conflatedness structurally/paradigmatically implying 'appropriate meaningfulness-and-
 teleology of reference', perversion-of-reference-of-thought structurally/paradigmatically
 implying 'perverted meaningfulness-and-teleology of reference' and derived-perversion-of-

reference-of-thought structurally/paradigmatically implying ‘derived-perverted meaningfulness-and-teleology of reference’. (Hence the circular-pervasiveness reflex by which a registry-worldview always resets its meaningfulness-and-teleology as neuter/conviction/dialectically-thinking and so even at the point of its underlying demonstrated incompleteness-of-reference-of-thought behind its perversion-and-derived-perversion-of-reference-of-thought is nothing but ‘a flawed totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag exercise’, and revealed so by the prospective/transcending/superseding registry-worldview.) This technically highlights two issues, the inherent perversion-of-reference-of-thought and the registry-worldview/dimension ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought, that induces a derived-perversion-of-reference-of-thought; in the sense that while an ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought as the non-positivistic/medieval mindset/reference-of-thought will certainly be enabling for a non-positivistic/medieval type of perversion-of-reference-of-thought like notions-and-accusations-of-sorcery to arise in circularity/recurrence/repetition/repeatability (as-of-‘perversion-and-derived-perversion-of-reference-of-thought -as-uninstitutionalised-threshold-circularity/subtransversality’) in a non-positivistic/medieval social-setup, a positivistic mindset/reference-of-thought prospective relative-ontological-completeness-of-reference-of-thought makes it impossible by its ‘rational-empiricism/positivising totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology) reference-of-thought’, likewise a mindset/reference-of-thought of procrypticism/disjointedness-as-of-reference-of-

thought is all too ready to endemise/enculturate the possibility of psychopathy and social psychopathy arising in circularity/recurrence/repetition/repeatability (as-of-‘perversion-and-derived-perversion-of-reference-of-thought -as-uninstitutionalised-threshold-circularity/subtransversality’) given its ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought such that it is a mindset/reference-of-thought of deprocrypticism-or-pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-⟨as conflation of apriorising/intelligibilitysetup/measuringinstrument/axiomatising⟩ (also referred to as deprocrypticism-or-pre-empting-procrypticism-or-object-recomposuring-ontologising), in pre-emption of procrypticism, so construed by ‘deprocrypticism ontologically-perspectival-elevated/pedestaling-as-dialectically-thinking-teleological-differentiation-as-of-supratransversality’, by its totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology) of reference-of-thought’ that is effectively the structural/paradigmatic ontological resolution given its ontological-completeness-of-reference-of-thought. This notion of human growing/developing prospective relative-ontological-completeness-of-reference-of-thought as of reducing-epistemic-abnormalcy from recurrent-utter-uninstitutionalisation, base-institutionalisation, universalisation, positivism and prospectively deprocrypticism, as successive totalising–renewing-realisation/re-perception/re-thought of the construal/conceptualisation of the same ontological-veridicality/intrinsic-reality going by human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination, can effectively be construed as a maximalising-recomposuring-for-

relative-ontological-completeness/transvaluating ‘successive shifting in the curve-of-prospective-relative-ontological-completeness-of-reference-of-thought of human meaningfulness-and-teleology’ (rather than a naïve construal based on incrementalism-in-relative-ontological-incompleteness as successive additions which will wrongly imply an improvement along the same ‘curve-of-prior-relative-ontological-incompleteness-of-reference-of-thought of human meaningfulness-and-teleology’) wherein going by the apriorising/intelligibilitysetup/measuringinstrument/axiomatising as reference-of-thought comparison, the implication is one of successive ‘transformative measuring-instruments/apriorising/intelligibilitysetup’ (successive transformative references-of-thought) undertaking respectively the measuring/aposteriorising/intelligising/measuring/logicising (as logical-processing-or-logical-implication) of the same inherent existential-reality but with ‘respective dramatic changes in the measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose’ (as dramatic changes in meaningfulness-and-teleology from the successive registry-worldviews/dimensions references-of-thought), together with an underlying recurrent postlogism-as-of-non-conviction issue with the successive registry-worldviews/dimensions references-of-thought as of their prospective relative-ontological-completeness-of-reference-of-thought (due to ‘least-and-derived-temporal-operating-modalities-of-the-reference-of-thought-as-of-incrementalism-in-relative-ontological-incompleteness-inducing-the-uninstitutionalised-threshold’); highlighting the notion of defectiveness in successive transformative measuring-instruments/apriorising/intelligibilitysetup/measuringinstrument/axiomatising as corresponding to perversion-and-derived-perversion-of-reference-of-thought /postlogism-and-conjugated-postlogism as of prospective relative-ontological-completeness-of-reference-of-thought. Consider for instance (with regards to human growing/developing prospective relative-ontological-completeness-reference-of-thought), the transformation of

meaningfulness-and-teleology associated with astronomical instruments, as objects for religious calculations such as astrolabes to the development of telescopes today rather for advanced astronomical science mirroring a corresponding human totalising–renewing–realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology) as of the successive institutionalisations. [This explains the peculiar mimetised-dementing placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology we’ll construe for instance of a non-positivistic/medieval mindset/reference-of-thought that doesn’t register positivistic meaningfulness reference-of-thought and likewise prospectively such a construal will have our present placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology as of priorly unsoundness-or-inauthenticity-of-reference-of-thought/dementing by its positivism–procrypticism reference-of-thought. Just as the very nature of existential-reality by our limited-mentation-capacity-(as of relative constitutedness towards relative conflation) construal/conceptualisation of it is rather ‘an uncompromising windedness/foldedness susceptible to our limited-mentation-capacity-(as of relative constitutedness towards relative conflation) virtuality-or-ontologically-flawed-construal as decontextualising/unimbricating/unrecomposuring of its inherent nature’, correspondingly the exercise of ontologically-veridical reasoning is rather maximalising-recomposuring-for-relative-ontological-completeness/transvaluating. Correspondingly, from the vantage position of our present positivising/rational-empirical ontological-completeness-of-reference-of-thought with respect to a non-positivistic/medieval worldview, we can garner an insight of dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing of the postlogism-and-conjugated-postlogism in a non-positivistic/medieval setup, wherein faced with arguments of the sort who is the sorcerer, how are they using their sorcery, etc.,

speaking of the non-positivistic/medieval ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought (given that sorcery doesn't exist, going by the insight of positivistic prospective relative-ontological-completeness-of-reference-of-thought whereas the non-positivistic/medieval registry-worldview/dimension is ridden with a whole complexity of dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing construct of notions-and-accusations-of-sorcery meaningfulness-and-teleology as its paradigm of circularity/recurrence/repetition/repeatability (perversion-and-derived-perversion-of-reference-of-thought -as-uninstitutionalised-threshold-circularity/subtransversality). This insight can equally be drawn prospectively in our positivism–procrysticism registry-worldview/dimension faced with its postlogism-as-of-non-conviction like psychopathy and social psychopathy. This speaks of the very nature of all hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing with regards to the limits of an institutionalisation (whether base-institutionalisation, universalisation and positivism eliciting respectively the uninstitutionalised-thresholds of ununiversalisation, non-positivism/medievalism and procrysticism) across all the institutionalisation process wherein the prior/transcended/superseded registry-worldview's/dimension's reference-of-thought in its totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag (as metaphysics-of-presence: illusion-of-the-present/present-consciousness/mirage) is representing itself as 'dialectically-thinking and dialectically/contendingly in-phase' whereas from the prospective institutionalisation registry-worldview's/dimension's reference-of-thought, as of the ontological-normalcy/post-convergence perspective, it is 'dialectically-dementing and dialectically/contendingly out-of-phase'. The reason for the ontologically defective totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag is

that all registry-worldviews/dimensions reference-of-thought ‘tend to convention’ and in so doing close the ‘existential frame-of-ontology/meaningfulness (which is the transcendental-enabler/existence-potency)’ in their conventioning, and thus to the exclusion of prospective ontological profoundness of reference-of-thought. Thus all registry-worldviews/dimensions had hitherto been closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications. However human existential closure of meaningfulness as conventioning doesn’t supersede but is rather superseded by existential ontological-veridicality, explaining the susceptibility of registry-worldviews/dimensions references-of-thought to be transcended/superseded with human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination expansion of ontological-depth as increasing ontological-completeness-of-reference-of-thought (or reducing ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought). Existential closure of meaningfulness as conventioning induces psychically a registry-worldview/dimension ‘exclusive representing’ of itself as as ‘candored and straight’ with respect to meaningfulness-and-teleology whereas its transcending/superseding by the prospective registry-worldview/dimension exposes psychically that it is rather ‘decandored and oblongated’ with respect to more profound prospective/transcending/superseding meaningfulness-and-teleology. A further example will be say ‘the God of plane’ type of articulation wherein such a base-institutionalisation as of animistic social-setup which is not positivistic (not the case of non-positivistic as medieval) is psychically ‘candored and straight’ with itself in totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag (its metaphysics-of-presence) and goes on articulating meaningfulness-and-teleology even in the new existential

transcendental/superseding contextualisation in terms-as-of-axiomatic-construct of the doubly-prior/transcended/superseded base-institutionalisation/animistic registry-worldview/dimension. Given such a state of totalising–self-referencing-syncretising, the notion of generating meaningfulness-and-teleology from the ontological-normalcy/post-convergence perspective priorly implies a requisite psychoanalytic-unshackling/memetic-reordering/institutional-recomposure, and so by maximalising-recomposuring-for-relative-ontological-completeness/transvaluating. While excluding any exercise of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity since the latter is only appropriate in the instance of prospective relative-ontological-completeness-of-reference-of-thought; as the base-institutionalisation (animistic) prior relative-ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought puts into question the very first and absolute apriorising/intelligibilitysetup/measuringinstrument/axiomatising of meaningfulness-and-teleology (‘existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality construed as of increasing human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination in the apriorising/axiomatising of ontological/meaningfulness-and-teleology construal’) with respect to the base-institutionalisation (animistic) registry-worldview’s/dimension’s implied as structural/paradigmatic denaturing construed as being/ontological/existential-defect or the registry-worldview’s/dimension’s–reference-of-thought-for-social-functioning-and-accordance defect or intradimensional-defect. Equally we can imagine that making a positivistic argument in the midst of a non-positivistic/medieval

setup will seem ‘deranged’ from their perspective and their mental orientation will be geared to their traditional sense of meaning and living as absolutely defining, but then the ‘center’ had moved from their world (from non-positivistic as base-institutionalisation/animistic or medieval dialectically-dementing decenter) to the positivistic world (as dialectically-thinking center). Likewise such a suprastructural articulation of our positivism–procrysticism relationship to its postlogism that includes psychopathy and social psychopathy will apparently not make any sense to our present but then ontologically our present is now decentered as dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing, though our mental-reflex will be a traditional sense of meaning and living as perfect, as well. However, to the extent that it is ‘not such totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag temporal/shortness-of-register-of-meaningfulness-and-teleology inclinations’ that drove human institutionalisations and resolved uninstitutionalised-thresholds from recurrent-utter-uninstitutionalisation to base-institutionalisation–ununiversalisation to universalisation–non-positivism/medievalism to positivism–procrysticism (as by reflex the temporal mental-disposition will rather be inclined to temporal (shortness-of-register-of-meaningfulness-and-teleology) extirpation in any registry-worldview/dimension with no upholding of transcendental possibilities), to that extent the intemporal-disposition should rather construe/conceptualise its intemporal-disposition as the tip of human transcendental institutionalisation possibility and thus inherently that it transversally takes precedence over human temporal complexes (and such a ‘transversal confliction’ resolved intemporally by prospective ontological-primemovers-totalitative-framework and second-naturing. This actually explains the inevitable contrariety involved in the making of transcendental human progress involving a prior/transcended/superseded reference-of-thought and a prospective/transcending/superseding reference-of-thought; given the blunt fact that ‘there is

no temporal-intemporality' and pretences of inevitability of human progress without need for intemporal projection are falsehoods 'arising as temporal/shortness-of-register-of-meaningfulness-and-teleology distraction' with respect to the institutionalising/intemporalising constraining effect of intemporal/longness-of-register-of-meaningfulness-and-teleology projections.). Critically, the notion of transcendence and transcendental-enabler/existence-potency associated with intemporality and institutionalisation/intemporalisation as of its very defining core is rather one of ontological-primemovers-totalitative-framework as it propounds the supersedingness/primacy/ascendency of intrinsic-reality as a the-Good/understanding/knowledge-driven construct over human 'good-naturedness'/impression-driven constructs as well as social-aggregation-enablers. The idea being that ontological-primemovers-totalitative-framework is much more than a notion associated with the positivistic registry-worldview/dimension (as has naively been traditionally implied) but is a central heuristic drive in defining and structuring meaningfulness-and-teleology in all prior registry-worldviews as well however relatively inefficient; given that with corresponding shallow to limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination, as institutionalising ontological-primemovers-totalitative-framework successively induce more and more profound 'mimetic-echoness to ontological-normalcy/post-convergence' as of the full-potency of existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency. (Consider the case with ancient Egyptians and even ancient Greeks where their relations with their deities were closely related to the fortune they expected on an empirical basis whether with respect to such occurrences like droughts, warfare, etc. which technically speaking is a rational allocation as ontological-primemovers-totalitative-framework of meaningfulness-and-teleology going by their limited-mentation-capacity-(as of relative

constitutedness towards relative conflation)). Transcendence and transcendental-enabling/existence-potency as so construed is more than just a vague notion of dialecticism but one that recognises on an effective reality basis that human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination implies more and more profound reconstruals/reconceptualisations (totalising–renewing-realisation/re-perception/re-thought) inducing transformative implications with respect to meaningfulness-and-teleology as transcendence. As knowledge conception as contrasted to sovereign conception, ‘transcendence and transcendental-enabling/existence-potency doesn’t recognise any human discreet primacy with respect to intrinsic-reality/ontological-veridicality’ but rather intrinsic-reality is the inherent purveyor of pertinence and primacy. For instance, we don’t have a choice in deciding that gravity is about 9.8 m/s^2 on earth since intrinsic-reality imposes that idea and the corresponding knowledge construction and organisation where intrinsic-reality is ascendant is rather based on an ‘intemporality-asymmetric-subsumption-of-temporality’, for relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency. This is not to be confused with sovereign constructions and organisations driven by human sovereign choices such as political choices or marketing choices or other sovereign choices based on practices and habits. The latter are social-scientific (besides the previous notion of social-scientific referring to intrinsic social reality transcendental-enabling/existence-potency), with respect to transcendental-enabling/existence-potency construals/conceptualisations only as of existence-in-its-mimetic-echoiness as inclusive of the human condition, i.e., human existential sovereign choices of meaningfulness-and-teleology as ontological construals ‘not in terms of the inherent intrinsic-reality/ontological-veridicality of the meaningfulness-and-teleology itself’ but ‘rather as of the veracity/ontological-pertinence of the reality of the human sovereign choices as of themselves as humans value

them independent of their inherent intrinsic-reality/ontological-veridicality as ontologically
 construing the reality of human condition', and so with respect to historicity, politicisation
 and other social choices like moralisation, cultural value, economic value, etc. This
 distinction is critical because very often sovereign choices as conventions will tend to be
 acted upon as if these were transcendental knowledge of intrinsic-reality/ontology construal
 of the social in a wrong equivalency, and further because the transcendental-
 enabler/existence-potency as of the intrinsic-reality/ontology construal of the social is more
 fundamental as the tool for 'creating/inventing-and-destroying/deconstructing conventions'
 for more and more profound grasp of intrinsic-reality/superseding-oneness-of-ontology as of
 human subpotent knowledge. Sovereign constructs can as such be construed beyond-the-
 consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought to
 stifle the possibility of intrinsic-reality/ontology of the social, construed as
 ontology/ontological-veridicality transcendental-enabling/existence-potency knowledge, from
 arising. This insight explains why all deferential-formalisation-transference are only of
 pertinence as they justify and are derived from relative intrinsic-reality/ontological-
 veridicality transcendental-enabling/existence-potency conceptualisations, and collapse when
 they fail that test. For instance, notions such as arguments from authority are useful in
 ensuring social efficacy but when authority is demonstrated as relatively fallacious, it then
 has no pretence to the sanctity of not being undermined. Ultimately, the veridical nature of
 knowledge beyond 'institutionalised-being-and-craft' (as established by prior transcendence)
 to prospective transcendence is not as an exercise of 'logical mere convincing' as of social-
 aggregation-enabling about what is knowledge and appropriate, but rather as a critical
 exercise of channelling of relative intrinsic-reality/ontological-veridicality transcendental-
 enabling/existence-potency as second-naturing institutionalisation percolation to elicit the
 necessary positive-opportunism for prospective institutionalisation as skewing

('intemporality-asymmetric-subsumption-of-temporality', for relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency) towards the intemporal/longness-of-register-of-meaningfulness. The fact is as construed by the Galileos, Corpernicus, Diderots and others of the world, transcendental knowledge (as relatively 'consecrated' by relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency) necessarily carries a 'cynicism-of-grandeur-as-of-effective-intemporal-solipsistic-commitment' to deal with the reality of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor (and so as of 'circular-complexification'/perpetual-reinstitutionalisation as a result of the same human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor mental-dispositions across all the successive institutionalisation process registry-worldviews/dimensions). In the bigger scheme of things, as of the 'deepest phenomenological transcendental-point-of-departure handle as of the notional-conflatedness of notional-deprocrypticism deneuterising—referentialism' reflected by metaphysics-of-absence in the conception of meaningfulness-and-teleology ontological-performance as of the transcendental implications of the institutionalisation process of knowledge-constructs/theories/intersolipsistic-intercessory-notions/notional-referential-notions/articulations/virtue, we can appreciate that the successive registry-worldviews/dimensions conventioning are increasingly ontologically-driven in their value construct as it is more and more profound ontological-veridicality that enables human transcendence and the institutionalisation process in the first place; with the deprocrypticism institutionalisation conventioning supposedly attaining absolute ontological grounding. The insight here is that the relative pure ontology-drive of a Socrates philosophical clairvoyance superseding Athenian society conventioning limits but then with

the latter perceiving in totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag its conventioning limits as absolutely ontological, Socrates is paradoxically construed as ontologically-impertinent and thus accused of heresy. Such an argument can also be extended to say a Copernicus or a Galileo whose relative pure-ontology drive advocating a heliocentric universe in medieval society comes against medieval society scholastics dogmatism conventioning limits but then with the latter perceiving in totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag its conventioning limits as absolutely ontological, Copernicus and Galileo are paradoxically construed as ontologically-impertinent. This highlights that a registry-worldview’s/dimension’s construes in totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag its conventioning limits as being the absolute ontological determinant of meaningfulness-and-teleology ontological-performance, and that meaningfulness-and-teleology as of relative pure ontology superseding it is paradoxically construed as ontologically-impertinent. This is relevant with regards to the ‘intellectual projection’ choices made as of their transformative implications on society; wherein such highly unconventional thinkers like Diderot of more dramatic social transformation implications are actually less appreciated as of the totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of their epochal society conventioning limits naively construed by mental-reflex as the absolute ontological determinant of meaningfulness-and-teleology ontological-performance, over similar thinkers whose thought are more forthcoming towards such societal conventioning limits. As of relevance to futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought with regards to our positivism–procrypticism, such a phenomenological transcendental-point-of-departure handle reflected by metaphysics-of-absence for the conception of meaningfulness-and-teleology

ontological-performance is necessarily ‘suspicious’ of our presence society ‘conventioning-limits’ in its beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought naively construed totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag mental-reflex as the absolute ontological determinant of meaningfulness-and-teleology ontological-performance, with regards to its capacity of appreciating prospective relatively profound pure-ontology as herein implied that paradigmatically/structurally supposedly supersedes our positivism–procrypticism registry-worldview’s/dimension’s institutionalisation reference-of-thought. This explains why fundamentally most human transcendental ideas of progress have been outlier ideas which ‘proponents ultimate purpose (beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought)’ weren’t fundamentally a ‘direct convincing’ of humans exercise as of social-aggregation-enabling but rather in projecting a big picture of the-Good/understanding/knowledge-drive as of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency, however unintelligible, as a prospective institutional percolation-channelling exercise as validated by ultimate ontological-primemovers-totalitative-framework with subsequent corresponding formalisation and second-naturing. The point of this construal/conceptualisation is inevitably equally along the same lines. In fact, it can be further contended going by the reality of human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions–existentialism-form-factor that ‘human knowledge is necessarily a second-naturing construction’ and not an ‘intemporal disposition construction’ as the latter will wrongly imply that we are only intemporal-as-longness-of-register-of-meaningfulness-and-teleology, which is obviously false since we are temporal-to-intemporal by our mental-disposition and our virtue with the Deprocrypticism registry-worldview/dimension

institutionalisation is actually to understand (as knowledge/the-Good) this and paradoxically be superseding in that respect by a pivoting/decentering psyche and institutionalisation, and not an artificial projection that is not real and hence will be ineffective and circular as hollow-staging-and-performance or apriorising/intelligibilitysetup-caricaturing. Thus human knowledge is a dynamic second-natured construct in upholding-and-vouching for the intemporal while pre-empting of the temporal, and so beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. [The notion of ‘beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought’ as used herein goes beyond the notions of ‘consciously’ or ‘unconsciously’ as we normally understand them, in the sense that ‘beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought’ speaks of the mental state as of hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing by its ontological-incompleteness-of-reference-of-thought at the point of uninstitutionalised/unintemporalised/solipsistic/recomposuring/animality-thresholds-of-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation (also referred to as ‘uninstitutionalised-threshold’) where the mental-disposition/mindset/reference-of-thought is rather emphasised as being in ‘a state of relative incapacity’ rather than one of full-conscious-capacity but neither full-unconscious-capacity mental-disposition. Thus unlike just ‘conscious’ or ‘unconscious’, the notion of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought implies ‘conscious’ and/or ‘unconscious’ as of hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing at the uninstitutionalised-threshold of a registry-worldview/dimension whether with regards to retrospective or prospective transcendental analysis. For instance say in a non-positivistic as medieval or animistic/base-institutionalisation social-setup someone accused another of sorcery. It is hardly the case that we can absolutely say they committed a

conscious immoral act with their accusation of sorcery since the ontological-completeness-of-reference-of-thought as knowledge-framework available to them doesn't enable their full conscious appraisal of such a judgment call as they are in an insecure-certitude-by-incertitude-and-virtue-by-vice-mental-flux with notions-and-accusations-of-sorcery. However, supposed they adopted such an attitude not only by such ignorance but rather affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, then they are effectively relatively conscious with respect to their action as a dishonest/deceitful/immoral act even though beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. Of course, where supposed someone from a positivistic social-setup found themselves in such a non-positivistic social-setup and equally proffered such an accusation of sorcery, then their conscious immorality is fully engaged as being in full-conscious-capacity with respect to their deception going by their positivistic prospective relative-ontological-completeness-of-reference-of-thought that supersedes superstitions including notions-and-accusations-of-sorcery. By extension, psychopathic/postlogical induced deception can only be construed as beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as when eliciting ignorance (as of 'lack of constraining social universal-transparency of the psychopath's mental-disposition of postlogism-(perverted-outcome-sought-precedes-existentially-veridical-logical-dueness)), and while construed as beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as when eliciting affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, is not disculpating. Ultimately, going by the very decisiveness of ontological-incompleteness-of-reference-of-thought, as it leads to 'lack of constraining social universal-transparency, associated with the

successive uninstitutionalised-threshold states, the notion of ‘human beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought’ is actually in the bigger picture the larger determinant of manifest human vices-and-impediments as of virtue-as-ontology conceptualisation, speaking fundamentally of the specific registry-worldviews/dimensions ‘as structural/paradigmatic denaturing construed as being/ontological/existential-defect or the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance defect or intradimensional-defect’ inherent with the state of recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism. Whereas the notion of human conscious vices-and-impediments as of ‘defect of logical-processing-or-logical-implication’ or defect of incidenting-as-social-performance of the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance is mostly able to arise incidentally ‘within the scope’ of underlying ‘as structural/paradigmatic denaturing construed as being/ontological/existential-defect or the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance defect or intradimensional-defect’ as beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought of the registry-worldview/dimension uninstitutionalised-threshold; as social universal-transparency is a strong inherent deterrent of human temporality and enabler of human intemporality (explaining why knowledge is truly virtue), even though at the uninstitutionalised-threshold of such knowledge-as-virtue arises the temporal-dispositions denaturing its categorical-imperatives/axioms/registry-teleology for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation. This nature of ‘as structural/paradigmatic denaturing construed as being/ontological/existential-defect or the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance defect or intradimensional-defect’ as induced beyond-the-consciousness-awareness-teleology-in-

existential-extirpation-as-of-existential-unthought as of registry-worldview/dimension
 uninstitutionalised-threshold explains why fundamentally issues of reference-of-thought
 defect or perversion-of-reference-of-thought point more decisively/fundamentally as to their
 resolution as aetiologisation/ontological-escalation towards the need for ontological-

 institutionalisations-over-corresponding-uninstitutionalisation as of base-institutionalisation-
 over-recurrent-utter-uninstitutionalisation, universalisation-over-ununiversalisation,
 positivism-over-non-positivism/medievalism and prospectively deprocrypticism-over-
 procrypticism. Thus structurally/paradigmatically, this is the supratransversality associated
 with intemporality and construed as ‘intemporality-asymmetric-subsumption-of-temporality’
 since it is ‘not equable’ with the narrowness as temporal/shortness-of-register-of-
 meaningfulness-and-teleology in intradimensional construal of meaningfulness-and-teleology
 but projects directly in grasping fundamentally the issue of ontological-incompleteness-of-
 reference-of-thought and the corresponding virtue-as-ontology implications; as insightfully,
 an arising issue of accusation of sorcery in non-positivism as medieval or animistic setting is
 more fundamentally/structurally/paradigmatically as of aetiologisation/ontological-escalation
 a question of their ontological-incompleteness-of-reference-of-thought as it
 endemises/enculturates such notions as its vices-and-impediments and the same approach
 applies to our state of positivism–procrypticism involving disjointedness-as-of-reference-of-
 thought-as-misappropriated-meaningfulness-and-teleology as it endemises/enculturates
 perversion-of-reference-of-thought of positivistic meaningfulness as vices-and-impediments
 requiring its pre-emption by futural Being-development/ontological-framework-expansion as
 of prospective deprocrypticism institutionalisation.] This effective realism is the requisite
 insight in understanding how supposedly outlier transcendental notions of intemporality in
 successive epochs become dominant notions of human knowledge and institutionalisation by

giving man access to relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency. Further along this rational-realism line of thinking, the fact is paradoxically that as more cuttngly demonstrated with ‘cultural diffusion driven transcendence’, the mechanism of transcendence is not a simplistic transference from a more ontologically-completeness-of-reference-of-thought registry-worldview to a lesser one. Surprisingly, the lesser one is actually in the position of determination in the contention for transcendence, and it is the competitiveness of ideas that are more ontologically-complete and ontologically inducing untenability/internal-contradiction/internal-incoherence/institutional-constraining and inconsistency that initially leads to the syncretising-denial towards the path of its transcendence; as notions and ideas of the prospective reference-of-thought gradually creep over those of the prior reference-of-thought. (This should be distinguish from the case of the transference of ideas where there is a common reference-of-thought, for instance, the-theory-of-relativity and quantum-mechanics are spectacular developments from Newtonian physics but they still share the same common reference-of-thought of positivism/rational-empiricism enabling the new theories to be quickly adopted within the mechanism of the common reference-of-thought in terms-as-of-axiomatic-construct of psychical and institutional orientation). Consider in this regard the case in an animistic social-setup wherein failure to be cured from the traditional healer tempts individuals in that setup as a matter of life and death to approach the newcomers of a positivistic registry-worldview/dimension, and with a successful cure sowing doubts about animistic tradition relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency, and with various other such positivistic outcomes inducing in the middle to long run further syncretising-denial of thought; as explanations for the cure will still be advanced in terms-as-of-axiomatic-construct of the old reference-of-thought (giving human natural predisposition to social-aggregation-enabling) but increasingly ridding such

explanations of their credible substance until there is critical transference into the new registry-worldview's/dimension's reference-of-thought. Syncretising-denial is actually the process by which transcendental meaningfulness, as of prospective/transcending/superseding registry-worldview reference-of-thought, is institutionalised; underlying the essential contiguity of human mental-disposition across all registry-worldviews/dimensions. This equally highlights a superficiality-of-inherent-sanctimony displayed by succeeding institutional-cumulations/institutional-recomposures, which may wrongly imply being out of the scope of human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, and thus fundamentally undermine ontologically-veridical analysis where exceptionalism is adhered to instead of the mediocrity principle. This quite sums up the syncretising-denial mechanism by which outlier transcendental ideas (transcendental in terms-as-of-axiomatic-construct of putting in question the prior totalising/circumscribing/delineating reference-of-thought-devolving, beyond just novel ideas within the same reference-of-thought), whether by diffusion or internal transformation, come to be dominant when ontologically pertinent; as even the 'moulting' intellectual/emancipator, beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, is coming from a point of habitation with prior traditional ideas (consider the case of Newton with alchemic notions), wherein acceptance of the new ideas they are purporting only comes after an unconscious process of suspicion and denial of such nagging new ideas until they arrive at a firm point of conviction before admitting to themselves the possible veracity/ontological-pertinence of the ideas, and so as their very own syncretising-denial which makes it unsurprising that even socially syncretising-denial is a necessary process for the ultimate acceptance of prospective ontological-primemovers-totalitative-framework as this subsumes-as-supplant-(as-of-the-more-profound-construal-of-existential-contextualising-

contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context) the prior ontological-primemovers-totalitative-framework. It is hardly the case of just a direct intemporal sense of meaningfulness-and-teleology transference of transcendental notions. The bigger point being that the construal/conceptualisation of transcendental ideas is not necessarily validated by their immediate recognition, a notion the would-be intellectuals/emancipators should be of a 'presencing consummated/forfeiting posture', but rather as providing fodder in the competitive ideas assuring human progress with emphasis rather with respect to cross-generational import (prospective-institutionalisation totalising-renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising-psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology) as enabled by psychoanalytic-unshackling/memetic-reordering/institutional-recomposure). It is doubtful that Galileo or Diderot and others of their inclination were naïve to think that their initiatives will immediately lead to a positivistic transformation of society but they certainly had a cynical sense of cross-generational purposefulness (whether beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought). This equally explains why in all epochs, however different the nature, there is an inherent temporal mental-disposition abhorrence of transcendental ideas as putting into question the present and present interests (for instance, even the industrial revolution when considered as actually generating material wealth was poorly perceived by many trade guilds).] It is only the 'imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality' (from the perspective of the 'dialectically-thinking-

reference-of-thought as depth-of-thought') that allows for 'an absolute teleological-differentiation/scission/variance/disambiguation of references-of-thought' of what the appropriateness-of-reference-of-thought-as-of-conflatedness (correct measuring-instrument/apriorising/intelligibilitysetup) and the perversion-of-reference-of-thought (defective measuring-instrument/apriorising/intelligibilitysetup) truly are, and the implications thereof with regards to meaningfulness-and-teleology (purposeful architectural measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose). Without the notion of 'imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality' (from the perspective of the 'dialectically-thinking-reference-of-thought as depth-of-thought') [undertaken as maximalising-recomposuring-for-relative-ontological-completeness/transvaluating], the new logical-processing-or-logical-implication as 'conviction/prelogical re-engaging reflex' (as existentially-veridical-logical-dueness-precedes-logical-outcome-arrived-at) will simply skip the notion of any perversion-of-reference-of-thought and 'prelogism-as-of-conviction re-engaging reflex' (undertaken as elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity) inducing a 'wrongly-projected decontextualising-unimbricatedness/unthreadedness/unrecomposuring-as-virtuality-or-ontologically-flawed-construal (which is rather dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing reference-of-thought in shallowness-of-thought-or-unsophistication-of-understanding) in grasping existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-

On the other hand, intemporality-as-longness-of-register-of-meaningfulness-and-teleology aetiologisation/ontological-escalation, can supersede the above perversion-of-reference-of-thought phenomena as of its derived vices-and-impediments implications, as veridically validated by intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency so-divulged by the ‘imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality’ (from the perspective of the prospective ‘dialectically-thinking-reference-of-thought as depth-of-thought’) enabling social universal-transparency-or-understanding-of-ontological-primemovers-totalitative-framework-of-underlying-phenomena superseding grasp of social vices-and-impediments as of the given transcendence-unenabling-uninstitutionalised-threshold in alienation—as inauthentic/poorly-objectified/poorly-desubjectified-as-objectified/ontological-bad-faith/nihilistic, by its psychoanalytic-unshackling/memetic-reordering/institutional-

recomposure or social pivoting/decentering to reconstrue/reconceptualise meaningfulness-and-teleology as of prospective relative-ontological-completeness. The difference between postlogism and prelogism can further be developed as such. Supposed there is a given context where the solution to additions of the ‘purposeful measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose’ (meaningfulness-and-teleology) taken involves rewards depending on how big is the number with the Donor not in a position to pay particular attention to the exact sums to be resolved if a character is in a position to fiddle with the implied sum to be resolved like deliberately using the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising as perversion-of-reference-of-thought (more like the ‘covert negative vista’ of the hidden-nature/unavailable social universal-transparency of psychopathy especially at adulthood). Now supposed to resolve a ‘purposeful measurement’ (meaningfulness-and-teleology), A appropriately uses a correct apriorising/intelligibilitysetup/measuringinstrument/axiomatising (appropriateness-of-reference-of-thought-as-of-conflatedness) and find out that the numbers measured and to be added are $5 + 2$ and is trying its best thereafter to resolve the sum but fails in its logical processing/implication-of-act-execution and gives 9 as the answer, this doesn’t void logically re-engaging with A with respect to other sums of measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose undertaken (in logical processing/implication-of-act-execution) so long as A learns and understands the addition principle well. This instance of A’s reference-of-thought where it is not perverted but its logical-processing-or-logical-implication has failed because of A’s incapacity is part and parcel (whether successful or not) of prelogism. Now supposed B is in a position and has the mental-disposition to covertly add 1 to any measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose and the correspond sum it is to resolve (by its use of a defective

apriorising/intelligibilitysetup/measuringinstrument/axiomatising as its perversion-of-reference-of-thought) and its 'purposeful measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose' (meaningfulness-and-teleology) to be added erroneously imply $6 + 3$ (with respect to the same measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose correctly taken by A as $5 + 2$) then resolved to be 9 as well just as A, fundamentally the idea of re-engaging with B for solutions of additions (in logical processing/implication-of-act-execution) is flawed since B is not committed due to its 'perversion-of-reference-of-thought' to genuinely strive for correct answers (ontological-veridicality), and this speaks of the possibility of B denaturing an infinite number of sums (to the point that it is 'socially-functional-and-accordant', i.e. functionally possible in the social context). Unlike the case with A having to do with A's addition ability but whose reference-of-thought is not perverted, such that A's defect is a 'defect of logical-processing-or-logical-implication' or defect of incidenting-as-social-performance of the registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance, on the other hand B's defect is an 'ontological/meaningfulness/being-construal/existential defect', i.e., the teleological disposition of B inherently carries the defect (to the point that B can be socially-functional-and-accordant while committing the defect, i.e. where the veridical notion/axiomatic-construct of the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising is not universally transparent as a 'negative covert vista'). Now supposed we are in a social context where C, D, E, F are to calculate additions as well but from the solutions arrived at by A and B, in the instance where C is ignorant of B's ontological/meaningfulness/being-construal/existential defect, there is a possibility of re-engaging with C but only where B's condition is exposed to it, but where the characters are not that ignorant but in any of the mental states (implying superseding the intrinsic-reality/ontological-veridicality

transcendental-enabler/existence-potency of normal additionality with such a social-aggregation-enabler situation) as of expediency or affordability (D), opportunism (E), exacerbation (F), social-chainism/social-discomfiture/negative-social-aggregation (B, C - where B's condition is not exposed to it, D, E, F) or temporal-endemisation/temporal-enculturation (B, C - where B's condition is not exposed to it, D, E, F) with B's condition. C - where B's condition is not exposed to it, D, E, F technically speaking have a 'derived-ontological/meaningfulness/being-construal/existential defect' as well, and so to the point that they consciously perceive can be socially-functional-and-accordant to them wherein lack of 'deductive social universal-transparency-or-understanding-as-ontological-primemovers-totalitative-framework-of-underlying-phenomena which protects the internal-coherence of meaning for virtue' enables their own 'covert negative vista' however ad hoc [conjugated-postlogism i.e. conjugated-ignorance (C - where B's condition is not exposed to it), conjugated-affordability (D), conjugated-opportunism (E), conjugated-exacerbation (F), and conjugated-social-chainism (B, C - where B's condition is not exposed to it, D, E, F) and conjugated-temporal-enculturation (B, C - where B's condition is not exposed to it, D, E, F)], and cannot therefore be re-engaged logically with (as 'prelogism-as-of-conviction re-engaging reflex') on the basis that they will relay in circularity/recurrence/repetition/repeatability the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising (perversion-and-derived-perversion-of-reference-of-thought -as-uninstitutionalised-threshold-circularity/subtransversality) defect elicited by B in terms-as-of-axiomatic-construct of B's postlogism-as-of-non-conviction and C, D, E and F ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought that is 'in-wait as of prior relative-ontological-incompleteness-of-reference-of-thought defective categorical-

imperatives/axioms/registry-teleology to enable their conjugated-postlogism, where it is socially-functional-and-accordant to do so. It should be qualified that postlogism (psychopathy) and conjugated-postlogism (as social psychopathy) are enabled, endemised and enculturated by the possibility of the phenomena being socially-functional-and-accordant without negative consequences to its agents so long as it is not socially universally transparent, and so eliciting the respective temporality over the intemporality of adhering to proper purposeful measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose (ontologically-veridical meaningfulness-and-teleology). Further more than postlogism and conjugated-postlogism being just passively socially-functional-and-accordant, a more active socially-functional-and-accordant framework is often induced by extrinsic-attribution on the token of eliciting ‘social-aggregation-enablers over intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency’. This is highly specific and circumscribe for efficacy-sake from acquired experience (with regards to adult psychopathy or adult postlogism) wherein achieving the registry-worldview’s/dimension’s–reference-of-thought-for-social-functioning-and-accordance of postlogism/psychopathy and/or conjugated-postlogism/social-psychopathy involves an insight about how ‘lack of constraining social universal-transparency of perversion-and-derived-perversion-of-reference-of-thought determines how prelogism-as-of-conviction minds will act as of ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation. Besides and critically as well, in addition to this inherently induced faulty-mentation-procedure-deception involved with the state of postlogism-as-of-non-conviction and its protraction into conjugated-postlogism/social-psychopathy, postlogism and conjugated-postlogism is equally and decisively sustained socially by the accompanying inherent disposition to uphold the registry-worldview’s/dimension’s–reference-of-thought-for-social-functioning-and-

accordance thereafter (given that inevitably social confliction is bound to arise in the social-setup with the phenomena of postlogism/psychopathy and conjugated-postlogism/social-psychopathy), and as the mere recurrence of such social conflictions associated with the postlogism/psychopathy and conjugated-postlogism/social-psychopathy characters might ultimately jeopardise the registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance (even when other prelogism-as-of-conviction minds do lack a social universal-transparency of the veridical postlogism/psychopathy and conjugated-postlogism/social-psychopathy underlying phenomena of perversion-and-derived-perversion-of-reference-of-thought as perverted-outcome-sought-precedes-existentially-veridical-logical-duedness). In this regard, prelogism-as-of-conviction minds generally adopt a generalising approach for determining 'the overall registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance experiences and recounts with any specific individual' including psychopathic or conjugated-postlogism, and in so doing construe dichotomously the said individual's as adhering or not-adhering to the registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance (and so specifically judged rather in various shades of the registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance), as entails with associating or not associating the said individual in given occasions or in specific given aspects of life depending on such experiences and recounts. With this in mind (based on its dormant childhood development experience), the adult psychopathy personality arising from its growth experience (and correspondingly the protraction into conjugated-postlogism behaviour in this regard), wherein its childhood psychopathy failing the registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance induced a shift in behaviour such that in lieu of 'such preposterous acts-and/or-narratives of vicious postlogism-as-of-non-conviction' at childhood, the childhood psychopathy comes to

grasp that ‘acts-and/or-narratives of vicious postlogism-as-of-non-conviction’ as of ‘compensating directed pseudo-virtue acts-and/or-narratives’ will lead to relative social overlooking of the ‘postlogism-as-of-non-conviction vicious acts-and/or-narratives’; and so cultivating its deterministic ontological-primemovers-totalitative-framework faulty-mentation-procedure-deception ‘misconception of meaningfulness-and-virtue’. For instance, as highlighted further below where John in a ‘dereifying act’ spills water on a chair, his ‘misconception of meaningfulness-and-virtue’ involving such a mental-disposition of ‘compensating directed pseudo-virtue acts-and/or-narratives’ may be to do some house chore but rather in ‘crude behaviour manner’ that reveals an ad-hoc quest to re-establish the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance with others. The adult psychopathy personality development arising from this fundamental faulty-mentation-procedure-deception ‘misconception of meaningfulness-and-virtue’ at childhood, further evolves a long way with a constantly readjustment process to ultimately enable the credulity for the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance at adult psychopathy, such that at adulthood social universal-transparency as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context of its underlying postlogism-as-of-non-conviction often gets lost enabling its faulty-mentation-procedure-deception at adulthood. By derivation the subsequently induced conjugated-postlogism/social-psychopathy, as of human temporal-dispositions will exploit unconsciously (as ignorance), expediently (as affordability) or consciously (as opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation) the lack of such social universal-transparency of the psychopathic/postlogism perversion-of-reference-of-thought, and thus its own derived-perversion-of-reference-of-thought; wherein even in the

case of occasional elucidation of specific postlogism-set-of-narratives-and-acts of the psychopath as being rather of non-conviction and dementing, this does not necessarily transform the mental-dispositions of temporal-dispositions in their conjugation to psychopathic postlogism as conjugated-postlogism since the induced-deception is fundamentally of reference-of-thought-elements/registry-elements (implied—logical-dueness-or-scape/profile-or-stature/presumptuousness-or-arrogation/assumptions/value-reference/teleology), with the conjugated-postlogism interlocutor as of ‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’, even when they recognised the specific postlogism-set-of-narratives-and-acts and are rather inclined to contend on the basis of the same flawed and deceptively-induced reference-of-thought-elements/registry-elements (whether unconsciously as beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as conjugated-ignorance or by expediency as conjugated-affordability or consciously as conjugated-opportunism/conjugated-exacerbation/conjugated-social-chainism-or-social-discomfiture-or-negative-social-aggregation/conjugated-temporal-enculturation-or-temporal-endemisation, given the ‘lack of constraining social universal-transparency) without reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology to the ontological implications of the appropriate existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context reference-of-thought-elements/registry-elements and thus explaining derived-perversion-of-reference-of-thought arises, in addition to the more fundamental issue of ontological-incompleteness-of-reference-of-thought as of prospective procrypticism uninstitutionalisation. In other words, ‘psychopathic/postlogism and social-psychopathic/conjugated-postlogism vicious acts-and/or-narratives’ as of

perversion-and-derived-perversion-of-reference-of-thought take the form of mental ‘misconception of meaningfulness-and-virtue’ that such ‘postlogism-as-of-non-conviction vicious acts-and/or-narratives’ based on their systematic combination with ‘compensating directed pseudo-virtue acts-and/or-narratives’ directed to relevant significant others will enable the registry-worldview’s/dimension’s–reference-of-thought-for-social-functioning-and-accordance, by such a compensation mechanism. With this faulty-mentation-procedure-deception, this is thus supposed to override the ‘postlogism-as-of-non-conviction vicious acts-and/or-narratives’ as of an association between the ‘postlogism-as-of-non-conviction vicious acts-and/or-narratives’, and ‘compensating directed pseudo-virtue acts-and/or-narratives’ towards relevant significant others, wherein that compensating is not a trite equivalency but rather involves ‘high-proportionality of overcompensating directed pseudo-virtue acts-and/or-narratives’ relative to ‘specific or given postlogism-as-of-non-conviction vicious acts-and/or-narratives’ in order to enable the postlogism/psychopathic manifestation achieve the registry-worldview’s/dimension’s–reference-of-thought-for-social-functioning-and-accordance (with such overcompensation involving sought after overall preceding and subsequent sense of social allegiance with relevant significant others and then corresponding ‘high-proportionality overcompensating directed pseudo-virtue acts-and/or-narratives’ towards relevant significant others, whether relevant individuals and/or relevant social network, as overall ‘social investment’ that should allow its instigated ‘postlogism-as-of-non-conviction vicious acts-and/or-narratives’ with respect to another individual or situation, as the occasion may arise, to be overlooked/absolved/exonerated/exculpated socially). This faulty-mentation-procedure-deception mental-disposition at adulthood psychopathy is more profound than just an ad hoc trite association between committing a given vicious act and initiating a given limited ‘compensating directed pseudo-virtue act-and/or-narrative’ in compensation as is the case at childhood psychopathy, since the adult psychopath discovers at

that stage that such triteness of association is relatively inefficient for attaining the registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance (but rather requires a more profound association of the 'postlogism-as-of-non-conviction vicious acts-and/or-narratives' and 'compensating directed pseudo-virtue acts-and/or-narratives'). As then during its childhood the 'compensating directed pseudo-virtue acts-and/or-narratives' are relatively universally transparent socially for what these truly are, as rather being associated with its faulty-mentation-procedure-deception mental-disposition of perversion-of-reference-of-thought, 'than just merely or confused with innocent virtue acts-and/or-narratives'; and as 'interlocutors in prelogism-as-of-conviction come to grasp the deliberativeness/consciousness of the artificial and fallacious systematic eliciting of 'compensating directed pseudo-virtue acts-and/or-narratives' as a crude-trite-compensating mechanism for its urge to commit 'postlogism-as-of-non-conviction vicious acts-and/or-narratives' and is thus socially-dysfunctional at childhood. Whereas at adulthood psychopathy the overcompensating involves a surreptitious upending/undermining/blurring of this underlying insight that the 'high-proportionality overcompensating directed pseudo-virtue acts-and/or-narratives' is rather as of a personality development derived-from and connected-with such fallacious crude-trite-compensating at childhood; such that it is then adopted and relayed as contending thus wrongly validating its apriorising-reference-of-thought-elements/apriorising-registry-elements of implied—logical-dueness-or-scape/profile-or-stature/presumptuousness-or-arrogation/assumptions/value-reference/teleology (which are actually outside existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context) as first-level deception, and thus enabling the infinite possibilities of second-level deception from their logical-processing-or-logical-implication. This underlying postlogism/psychopathic faulty-mentation-procedure-deception mental-disposition and its

protraction in conjugated-postlogism/social-psychopathy involving deliberative/conscious or unconscious (conjugated-ignorance) artificial, fallacious and surreptitious systematic eliciting of ‘high-proportionality overcompensating directed pseudo-virtue acts-and/or-narratives’ systematically enabling the possibility for committing ‘postlogism-as-of-non-conviction vicious acts-and/or-narratives’ with respect to another individual or situation, as the occasion may arise, while ensuring social overlooking/absolving/exonerating/exculpating is a central enculturating/endemising mechanism at the registry-worldview/dimension-level (beyond the individuation-level) of human temporalities-drives to adhere to the wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the registry-worldview’s/dimension’s institutionalisation categorical-imperatives/axioms/registry-teleology (failing/not-upholding-as-of-axiomatic-construct intemporal-preservation-entropy-or-contiguity—or—ontological-preservation as of ontological-normalcy/post-convergence). Further, at the confluence of postlogism/psychopathy and conjugated-postlogism/social-psychopathy with respect to ontologically-veridical meaningfulness-and-teleology arises disjointedness-as-of-reference-of-thought; inherent in temporality and as of postlogism and conjugated-postlogism mental-dispositions (shallowness-of-thought construed as of temporal-extirpatory reasoning as well as incoherent and awkwardly implied universal projections, but which actually speaks of totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag explaining why its ‘universal projection lip-servicing nature or inductive limitation fails the test of a true principle’, basically highlighting a dynamic reference-of-thought relationship with meaningfulness-and-teleology as of poor performance of supposed intemporal-projection but actually in effect pseudointemporality-as-temporality and speaks, more specifically with regards to psychopathic/postlogical meaningfulness-and-teleology, rather as of relatively ‘mere-rhyming mental-disposition’ emphasising wooden-language—of-temporal—mere-

 interestingly such a contrastive insight (of temporal-to-intemporal contrastive-synopsis-ing-

 of temporal-to-intemporal-dispositions disambiguation. The very 'intemporal synopsis-ing-

 'ontological construals' outside institutionalisation framework as enabled by deferential-

The relative transparency of childhood psychopathy perversion-of-reference-of-thought (as highlighted with the case of John in a 'dereifying act' spilling water on a chair in conjunction with its psychopathic perverted compensation mental-disposition as a basis for concurrently instigating postlogism-as-of-non-conviction so long as it can be socially-functional-and-accordant in satisfying its faulty-mentation-procedure-deception-or-urge by vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging) is highly revealing of the perverted nature of 'temporal psychopathic/postlogical synopsis-ing-depth-of-meaningfulness-and-teleology', and as it develops into adult psychopathy where social universal-transparency as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context gets lost and its perversion-of-reference-of-thought is related to as appropriateness-of-reference-of-thought-as-of-conflatedness in 'prelogism-as-of-conviction rather than as postlogism-as-of-non-conviction' as the adult psychopath undergoes maturation/indirectness/spatialisation/credulity/craftiness to attain social-functioning-and-accordance—as-of-social-stake-contention-or-confliction (further elucidated elsewhere) inducing the further protraction in conjugated-postlogism/social-psychopathy of derived-

perversion-of-reference-of-thought ‘temporal-synopsising-depth-of-meaningfulness-and-teleology’-as-shallowness-of-thought in derived–vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging (beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought). This at the institutional-level, a framework as the extended-informality-(susceptible-to-effecting-parsimony-as-of-shoddiness-and-incompleteness-to-meaningfulness-and-teleology) without social universal-transparency as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context as so reflected by its ontological-incompleteness-of-reference-of-thought (disjointedness-as-of-reference-of-thought) is bound to induce defective/perverted ‘temporal-distractively-aligned synopsising-depth of meaningfulness-and-teleology’ relative to intemporal/ontological and virtue constructs. [Consider the instance of an archetype illustration with respect to say a Socrates or Rousseau individuation ‘intemporal synopsising-depth-of-meaningfulness-and-teleology/supratransversality as-of-social-context-holism-construed-conflatedness’, ‘temporal-distractively-aligned synopsising-depth-of-meaningfulness-and-teleology’-as-shallowness-of-thought/subtransversality in pseudointemporality lip-servicing will within the ontological-incompleteness-of-reference-of-thought of their respective epochs poorly grasp their respective ‘intemporal synopsising-depth-of-meaningfulness-and-teleology/supratransversality as-of-social-context-holism-construed-conflatedness’, and rather think as irrational the projective disposition of a Socrates that doesn’t rather advance a temporal interest in the city-state polity but is rather bent on spreading new ideas as a natural philosopher while prioritising as of nonextirpatory-existential-preempting-of-existential-unthought in his asceticism the prospective intemporal/longness-of-register-of-meaningfulness-and-teleology over the temporal/shortness-of-register-of-meaningfulness-

and-teleology status quo, and likewise with a Rousseau who isn't advancing a temporal/shortness-of-register-of-meaningfulness-and-teleology interest that his aristocratic stature should warrant like actively pursuing for landed properties and currying favours with kings but is rather bent principally on a prospective commitment on grasping and spreading notions of a renewal of the human condition as universal rights and enlightened despotism; such that the averaging-of-thought in such setups will certainly be rife with distraction of such 'temporal-distractively-aligned synopsis-ing-depth-of-meaningfulness-and-teleology'-as-shallowness-of-thought/subtransversality; wherein a Socrates or Rousseau individuation 'intemporal synopsis-ing-depth-of-meaningfulness-and-teleology' as articulated above will face in the same space of the registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance thresholds with respect to meaningfulness-and-teleology such 'temporal-distractively-aligned synopsis-ing-depth-of-meaningfulness-and-teleology'-as-shallowness-of-thought/subtransversality as stated above, as the 'lack of constraining social universal-transparency as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context implies that same-terms-of-expressions/seemingly-same-implied-meaningfulness are undisambiguated/undelineated, and available to temporal postlogical/psychopathic synopsis-ing-depth-of-meaningfulness-and-teleology, temporal-dispositions in conjugated-postlogism synopsis-ing-depth-of-meaningfulness-and-teleology as well as intemporal synopsis-ing-depth-of-meaningfulness-and-teleology. Likewise, for instance, it won't be surprising that the 'intemporal synopsis-ing-depth-of-meaningfulness-and-teleology/supratransversality as-of-social-context-holism-construed-conflatedness' of aetiologisation/ontological-escalation as implied in this write-up, in principle, is rather alien as of its purposefulness/ontological-aspiration (notwithstanding the debatableness of veracity/ontological-pertinence as all knowledge constructs must necessarily be opened to) to

many ‘temporal-distractively-aligned synopsising-depth-of-meaningfulness-and-teleology’-as-shallowness-of-thought/subtransversality. This fundamentally arises due to the fact that prospective transcendence arises as ‘an exercise of outward-facing prospective institutionalisation metaphysics-of-absence value-referencing’ relative to a ‘totalising-self-referencing-syncretising inward facing uninstitutionalised-threshold value-referencing’.] Ultimately, loss of social universal-transparency as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context as of ontological-incompleteness-of-reference-of-thought such that mental states with respect to postlogisms and conjugated-postlogisms as of specific registry-worldviews/dimensions reveal the reality of the registry-worldview/dimension ontological-incompleteness-of-reference-of-thought, and more specifically relevant to the phenomenon of psychopathy and social psychopathy it points to disjointedness-as-of-reference-of-thought associated with procrypticism ontological-incompleteness-of-reference-of-thought. It should be noted as well that the notion of overlooking and resetting (as the fact is the conscious manifestation of perversion-and-derived-perversion-of-reference-of-thought doesn’t truly qualify for such a notion of overlooking and resetting since it is of as structural/paradigmatic denaturing construed as being/ontological/existential-defect or the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance defect and not defect of logical-processing-or-logical-implication or defect of incidenting-as-social-performance of the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance, more like it can’t be pretended that overlooking the nefarious implications of notions-and-accusations-of-sorcery in a non-positivistic social-setup in some way implies a resetting of non-positivistic/medieval mindsets/reference-of-thought, and it will be more of an intellectual-and-moral dereliction from a positivistic insight) doesn’t cancel the fundamental

temporal mental-dispositions as portrayed above given that intrinsic-reality/ontological-veridicality is a contiguity (superseding–oneness-of-ontology), and the ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought as displayed by the individuations (speaking not of a defect of logical-processing-or-logical-implication or defect of incidenting-as-social-performance of the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance) above is of ‘existential perpetuation in circularity/recurrence/repetition/repeatability (as-of-‘perversion-and-derived-perversion-of-reference-of-thought -as-uninstitutionalised-threshold-circularity/subtransversality’); and so as socially-functional-and-accordant, (wherein with respect to ‘least-and-derived-temporal-operating-modalities-of-the-reference-of-thought-as-of-incrementalism-in-relative-ontological-incompleteness-inducing-the-uninstitutionalised-threshold’, social meaningfulness-and-teleology is downgraded into ‘temporal averaging-of-thought mental-dispositions and projections disposition’ with corresponding degrading of the profoundness/sophistication of reference-of-thought of a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating disposition such that for veracity/ontological-pertinence there is need for teleological-differentiation/scission/variance/disambiguation in construing a ‘supratransversality reference-of-thought of meaningfulness-and-teleology’ as ontological and ‘subtransversality reference-of-thought of meaningfulness-and-teleology’, while with respect to ‘maximal-operating-modality-of-reference-of-thought-as-of-formalisation’ social meaningfulness-and-teleology is deferred to the profoundness/sophistication of reference-of-thought of a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating disposition by its ontological-primemovers-totalitative-framework induced prospective institutionalisation formalisations, percolation-channelling and second-naturing). Thus in

summary ‘existential perpetuation in circularity/recurrence/repetition/repeatability’ (of ‘maximal-as-intemporal-operating-modality-with-respect-to-categorical-imperatives/axioms/registry-teleology-of-reference-of-thought-as-of-maximalising-recomposuring-for-relative-ontological-completeness/transvaluating-inducing-the-prospective-institutionalisation’-and-‘least-and-derived-temporal-operating-modalities-with-respect-to-categorical-imperatives/axioms/registry-teleology-of-reference-of-thought-as-of-incrementalism-in-relative-ontological-incompleteness-in-inducing-the-uninstitutionalised-threshold’) defines how and why any ‘institutionalisation-by-uninstitutionalised-threshold limits’ come to be attained and sustained (whether recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism, positivism–procrypticism, and prospectively deprocrypticism) as it is construed as arising due to the definite/unchangeable reality of ‘human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions–existentialism-form-factor intertwined with a given institutionalisation ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought (with the latter not-definite/changeable by ‘transcendental institutionalisation/intemporalisation’ by a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating exercise). This is so reflected as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating. This explains why the ‘recurrent-utter-uninstitutionalisation’ mindset/reference-of-thought is existentially perpetuating ‘failing/not-upholding-as-of-axiomatic-construct of rulemaking-over-non-rules’ in circularity/recurrence/repetition/repeatability as-inherently-implied-by-the-uninstitutionalised-threshold (hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing-of-recurrent-utter-uninstitutionalisation), the

‘base-institutionalisation–ununiversalisation’ mindset/reference-of-thought is existentially perpetuating ‘failing/not-upholding-as-of-axiomatic-construct of universalisation-directed-rulemaking-over-non-rules’ in circularity/recurrence/repetition/repeatability as-inherently-implied-by-the-uninstitutionalised-threshold (hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing-of-ununiversalisation), the ‘universalisation–non-positivism/medieval’ mindset/reference-of-thought is existentially perpetuating ‘failing/not-upholding-as-of-axiomatic-construct of positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules’ in circularity/recurrence/repetition/repeatability as-inherently-implied-by-the-uninstitutionalised-threshold (hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing-of-non-positivism/medievalism), the ‘positivism–procrpticism’ mindset/reference-of-thought is existentially perpetuating ‘failing/not-upholding-as-of-axiomatic-construct in pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules’ in circularity/recurrence/repetition/repeatability as-inherently-implied-by-the-uninstitutionalised-threshold (hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing-of-procrpticism), and the ‘deprocrpticism’ mindset/reference-of-thought will be existentially perpetuating ‘pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules’ in circularity/recurrence/repetition/repeatability as-inherently-implied-by-its-preempting-of-any-uninstitutionalised-threshold. It should further be noted that the notion of in circularity/recurrence/repetition/repeatability is not about conceptualising in the simplistic sense of any specific effective factual acts of circularity/recurrence/repetition/repeatability-as-of-conflated-construal but rather about a defining defectiveness of registry-worldview reference-of-thought-(reflected-as-

unsoundness-or-inauthenticity-of-reference-of-thought-and-not-logically-contending) construed as ‘circularity/recurrence/repetition/repeatability-as-of-conflated-construal of perversion-and-derived-perversion-of-reference-of-thought’ inherently-implied (hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing-of-the-uninstitutionalised-threshold whether as recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism or procrypticism) given the registry-worldview/dimension-level of ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought. So basically, circularity/recurrence/repetition/repeatability-as-of-conflated-construal is about the ‘circularity of recurrent-utter-uninstitutionalisation-⟨reflected-as-unsoundness-or-inauthenticity-of-reference-of-thought-and-not-logically-contending⟩ in need for base-institutionalisation-⟨reflected-as-soundness-or-authenticity-of-reference-of-thought-and-logically-contending⟩’, the ‘circularity of ununiversalisation-⟨reflected-as-unsoundness-or-inauthenticity-of-reference-of-thought-and-not-logically-contending⟩ in need for universalisation-⟨reflected-as-soundness-or-authenticity-of-reference-of-thought-and-logically-contending⟩’, the ‘circularity of non-positivism/medievalism-⟨reflected-as-unsoundness-or-inauthenticity-of-reference-of-thought-and-not-logically-contending⟩ in need for positivism-⟨reflected-as-soundness-or-authenticity-of-reference-of-thought-and-logically-contending⟩’ and prospectively the ‘circularity of procrypticism-⟨reflected-as-unsoundness-or-inauthenticity-of-reference-of-thought-and-not-logically-contending⟩ in need for deprocrypticism-⟨reflected-as-soundness-or-authenticity-of-reference-of-thought-and-logically-contending⟩’, successively as of their prospective relative-ontological-completeness-of-reference-of-thought. [For instance, resetting relations anew and overlooking non-positivistic/medieval postlogism issue of say notions-and-accusations-of-

sorcery does not mean that characters in such a non-positivistic/medieval setup are no longer susceptible to the same mental-dispositions ‘as of non-positivistic/medieval reference-of-thought’ on different or subsequent occasions/instances where the medieval postlogism-as-of-non-conviction issue of notions-and-accusations-of-sorcery will arise again, where it is socially-functional-and-accordant to do so passively or actively by eliciting social-aggregation-enablers over the intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency’. The reason being that the perversion-of-reference-of-thought speaks to a fundamental ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought as a non-positivistic/medieval mindset/reference-of-thought as susceptible to further instances (in circularity/recurrence/repetition/repeatability-as-of-conflated-construal) of endemising/enculturating notions-and-accusations-of-sorcery and hence this issue can only be structurally/paradigmatically resolved by a relative prospective ontological-completeness-of-reference-of-thought ushered in by ‘a positivistic mindset/reference-of-thought and social-setting construct prospective/transcending/superseding totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology)’ involving psychoanalytic-unshackling/memetic-reordering/institutional-recomposure as of a cross-generational import. That is equally the fundamental and structural/paradigmatic problem associated with psychopathy and social psychopathy given the ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought of our procrypticism/disjointedness-as-of-reference-of-thought for a deprocrypticism reference-of-thought. Such naïve construal of

resetting relations anew and overlooking with regards to perversion-and-derived-perversion-of-reference-of-thought (utterly different from defect of logical-processing-or-logical-implication or defect of incidenting-as-social-performance of the registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance resetting anew and overlooking) simply becomes at best 'impression-driven/good-naturedness/wishfulness active enabler' for temporally inclined mindsets with respect to what can be habituated/endemised/enculturated as of perversion-of-reference-of-thought (where postlogism and conjugated-postlogism can be passively socially-functional-and-accordant or actively socially-functional-and-accordant by eliciting social-aggregation-enablers, and so over inherent intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency'). Rather than the idea of resetting relations anew and overlooking, a true intellectual-and-moral elevation is instead achieved by a prospective institutionalisation second-naturing process construing the inherent reality and derived-implications of perversion-of-reference-of-thought for its superseding, which effectiveness skews ('intemporality-asymmetric-subsumption-of-temporality', for relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency) to the veritable intemporal/longness-of-register-of-meaningfulness-and-teleology in deferential-formalisation-transference as of aetiologisation/ontological-escalation, as a the-Good/understanding/knowledge-driven/ontological-primemovers-totalitative-framework construct; and so construed suprastructurally as of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought-of-the-prior/transcended/superseded. In other words, recurrent-utter-uninstitutionalisation manifestation of postlogism can only be structurally/paradigmatically resolved by base-institutionalisation reference-of-thought, ununiversalisation manifestation of postlogism can only be structurally/paradigmatically resolved by universalisation reference-of-thought, non-

positivism/medievalism manifestation of postlogism can only be structurally/paradigmatically resolved by positivism reference-of-thought, and prospectively procrypticism manifestation of postlogism can only be structurally/paradigmatically resolved by deprocrypticism reference-of-thought. As palliative construal is rather ontologically incoherent as the idea for striving to construe intemporality from temporality is rather naïve and actually as of ontologically-flawed totalising–self-referencing-syncretising. Totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag here implies that every registry-worldview/dimension is rather pre-inclined to represent its own apriorising/intelligibilitysetup-caricaturing-or-hollow-staging-and-performance at worst as an nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) or a-registry-worldview’s-or-dimension’s-ignoring-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-as-an-ontologically-flawed-neuterisation-or-bracketing-or-epoché of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing, and so rather than as truly ‘decandored/oblongated and dialectically-dementing and dialectically/contendingly-out-of-phase or decentered’, and doing so beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, to avoid its ‘ontologically-perspectival-degraded-as-decentered/dementing-teleological-differentiation-as-of-subtransversality-in-apriorising/intelligibilitysetup-caricaturing’ with respect to prospective notional-deprocrypticism ‘ontologically-perspectival-elevated/pedestaling-as-dialectically-thinking-teleological-differentiation-as-of-supratransversality’; though paradoxically it will effectively recognise such a representation about prior/transcended/superseded registry-worldviews/dimensions. For instance, we’ll be hard pressed to acquiesce to an argument with regards to medieval manifestation of postlogism for instance as it instigates notions-and-accusations-of-sorcery, associated with a logic in terms-as-of-axiomatic-construct of non-

positivism/medieval ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought of the type ‘A’s action was what brought about the accusation of witchcraft, and A should stop the practice’, from our positivistic transcendently totalising–renewing-realisation/re-perception/re-thought as of its positivism prospective relative-ontological-completeness-of-reference-of-thought, and would rather imply ‘the decandored/oblongated and dialectically-dementing and dialectically/contendingly-out-of-phase nature’ of such non-positivistic/medieval reference-of-thought priorly without its contending status even arising in the very first place; but then with respect to our own postlogism-and-conjugated-postlogism as psychopathy and social psychopathy pointing to our own ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought as procrypticism, we will tend to advance an ‘nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) as a-registry-worldview’s-or-dimension’s-ignoring-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-as-an-ontologically-flawed-neuterisation-or-bracketing-or-epoché of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing of our own ontological-misconstruing-of-meaningfulness/hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing, as we strive circularly-as-of-shortness-of-register-of-meaningfulness-and-teleology in an incoherent patchwork of meaningfulness (palliation construal) on the same terms of our ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought (in the case of procrypticism, which is rather of ‘ontologically-perspectival-degraded-as-decentered/dementing-teleological-differentiation-

as-of-subtransversality-in-apriorising/intelligibilitysetup-caricaturing'), ignoring the notion of prospective transcending with respect to perversion-of-reference-of-thought or derived-perversion-of-reference-of-thought going by ontological-normalcy/post-convergence totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology) as of notional-deprocrypticism (which is rather of 'ontologically-perspectival-elevated/pedestaling-as-dialectically-thinking-teleological-differentiation-as-of-supratransversality') in longness-of-register-of-meaningfulness-and-teleology in order to grasp ontologically-veridical meaningfulness; and so, no more different as the non-positivism/medieval mindset/reference-of-thought trying to process logic on the basis of its ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought as notions-and-accusations-of-sorcery. This reason underlies the notion of prospective institutionalisation which arises not as of logical-processing-or-logical-implication issue but 'more fundamentally an appropriateness-of-reference-of-thought-as-of-conflatedness-or-perversion-of-reference-of-thought issue as of a paradigmatic and ontological meaningfulness-and-teleology implication with respect to eliciting the prospective relative-ontological-completeness-of-reference-of-thought of the prospective/transcending/superseding registry-worldview/dimension, without totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of the ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought of the prior/transcended/superseded registry-worldview/dimension. Thus the articulation of prospective institutionalisation 'is not about ontological-primemovers-totalitative-framework implying equivalence between the prior/transcended/superseded and

the prospective/transcending/superseding'. It is rather about the precedingness/supersedingness/ascendency of the latter in transversality and inequivalence with the former. For instance the factual ontological-primemovers-totalitative-framework/effectiveness validations of say a chemistry mindset/reference-of-thought (with demonstrations of chemistry principles by chemical reactions producing elements and compounds) say in a non-positivistic/medieval setup prone to alchemy and essences-driven explanations 'is not and cannot be construed as a logical-processing-or-logical-implication validation as of alchemic mindset/reference-of-thought' but rather 'a chemistry scientific mindset/reference-of-thought validation', critically because the issue is fundamentally not about the specific validations of chemistry principles but rather about the non-positivistic/medieval alchemy and essences-driven explanations defective mindset/reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising mental-disposition reflex with respect to metaphorically-as-of-a-million-and-one-instances-and-locales/aetiologisation/ontological-escalation of interpretive defects of that may arise from such non-positivistic/medieval mindset/reference-of-thought based on alchemy and essences-driven explanations given its ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought. Thus wrongly implying that a contending engagement between the two is of logical-processing-or-logical-implication, 'wrongly elevates and validates the non-positivistic/medieval mindset/reference-of-thought' as the mindset/reference-of-thought of contention, as such a possibility of contending engagement from the chemistry mindset/reference-of-thought is about harkening rather to a paradigmatic and conflatedness (psychoanalytic-unshackling/memetic-reordering/institutional-recomposure) of the alchemy and essences-driven explanations mindset/reference-of-thought reflex for the ascendency of a positivistic chemistry registry-worldview reflex as of its

prospective relative-ontological-completeness-of-reference-of-thought as it addresses the former defect of totalising–self-referencing-syncretising/metaphysics-of-presence and thus provides the possibility for resolving metaphorically-a-million-and-one-instances-and-locals/aetiologisation/ontological-escalation of defects of that non-positivistic/medieval mindset/reference-of-thought based on alchemy and essences-driven explanations given its ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought. This insight equally comes to the mind as we can equally imagine that a mere demonstration or demonstrations of positivistic meaningfulness effectiveness/ontological-primemovers-totalitative-framework in say a base-institutionalisation/animistic social-setup or non-positivism/medievalism social-setup to their approbation is not a sufficient basis to imply that they are thereafter of positivistic mindset/reference-of-thought and to be engaged with as of logical-processing-or-logical-implication, as any such positivistic demonstration pertinence is not about its factual effectiveness approbation in the base-institutionalisation/animistic social-setup per se but rather as of its paradigmatic and conflatedness (psychoanalytic-unshackling/memetic-reordering/institutional-recomposure) of the underlying base-institutionalisation/animistic ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought which is rather of cross-generational import (prospective-institutionalisation totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology) as enabled by psychoanalytic-unshackling/memetic-reordering/institutional-recomposure). Such an insight can be extended prospectively on the same measure with respect to our procrypticism prior relative-ontological-incompleteness-of-

reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought and futural Being-development/ontological-framework-expansion as of prospective deprocrypticism ontological-completeness-of-reference-of-thought; though as previously indicated we will wrongly tend to (just as any totalising–self-referencing-syncretising/metaphysics-of-presence registry-worldview/dimension) to represent by reflex our own procrypticism apriorising/intelligibilitysetup-caricaturing-or-hollow-staging-and-performance at worst as an nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) or a-registry-worldview’s-or-dimension’s-ignoring-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-as-an-ontologically-flawed-neuterisation-or-bracketing-or-epoché of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing in our placeholder-setup/mentation/mental-devising-representation/consciousness-awareness-teleology rather than the true reality from an ontological-normalcy/post-convergence perspective as ‘decandored/oblongated and dialectically-dementing and dialectically/contendingly-out-of-phase’, and doing so beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought to avoid its ‘ontologically-perspectival-degraded-as-decentered/dementing-teleological-differentiation-as-of-subtransversality-in-apriorising/intelligibilitysetup-caricaturing’ with respect to futural Being-development/ontological-framework-expansion as of prospective deprocrypticism ‘ontologically-perspectival-elevated/pedestaling-as-dialectically-thinking-teleological-differentiation-as-of-supratransversality’. This reflex is what establishes the defining circularity/recurrence/repetition/repeatability of procrypticism as of its ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought in

endemising/enculturating psychopathy and social psychopathy. The bigger picture here is that across the institutionalisation process and the institutional-cumulations/institutional-recomposures, and as reflected insightfully from cultural diffusion induced institutionalisations, ‘the prior/transcended/superseded registry-worldview’s/dimension’s reference-of-thought in its totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag apriorising/intelligibilitysetup-caricaturing-or-hollow-staging-and-performance’ need to be recognised, registered and represented from the prospective/transcending/superseding registry-worldview reference-of-thought for what it is, rather than an ‘nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) as a-registry-worldview’s-or-dimension’s-ignoring-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-as-an-ontologically-flawed-neuterisation-or-bracketing-or-epoché of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing to then allowed for the necessary cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure of the prospective institutionalisation by its prospective relative-ontological-completeness-of-reference-of-thought-.]

It should be noted as well that the idea of ‘totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology)’ enabled by psychoanalytic-unshackling/memetic-reordering/institutional-recomposure is the deterministic phenomenon behind ‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics’ and the specific institutional-cumulations/institutional-recomposures of the institutionalisation process as recurrent-utter-uninstitutionalisation, base-institutionalisation–

ununiversalisation, universalisation–non-positivism/medievalism, positivism–procrypticism, and deprocrypticism. It captures the true notion of transcendence as a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating involving utterly putting-into-question/reshuffling/remaking the human psyche/placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology in the very first instance, and on a second-level then imply eliciting the corresponding meaningfulness-and-teleology for such renewed psyche as reference-of-thought. Such ‘totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology)’ involves specific ‘memeticism/meaningfulness circular-caricature’ with respect to the implied registry-worldview/dimension in their respective institutionalisation state (as candored/straight and dialectically-thinking/dialectically-or-contendingly in-phase) and their uninstitutionalised-threshold state (in hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing as decandored/oblongated and dialectically-dementing/dialectically-or-contendingly out-of-phase). The notion of ‘totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology)’ as being of true transcendence can be further elucidated with regards to two remarkable historical developments which while inherently exceptional, to say the least, aren’t truly transcendental. Consider for instance that transcendental is generally considered as the central notion of Kantian philosophy. The reality however is that the supposed transcendentalism is actually an elaboration in the terms of the actual and true rational-empiricism/positivism reference-of-thought transcendence established by Descartes’ thinking proposition and scepticism exercise as the fundamental basis for continuously re-elaborated ‘extended

rationalism' right up to the present. Kantian supposed transcendence (Copernican revolution) is not eliciting a 'dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics' of 'totalising-renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising-psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology)' (which is exactly what Descartes' thinking proposition and scepticism exercise does with respect to the non-positivistic/medieval psyche/placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology). The Kantian construct is an elaboration well within the psychical framework established by the rationalism thinking proposition and scepticism exercise, and Kantian meaningfulness-and-teleology is utterly comprehensible and intelligible to that psyche, though in many ways it is a more profound elaboration of meaningfulness-and-teleology issues. So it is actually an apriorising/intelligibilitysetup/measuringinstrument/axiomatising within the extended-rationalism reference-of-thought that doesn't psychically and meaningfully supersede it but elaborates within it; and it doesn't reference an apriorising/intelligibilitysetup/measuringinstrument/axiomatising 'totalising-renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising-psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology)' as implied by a 'dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics' from Recurrent-utter-uninstitutionalisation to Base-institutionalisation-ununiversalisation, to Universalisation-non-positivism/medievalism, to Positivism-procrypticism, and prospectively to Deprocripticism; as successively non-rules-as-impulsive-or-accident-or-random-mental-disposition-(as 'basic constitutedness of reference-of-thought' apriorising/intelligibilitysetup/measuringinstrument/axiomatising) gives way to rulemaking-

over-non-rules-⟨as ‘first-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising⟩ which gives way to universalisation-directed-rulemaking-over-non-rules-⟨as ‘second-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising⟩ which gives way to positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-⟨as ‘third-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising⟩, and prospectively bringing about pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-⟨as conflation of apriorising/intelligibilitysetup/measuringinstrument/axiomatising⟩; and wherein the successive mindsets/references-of-thought and institutionalisations are suprastructural to each other (beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought). Insightfully, this highlights that human mentation capacity is in a dynamic cumulation as of the maximalising-recomposuring-for-relative-ontological-completeness/transvaluating of its limited-mentation-capacity-⟨as of relative constitutedness towards relative conflation⟩. It puts into question the Kantian philosophical exercise (Copernican revolution) of striving to establish universal human mental apriorising/axiomatising principles with respect to a mental state that is perpetually in a transformative becoming state of shallow to deeper limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination. (This latter condition inherently means that the certitude of such an enterprise itself can only be grounded on the human existential imbricated-becoming-transitioning as the absolute apriorising.) It is this author’s contention that the Kantian conceptualisation exercise while interesting is in many ways rather a heuristic construct given its grounding on a categorisation reflex that poorly syncs with and is in constant need for

heuristic re-adaptation to match ‘an imbricated-becoming-transitioning existential reality nature that is preceding-and-superseding to any human mental apriorising/axiomatising of it’, and thus rendering such an apriorising/axiomatising conceptualisation exercise highly heuristic (to constantly resolve the virtualities it raises by re-categorisation/re-adaptation/re-classification), and so when not employing a referentialism reflex that is naturally inclined to be contiguous with intrinsic-reality as of ontological-normalcy/post-convergence/intemporal-preservation-entropy-or-contiguity—or—ontological-preservation. A further weakness is the naive implication thus that an apriorising/axiomatising exercise of human mental understanding only starts and ends with the positivistic/rational-empiricism registry-worldview’s/dimension’s reference-of-thought as if it is the only one that had existed, against the anthropological and historical trend, and without explaining how previous meaningful-frames developed into the positivistic/rational-empiricism and how the latter could develop prospectively. Besides the Kantian argument that the transcendent (in all its connotations beyond direct experiences) cannot be known is equally anthropologically and historically erroneous as even in his days, with respect to adopting of a positivistic/rational-empiricism worldview over non-positivistic/alchemic/essences/medieval registry-worldview/dimension certainly does has a name (transcendence). But then it is more the case that from a totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag posture holding only one registry-worldview/dimension categorical-imperatives/axioms/registry-teleology as absolute, then prospective transcendence is rather a beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought notion. Besides, Kant’s notion of transcendence (transcendental idealism) and subsequent philosophical development of the notion is one relating to immediate phenomenal conceptualisation rather construed as ‘phenomenal-abstractiveness of presence’ (and more precisely phenomenal-abstractiveness of presence as of ‘the positivism/rational-empiricism

apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights' transcendence implied by Descartes) rather than a construal of transcendence as implied herein as of deepening limited-mentation-capacity with respect to the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality as superseding-oneness-of-ontology as an all-encompassing totalising-renewing-realisation/re-perception/re-thought of human psychical and institutionalisation disposition for meaningfulness-and-teleology, even though fundamentally enabled by developing human phenomenal-abstractiveness of presence as of random-as-impulsive-phenomenal-abstractiveness-of-presencing-in-'trepidatious-consciousness' with recurrent-utter-uninstitutionalisation, nominal-as-tendentious-phenomenal-abstractiveness-of-presencing-in-'warped-consciousness' with base-institutionalisation-ununiversalisation, ordinal-as-qualifying-phenomenal-abstractiveness-of-presencing-in-'preclusive-consciousness' with universalisation-non-positivism/medieval, intervalist-as-categorising-phenomenal-abstractiveness-of-presencing-in-'occlusive-consciousness' with positivism-procrypticism, and ratio-contiguity/ratiocination-as-referentialism-phenomenal-abstractiveness-of-presencing-in-'protensive-consciousness' with deprocrypticism. Basically, Kant lacked a notion of metaphysics-of-absence (to overcome totalising-self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage) with respect to the positivism/rational-empiricism registry-worldview/dimension. In other words, Kant is involved in an epistemological conceptualisation at a given point in time (erroneously construed as the absolute point of human thought apriorising, without a decentering sense of projection with respect to the prior and prospective). But existential-reality as of its human mental apriorising/axiomatising (heuristically at least) started well before that point and carries on well after that point, and such an exercise is more profound when it construes human mental apriorising/axiomatising along the full imbricated-becoming-transitioning of

existence as it redefines meaningfulness-and-teleology on the basis of human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination in its construal/conceptualisation of a superseding-oneness-of-ontology construed as transcendental-enabling/existence-potency. Insightfully, this author construes an existential-reference/existential-tautologisation basis of such human mental apriorising/axiomatising process for the transcendental-enabling/existence-potency of successive apriorising/intelligibilitysetup-as-transcendental registry-worldviews/dimensions rather as of an exercise of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating over conceptualisations of human mental apriorising/axiomatising process on a simple categorisation reflex basis as elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity which tend to require constant heuristic adaptations to sync in contiguity with imbricated-becoming-transitioning of existential-reality and avoid virtualities, as wrongly operating on the basis of an absolute point of human thought apriorising/axiomatising that doesn't recognise that successive apriorising/intelligibilitysetup-as-transcendental registry-worldviews/dimensions are defining/transcendental-enabling/existence-potency for new prospective relative-ontological-completeness-of-reference-of-thought. In the bigger framework, this author holds that conceptually and operantly nothing is certain but for the certitude of existence and its oneness, thereafter defining relative certitudes by the contextualising-contiguity of existence as of human shallow to deeper limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as of its successively developed transcendental psychical and institutionalisation notions from apriorising/intelligibilitysetup/measuringinstrument/axiomatising non-rules-as-impulsive-or-accidentated-or-random-mental-disposition to successively profound

apriorising/intelligibilitysetup/measuringinstrument/axiomatising rules associated with human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination, as further elaborated in this paper. This same insight can be extended with respect to an Einstein and Bohr led theory-of-relativity and quantum-mechanics physics respectively in relation to the physics of Newton, Galileo, Leibniz; wherein the latter established the ‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics’ psyche as ‘totalising-renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising-psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology)’ of positivistic physics right back then in their epoch such that the overall underlying principle of ontological-primemovers-totalitative-framework as transcendental-enabling/existence-potency back then is still what prevails today. It is that physics psyche established back then which enabled seemingly aloof conceptualisations of physics like theory-of-relativity and quantum-mechanics within a decade or so of their articulations as of more profound elaboration of transcendental-enabling/existence-potency ontological-primemovers-totalitative-framework to establish themselves as the central physics theories with little or no quarrel. It is interesting to grasp that such a physics and science psyche wasn’t available to a Copernicus in what may be construed today as a relatively benign conceptualisation of a heliocentric model of the world, with the revolt of Galileo and others ultimately establishing that physics and science psyche over a non-positivistic/medieval apriorising/intelligibilitysetup/measuringinstrument/axiomatising relationship to ontological-primemovers-totalitative-framework that is not ontological-veridicality/intrinsic-reality transcendental-enabling/existence-potency as of its non-scientific psyche. In other words however ‘good-natured, well-meaning and wishful for enabling human progress’ the mental-

disposition in that epoch as alchemic and non-positivistic was structurally not ontological-veridicality/intrinsic-reality transcendental-enabling/existence-potency, and instinctively one may argue that it is by coming out from the frustration of not achieving anything decisive but for ‘palliative results’ in terms of progress with an alchemic and non-positivistic psyche that the Newton’s of that epoch increasingly adopted a positivistic sense of things which they increasingly came to realise as being ontological-veridicality/intrinsic-reality transcendental-enabling/existence-potency. This same ‘ontological misconstrual’ naively grounded on ‘palliative constructs and naïve conceptual patterning’ driven by ‘good-naturedness, well-meaningfulness and wishfulness’ is pervasive in the social sciences today as of its poor ontological-veridicality/intrinsic-reality transcendental-enabling/existence-potency construction having to do with a totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag agent of limited-mentation-capacity that we are as of our animate-existential-referencing/subjectification wherein our totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of meaningfulness-and-teleology is often wrongly construed as ontological as of ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’. Consider for instance a situation where statistically people likely to rest more in their home in winter are compared with people spending more time outdoors with regards to prevalence of flu, and then arriving at the conclusion that the treatment for flu is resting more at home. Such a construct as basic constitutedness is at best a sound palliative construct and naïve conceptual patterning however good-natured, well-meaning and wishful, but doesn’t deal with the required pure-ontology conflatedness as of ontological-veridicality/intrinsic-reality transcendental-enabling/existence-potency in establishing a comprehensive disease theory for flu that syncs with other human diseases theories and human biology theories and general

biology theories and informed by the bigger ‘transcendental-enabling/existence-potency positivism psyche-and-thereof-philosophy’ (construed rather as of an organic depth of ontological coherence/contiguity that is structurally/paradigmatically transcendental-enabling/existence-potency contiguously as from the deeper apriorising/axiomatising of ‘transcendental-enabling/existence-potency positivism psyche-and-thereof-philosophy’ and not vague ad-hoc mechanical patchwork of non-transcendental-enabling/existence-potency conceptualised/construed relations), and so as of its ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’. The practice in many a social science specialism is often to articulate concepts whose linkage with other social science concepts and the overall social science background knowledge construct is vague such that ontological-veridicality/intrinsic-reality transcendental-enabling/existence-potency is hardly established but for bare ‘palliative constructs and naïve conceptual patterning’ that are more often than not totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag than truly ontological when examined closely such that the test of transcendentally-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism when the implications of such notions are examined as of metaphysics-of-absence not only in terms of one registry-worldview’s/dimension’s meaningfulness-and-teleology but two or more, say our present positivism reference-of-thought and retrospective non-positivism reference-of-thought, their ‘supposed ontological status’ turn out to be ridiculous totalising–self-referencing-syncretising, exposing their true nature as rather palliative constructs and conceptual patterning. In the bigger framework can notions construed/conceptualised as of ‘human subjectivity so-construed as ineffectively transcendentally-enabled-institutionalisation-process-level-of-

It is this author's contention that the 'transcendental-enabling/existence-potency deprocrypticism psyche-and-thereof-philosophy' as so transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism provides the requisite ontologically-veridical background referencing as of its conflatedness (in the same vein as the prior positivism-procrypticism registry-worldview/dimension bigger 'transcendental-enabling/existence-potency positivism psyche-and-thereof-philosophy' with regards to non-positivism/medievalism) as of the prospective-and-more-profound deprocrypticism registry-worldview/dimension bigger 'transcendental-enabling/existence-potency deprocrypticism psyche-and-thereof-philosophy' as herein implied by this hermeneutic psychology suprastructuralism insight construed as of metaphysics-of-absence as 'dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics', not only with regards to the social sciences but also when it comes to the many instances of poor scientific studies thus enabling the decisive superseding of palliative construals and conceptual-patterning that can hardly be qualified as ontological. The underlying contention of both such a present 'transcendental-enabling/existence-potency positivism psyche-and-thereof-philosophy' and prospective 'transcendental-enabling/existence-potency deprocrypticism psyche-and-thereof-philosophy' as of their respective relative ontologically-veridical psychical background referencing as of

conflatedness for knowledge/meaningfulness-and-teleology has to do with the bigger ontological-normalcy/post-convergence reality (of ontologically valid knowledge/meaningfulness-and-teleology) as of its notional-conflatedness/constitutedness-to-conflatedness as the structural/paradigmatic basis by which ‘ontological-deficiency (conceptually represented as subsuming of virtue-defect or vices-and-impediments ‘with virtue not truly differentiated from ontology’ but rather such a conceptual-differentiation being represented as of our notional-totalising–self-referencing-syncretising animate-existential-referencing/subjectification emotional-involvement implications)’ is construed fundamentally going by a registry-worldview’s/dimension’s reference-of-thought relative deficiency as prior relative-ontological-incompleteness-of-reference-of-thought (as its uninstitutionalised-threshold/uninstitutionalised-threshold) thereby resolvable structurally/paradigmatically by the prospective registry-worldview’s/dimension’s reference-of-thought prospective relative-ontological-completeness-of-reference-of-thought; thus validating with regards to both reference-of-thought respectively as the ‘transcendental-enabling/existence-potency positivism psyche-and-thereof-philosophy’ and the ‘transcendental-enabling/existence-potency deprocrypticism psyche-and-thereof-philosophy’ their relative ontologically-veridical background referencing as of conflatedness as of ontological-normalcy/post-convergence. Since we can perfectly conceptualise with both reference-of-thought the articulation of coherent meaningfulness-and-teleology respectively in non-positivism terms-as-of-axiomatic-constructs and non-deprocrypticism/procrypticism terms-as-of-axiomatic-constructs, or rather in terms-as-of-axiomatic-construct that do not grasp structurally/paradigmatically the respective reference-of-thought organic grounding as of underlying ontological-normalcy/post-convergence implications, and so beyond just a question of vague ad-hoc mechanical patchwork of non-transcendental-enabling/existence-potency conceptualised/construed relations. This elucidation points out that transcendence

‘must truly’ involve an ontological-dementation/dialectical-dementation stranding-dialectics with the utter decentering of understanding itself by the prospective/transcending/superseding reference-of-thought over the hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing of the prior/transcended/superseded at its uninstitutionalised-threshold as a totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology) eliciting a new apriorising/intelligibilitysetup/measuringinstrument/axiomatising of prospective/transcending/superseding reference-of-thought as candored/straight, dialectically-thinking and dialectically/contendingly-in-phase over the prior/transcended/superseded reference-of-thought as decandored/oblongated, dialectically-dementing and dialectically/contendingly out-of-phase. Basically, ontological-dementation/dialectical-dementation speaks of the contingent supersedingness of prospective relative-ontological-completeness-of-reference-of-thought of prospective/transcending/superseding reference-of-thought over prior relative-ontological-incompleteness-of-reference-of-thought of prior/transcended/superseded reference-of-thought, and so ‘with respect to the relative veracity/ontological-pertinence of their projected logical-processing-or-logical-implication of meaningfulness-and-teleology as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context’, wherein the prior/transcended/superseded reference-of-thought is construed as dialectically-dementing and decentered/out-of-phase thus subsumed-as-supplanted while the prospective/transcending/superseding reference-of-thought is construed as dialectically-thinking and centered/in-phase thus subsuming-as-supplanting (by supratransversality as of ‘intemporality-asymmetric-subsumption-of-

temporality', rather as of intellectual-and-moral-inequivalence/non-correspondence). Thus contingently and ontologically, recurrent-utter-uninstitutionalisation is dementing and decentered thus subsumed-as-supplanted (given its failing/not-upholding-as-of-axiomatic-construct of rulemaking-over-non-rules) relative to base-institutionalisation–ununiversalisation as dialectically-thinking and centered, with the latter dementing and decentered thus subsumed-as-supplanted (given its failing/not-upholding-as-of-axiomatic-construct of universalisation-directed-rulemaking-over-non-rules) relative to universalisation–non-positivism/medievalism as dialectically-thinking and centered, with the latter dementing and decentered thus subsumed-as-supplanted (given its failing/not-upholding-as-of-axiomatic-construct of positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules) relative to our positivism–procrypticism as dialectically-thinking and centered, with the latter dementing and decentered thus subsumed-as-supplanted (given its failing/not-upholding-as-of-axiomatic-construct in pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules) relative to futural Being-development/ontological-framework-expansion as of prospective deprocrypticism as dialectically-thinking and centered; and so successively, 'with respect to relative ontological veridicality of logical-processing-or-logical-implication projected meaningfulness-and-teleology as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context'. Ontological-dementation/dialectical-dementation stranding-dialectics as of transcendental/interdimensional/transdimensional registry-worldview/dimension-level conceptualisation/construal as enabling prospective suprastructuration (suprastructural psychical-and-institutionalisation orientation of meaningfulness-and-teleology synopsising-depth as of the overall registry-worldview's/dimension's reconstrual of superseding–oneness-

of-ontology), is technically apprehended rather as of the ‘reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold’ of meaningfulness-and-teleology of the prior/transcended/superseded registry-worldview reference-of-thought implied as of distractive-alignment-to-reference-of-thought in reflecting the prospective/transcending/superseding registry-worldview reference-of-thought suprastructuration as the ‘new ontologically-veridical becoming-or-present-of-reference-of-thought’ since there ‘cannot be two different becoming-or-present-of-reference-of-thought’ but rather that the prospective/transcending/superseding suprastructuration is by its prospective relative-ontological-completeness-of-reference-of-thought the becoming-or-present-of-reference-of-thought. However, in all the ontological-dementation/dialectical-dementation implied successive institutional-cumulations/institutional-recomposures, such a ‘confusion of relative ontologically-veridical becoming-or-present-of-reference-of-thought’ induces an underlying ‘paradox of transcendence’ involved in all such transcendences wherein mental-dispositions as of reference-of-thought are caught between the prospective/transcending/superseding registry-worldview prospective relative-ontological-completeness-of-reference-of-thought and the prior/transcended/superseded registry-worldview prior relative-ontological-incompleteness-of-reference-of-thought, with respect to meaningfulness-and-teleology referencing. Consider in this case the human condition of transience of reference-of-thought as experienced by Okonkwo returning from banishment to Umuofia village in Chinua Achebe’s *Things Fall Apart*. That is, basically and by reflex, mental-dispositions as of the formation of ‘recurrent-utter-uninstitutionalisation non-rules-as-impulsive-or-accidented-or-random-mental-disposition categorical-imperatives/axioms/registry-teleology will not necessarily construe transitorily at its uninstitutionalised-threshold that ‘base-institutionalisation–ununiversalisation rulemaking-over-non-rules categorical-imperatives/axioms/registry-teleology is the relative ontologically-

veridical reference-of-thought (as explained further below with respect to ‘symmetrisation-of-reference-of-thought but which is in effect an ontologically-non-veridical-or-flawed-totalising–self-referencing-syncretising and/or desymmetrisation for perceived temporal social-stake-contention-or-confliction’ associated with distractive-alignment-to-reference-of-thought, and ‘intemporality-asymmetric-subsumption-of-temporality’/ontological-asymmetrisation as of deconstruction/ontological-reconstituting in aetiologisation/ontological-escalation); such that on a logical basis the averaging-of-thought in recurrent-utter-uninstitutionalisation will be more inclined to turn towards the ‘prior conventional non-rules-as-impulsive-or-accidental-or-random-mental-disposition’ as categorical-imperatives/axioms/registry-teleology, and so over the ‘prospective relative pure-ontology conflatedness implying rulemaking-over-non-rules’. This is because a registry-worldview/dimension is a ‘circular-pervasiveness closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications’ wherein achievement motives and temporal-stakes of the conventional constructs as of human finite aspirations whether socially, professionally, family-wise, hedonic, etc. as of the registry-worldview’s/dimension’s denaturing closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications so-construed prospectively, will tend to ‘take precedence as of ontological-incompleteness-of-reference-of-thought induced distractive-alignment-to-reference-of-thought and override any such sense of relative pure-ontology conflatedness as of prospective relative-ontological-completeness-of-reference-of-thought (as implied by ontological-faith-notion-or-ontological-fideism as heuristic but non-constraining compensation for human limited-mentation-capacity where constraining social universal-transparency doesn’t yet avail) even though, it is such relative pure-ontology conflatedness that is the ontological-faith-notion-or-ontological-fideism enabling (by ultimately making

available such prospective constraining social universal-transparency) the successive institutional-cumulations/institutional-recomposures. Even then and ultimately, it is mainly a cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure that progressively rids the prior conventional constructs of their essence as of syncretising-denial that enables prospective registry-worldview/dimension suprastructuration/transcendence. This insight extends to all the successive registry-worldviews including ours as positivism–procrypticism as the relative pure-ontology conflatedness as of ontological-faith-notion-or-ontological-fideism implying such a construct as the deprocrypticism institutionalisation suprastructuration (pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-(as conflation of apriorising/intelligibilitysetup/measuringinstrument/axiomatising)) will certainly be a remote contemplation of such an averaging-of-thought mental-disposition of our registry-worldview/dimension, rather construing its circular-pervasiveness closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications as absolute by reflex beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought wherein achievement motives and temporal-stakes of the conventional constructs as of human finite aspirations whether socially, professionally, family-wise, hedonic, etc. as of the registry-worldview’s/dimension’s denaturing closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications so-construed prospectively, will tend to ‘take precedence as of ontological-incompleteness-of-reference-of-thought induced distractive-alignment-to-reference-of-thought and override any such sense of relative pure-ontology conflatedness notion as of prospective relative-ontological-completeness-of-reference-of-thought and implying rather a prospective

transcendental depth-of-thought/reference-of-thought. This equally explains why the implied supratransversality as of aetiologisation/ontological-escalation is necessarily a ‘presencing consummated/forfeiting posture’ of intemporality-asymmetric-subsumption-of-temporality/ontological-asymmetrisation that needs to take into account this ‘paradox of transcendence’. And critically so, because beyond just ‘human conscious willing’, transcendence necessarily implies the ‘prospect of humans to appreciate/understand meaningfulness-and-teleology beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought’; such that, structurally/paradigmatically/necessarily, that which gets to ‘conceptualise/construe beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought’ is necessarily ontologically-asymmetrical as rather imbued with intellectual-and-moral responsibility over that which doesn’t get there (and so, even with regards to a basic non-transcendental construal of asymmetrisation within a same registry-worldview’s/dimension’s reference-of-thought like Doctor – Patient, Parent – Child, Server – Customer, Teacher – Student etc. as ensues from a Derridean binary opposition analysis). However at uninstitutionalised-threshold, the notion of intemporality-asymmetric-subsumption-of-temporality/ontological-asymmetrisation is not readily acquiesced to for the simple reason that two references-of-thought/axiomatic-constructs are at play with those adhering to the prior/transcended/superseded categorical-imperatives/axioms/registry-teleology inclined beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought to uphold meaningfulness-and-teleology as such, whereas in contrast adherence to the prospective/transcending/superseding as of its prospective relative-ontological-completeness-of-reference-of-thought will certainly grasp the pertinence of intemporality-asymmetric-subsumption-of-temporality/ontological-asymmetrisation as of deconstruction/ontological-reconstituting aetiologisation/ontological-escalation; so construed, as prospective relative-

ontological-completeness-of-reference-of-thought brings about deepening
 sense/apriorising/axiomatising—psychologism of transcendently-enabled-
 institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-
 objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism meaningfulness-
 and-teleology construal for a sounder and sounder relationship with intrinsic-
 reality/ontological-veridicality. [In this respect, it should be noted that in the example on the
 denaturing of Additionality as further articulated below with regards to the characters A, B,
 C, D, E, F and Z, it is naïve to think that the characters A, B, C, D, E, F will simply acquiesce
 to Z's supposedly ontologically-veridical posture, as by their prior relative-ontological-
 incompleteness-of-reference-of-thought as beyond-the-consciousness-awareness-teleology-
 in-existential-extirpation-as-of-existential-unthought they may operate on a logic that once
 such a situation as A induced additionality defect deception develops as of 'lack of
 constraining social universal-transparency, that's fine and implicitly others could just as well
 consciously go along with it, and that it is just as implicitly legitimate as of the wooden-
 language—of-temporal-mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-
 dementing-narratives of the prior/transcended/superseded categorical-
 imperatives/axioms/registry-teleology notwithstanding its failing/not-upholding-as-of-
 axiomatic-construct intemporal-preservation-entropy-or-contiguity—or—ontological-
 preservation as of ontological-faith-notion-or-ontological-fideism; highlighting how across
 the successive registry-worldviews hollow-staging-and-performance or
 apriorising/intelligibilitysetup-caricaturing arise, however, different the perception from
 'very-crude' (with recurrent-utter-uninstitutionalisation) to 'seemingly polished' (with our
 positivism—procrypticism) depending on prospective relative-ontological-completeness-of-
 reference-of-thought. This is to point out that at uninstitutionalised-threshold temporal-
 dispositions as of ontological-incompleteness-of-reference-of-thought do not necessarily

acquiesce to intemporality-asymmetric-subsumption-of-temporality or asymmetrisation (as Z's ... looking down on A, B, C, D, E and F mental-dispositions perversion-and-derived-perversion-of-reference-of-thought as allowing for the endemisation/enculturation of the denaturing of additionality and the implications thereof of subsequent denaturing in circularity/recurrence/repetition/repeatability that ensue where socially-functional-and-accordant due to lack of constraining social universal-transparency-or-understanding-as-ontological-primemovers-totalitative-framework-of-underlying-phenomena which protects the internal-coherence of meaning for virtue'; not only as a specific/particular construal/conceptualisation but of universal import as having to do with endemisation/enculturation of perversions-of-reference-of-thought-⟨reflected-as-unsoundness-or-inauthenticity-of-reference-of-thought⟩.] Does the 'intellectual romanticism' of a Rousseau articulation of universal human rights necessarily register fully in the mindset/reference-of-thought of the averaging-of-thought of his epoch or is it rather more truly a beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought notion until the necessary psychoanalytic-unshackling/memetic-reordering/institutional-recomposure generations latter that brings this beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought notion to the fore of the averaging-of-thought, and this interrogation could be extended to say superstitious notions and their implications in a non-positivistic social-setup as the drive of say a rational-empiricism/positivistic emancipating agent in many ways will be a beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought notion for the averaging-of-thought in such a social setting, and equally similar issues faced today in many a traditional society like female genital mutilation is more than just an issue of stopping the practitioners of genital mutilation but has to do with averaging-of-thought meaningfulness-and-teleology in such social-setup that is a question of a beyond-the-

consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought notion with respect to recasting of gender rights in a prospective meaningfulness-and-teleology. Likewise, it could be asked whether such an aetiologisation/ontological-escalation notion as deprocrypticism institutionalisation implied suprastructuration over our positivism—procrypticism is rather not a beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought notion as of the present averaging-of-thought mental-disposition and mental-projection. The fact is that registry-worldviews/dimensions operate meaningfulness-and-teleology as of their ontological representation of reality within the limits of their categorical-imperatives/axioms/registry-teleology which provide them with their ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific referencing/reference-of-thought/axiomatic-construct for predicative-insights’ (so derived from prior ontological-faith-notion-or-ontological-fideism induced projective-insights/postdication/deconstruction), but then the further possibility of expanding the axiomatic-construal/axiomatic-conceptualisation of ontological representation of reality as prospective registry-worldview/dimension suprastructuration requires new projective-insights/postdication/deconstruction to establish more profound categorical-imperatives/axioms/registry-teleology as new/prospective ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific referencing/reference-of-thought/axiomatic-construct for predicative-insights’; but then, such ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific referencing/reference-of-thought/axiomatic-construct for predicative-insights’ of each registry-worldview/dimension suprastructuration comes with a fundamental mentation-reflex flaw that their given ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific referencing/reference-of-thought/axiomatic-construct for predicative-insights’ is absolute and non-transcendable’ beyond-the-consciousness-awareness-teleology-in-

existential-extirpation-as-of-existential-unthought, failing to grasp that projective-
 insights/postdication/deconstruction (factoring in human limited-mentation-capacity-
 deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-
 thought,-by-ratio-contiguity/ratiocination) about prospectively more profound categorical-
 imperatives/axioms/registry-teleology will certainly imply an altogether new/prospective
 ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific
 referencing/reference-of-thought/axiomatic-construct for predicative-insights’ and
 notwithstanding the fact that that present registry-worldview/dimension is the result of prior
 projective-insights/postdication/deconstruction induced transcendence. Such that it is a cross-
 generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure as a
 beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-
 unthought notion that enables the fulfilment of the promise of projective-
 insights/postdication/deconstruction as of ontological-faith-notion-or-ontological-fideism
 effectively with deconstruction/engaged-destruktion/ontological-reconstituting; and so, with
 respect to transcending from recurrent-utter-uninstitutionalisation right up to our positivism—
 procrypticism institutionalisation suprastructuration, and prospectively the same human—
 aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—
 imbued-temporal-to-intemporal-dispositions—existentialism-form-factor issues arise with
 respect to the possibility of our prospective transcendence to deprocrypticism, as we perceive
 our ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific
 referencing/reference-of-thought/axiomatic-construct for predicative-insights’ as absolute
 failing to construe the all-encompassing redefining implications of projective-
 insights/postdication/deconstruction with respect to the possibility of an altogether
 new/prospective ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific
 referencing/reference-of-thought/axiomatic-construct for predicative-insights’ (as pre-

empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-(as conflation of apriorising/intelligibilitysetup/measuringinstrument/axiomatising)). So the challenge as of this aetiologisation/ontological-escalation as implying futural Being-development/ontological-framework-expansion as of prospective deprocrypticism, is one of making conscious beyond the nombrilism/closed-structuring-of-meaningfulness-and-teleology within all registry-worldviews/dimensions just as ours inducing transversality/logical-incongruence, that doesn't tend to consciously recognise that prospective ontological-completeness-of-reference-of-thought imply as of the institutionalisation process that new projective-insights/postdication/deconstruction necessarily induce new 'apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific referencing/reference-of-thought/axiomatic-construct for predicative-insights' defining new/prospective registry-worldview/dimension. Particularly so, as averaging-of-thought mental-dispositions most profound relationship to meaningfulness-and-teleology tends to be geared rather towards the given 'apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific referencing/reference-of-thought/axiomatic-construct for predicative-insights' as-an-only-one as this enables human finite aspirations whether socially, professionally, family-wise, hedonic, etc. as of the registry-worldview's/dimension's denaturing closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications so-construed prospectively, as within ONLY recurrent-utter-uninstitutionalisation (by its non-rules-as-impulsive-or-accidented-or-random-mental-disposition categorical-imperatives/axioms/registry-teleology), ONLY base-institutionalisation-ununiversalisation (by its rulemaking-over-non-rules categorical-imperatives/axioms/registry-teleology), ONLY universalisation-non-positivism/medievalism

(by its universalisation-directed-rulemaking-over-non-rules categorical-imperatives/axioms/registry-teleology), or ONLY positivism–procrypticism (by its positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules categorical-imperatives/axioms/registry-teleology), and so ‘construed-as-of-contingent-circular-pervasiveness closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications-as-instant-and-absolute-basis-for-being/existence’ (despite the ontological-incompleteness-of-reference-of-thought induced distractive-alignment-to-reference-of-thought and override any such sense of relative pure-ontology conflatedness as of prospective relative-ontological-completeness-of-reference-of-thought conflatedness), whilst the projective-insights/postdication/deconstruction discernment as of ontological-faith-notion-or-ontological-fideism (since the purpose of categorical-imperatives/axioms/registry-teleology is about intemporal-preservation-entropy-or-contiguity—or—ontological-preservation, and not the mimicking of their wooden-language—of-temporal-mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives, whether beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought), about how and why the institutionalisation process as of such successive ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific referencing/reference-of-thought/axiomatic-construct for predicative-insights’ is driven from recurrent-utter-uninstitutionalisation to base-institutionalisation–ununiversalisation to universalisation–non-positivism/medievalism to positivism–procrypticism by projective-insights/postdication/deconstruction in establishing them in the first place as of prospective relative-ontological-completeness-of-reference-of-thought, and thus the utility of projective-insights/postdication/deconstruction in enabling futural Being-development/ontological-framework-expansion as of prospective deprocrypticism (pre-empting-disjointedness-as-of-

reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules categorical-imperatives/axioms/registry-teleology) by construing its grander ‘re-apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific referencing/reference-of-thought/axiomatic-construct for predicative-insights’ as of full ontological-completeness-of-reference-of-thought, tends to be lost to temporal/shortness-of-register-of-meaningfulness-and-teleology mental-dispositions; speaking more of a mental-orientation not geared to grasp the ‘existential tale’ of its species as of ontological-faith-notion-or-ontological-fideism driven human eternalising and emancipating aspiration behind projective-insights/postdication/deconstruction for creating successive ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatisings specific referencing/reference-of-thought/axiomatic-construct for predicative-insights’ as of prospective relative-ontological-completeness-of-reference-of-thought. But rather an ad-hoc mental-orientation ‘construed-as-of-contingent-circular-pervasiveness closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications-as-instant-and-absolute-basis-for-being/existence’ (despite the ontological-incompleteness-of-reference-of-thought induced distractive-alignment-to-reference-of-thought and override any such sense of relative pure-ontology conflatedness as of prospective relative-ontological-completeness-of-reference-of-thought conflatedness) not geared to uphold eternalising and emancipating possibilities implied by projective-insights/postdication/deconstruction notwithstanding the fact that its ‘construed-as-of-contingent-circular-pervasiveness closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications-as-instant-and-absolute-basis-for-being/existence’ (naively perceived as the only one as of mechanicalism with a poor sense of organicalism, despite the ontological-incompleteness-of-reference-of-thought and override any such sense of relative pure-ontology conflatedness as

of prospective relative-ontological-completeness-of-reference-of-thought) arose by projective-insights/postdication/deconstruction as of ontological-faith-notion-or-ontological-fideism. Further, even more decisively though by reflex we naively-and-erroneously tend to construe of human virtuous-dispositions or vices-and-impediments as arising mainly as of their conscious choices, paradigmatically/structurally a registry-worldview/dimension prior relative-ontological-incompleteness-of-reference-of-thought as a beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought notion is the more decisive/salient notion as to human ‘objectively construed/analysed virtuous-dispositions or vices-and-impediments’ even though individual ‘conscious choices’ will tend to ‘simply qualify the effective possibility of such virtuous-dispositions or vices-and-impediments arising’; such that a registry-worldview/dimension incompleteness-of-reference-of-thought is paradigmatically/structurally susceptibility as a state of ‘in-wait as of prior relative-ontological-incompleteness-of-reference-of-thought defective categorical-imperatives/axioms/registry-teleology for the vices-and-impediments so implied to arise-and-be-endemised/enculturated beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. This explains why the institutionalisation process is basically about shifting apriorising/intelligibilitysetup/measuringinstrument/axiomatisings to supersede the state of beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as of human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination in handling the more and more profound/depth of intrinsic-reality/ontological-veridicality construing reference-of-thought/axiomatic-construct that avails as of ontological-normalcy/post-convergence or increasing ontological-completeness-of-reference-of-thought; (such that such meaningfulness as expressed herein is more than just of logical construct implying simple logical meaningfulness as within only a single-as-our-

present positivistic predicative-insights framework of reasoning and understanding, but requires a more profound retrospective and prospective mental-projection in its contemplation). This equally explicates the empirical reality associated with the occurrence of human transcendence cross-generationally as the timeframe for psychoanalytic-unshackling/memetic-reordering/institutional-recomposure of projective-insights/postdication/deconstruction induced prospective/transcending/superseding registry-worldview/dimension 'apriorising/intelligibilitysetup/measuringinstrument/axiomatising specific referencing/reference-of-thought/axiomatic-construct for predicative-insights' to take hold. It equally explicates why hollow-staging-and-performance or apriorising/intelligibilitysetup-caricaturing (as 'vague staging and performing' and not truly dialectically-thinking meaningfulness-and-teleology) tend to arise in each registry-worldview/dimension at its uninstitutionalised-threshold. This has to do fundamentally with the antipodality of the mental-dispositions of postlogism-as-of-non-conviction as of effecting-parsimony-as-of-shoddiness-and-incompleteness-to-meaningfulness-and-teleology and prelogism-as-of-conviction as of effecting-wholeness-as-of-profoundness-and-completeness-to-meaningfulness-and-teleology in the construal of intrinsic-reality/ontological-veridicality. It is important to grasp that such 'prelogism-as-of-conviction existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context dynamic' of the nature of 'postlogism-as-of-non-conviction/distractive-alignment-to-reference-of-thought dynamism' as knowledge-construct/intersolipsistic-intercessory-notion/notional-referential-notion/articulation is a critical element for a postlogism/psychopathy storied-construct development as of aetiologisation/ontological-escalation insight, at the individuation-level of analysis, involving 'themes-driven underlying-agency-or-sous-agencement dynamics for narration-construed-as-instantiative-

moulting' as of ontological-normalcy undermining by 'distractive-alignment-to-reference-of-thought with distractive-alignment-to-reference-of-thought and corresponding ontological-normalcy upholding with conflatedness. (Thus disambiguating mental-dispositions as of 'prelogism-as-of-conviction reference-of-thought', 'postlogism-as-of-non-conviction/psychopathic mental madeupness/bottomline of reference-of-thought', and various 'derived-non-conviction/conjugated-postlogisms/social-psychopathy as madeupness/bottomline of reference-of-thought'; and as this 'aftereffect/dynamic-cumulative-aftereffect of upholding/failing ontologically-normalcy' reflects constitutedness, first-level-pseudo-conflation, second-level-pseudo-conflation, third-level-pseudo-conflation and conceptual-conflatedness – altogether construed as of notional-conflatedness/constitutedness-to-conflatedness reflecting uninstitutionalised-threshold/conventioning/closed-structure/non-transcendability/distractive-alignment-to-reference-of-thought/effecting-parsimony as of 'reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold' meaningfulness and corresponding prospective-institutionalisation/ontology/opened-structure/transcendability/conflatedness teleological-elevated-as-'prelogism-as-of-conviction commitment of reference-of-thought' of meaningfulness, and so as of conflatedness of social-stake-contention-or-confliction comprehensive-and-insightful itemisation for developing storied-construct. At both registry-worldview/dimension-level and individuation-level of analysis unlike 'prelogism-as-of-conviction commitment of reference-of-thought', 'madeupness/bottomline of reference-of-thought' is associated with relative 'temporal-mental-dispositions'-construed-as-surreptitiously-or-palpably-committing-as-of-extrinsic-attribution-or-its-perpetuating-with-other-mental-dispositions-as-supposedly-superseding-intrinsic-reality/ontological-veridicality as of mentally-invested with regards to perceived social-stake-contention-or-confliction' notwithstanding subsequent apprehension of ontologically-veridical meaningfulness-and-

teleology, that speaks of ‘ad-hoc social-commitment-thresholds for foregoing the upholding of intrinsic-reality/ontological-veridicality’ and assuming denaturing as of ‘lack of constraining social universal-transparency at the uninstitutionalised-threshold beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. It is this dynamic-cumulative-aftereffect/aftereffect that underlies perversion-and-derived-perversion-of-reference-of-thought associated with uninstitutionalised-thresholds.) This thus conveys the individuation-level of analysis ontological-primemovers-totalitative-framework as well as differentiated intemporal-conflatedness-as-effecting-wholeness-as-of-profoundness-and-completeness-to-meaningfulness-and-teleology-or-temporal-constitutedness-as-effecting-parsimony-of-meaningfulness-and-teleology (so implied by metaphysics-of-absence as of our procrypticism uninstitutionalised-threshold as disjointedness-as-of-reference-of-thought). By mental-reflex a postlogism-as-of-non-conviction stand is a ‘mental-shortcut’ that is fundamentally perverted as it perceives meaning as ‘deterministic of others behaviours by its empty-form’ while a prelogism-as-of-conviction stand is one that relates to meaning on the basis of its assumed existential validity, or at worst involves omissions or exaggerations relative to such fundamental existential validity, but doesn’t countenance by mental-reflex the projection of empty-form of meaningfulness which is ‘existentially invalid’ in the very first place. Consequently, where there is ‘lack of constraining social universal-transparency at the uninstitutionalised-threshold due to ontological-incompleteness-of-reference-of-thought, postlogism-as-of-non-conviction implied meaningfulness-and-teleology will tend to be incidentally conjugated with prelogism-as-of-conviction dispositions as of ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation. This is the case beyond just any such specific instances and such specific postlogism-as-of-non-

conviction character(s) and specific conjugated-postlogism character(s) but rather as of aftereffect/dynamic-cumulative-aftereffect, and thus defining together with the registry-worldview/dimension prior relative-ontological-incompleteness-of-reference-of-thought at its ‘uninstitutionalised-threshold the hollow-staging-and-peformance-or-apriorising/intelligibilitysetup-caricaturing as a dementing enculturation’. This is characteristic of the successive uninstitutionalised-thresholds whether as recurrent-utter-uninstitutionalisation (non-rules-as-impulsive-or-accidented-or-random-mental-disposition hollow-staging-and-performance as random/impulsive mental-disposition), ununiversalisation (non-universalising hollow-staging-and-performance like animistic attributing of misfortune to someone else’s malevolent spirit), non-positivism/medievalism (non-positivising/non-rational-empirical hollow-staging-and-performance like notions-and-accusations-of-sorcery) or procrypticism (disjointed-misappropriating-of-meaning hollow-staging-and-performance like psychopathy and social psychopathy), thus construing of a registry-worldview as of its ontological-incompleteness-of-reference-of-thought as rather reflecting ‘virtue-and-ontological-veridicality’ as of its institutionalisation and ‘vices-and-impediments’ as of its uninstitutionalised-threshold. This consequently implies at the uninstitutionalised-threshold an ‘symmetrisation-of-reference-of-thought but which is in effect an ontologically-non-veridical-or-flawed-totalising–self-referencing-syncretising and/or desymmetrisation for perceived temporal social-stake-contention-or-confliction as hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing’ is socially induced in temporality requiring deconstruction/ontological-reconstituting as intemporal-asymmetric-subsumption-of-temporality/ontological-asymmetrisation as of prospective relative-ontological-completeness-of-reference-of-thought, which in the bigger picture speaks of ‘differentiated construal of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-

instantiative-context' wherein the temporal is 'dementing-and-decentered-to-prior-institutionalisation's-categorical-imperatives/axioms/registry-teleology and the intemporal-as-ontological dialectically-thinking-and-centered-to-prospective-institutionalisation's-categorical-imperatives/axioms/registry-teleology, and further explains the 'paradox of transcendence' (confusion of relative ontologically-veridical becoming-or-present-of-reference-of-thought') wherein the temporal is hung (beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought) to the wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the registry-worldview's/dimension's institutionalisation categorical-imperatives/axioms/registry-teleology thus 'construed-as-of-contingent-circular-pervasiveness closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications-as-instant-and-absolute-basis-for-being/existence' (despite the ontological-incompleteness-of-reference-of-thought induced distractive-alignment-to-reference-of-thought and override any such sense of relative pure-ontology conflatedness as of prospective relative-ontological-completeness-of-reference-of-thought conflatedness) whereas the intemporal-as-ontological construes categorical-imperatives/axioms/registry-teleology as meant for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation and up for remaking once perversion-and-derived-perversion-of-reference-of-thought undermines their intemporal-preservation-entropy-or-contiguity—or—ontological-preservation on the basis of the 'complementing grander social-universally-non-transparent-thus-non-constraining-element of ontological-faith-notion-or-ontological-fideism' with regards to human limited-mentation-capacity and as of 'intemporal-prioritisation-of-reference-of-thought'-as-conflatedness. This conceptualisation as a 'dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics' is empirically more true of human

development which by a flawed metaphysics-of-presence overly construes in totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag the positivistic psyche almost as if it is the sole and genuine one without factoring in the notion of a continuous ‘totalising–renewing-realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-prospective-meaningfulness-and-teleology)’ in successions of human psyches arising with human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination, with the further implication of a prospective ‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics’ as a deprocrypticism psyche and its corresponding memetism or suprastructural meaningfulness-and-teleology.

Now supposed Z was another character inclined for maximalising-recomposuring-for-relative-ontological-completeness/transvaluating as preserving the inherent intemporality of additionality as allowing civilisational/institutional-being-and-craft setup preservation, brought in by the Donor, there is no question that Z will register the newly divulged ontological-veridicality/intrinsic-reality of the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising and its derived-implications as perversion-and-derived-perversion-of-reference-of-thought to renew the construal/conceptualisation of what is considered as a relatively ontological-completeness-of-reference-of-thought for a prospective reference-of-thought that preserves intemporality, by factoring in the fact of this contextual ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought as it enculturates/endemises the perversion-of-reference-of-thought, and thus will be predisposed to a reconstrual/reconceptualisation of arithmetic principles factoring in and superseding this specific-type (as exposed by B’s

postlogism and C, D, E, F conjugated-postlogism) of ‘imbricatedness/threadedness/recomposuring as existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality’ or ‘dialectically-thinking-reference-of-thought as depth-of-thought’, and will look down on B, C, D, E and F mental-dispositions perversion-and-derived-perversion-of-reference-of-thought as allowing for the endemisation/enculturation of the denaturing of additionality and the implications thereof of subsequent denaturing in circularity/recurrence/repetition/repeatability that ensue where socially-functional-and-accordant (lack of constraining social universal-transparency-or-understanding-as-ontological-primemovers-totalitative-framework-of-underlying-phenomena which protects the internal-coherence of meaning for virtue’), not only as a specific/particular construal/conceptualisation but of universal import as having to do with endemisation/enculturation of perversions-of-reference-of-thought-(reflected-as-unsoundness-or-inauthenticity-of-reference-of-thought) speaking fundamentally of the given prior relative-ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought (wherein Z’s disposition is an ordered-construct or second-naturing institutionalisation over B, C, D, E and F mental-anarchy/mentarchy inducing of ‘uninstitutionalised-threshold’). Though metaphorically in the mortal’s temporal/shortness-of-register-of-meaningfulness-and-teleology terms, that ‘low-life’ of universal import may be utterly oblivious to the practicalities of B, C, D, E and F so engrossed in a world of ‘high-life’ of temporality/extirpation as the ‘fullness of meaningfulness-and-teleology’ over the appreciation of the intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-

for-relative-ontological-completeness/transvaluating paradigm, be it that the latter disposition as philosophically intemporal is what creates-and-enables the being in civilisation/institutionalised-being-and-craft in the first place, as the metaphorically ‘high-life’ of temporality/extirpation cannot count on an overall principle of temporality/extirpation for its existential sustainability (as B, C, D, E and F needs that the Donor grants the rewards by not factoring in the deceit, thus their existential principle doesn’t sustain the ‘civilisation/institutionalised-being-and-craft setup’ in which they are living in, hence qualified as extirpatory/temporal/parasitising/co-opting as ‘least-and-derived-temporal-operating-modalities-of-the-reference-of-thought-as-of-incrementalism-in-relative-ontological-incompleteness-inducing-the-uninstitutionalised-threshold’) but unavowedly and paradoxically rather on the parasitising/co-opting of the intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm enabling the institutionalisation process; and besides, it is because the intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency as prospective ontologising (as undertaken by Z) can supersede denaturing postlogical-backtracking towards ‘social-aggregation-enablers over intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency’ (referenced by B, C, D, E and F) that the further possibility (as transcendence) for prospective civilisation/institutionalised-being-and-craft setup as new conventioning arises. Hence the notion of ‘imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality’ (from the perspective of the ‘dialectically-thinking-reference-of-thought as depth-of-thought’) exposes contextually the relative temporality-to-intemporality (shortness-to-longness-of-register-of-

meaningfulness-and-teleology) of human mental-dispositions implying an intellectual-and-moral-inequivalence/non-correspondence between of temporal-dispositions perversion-and-derived-perversion-of-reference-of-thought involved in postlogism and conjugated-postlogism as it discloses the temporal-dispositions individuations mental-dispositions displayed by B, C, D, E and F (as ‘wrongly-projected decontextualising-unimbricatedness/unthreadedness/unrecomposuring-as-virtuality-or-ontologically-flawed-construal (which is rather dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing reference-of-thought in shallowness-of-thought-or-unsophistication-of-understanding) in grasping existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality’ in their relationship with additionality as elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity) in contrast to the intemporal-disposition individuation mental-disposition displayed by Z (as ‘imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality’ (from the perspective of the ‘dialectically-thinking-reference-of-thought as depth-of-thought’) in its relationship with additionality (as elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity) by way of Z’s ‘maximalising-recomposuring-for-relative-ontological-completeness/transvaluating-(unwinding-as-unfolding/dépliage-as-détendre of elucidation-of B, C, D, E and F ‘wrongly-projected decontextualising-unimbricatedness/unthreadedness/unrecomposuring-as-virtuality-or-ontologically-flawed-

construal (which is rather dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing reference-of-thought in shallowness-of-thought-or-unsophistication-of-understanding) in grasping existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality or B, C, D, E and F). In other words, this situation highlights the universal issue across all registry-worldviews/dimensions underlying the notion of temporality and intemporality. Wherein categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity-or-ontological-preservation for the intemporal mental-disposition individuation are meant to uphold intemporality incontrovertibly and where such is blurred or undermined given ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought going by human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) requiring a further accruing as deeper human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) as 'an existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning' that 'retraces' the existential-reality for intemporal-preservation-entropy-or-contiguity-or-ontological-preservation by maximalising-recomposuring-for-relative-ontological-completeness/transvaluating of categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity-or-ontological-preservation with the implications thereof ushering in the successive institutionalisations as the need for new 'contextualising-contiguity of imbricated-becoming-transitioning as of-existential-reality' when the idea of ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-

ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-
 prospective-reference-of-thought arises (as uninstitutionalised-threshold); i.e., from recurrent-
 utter-uninstitutionalisation to base-institutionalisation–ununiversalisation to universalisation–
 non-positivism/medievalism to positivism–procrysticism and prospectively to
 deprocrysticism. While for the temporal mental-disposition individuations the form-and-
 perception or derived-form-and-perception of intemporal-preservation-entropy-or-contiguity–
 or–ontological-preservation whether upholding ontological-veridicality/intrinsic-reality or not
 (and so whether unconsciously, expediently or consciously) is a sufficient basis so long as it
 is socially-functional-and-accordant such that the possibility of blurring or undermining
 existential-reality by ‘wrongly-projected decontextualising-
 unimbricatedness/unthreadedness/unrecomposuring-as-virtuality-or-ontologically-flawed-
 construal (which is rather dementing hollow-staging-and-performance-or-
 apriorising/intelligibilitysetup-caricaturing reference-of-thought in shallowness-of-thought-
 or-unsophistication-of-understanding) in grasping existential-contextualising-contiguity’s-
 reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-
 thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-
 that-remain of-existential-reality’ is just as valid, hence a failure to abstractly recognise
 intemporality as of-existential-reality with the implication thereof as perversion-and-derived-
 perversion-of-reference-of-thought with respect to the registry-worldview’s/dimension’s
 vices-and-impediments implied by its implied ontological-incompleteness-of-reference-of-
 thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-
 performance-so-construed-by-prospective-reference-of-thought. Hence the reason why the
 vices-and-impediments inherent of a given registry-worldview/dimension cannot be
 structurally/paradigmatically/ontologically resolved within it as there is need for prospective
 ontological-completeness-of-reference-of-thought structured to inherently supersede such

vices-and-impediments, whether as base-institutionalisation in superseding recurrent-utter-uninstitutionalisation, universalisation superseding base-institutionalisation–ununiversalisation, positivism superseding universalisation–non-positivism/medievalism and deprocrypticism superseding positivism–procrypticism/disjointedness-as-of-reference-of-thought. The central idea here being that the most critically important notion in the situation of A, B, C, D, E, F and Z, is Z’s upholding of prospective transcendental-enabling/existence-potency over any temporal extirpatory paradigm, however, the enculturation and mass thinking behind temporal extirpatory paradigm. (* Noting that individuation as defined elsewhere speaks of temporal-to-intemporal trait characteristic, as anywhere between shortness-to-longness-of-register-of-meaningfulness-and-teleology, that can accrue at least incidentally/on-occasion in all individuals-as-receptacles-of-individuations but more recurrently as teleologically defining in a-life-phase-or-life-phases-of-given-individuals, thus critically enabling a dynamic-cumulative-aftereffect intradimensional and transcendental/transdimensional/interdimension/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating analysis as metaphysics-of-absence/postdication). Finally, thus it is critical to note that the existential contextualisation above as ‘imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity’-s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality’ (from the perspective of the ‘dialectically-thinking-reference-of-thought as depth-of-thought’) is a priori and supersedes the mere notion of additionality as elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity since mere additionality is bound to wrongly represent the additions of B, C, D, E and F as correct (as it is a virtuality-or-ontologically-flawed-

construal/being-construal-as-abstract-construal-as-of-flawed-and-shallow-and-non-veridical-
 existential-reference in totalising-self-referencing-syncretising/illusion-of-the-present-
 present-consciousness/mirage as metaphysics-of-presence) thus overlooking their ‘wrongly-
 projected decontextualising-unimbricatedness/unthreadedness/unrecomposuring-as-virtuality-
 or-ontologically-flawed-construal (which is rather dementing hollow-staging-and-
 performance-or-apriorising/intelligibilitysetup-caricaturing reference-of-thought in

 completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-
 becoming-transitioning as-rules-that-remain of-existential-reality’. Such ‘an absolute
 teleological-differentiation/scission/variance/disambiguation of references-of-thought’ of Z’s
 intemporal-disposition reference-of-thought as supratransversality over B, C, D, E and F
 temporal-dispositions references-of-thought as subtransversality, can be demonstrated in the
 archetype characters of say a Socrates or Rousseau (even though no human individual as
 receptacle of individuations can be qualified as purely of intemporal-disposition or purely of
 temporal-dispositions). Wherein within their respective registry-worldviews/dimensions
 setups, their maximalising-as-transcendental recomposuring mental-dispositions in projection
 for prospective institutionalised-being-and-craft, i.e. ontologising of future conventioning, as
 supratransversality (as the grander intellectual-and-moral effort that can be made within their
 registry-worldviews/dimensions) is rather poorly construed to the ordinariness/averageness of
 thought within their respective registry-worldviews/dimensions setups (which mental-
 dispositions and conventioning – as ‘wrongly-projected decontextualising-
 unimbricatedness/unthreadedness/unrecomposuring-as-virtuality-or-ontologically-flawed-
 construal (which is rather dementing hollow-staging-and-performance-or-
 apriorising/intelligibilitysetup-caricaturing reference-of-thought in shallowness-of-thought-

or-unsophistication-of-understanding) in grasping existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality' – will rather think as irrational the projective disposition of a Socrates that doesn't rather advance a temporal interest in the city-state polity but is rather bent on spreading new ideas as a natural philosopher while prioritising as of nonextirpatory-existential-preempting-of-existential-unthought in his asceticism the prospective intemporal over the temporal status quo, and likewise with a Rousseau who isn't advancing a temporal interest that his aristocratic stature should warrant like actively pursuing for landed properties and currying favours with kings but is rather bent principally on a prospective commitment on grasping and spreading notions of a renewal of the human condition as universal rights and enlightened despotism. This is certainly because emanantly/becomingly/solipsistically temporal-dispositions do not appreciate that there is a more 'profound level of living in the realm of human thoughtfulness' based on eudaemonic-contemplation of 'intemporal-prioritisation-of-reference-of-thought'-as-conflatedness that then 'invents/creates' the structural/paradigmatic possibility for prospective institutionalised-being-and-craft as there isn't any inherent intemporality needed for maximalising-recomposuring-for-relative-ontological-completeness/transvaluating out of the ordinariness/averageness of any institutionalised-being-and-craft setup. Hence such intemporality as maximalising-recomposuring-for-relative-ontological-completeness/transvaluating need its totalising–renewing-realisation/re-perception/re-thought as of given that the-succession-of-institutionalisations/the-institutionalisation-process is 'not a human solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity transformation exercise as of temporal-dispositions/shortness-of-register-of-meaningfulness-and-teleology but rather is solely a second-naturing to

supersede the uninstitutionalised-threshold divulged by ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought'. The implication is that acting as-of-a-second-natured nature is not enough for articulating prospective institutionalisation requiring 'intemporal projection totalising-renewing-realisation/re-perception/re-thought' for the requisite prospective maximalising-recomposuring-for-relative-ontological-completeness/transvaluating, and such conceptualisations from only a second-naturedness of thought as rather contextually temporal is not intemporal as of-universal-and-abstractive nature but is in 'totalising-self-referencing-syncretising'/illusion-of-the-present/present-consciousness/mirage as metaphysics-of-presence. Thus an institutionalisation second-naturedness is challenged by its very own level of ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought marking its uninstitutionalised-threshold whether as recurrent-utter-uninstitutionalisation with recurrent-utter-uninstitutionalisation, ununiversalisation with base-institutionalisation, non-positivism-or-medievalism with universalisation and procrypticism with positivism, in need for a renewed institutionalisation respectively as base-institutionalisation, universalisation, positivism and prospectively deprocrypticism. This equally explain why the notion of human transcendental progress is relatively 'outlier driven' as it requires an intemporal-solipsism/ontological-faith-notion-or-ontological-fideism of thought more than just institutionalised second-naturing such that it has often been the erudition periphery of institutional-cumulations/institutional-recomposures that had tended to fundamentally put into question their present with new paradigm shifts. It is ontologically-speaking impossible to comprehensively undermine a dimension's/registry worldview's postlogism without undermining the registry-worldview's/dimension's reference-of-thought itself as implied by

its state of ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought, for instance psychopathy in positivism–procrypticism or notions of sorcery in universalisation–non-positivism/medievalism (wherein from the prospective point-of-reference respectively as deprocrypticism or positivism, it is in ontological-dementation/dialectical-dementation as of the placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology), given that this fundamental ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought of the given registry-worldview/dimension as reflected from a ontological-normalcy/post-convergence perspective, by its ‘contextualising-contiguity of imbricated-becoming-transitioning’ means it is structurally bound to enculturate/endemise its given postlogism. Obviously we can appreciate that without a positivistic outlook/reference-of-thought there is no chance that a non-positivistic/medieval registry-worldview/dimension will do away with notions-and-accusations-of-sorcery, as the latter is bound to arise as of human hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing in non-positivism/medievalism where the mindset/reference-of-thought is not rationally-empirical/positivising. Likewise the procrypticism/disjointedness-as-of-reference-of-thought wherein the perversion-of-reference-of-thought from a psychopathic character is contextually likely to be engaged with (as ‘prelogism-as-of-conviction re-engaging reflex’) and even exploited (whether unconsciously, expediently or consciously), implies a comprehensive structural/paradigmatic undermining of the phenomena of psychopathy and social psychopathy is impossible without putting in question and undermining our uninstitutionalised-threshold as procrypticism for futural Being-development/ontological-framework-expansion as of prospective deprocrypticism which is effectively the

structural/paradigmatic resolution of psychopathy and social psychopathy (besides palliative conceptualisations that can hardly make a dent on the comprehensively defined structural/paradigmatic phenomenon in terms-as-of-axiomatic-construct of the larger aetiologisation/ontological-escalation) just as positivism is the structural/paradigmatic ontological resolution of notions-and-accusations-of-sorcery, and ad hoc tempering with medieval postlogism (perverted-outcome-sought-precedes-existentially-veridical-logical-dueness) as instances of notions-and-accusations-of-sorcery doesn't grasp the underlying and comprehensive medieval social-construct structural/paradigmatic endemisation/enculturation of such a phenomenon. Further, registry-worldviews/dimensions being prospectively closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications with their 'intradimensional socially-betraying-threshold-of-ontologising-depth-of-analysis' or 'socially-betraying-threshold-of-intemporal-preservation-entropy-or-contiguity-or-ontological-preservation' determined by their 'sanctified-conventioning-social-aggregation-enablers', there is a need to circumvent and break these 'sanctified-conventioning-social-aggregation-enablers' by prospective 'intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency' to allow for new defining transcendental meaningfulness and its corresponding grander teleological-differentiation/teleology that can then perceive the prior registry-worldview/dimension as of its ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought and accessorially its enculturating/endemising of its postlogism, and superseding both of these in the prospective registry-worldview/dimension institutionalisation. For instance, the intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency of a medicine based on natural causes and drugs as natural cures carried the effectiveness/ontological-primemovers-totalitative-framework that undermined non-

positivistic/medieval ‘sanctified-conventioning-social-aggregation-enablers’ to do away with such notions as curses, sorcerers, etc. being the cause of disease, and undermine the whole degraded teleological dispositions based on such ‘sanctified-conventioning-social-aggregation-enablers’. Likewise only by articulating comprehensive and effective aetiologisation/ontological-escalation resolutions to the defect of procrypticism and its postlogism first with respect to formal constructions that the derived effectiveness/ontological-primemovers-totalitative-framework can feed back as percolation-channelling to dimensionally (registry-worldview) to undermine the ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance-so-construed-by-prospective-reference-of-thought of our procrypticism and accessorially its enculturating/endemising of psychopathy and social psychopathy. Thus suprastructurally (beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought) and as of the ontological-normalcy/post-convergence ontological-completeness-of-reference-of-thought perspective, ‘imbricatedness/threadedness/recomposuring as of existential-contextualising-contiguity’-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context imbricated-becoming-transitioning as-rules-that-remain of-existential-reality’ implies a transversality/logical-incongruence as ‘an absolute teleological-differentiation/scission/variance/disambiguation of references-of-thought’ by maximalising-recomposuring-for-relative-ontological-completeness/transvaluating of prospective reference-of-thought as supratransversality (as of higher ontological-completeness-of-reference-of-thought reflected in operant individuation terms as ‘coherence in depth of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating/longness-of-register-of-meaningfulness-and-teleology construal of reference-of-thought’) over the dialectical-dementing and dialectically/contendingly-out-

of-phasing of the prior reference-of-thought as subtransversality (as of lesser ontological-completeness-of-reference-of-thought with respect to perversion-of-reference-of-thought reflected in operant individuation terms as ‘disjointed-misappropriation/arrogation and derived-disjointed-misappropriation/arrogation of meaningfulness-and-teleological-differentiation in shallowness as incremental/shortness-of-register-of-meaningfulness-and-teleology construal of perversion-of-reference-of-thought and derived-perversions-of-reference-of-thought’; construed as of defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose and derived-implications of the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising measurements-as-of-aposteriorising/intelligising/measuring/logicising-purpose (perversion-of-reference-of-thought-and-derived-perversions-of-reference-of-thought ‘disjointedness-as-of-reference-of-thought’ misappropriated meaningfulness-and-teleological-differentiation in arrogation). This absolute teleological-differentiation/scission/variance/disambiguation of references-of-thought [in terms-as-of-axiomatic-construct of ‘the prospective supratransversality reference-of-thought’ (as maximalising-recomposuring-for-relative-ontological-completeness/transvaluating by way of prospective intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency as it supersedes the prior reference-of-thought ‘socially-betraying-threshold-of-ontologising-depth-of-analysis’ or ‘socially-betraying-threshold-of-intemporal-preservation-entropy-or-contiguity—or-ontological-preservation’ determined by its ‘sanctified-conventioning-social-aggregation-enablers’) and ‘the prior subtransversality reference-of-thought’ (as denaturing postlogical-backtracking dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing towards the reference-of-thought ‘sanctified-conventioning-social-aggregation-enablers’ in undermining prospective intrinsic-reality/ontological-veridicality transcendental-enabler/existence-

potency)] is comprehensively rearticulated all across the ‘reference-of-thought existentialism construct’ i.e., from the registry-worldview (meaning by its specific teleological differentiation/scission/variance/disambiguation construct), the contending-reference (meaning teleological construct), the ontological-reference (being/existential construct of meaning), meaningful-reference (meaning contextualisation construct), the reference-of-thought (operant construal of meaning), and right down to the apriorising–registry (basic defining construct of meaning, in terms-as-of-axiomatic-construct of logical-dueness/profile/presumption/assumptions/value-reference/teleology). This suprastructural and ontological-normalcy/post-convergence insight from an ontological-completeness-of-reference-of-thought point-of-departure-of-construal underlines ontologically that, Deprocripticism (by its ‘non-disjointedness-as-of-reference-of-thought’ categorical-imperatives/axioms/registry-teleology i.e., deprocripticism-or-pre-empting-procripticism-or-object-recomposuring-ontologising) is object-ontologising-recomposuring by subsuming-as-supplanting-(as-of-relatively-more-profound-construal-of-existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context) Positivism–procripticism which (by its ‘positivising/rational-empiricism’ categorical-imperatives/axioms/registry-teleology i.e., positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-(as ‘third-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising)) is maximalising-recomposuring-for-relative-ontological-completeness/transvaluating by subsuming-as-supplanting-(as-of-relatively-more-profound-construal-of-existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context) Universalisation–non-positivism/medievalism which (by its ‘universalising’ categorical-

This implies a human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) undergoing a maximalising-recomposuring-for-relative-ontological-completeness/transvaluating from shallowest limited-mentation-capacity-(as of relative constitutedness towards relative conflation) (as recurrent-utter-uninstitutionalisation) to deepest limited-mentation-capacity-(as of relative constitutedness towards relative conflation) (as deprocrypticism) towards a superseding–oneness-of-ontology.  deprocrypticism-or-pre-empting-procrypticism-or-object-recomposuring-ontologising with
 such notion of rules speaking in terms-as-of-axiomatic-construct of both the developing
 capacity of human placeholder-setup/mental-devising-
 representation/mentation/consciousness-awareness-teleology in its
 construing/conceptualising of elaboration-as-mere-
 extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-

 ‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural
 psychology-of-dynamics’, as well as developing institutionalisation capacity as
 meaningfulness-and-teleology differentiations; and so as human totalising-renewing-
 realisation/re-perception/re-thought-as-utter-placeholder-setup-ontological-rescheduling-(by-

a-renewing-of-apriorising/axiomatising–psychologism-as-the-new-referencing-basis-of-
 prospective-meaningfulness-and-teleology) by psychoanalytic-unshackling/memetic-
 reordering/institutional-recomposure. As explained, the reason for the successive
 institutional-cumulations/institutional-recomposures underlying the institutionalisation
 process has to do with human limited-mentation-capacity-(as of relative constitutedness
 towards relative conflation) inducing successive recomposuring from shallow-limited-
 mentation-capacity to deeper-limited-mentation-capacity construed as reducing-epistemic-
 abnormalcy towards ontological-normalcy/post-convergence or intemporal-preservation-
 entropy-or-contiguity-or–ontological-preservation. Hence notionally speaking if humans had
 completed-mentation-capacity there will only be deprocrypticism institutionalisation and not
 the subsuming-succession of recurrent-utter-uninstitutionalisation, base-institutionalisation–
 ununiversalisation, universalisation–non-positivism/medievalism, positivism–procrypticism,
 with all mutually implied as subsumed-as-supplanted in deprocrypticism as of achieved
 ontological-completeness-of-reference-of-thought; subsumed-as-supplanted successively as

 with deprocrypticism, ‘deprocrypticism-or-pre-empting-procrypticism-or-abject-
 recomposuring-ontologising. This existential-becoming-transitioning to deprocrypticism as
 well as the overall existential-becoming-transitioning nature of existence/existential-reality is

the validation of the notion of existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency. That is existence is existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency, such that it inherently implies the institutionalisation process which can be construed as deprocrypticism-as-of-its-mimetic-echoness/deprocrypticism-in-reverberation or ontological-normalcy-as-of-its-mimetic-echoness/ontological-normalcy-in-reverberation or post-convergence. [By extension such projective-insights from a ‘notional human completed-mentation-capacity’ perspective about deprocrypticism conceptually implies that procrypticism is the actually implied epistemic-abnormalcy reflection ‘disjointedness-as-of-reference-of-thought’-as-misappropriated-meaningfulness-and-teleology-in-arrogation, along successive limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination implied uninstitutionalised-thresholds: as failing/not-upholding-as-of-axiomatic-construct recurrently rulemaking-over-non-rules-(as ‘base constitutedness of reference-of-thought’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising), as failing/not-upholding-as-of-axiomatic-construct universalisation-directed-rulemaking-over-non-rules-(as ‘first-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising), as failing/not-upholding-as-of-axiomatic-construct positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-(as ‘second-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising), as failing/not-upholding-as-of-axiomatic-construct pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-(as ‘third-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising), and up to when uninstitutionalised-threshold is structurally/paradigmatically superseded by ‘notional-

Postlogism (perverted-outcome-sought-precedes-existentially-veridical-logical-dueness) is ‘the abnormal application of logic for virtuality-or-ontologically-flawed-construal/being-construal-as-abstract-construal-as-of-flawed-and-shallow-and-non-veridical-existential-reference’ or ‘hollow-constituting’-or-failing-intemporal-preservation-or-misappropriation-of-meaningfulness is very much different from ‘the normal application of logic for being-construal-or-intrinsic-reality-construal as-abstract-construal-as-of-veridical-existential-reference’ known as prelogism (existentially-veridical-logical-dueness-precedes-logical-outcome-arrived-at) as conviction whether good or bad conviction which is at the least ‘of sound logical-dueness of reference-of-thought’, whereas postlogism (perverted-

outcome-sought-precedes-existentially-veridical-logical-dueness) as ‘hollow-constituting’-or-failing-intemporal-preservation-or-misappropriation-of-meaningfulness being ‘of non-conviction’ do not operate on the same logical-dueness of registry//anchoring-of-meaning/meaningful-reference/ontological-reference/contending-reference/registry-worldview mental-devising-representation basis of prelogism-as-of-conviction as ‘of sound reference-of-thought’ which is reflected as mental straightness and candored. Rather postlogism as ‘hollow-constituting’-or-failing-intemporal-preservation-or-misappropriation-of-meaningfulness being about ‘vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging’, harkens back to a registry/mental-devising-representation that is reflected/perspectivated as dementing (oblongated/decandored-and-dialectically-or-contendingly-out-of-phase). Thus postlogism as ‘hollow-constituting’-or-failing-intemporal-preservation-or-misappropriation-of-meaningfulness (psychopathic-and-the-temporal-dispositions-conjugation-to-it-as-conjugated-postlogism) implies fundamentally non-veridical implied categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity-or-ontological-preservation and thus the apriorising-registry-elements as implied—logical-dueness-or-scape/profile-or-stature/presumptuousness-or-arrogation/assumptions/value-reference/teleology are undue for logical contention but rather ontologically reflected/perspectivated in perversion-of-reference-of-thought. In existential terms, postlogism as ‘hollow-constituting’-or-failing-intemporal-preservation-or-misappropriation-of-meaningfulness (psychopathic-and-the-temporal-dispositions-conjugation-to-it-as-conjugated-postlogism) speaks of a disposition to engage in postlogical-backtracking—iterative-looping-‘set-of-dereifying-hollow-narratives-and-acts’, involving absolving/fleeting/escaping-reflex-logic, counting on the fact that others will sooner or later be in prelogism-as-of-conviction/thinking relation with the formulaic-non-conviction-or-

existential-decontextualised-transposition-or-hollow-staging-and-performance-or-
 caricaturing-of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising-or-
 postlogism/impulsively-dementing, hence wrongly elevating its perversion-of-reference-of-
 thought into logical-contention rather than dealing with as structural/paradigmatic denaturing
 construed as being/ontological/existential-defect or the registry-worldview's/dimension's-
 reference-of-thought-for-social-functioning-and-accordance defect or intradimensional-
 defect. Postlogism as 'hollow-constituting'-or-failing-intemporal-preservation-or-
 misappropriation-of-meaningfulness (psychopathic-and-the-temporal-dispositions-
 conjugation-to-it-as-conjugated-postlogism) thus inherently implies and is about articulations
 of perversion-of-reference-of-thought with respect in the very first instance to the validity of
 implied reference-of-thought rather than valid articulations of logical contention as the latter
 is with respect to ontological-veridicality of logical-processing-or-logical-implication only
 after the former (reference-of-thought) has been established as veridical/true. Postlogism/outcome-sought-precedes-logical-ness is not about a defect of logical-
 processing-or-logical-implication or a defect of incidenting-as-social-performance of the
 registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-
 accordance but rather speaks of false projection of 'apriorising-reference-of-thought-
 elements/apriorising-registry-elements (out of existential-contextualising-contiguity's-
 reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-
 thought-devolving-as-of-instantiative-context)' of implied—logical-ness-or-scape/profile-
 or-stature/presumptuousness-or-arrogation/assumptions/value-reference/teleology implying
 as structural/paradigmatic denaturing construed as being/ontological/existential-defect or the
 registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-
 accordance defect or intradimensional-defect as first-order faulty-mentation-procedure-
 deception-or-urge (inducing circularity/recurrence/repetition/repeatability of a subsequent

implication of a second-order level wrongly implied deception of logical-processing-or-logical-implication of infinite deception possibilities with respect to the infinite possibilities of ‘perfect logical-processing-or-logical-implication’ on the false basis of the perversion-and-derived-perversion-of-reference-of-thought). Such perversion-of-reference-of-thought/mental-devising-representation-perversion has various shades of ‘temporal/shortness to intemporal/longness depth/register of meaningfulness stranded finalities/teleologies’. This can be demonstrated as follows with psychopathy at childhood (which at this point is relatively transparent to the critical observer). Let’s say John is a psychopath, he wants to get his brother Peter punished for annoying him. John knows that dad will punish anyone who spills water on the chair. John, in a ‘dereifying act’, then spills water on a chair and goes and tell dad Peter has spilled water on the chair, and waits for Peter to get punished (and, this way of acting and thinking is not limited only to a benign notion like spilling water as it could be setting fire, destroying an equipment, etc.). This is different even from bad conviction or prelogism in that a child who has a bad conviction or prelogism is ad hoc and circumspect by taking advantage or reacting to a situation that has developed to accuse another as of temporal-existential constraint. They don’t initiate such a situation ‘as a rational way of thinking’ and even less to the gravity that the psychopath does.

One other major flaw in the perception of the psychopath is that they are liars (a pathological liar, it is said). This again is a flawed notion. To lie is to be in prelogism-as-of-conviction (bad or poor conviction), whether by omitting or exaggerating in a circumspect and ad hoc manner but relative to existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context. Lying as such is ‘an ad-hoc defect of logical-processing-or-logical-implication or defect of incidenting-as-social-performance of the

registry-worldview's/dimension's—reference-of-thought-for-social-functioning-and-
 accordance that doesn't speak of the true postlogism/psychopathic phenomenon which has to
 do with the perversion-of-reference-of-thought-and-not-of-logical-contention with regards to
 registry/anchoring-of-meaning/meaningful-reference/ontological-reference/contending-
 reference/registry-worldview as the psychopath perversion-of-reference-of-thought speaks of
 'a circularity/recurrence/repetition/repeatability as enabled by social-functioning-and-
 accordance—as-of-social-stake-contention-or-confliction' implying a 'being or ontological or
 meaningfulness or existential defect' which is poorly construed as 'pathological lying at the
 level of logical-processing-or-logical-implication of conviction/prelogic mental-reflex
 engagement' rather than being construed as a mental and teleological disposition defect at the
 level of the reference-of-thought as of perversion-of-reference-of-thought construed as
 mental-unsoundness). In fact, besides 'lying' such poor characterisation of the psychopath
 extends to other notions like 'bullying', 'manipulating', 'fooling', etc. which are all in
 prelogism-as-of-conviction/thinking notions though 'bad or poor convictions' (bad or poor
 conviction/prelogism construed as wrong logical-processing-or-logical-implication or
 wrong operation of prelogism-as-of-conviction but nonetheless prelogism-as-of-conviction).
 Fundamentally, psychopathic slanting is particular in that it departs from a relation to the
 'empty-form-of-meaning-as-inherently-deterministic outside the framework of a veridical
 existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-
 ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context'
 contrasted with bad/poor conviction which departs with a relation to 'omitting or
 exaggerating within the framework of a veridical existential-contextualising-contiguity's-
 reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-
 thought-devolving-as-of-instantiative-context'. But while poor-or-bad prelogism may be what
 is perceived from a 'normal' social and conviction point of view, particularly with adult

psychopathy; these are all wrong and actually will make an analysis of the psychopath and psychopathy ontologically-flawed. The psychopath is in a state of non-conviction-or-‘existential-decontextualised-transposition’-or-hollow-staging-and-performance-or-caricaturing-of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising-or-‘impulsive-dementation’ (not recognising/giving-up-on the sound operation/processing of logic as the basis for deriving essence of meaning but rather perceiving meaning as just a hollow mimicking form that determines how others will act, more like a projection of form, i.e. non-conviction-or-‘existential-decontextualised-transposition’ being a state of ‘conscious, unprincipled and instrumentalised non-conviction in veridical unsoundness-or-inauthenticity-of-reference-of-thought as the psychopathic mindset/reference-of-thought ontological-primemovers-totalitative-framework value-reference reflected by its perversion-of-reference-of-thought’ in contrast to conviction as a state of ‘conscious, principled and uninstrumentalised conviction in veridical soundness-or-authenticity-of-reference-of-thought as the conviction mindset/reference-of-thought ontological-primemovers-totalitative-framework value-reference’. This is the fundamental fact that explains the evasiveness in grasping the psychopath in its motive and orientation as the psychopath’s actions can be as simple as a basic formulaic (meaning-by-the-mere-illogical-possibility-of-it-being-narrated-or-postlogism-formulaic-non-conviction-or-existential-decontextualised-transposition-or-hollow-staging-and-performance-or-caricaturing-of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising-or-impulsively-demented) understanding of the effects on interlocutors of endearing, pleasing, laughter, etc. in inducing distraction, empathy, suspension-of-profound-reasoning or reference-of-thought teleological-degradation in relation to its mechanical-comprehension-dementing/‘hollow-constituting’-or-failing-intemporal-preservation-or-misappropriation-of-meaningfulness in undermining an prelogism-as-of-conviction perspective which reference-of-thought is veridical. All the bad or

poor conviction terms above, i.e. lying, bullying, manipulating, fooling, etc., wrongly point to the fact that the psychopath is having a ‘deliberative prelogism-as-of-conviction mental process’ with respect to its end purpose, and thus wrongly implying it is in ‘prelogism-as-of-conviction’ with the wrong idea that its apriorising/intelligibilitysetup/measuringinstrument/axiomatising reference-of-thought-elements/registry-elements/anchoring-of-meaning-elements of implied—logical-dueness-or-scape/profile-or-stature/presumptuousness-or-arrogation/assumptions/value-reference/teleology are existentially veridical. The psychopath is operating on the basis of ‘a last mimicking denaturing postlogism—construed-as-of-perverted-outcome-sought-precedes-existentially-veridical-logical-dueness postlogical-backtracking—iterative-looping-‘set-of-dereifying-hollow-narratives-and-acts’-with-succeeding-shifting-of-the-narratives-and-acts-foci-as-deception-of-successively-shifting-or-non-cohering-narratives-and-acts’ towards ‘social-aggregation-enablers over intrinsic-reality/ontological-veridicality transcendental-enabler/existence-potency’, and so to satisfy ‘a faulty-mentation-procedure-deception-or-urge’; and so, one narrative iteration at a time. Now the faulty-mentation-procedure-deception-or-urge implying ‘a convictional deliberativeness’ is coming from its interlocutor’s ‘prelogism-as-of-conviction mind’ itself which prelogically/in-conviction (as the prelogism, which is wrongly induced in distractive-alignment-to-reference-of-thought, conjoins all the denaturing postlogism—construed-as-of-perverted-outcome-sought-precedes-existentially-veridical-logical-dueness postlogical-backtracking—iterative-looping-‘set-of-dereifying-hollow-narratives-and-acts’-with-succeeding-shifting-of-the-narratives-and-acts-foci-as-deception-of-successively-shifting-or-non-cohering-narratives-and-acts as absolving/fleeting/escaping-reflex-logic, to wrongly imply a depth-of-conviction whether as of bad or good conviction/prelogism) in reality is wrongly assuming a depth-of-postlogism-slantedness/insane integration. The psychopath being postlogical—construed-as-of-perverted-

outcome-sought-precedes-existentially-veridical-logical-dueness or pathologically/impulsively ‘hollow-constituting’-or-failing-intemporal-preservation-or-misappropriation-of-meaningfulness is not lying (or manipulating or bullying), in fact the psychopath will prefer that normal conviction minds think it is lying (or any notion of a bad-or-poor conviction rather than the idea of non-conviction), as at least they will then wrongly realign prelogically/(existentially-veridical-logical-dueness-precedes-logical-outcome-arrived-at) again to it with respect to its subsequent narratives to examine the pertinence of its logic/logical-processing i.e. engaging logical operating/processing and wrongly granting it conviction (be it even bad-or-poor conviction as this will then wrongly imply its wrong or poor performance of logical-processing-or-logical-implication, rather than its hollow-constituting/vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging/slanting of empty narratives that are flawed or non-existent as postlogism-as-of-non-conviction) thus wrongly involved in prelogism hence wrongly validating as real its ‘fundamental faulty-mentation-procedure-deception-or-urge’ which is its ‘apriorising—reference-of-thought-elements/apriorising—registry-elements, that in reality are out of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context’, of implied—logical-dueness-or-scape/profile-or-stature/presumptuousness-or-arrogation/assumptions/value-reference/teleology (instead of examining in the very first place their relevance/pertinence or its soundness-or-authenticity-of-reference-of-thought); in so doing, analysing its meaning as essence instead of analysing it as non-veridical hollow mimicking form or vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging or meaning-by-the-mere-illogical-possibility-of-it-being-narrated or non-veridical hollow mimicking narratives. What the psychopath is doing is 'SLANTING' or impulsive-dementing.

That is to arrive at a sought-outcome by subknowledging-or-mimicking the non-veridical hollow-form of the meaning of other persons conviction narratives which it perceives as ‘being blatantly deterministic’ of the views and actions of the ‘normal prelogism-as-of-conviction mind’, i.e. the psychopath is ‘narrating veridical emptiness/hollow narratives’. The idea being about arriving at a sought-outcome by taking a posture that does not attach a depth of conviction on narratives but rather simply ‘the mere possibility of the hollow narratives being articulated, and then integrated by interlocutors as real’. Thus the psychopathic postlogical mindset and by derivation conjugated-postlogism/dementing-integration mindset is one of relating to meaning and meaningfulness as valid by ‘the mere performative-form representation of meaning and meaningfulness’ rather than veracity/ontological-pertinence of meaningfulness. The psyche is thus fundamentally one geared towards how to perform in interlocution rather than express a genuine sense of conviction and hence the disposition for extrinsic-attribution by active social-aggregation-enabling. Meaning and meaningfulness is seen not as an end-construct that is of passive social determinism by its inherent veracity/ontological-pertinence as of intrinsic-attribution associated with transcendental-enabling/existence-potency, but rather as a potent and active construct of social determinism which requires actually eliciting a sought after outcome and not a notion of intrinsic existential/ontological inherence. This mental-disposition is qualified as ontological-decadence or postlogism and its derivation/adoption by temporal-dispositions is derived-ontological-decadence in conjugated-postlogism. More precisely, it is critical to distinguish between the notion of slanting (*cinglé* in French) as postlogism-as-of-non-conviction and the notion of a lie which is prelogism-as-of-conviction (be it a bad conviction) as with a lie the implied-logical-dueness (with the corresponding implied-reference-of-thought/implied-registry elements) are existentially veridical with the ‘lying deception’ being of ad-hoc exaggeration or omission or inappropriate accounting of circumstantiality and/or factuality

but as of ‘effectively due’ logical-processing-or-logical-implication. The narratives-and-acts-foci of the set-of-narratives of a ‘lying deception’ do not successively shift (as with slanting) but carry an overall coherence implying deception-but-as-of-successively-cohering-narratives. This is because a lie is more of deception arising out of ad-hoc contextual-ambiguity-constraint(s) ad-hocly articulated as deception-but-as-of-successively-cohering-narratives to resolve the ad-hoc contextual-ambiguity-constraint(s), and lying doesn’t fundamentally imply where such ad-hoc contextual-ambiguity-constraint(s) is non-existent the interlocutor will still not be predisposed to a veridical and appropriate logical-engagement/interlocution/implication. This equally explains why a lie collapses as a whole (or whole pieces of the lie) since such a collapse arises out of the truth/ontological-veridicality resolution of the contextual-ambiguity-constraint(s) behind the coherent structure(s) of the lying deception. Slanting on the other hand speaks of a fundamental pathological faulty-mentation-procedure-deception-or-urge associated with postlogism-as-of-non-conviction with respect to social-stake-contention-or-confliction (and by extension ‘derived-slanting’ induced as conjugated-postlogism-opportunism and conjugated-postlogism-exacerbation arises out of purposeful enculturation/endemisation of the slanting habit where it is viewed by some interlocutors of the psychopath as socially-functional-and-accordant, since its manifestation is not universally transparent as ontologically decadent); due to the slanted child psychopathy mind’s developmental incompleteness (as it is so focussed on attaining its sought after outcome in advance that it construes of ‘presupposing/presuming/premising in concurrence’ as an independent mental activity that must not necessarily be derived-and-implied from existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context, whereas the latter is exactly what validates logical-processing-or-logical-implication as a process reflecting existential-reality as of

implied—logical-dueness-or-scape/profile-or-stature/presumptuousness-or-arrogation/assumptions/value-reference/teleology), with respect to construing meaning and meaningfulness as prelogism-as-of-conviction, but instead construes meaning and meaningfulness as postlogism-as-of-non-conviction explaining the circular nature and its particularly overblown extrinsic-attribution mental-disposition to elicit social-aggregation-enabling over relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency with regards to inherent reality and meaningfulness. The peculiarity of slanting is that it is deception-of-successively-shifting-or-non-cohering-narratives-and-acts wherein the initiation of a hollow falsehood narrative is followed by the projection of another hollow falsehood narrative on the basis of the former as if the former was true, and the projection of another falsehood narrative on the basis of the previous one as if the previous one was true, and so on. Thus slanting doesn't have a 'coherent whole of narratives' with respect to existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context as is the case when someone tells a lie, and actually where such a 'coherent whole of narratives' with respect to existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context is wrongly implied about slanting, it has to do with prelogism-as-of-conviction mind/mental-disposition 'wrongly conjoining the succession of slanting narratives from the last iterated slanted narrative' to wrongly imply that the slanting psychopath narratives are a 'coherent whole of narratives as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context', and this is the mechanism that induces conjugated-postlogism/dementing-integration by some interlocutors of the adult psychopath, whether conscious or unconsciously. It is interesting to note that at

childhood psychopathy where the mental-disposition is relatively universally-transparent what is perceived and related to by conviction interlocutors is not a ‘coherent whole of narratives’ but a deliriousness/delirious-effect/cinglé-effect/mental-unsoundness-effect arising out of its contemplation (as if it were true), pointing out that the reality of mental-states in wrong prelogism-as-of-conviction alignment to psychopathic slanting is actually a mental-unsoundness not different as contemplating aligning in conviction to the childhood psychopathy slanting as with the dereifying example of spilling water on a chair and accusing another. A salient comparison that strongly highlights the difference between slanting and lying, is that a lying child doesn’t come across as delirious since its lying deception is a coherent whole as of contextual-ambiguity-constraint(s) while a slanting deception is as of faulty-mentation-procedure-deception-or-urge due to psychopathic developmental failure to relate to meaning and meaningfulness as of prelogism-as-of-conviction with the personality development out of that developmental failure bringing about the adult psychopath slanting mental-disposition with respect to social-stake-contention-or-confliction; and as the adult psychopath developed maturation/indirectness/spatialisation/credulity/craftiness to attain social-functioning-and-accordance—as-of-social-stake-contention-or-confliction, induces interlocutors conviction/prelogical alignment to its non-conviction/postlogical narratives whereas at childhood psychopathy interlocutors will not align in-conviction/prelogically (in order not to wrongly conjoin the psychopathic postlogical slanting narratives as deception-of-successively-shifting-or-non-cohering-narratives-and-acts as if of coherent whole as conviction/prelogical narratives, and this is what actually occurs by inducing conjugated-postlogism/dementing-integration in interlocutors at adulthood psychopathy) given the obvious and transparent deliriousness/delirious-effect/cinglé-effect associated with slanting over a slant over a slant, successively. Hence, this slanting deception (deception-of-successively-shifting-or-non-cohering-narratives-and-acts) is also qualified as deception-by-

concurrently-false-presupposing/false-presuming/false-premising-of-narratives or deception-by-concurrently-false-assumptive-dementing. Thus, with slanting the implied-logical-dueness (with the corresponding implied-reference-of-thought/implied-registry elements) are existentially unreal/non-veridical/flawed explaining the meaningful emptiness/hollowness of slanting (as not even an exaggeration or omission or inappropriate accounting of circumstantiality and/or factuality as of ‘effectively due’ logical-processing-or-logical-implication), thus explaining why ‘slanting and derived-slanting’ is construed as unsoundness-or-inauthenticity-of-reference-of-thought/dementing as opposed to lying deception construed in a shade of soundness-or-authenticity-of-reference-of-thought. Insightfully, it points out as well that the basis of the postlogism/psychopathic induced deception is not the psychopath itself (as it is commonly asserted about psychopathic manipulation), but rather it lies in the very nature of the reasoning of the prelogism-as-of-conviction interlocutor mental engagement reflex who ‘aligns in-conviction’ as it will ‘normally do’ with other conviction/prelogical minds to a postlogism-as-of-non-conviction mind, and then wrongly validates that the postlogism-as-of-non-conviction mind is in prelogism-as-of-conviction. In other words, the operation of the psychopathic mind as of its incomplete mentation development (as inclined to induce a faulty-mentation-procedure-deception) as it fails to construe meaning and meaningfulness as based on prelogism-as-of-conviction but rather as based on postlogism-as-of-non-conviction with its personality development into adulthood on this basis, paradoxically leads to the prelogism-as-of-conviction mind’s deception since the latter operates on the basis that everyone must be conviction (be it bad-conviction at worst) and the notion of postlogism-as-of-non-conviction doesn’t register naturally except where the personality development of the childhood psychopathy into an adult psychopath is experienced closely, and the adulthood psychopath mentation processes structure can be retraced to the delirious mentation processes structure at

childhood psychopathy when it is universally transparent as maturation/indirectness/spatialisation/credulity/craftiness continually developed during its personality development into adulthood psychopathy now enables it becoming socially-functional-and-accordant. This induced deception does not however occur at childhood psychopathy since it is very much transparent as a deliriousness/delirious-effect/cinglé-effect as the childhood psychopathy has hardly achieved maturation/indirectness/spatialisation/credulity/craftiness of its slanting-deception mental-disposition. What underlies the slanting of the psychopath is its rather unnuanced understanding and gauging of social situations and social cues as out of existential-contextualising-contiguity by its dereification on a mental-processing disposition that is rather a ‘dereifying bivalent-disposition-to-acute-caricatural-prepotence-or-acute-lulling-diffidence’, and so in contrast with the expected ‘reifying nuanced/multivalent mental-processing’ of convictional dispositions in existential-contextualising-contiguity, however bad-or-poor their ontological-performance of convictional mental-processing. This underlies the apparent vividness of interlocution with the psychopath especially with regards to social-stake-contention-or-confliction due to a ‘conviction by non-conviction cross-perception effect’ wherein the convictional interlocutor by its mental-reflex is wrongly inclined to perceive and so specifically with adult psychopathy a ‘reifying nuanced/multivalent mental-processing’ in existential-contextualising-contiguity knowledge-reification with regards to the psychopath ‘dereifying bivalent-disposition-to-acute-caricatural-prepotence-or-acute-lulling-diffidence’ out of existential-contextualising-contiguity-in-dereification, while the psychopath view of the convictional interlocutor’s supposedly ‘reifying nuanced/multivalent mental-processing’ in existential-contextualising-contiguity knowledge-reification is rather as of its ‘dereifying bivalent-disposition-to-acute-caricatural-prepotence-or-acute-lulling-diffidence’ inclination out of existential-contextualising-contiguity-in-dereification. While at

childhood psychopathy such a ‘dereifying bivalent-disposition-to-acute-caricatural-
 prepotence-or-acute-lulling-diffidence’ out of existential-contextualising-contiguity-in-
 dereification is socially inefficacious and trouble-inducing giving the deliriousness effect
 from universal-transparency of its acts, at adulthood psychopathy the lack of such universal-
 transparency of the postlogism-slantedness rather makes the latter ‘sound
 impassioned/stirring/vivid/spirited’ to the unsuspecting interlocutor who by mental-reflex
 wrongly assumes as ontologically-veridical the falsely implied existential-contextualising-
 contiguity, giving the psychopath life-long learnedness and adaptation from its childhood
 inefficacy as of its increasing maturation/indirectness/spatialisation/credulity/craftiness with
 adulthood, and this latter ‘apparently impassioned/stirring/vivid/spirited but rather falsely
 implied existential-contextualising-contiguity’ disposition tends to be socially
 enculturated/endemised as of conjugated-postlogism. But then, more than just the deception
 this state of affairs has a further nefarious effect on the natural human—
 aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—
 imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, as the induced ‘lack
 of constraining social universal-transparency with respect to intrinsic meaningfulness further
 elicits conviction minds temporal-dispositions of
 ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-
 negative-social-aggregation/temporal-enculturation-or-temporal-endemisation, which can
 actually be more decisive grounds for the perpetuation of psychopathy as social-psychopathy,
 as the fact is the psychopath is very much pathological and tends to act impulsively in its
 faulty-mentation-procedure-deception as of circumstantiality. [This is more profoundly
 exposed in the conceptualisation of the institutionalisation process as it induces ‘socially-
 functional-and-accordant reference-of-thought as of human—
 aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—

imbued-temporal-to-intemporal-dispositions—existentialism-form-factor; that can be elucidated by an existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context analysis of ‘least-and-derived-temporal-operating-modalities-of-the-reference-of-thought-as-of-incrementalism-in-relative-ontological-incompleteness-inducing-the-uninstitutionalised-threshold’-and-not-‘maximal-as-intemporal-operating-modality-of-reference-of-thought-as-of-maximalising-recomposuring-for-relative-ontological-completeness/transvaluating-as-inducing-the-prospective-institutionalisation’. Central to such an insight, is the understanding of what the reality of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor means about human mental-disposition. The implication is that we ‘consistently’ have two sets of mental-dispositions having to do with the uninstitutionalised-threshold of all registry-worldviews/dimensions; as of metaphysics-of-presence and metaphysics-of-absence representations. First, ‘human institutionalisation mental-disposition’ within the scope of a registry-worldview/dimension institutionalisation reference-of-thought categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation (as-not-failing/upholding intemporal-preservation-entropy-or-contiguity—or—ontological-preservation as of ontological-normalcy/post-convergence which always factor in human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) by a re-equilibrating metaphysics-of-absence/postdication). Then, ‘human temporal uninstitutionalised-threshold mental-disposition’ construed either ‘as out of the scope of the registry-worldview/dimension institutionalisation reference-of-thought categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation’ or ‘the registry-worldview/dimension

uninstitutionalised-threshold reference-of-thought' (as-failing/not-upholding-as-of-axiomatic-construct intemporal-preservation-entropy-or-contiguity—or—ontological-preservation 'by projected wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the registry-worldview's/dimension's institutionalisation categorical-imperatives/axioms/registry-teleology of the registry-worldview/dimension institutionalisation reference-of-thought', as of an ontological-normalcy/post-convergence perspective) as so reflected from the prospective registry-worldview/dimension institutionalisation reference-of-thought categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation. With the attainment of registry-worldview/dimension institutionalisation by social universal-transparency we can very much uphold a second-natured quasi-intemporal-disposition reference-of-thought as 'human institutionalisation mental-disposition' which is why humankind pursues institutionalisations as devising human collective emancipation from base-institutionalisation to universalisation to positivism and prospectively to deprocrypticism in resolving the vices-and-impediments of their respective uninstitutionalised-thresholds as recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism. But exactly for the purpose of ensuring the perpetuation of this human institutionalisation capacity (as in enabling futural Being-development/ontological-framework-expansion as of prospective deprocrypticism) as the very essence of human virtue itself, it is equally important to understand how institutionalisation comes to be limited at successive registry-worldviews/dimensions institutional-cumulations/institutional-recomposures (as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor) to grasp how we can then supersede/transcend prospectively. 'Human temporal uninstitutionalised-threshold

mental-disposition' refers to our fixation to the mere-categorical-imperatives/axioms/registry-teleology of the registry-worldview/dimension institutionalisation reference-of-thought but failing/not-upholding-as-of-axiomatic-construct prospective intemporal-preservation-entropy-or-contiguity-or-ontological-preservation as of ontological-normalcy/post-convergence which always factor in human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) by a re-equilibrating metaphysics-of-absence/postdication as construed from the prospective registry-worldview/dimension institutionalisation reference-of-thought, and as revealed by this prospective institutionalisation existential-contextualising-contiguity-in-reification's-elucidation-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context. Fully understanding psychopathy which is the postlogism-as-of-non-conviction of the positivism-procrypticism registry-worldview/dimension institutionalisation-uninstitutionalisation reference-of-thought is inevitably tied to understanding our procrypticism as our 'human temporal uninstitutionalised-threshold mental-disposition' from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism registry-worldview institutionalisation reference-of-thought, as of ontological-normalcy/post-convergence wherein our procrypticism 'human temporal uninstitutionalised-threshold mental-disposition' is decentered and dialectically-dementing as dialectically-out-of-phase, just as understanding the postlogism of the universalisation-non-positivism/medievalism registry-worldview's/dimension's reference-of-thought like notions of and accusations of sorcery, is inevitably tied to understanding non-positivism/medievalism as the 'human temporal uninstitutionalised-threshold mental-disposition' so-construed from prospective positivism registry-worldview/dimension institutionalisation reference-of-thought as of ontological-normalcy/post-convergence 'wherein the non-positivism/medieval mental-disposition is decentered and dialectically-dementing as dialectically-out-of-phase; and in

both instances, construed as of their ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance (as of their respective prospective registry-worldview/dimension existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context; since the prospective institutionalisation existential-contextualising-contiguity-in-reification's-elucidation-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context speaks of a deeper limited-mentation-capacity-(as of relative conflation) of a deeper and more correct grasp/apriorising-and-understanding of ontology/ontological-veridicality/intrinsic-reality). Effectively, 'human temporal uninstitutionalised-threshold mental-disposition' is what is reflected at uninstitutionalised-threshold as registry-worldviews/dimensions hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing as of perversion-and-derived-perversion-of-reference-of-thought of recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism, and prospectively (as applicable with the construal of psychopathy and social psychopathy postlogism) procrypticism; wherein the habitual intradimensional placeholder-setup/mentation/mental-devising-representation/consciousness-awareness-teleology 'nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) scheduling or a-registry-worldview's-or-dimension's-ignoring-of-its-prior-relative-ontological-incompleteness-of-reference-of-thought-as-an-ontologically-flawed-neuterisation-or-bracketing-or-epoché of totalising-conflated-meaningfulness-and-teleology-as-of-notional-deprocrypticism-reflected-ontological-aesthetic-tracing as of the prospective apriorising/intelligibilitysetup', at uninstitutionalised-threshold (reflecting uninstitutionalised-threshold), is now substituted (from ontological-normalcy/post-convergence perspective of the prospective registry-worldview/dimension institutionalisation reference-of-thought) by its

‘decentering and dialectical-dementation of its reference-of-thought’; which we can effectively acquiesce to as of the uninstitutionalised-thresholds but will rather have a mental complex when this is implied prospectively to imply our uninstitutionalised-threshold as procrypticism, just as all registry-worldviews/dimensions had hitherto displayed a mental complex when their construal as uninstitutionalised-threshold is implied. Thus this implied human ‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics’ as driven by ontological-normalcy/post-convergence will explain the specific natures of registry-worldviews/dimensions references-of-thought (as ‘underlying scheduling of soundness-or-authenticity-of-reference-of-thought’) behind the successive registry-worldviews/dimensions institutional-cumulations/institutional-recomposures peculiar psychologisms/psychologism-constructs of meaning and meaningfulness in explaining the empirical-realities of the various anthropological societies mindsets/reference-of-thought/consciousness-awareness-teleology; whether as recurrent-utter-uninstitutionalisation psychologism, base-institutionalisation–ununiversalisation psychologism, universalisation–non-positivism/medievalism psychologism, positivism–procrypticism psychologism, and prospectively deprocrypticism psychologism equally qualified as suprastructuralism. Hence, our present positivism mental-disposition is just one of human historical psychologisms/psychologism-constructs, and it is not absolute as to imply there aren’t or weren’t other human psychologisms/psychologism-constructs, wherein in their own realisation, perception and thought they are ‘not decentered’ and ‘not dialectically-dementing’ as of their ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance rather so construed from a higher psychologism’s articulation of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context as ontologically-veridical. Thus,

deprocrypticism as decentering and dementing the positivism–procrypticism registry-worldview reference-of-thought will certainly imply an altogether different psychologism of meaning and meaningfulness-and-teleology as suprastructuralism. It should be noted that the implied meaning of psychologism here has to fundamentally do with a psychology arising out of ontological development in the construal of intrinsic-reality/ontological-veridicality establishing a mindset/reference-of-thought of meaningfulness-and-teleology with its psychologism/psychologism-construct, and so it is ontologically-driven. As further ontological development in the construal of intrinsic-reality/ontological-veridicality arises (as of human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination) a renewing of mindset/reference-of-thought of meaningfulness-and-teleology with its corresponding psychologism/psychologism-construct occurs, with this institutionalisation-process leading to the successive registry-worldviews/dimensions reference-of-thought psychologies/psychologism-constructs, and implied prospectively as well with the deprocrypticism worldview/dimension reference-of-thought psychologism/psychologism-construct. Critically, a psychologism/psychologism-construct takes a apriorising/intelligibilitysetup/measuringinstrument/axiomatising form that construes meaning and meaningfulness from the prior (and even lower) registry-worldview’s/dimension’s reference-of-thought psychologism up to its own registry-worldview’s/dimension’s reference-of-thought psychologism as of its more profound existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context in reflecting/perspectivating their ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance. Hence this articulation of successive registry-worldviews/dimensions reference-of-thought

psychologisms up to the deprocrypticism, is an initiation into deprocrypticism psychology as of its apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of its more profound existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context in reflecting/perspectivating the ontological-incompleteness-of-reference-of-thought-induced-virtuality-or-ontologically-flawed-construal-or-hollow-staging-and-performance of positivism–procrypticism and all the lower registry-worldviews/dimensions. Basically, this idea of 'human temporal uninstitutionalised-threshold mental-disposition' as metaphysics-of-absence points out that ontological analysis should rather be from the prospectively implied 'human institutionalisation mental-disposition', and in this instance implying an ontological analysis of psychopathy and social psychopathy from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism registry-worldview reference-of-thought and not the present positivism–procrypticism, just as analysing notions-and-accusations-of-sorcery should rather be from the prospective positivism registry-worldview reference-of-thought and not its present universalisation–non-positivism/medievalism registry-worldview reference-of-thought; as of the fact of fundamental registry-worldview/dimensional 'prospective as structural/paradigmatic denaturing construed as being/ontological/existential-defect or the registry-worldview's/dimension's-reference-of-thought-for-social-functioning-and-accordance defect or intradimensional-defect, so construed in order to supersedes its structural/paradigmatic vices-and-impediments. Paradigmatically, this idea extends to all issues implying metaphysics-of-absence 'human temporal uninstitutionalised-threshold mental-disposition'. This brings home the underlying notion of rational-realism as construed herein, as rational-realism attends to the idea of human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as enabling its more

profound grasp of intrinsic-reality/ontological-veridicality by way of a concurrently more and more ‘rational realistic’ construal of intrinsic-reality/ontological-veridicality as of a natural human psychological growth disposition (‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics’). Wherein, going by its first impulse with respect to its ‘construal/conceptualisation activity as of its coming into existence in the world’, human natural mental-reflex starts out with a simplistic idealism to account at one fell swoop for the comprehensiveness/complexity of intrinsic-reality/ontological-veridicality it faces and has to contend with while construing/conceptualising fundamental meaningfulness-and-teleology. This then gives rise to such a simplistic idealism of the natural idea of Gods or God or Spirits, as taking away the chore of understanding and purpose, and giving a sense of intuitive guidance, hope, peace of mind and as to what humans should expect in their existence. But as of the intrinsic-reality constraints of having to deal with matters of the world on its own by developing notions of understanding and purposefulness as the mere imagination of God or Gods or Spirits by itself doesn’t give agency (or at the least ‘perceived’ sufficient agency) in resolving human issues of the world and making its need for understanding and purposefulness go away. This induces a bifurcation of human intellectual and moral allegiance to the supernatural and the real in adjunction, as of their ‘perceived’ effectiveness. With a commitment to the idealism of the supernatural not only as of its ‘perceived’ virtuous import, but as of ‘perceived’ nefarious effects to human volition to it, man hangs on to both an effective realistic as well as idealistic conceptualisation/construal in existence. Such a growth psychology ultimately goes beyond construing idealism as the supernatural but as a complement to more and more profound realistic understanding and purposefulness in existence, but then having to readjust such idealism wherein the real as of its critical import to critical existence issues increasingly comes to take presence as of its effectiveness. Such that as construed today, human history

overall has been an exercise in toning down the grander notion of idealism as of notions of the supernatural, essences and metaphysical ideals, and enabling increasing permeation and/or superseding of such notions with an effectiveness-driven realism leading to a general and increasing elevation of knowledge as the-human-and-social-emancipator, the present ascendancy of philosophies increasingly concerned with the human realities of existence (strongly so, lately with such movements as positivism, phenomenology, existentialism and post-structuralism) and science in all its facets whether physical, biological or social, as well as a human-centeredness of arts and culture. Rational-realism is grounded on this historic empirical state of affairs of increasing human realism in taking hold of its destiny on ‘the premise of a deference to intrinsic-reality as of its effective inherence validated by ontological-primemovers-totalitative-framework’ that has accompanied human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination in construing/conceptualising meaningfulness-and-teleology. Rational-realism thus finds in the grander notion of idealism, an avowal of human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) that actually is behind all hollow-staging-and-performance (as apriorising/intelligibilitysetup-caricaturing) of successive registry-worldviews/dimensions; with the idea that there is no place to hide behind idealisms and that human emancipation and virtue has been and is fundamentally about buckling down and undertaking the requisite effort in ‘understanding for real’ and not differing to ‘thin air’ in the name of idealism. Rational-realism pushes the grander notion of realism further by asking the question, have all the idealisms as of the grander idealism been identified and superseded? It comes to the conclusion that while that has been decisively the case with supernaturalism, belief in essences and metaphysical idealism, as of structural/paradigmatic social implications, one other sort of idealism remains to be recognise as ‘false realism’; the idealism that doesn’t

grasp what man itself is, rather as overly indulgent in not recognising how a thorough understanding of itself in enabling pivoting/decentering is effectively the strongest asset for its full emancipation. Central to such a most basic realism is grounding human knowledge of itself and thereof all knowledge on the ‘mediocrity principle’ as to enable the full construal of both metaphysics-of-presence and metaphysics-of-absence ontologies as enabling a further human emancipation registry-worldview’s/dimension’s reference-of-thought psychologism, deprocrypticism psychologism. This is the insight behind the articulation of the social construed in threshold terms of social-functioning-and-accordance—as-of-social-stake-contention-or-confliction rather as socially-functional-and-accordant. This insight further divulges the reality across all registry-worldviews/dimensions of ‘human institutionalisation mental-disposition’ and ‘human temporal uninstitutionalised-threshold mental-disposition’, as powerful conceptualisations for framing issues in their appropriate psychologism however unpalatable/inconveniencing, as history has always shown that unpalatability, inconvenience and contrariety have always been the test that all humans have had to undergo to effectively achieve their respective prospective registry-worldview/dimension transcendence, and the more complete conceptualisation of knowledge goes beyond its technicalities and plainness to imply its underlying sense of dedication as the very intemporal-solipsism/ontological-faith-notion-or-ontological-fideism disposition behind its creation, cultivation and projection. And as with all previous realism drives, the idea of rational-realism is not as an articulation within the finite scope of the present meaningfulness-and-teleology frame of thought and social-stake-contention-or-confliction but rather carries a prospective scope, just as the vocation of the realism of a positivistic mindset/reference-of-thought in a non-positivistic social-setup should not be about elaborating meaning as of positivistic meaningfulness-and-teleology to engage the non-positivistic social-setup in terms-as-of-axiomatic-construct of its non-positivistic sense of social-stake-contention-or-confliction of human relations as that will

certainly just induce an ‘idle circularity and contrariety’ within the non-positivistic social-setup. But rather the point is all about recognising ‘human prospective institutionalisation capacity as the very essence of human virtue’ available to all humans past and present, that enabled this animal among all creatures to be engaged in a grander collective exercise of ‘existential-tautological eudaemonic-contemplation’ (as of human ‘subpotent-mimetic-echoness-derivation-within-the-full-potency of existence-as-of-its-mimetic-echoness’), to imply that there is a prospective virtuous possibility of human institutionalisation that can be grasped, and so expressed in terms-as-of-axiomatic-construct of the notion of social-stake-contention-or-confliction of that prospective institutionalisation psychologism, just as the vocation of the positivistic mindset/reference-of-thought is all about eliciting the notion of social-stake-contention-or-confliction in terms-as-of-axiomatic-construct of positivistic psychologism to imply that the non-positivistic community has the capacity and should come to terms with its human emancipatory institutionalisation potential. Insightfully, the apriorising/intelligibilitysetup/measuringinstrument/axiomatising comparison can be used to reveal the ‘perpetually stable temporal-to-intemporal nature of human mental-disposition as of institutionalisation or uninstitutionalised-threshold’, across all registry-worldviews/dimensions references-of-thought but for the fact that they have different categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity—or—ontological-preservation building up from the prior ones as of their respective elucidation-of-existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context (recurrent-utter-uninstitutionalisation non-rules-as-impulsive-or-accidentated-or-random-mental-disposition as failing/not-upholding-as-of-axiomatic-construct rulemaking-over-non-rules-(as ‘first-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising) required for base-

institutionalisation–ununiversalisation, ununiversalisation failing/not-upholding-as-of-axiomatic-construct universalisation-directed-rulemaking-over-non-rules-(as ‘second-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising) required for universalisation–non-positivism/medievalism, non-positivism/medievalism failing/not-upholding-as-of-axiomatic-construct positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules-(as ‘third-level pseudo-conflation’ apriorising/intelligibilitysetup/measuringinstrument/axiomatising) required for positivism–procrypticism or prospectively, positivism failing/not-upholding-as-of-axiomatic-construct ‘deprocrypticism-or-pre-empting-procrypticism-or-object-recomposuring-ontologising as conflation of apriorising/intelligibilitysetup/measuringinstrument/axiomatising) required for perpetuating-deprocrypticism). Supposed there was no apriorising/intelligibilitysetup/measuringinstrument/axiomatising defect (no perversion-of-reference-of-thought) with social universal-transparency of the calculations to be done, it is fair to say ‘human institutionalisation mental-disposition’ in this reference-of-thought is of quasi-intemporal-disposition (and the whole point of human knowledge aspiration and virtue is to achieve this state or deferential-states-of-this-state as with formalisations and percolation-channelling). Thus calculations (logically-derived meaningfulness) in such an institutionalised framework are effectively in intellectual-good-faith but for failure in performance as defect of logical-processing-or-logical-implication or defect of incidenting-as-social-performance of the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance. But then human existential-reality comes with human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) with limited grasp of intrinsic-reality at various stages of human emancipation up to the present day, such that social universal-transparency required for ‘human institutionalisation mental-disposition’ has been made transcendently available only in partial

construals/conceptualisations that are as-of existential-reality, and where non-available at uninstitutionalised-threshold, it is naïve to construe human mental-disposition as of quasi-intemporal-disposition; as the anthropological and historical evidence consistently points to a different structure with regards to the ‘human temporal uninstitutionalised-threshold mental-disposition’ as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context elucidated ontological-normalcy/post-convergence. It points to a fundamental structural disposition for human temporalities-drives to adhere to the wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the registry-worldview’s/dimension’s institutionalisation categorical-imperatives/axioms/registry-teleology (failing/not-upholding-as-of-axiomatic-construct intemporal-preservation-entropy-or-contiguity—or—ontological-preservation as of ontological-normalcy/post-convergence which always factor in human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) by a re-equilibrating metaphysics-of-absence/postdication) of the given registry-worldview/dimension, when incapable of construing a prospective registry-worldview reference-of-thought as providing the resolution for the vices-and-impediments associated with such a present registry-worldview/dimension institutionalisation. Such notions as the following that can be at the very centre of ways of thought in various social-setups or subcultures are not fortuitous but speaks of the reality (as metaphysics-of-absence) of the notion of ‘human temporal uninstitutionalised-threshold mental-disposition’ that structurally/paradigmatically ‘notionally acquiesce to the possibility of a registry-worldview’s/dimension’s temporality and is non-transcendental to that possibility’: she deserves to be rape because she was scantily clad as well dressed women will not be raped; his goods deserve to be stolen as he didn’t look after them properly; those people/group/ethnicity deserved what happened to them because they are so and so; etc. [We

can note here that such statements as of a variance of more benign to weightier nature can be made as being socially-functional-and-accordant (without or hardly any negative consequences at the acceptable socially-functional-and-accordant-threshold like being repudiated or incriminated, etc.), construed as ‘least-and-derived-temporal-operating-modalities-of-the-reference-of-thought-as-of-incrementalism-in-relative-ontological-incompleteness-inducing-the-uninstitutionalised-threshold’ in the same social space that statements of ‘maximal-as-intemporal-operating-modality-of-reference-of-thought-as-of-maximalising-recomposuring-for-relative-ontological-completeness/transvaluating-as-inducing-the-prospective-institutionalisation’ are made but with both construed in the conventioning of social-functioning-and-accordance—as-of-social-stake-contention-or-confliction as effectively ‘non-dissociable’, thus validating the notion that institutionalisation is not about solipsistic transformation into the intemporality-drive (longness-of-register-of-meaningfulness-and-teleology disposition) but rather about acceptable thresholds for the registry-worldview/dimension institutionalisation defined social-functioning-and-accordance—as-of-social-stake-contention-or-confliction, explaining why uninstitutionalised-thresholds are bound to arise successively in the institutionalisation process (out-of-human temporality) together with corresponding prospective institutionalisations (out of-human intemporality) with the latter enabling totalising–renewing-realisation/re-perception/re-thought of defined social-functioning-and-accordance—as-of-social-stake-contention-or-confliction as of the notional-contiguity/epistemic-contiguity of the institutionalisation process. This equally explain why and in particular in certain domains like the philosophical construed as ‘notional philosophical’ (by its very ‘first-ontology responsibilities’), the social-construct conventioning cannot and should not be considered and related to as an absolute determinant of meaningfulness, value and worth as it is more of a conventioning however ontologically-informed the conventioning, and ‘the need for the social-construct further

development requires that it can utterly be put into question by pure-ontology conflatedness with no conventioning complexes’! (As a reminder, the notion of intemporality/temporality is an ontological-as-of-being construct and the apparent references to virtue imply the subsumed construal of virtue by the ontological-as-of-being construct, such that it is important to grasp that all notions articulated herein are ontological, just as the notions of the being domains-of-study of the natural world are ontological, and the high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising–self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction nature of the being domains-of-study of the social world should not naively imply a construct that isn’t ontological or otherwise, as in both instances the aspiration is for ‘intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency as an otherness from any emotional-involvement/subjectification/notional-totalising–self-referencing-syncretising predilection of the inquirer’. This elucidation is equally to highlight that the idea of socially-functional-and-accordant ‘modular-thresholds’-of-temporal-to-intemporal-dispositions-dissociability is beyond just a construal as of virtue analysis but rather an ontological analysis, as it applies in all social conceptualisations of performance and functionality whether virtuous or virtuously-neutral but necessarily as of the social being/existence domains-of-study.) The conventioning of social-functioning-and-accordance—as-of-social-stake-contention-or-confliction effectively ‘non-dissociable’ modular construal of temporal-dispositions and intemporal-disposition rather as of socially-functional-and-accordant thresholds, has deterministic implications with regards to ‘interdimensional/transdimensional/transcendental registry-worldview/dimension-level of analysis’ as well as ‘temporal-to-intemporal-dispositions individuation-level of analysis’; for construing the implications of such ‘modular-thresholds’-of-temporal-to-intemporal-dispositions-dissociability social-functioning-and-accordance—as-of-social-stake-contention-

or-confliction effectiveness-or-ineffectiveness and ontological-resolution as of ‘contingent ontologising-capacity driven apriorising/axiomatising–psychologism by way of the grander ontological-normalcy/post-convergence

 functioning-and-accordance with no-temporal-to-intemporal-dispositions-non-dissociability

(due to social universal-transparency of deprocrypticism meaningfulness-and-teleology), is equally the need to supersede human ‘emotional involvement’. As ‘emotional-involvement’ is self-centering-and-definitional of human consciousness as of our animate-existential-referencing/subjectification, but actually such reality is otherwise of the same ontologically-veridical nature as existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency into which everything else is caught into as superseding–oneness-of-ontology (even though our high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising–self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction will often tend to induce a relatively flawed meaningfulness-and-teleology construal in this regard, that explains our metaphysics-of-presence mental-disposition). Thus an appropriate ontologically-veridical social-conceptualisation and/or storied-construct as aetiological/ontologically-escalatory that has the capacity to supersede the inherent human high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising–self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction specific element (which tend to denaturing meaningfulness-and-teleology construal, as high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising–self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction is behind manifest human ‘non-dissociability’ of the registry-worldview’s/dimension’s-reference-of-thought-for-social-functioning-and-accordance temporal-to-intemporal thresholds’ within the ontological scope of any given institutionalisation), should be able to imply the same underlying ontologically-veridical existence-as-of-its-mimetic-echoness/existence-in-reverberation/existence-potency of the superseding–oneness-of-ontology as any other truly ontologically-veridical conceptualisation, be it of animate or inanimate nature. The implication being that the underlying notional-totalising–self-referencing-syncretising (of our ‘emotional-involvement’ as self-centering-

and-definitional of human consciousness as of our animate-existential-referencing/subjectification) can perfectly be escaped from to more profound and unsuspecting depths of ontologically-veridical meaningfulness-and-teleology construal (enabling ‘dissociability of the registry-worldview’s/dimension’s–reference-of-thought-for-social-functioning-and-accordance temporal-to-intemporal thresholds’ ontologically), and so beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, ushering in ‘an ontologically-veridical existence-as-of-its-mimetic-echoiness/existence-in-reverberation/existence-potency’ contemplation to a point that subsumes equably both animate-existential-referencing/subjectification and inanimate-existential-effecting, wherein the underlying teleological-determinism of human functional and performance thresholds are effectively desubjectifiable-as-objectifiable to the point of attaining ‘effecting teleological-determination’ of the same level as inanimate ‘effecting determination’ (with little temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising–self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction denaturing meaningfulness-and-teleology construal), and so enabled with the referentialism technique of point-referencing for conflation in construing temporal-to-intemporal contrastive-synopsising-depths-of-meaningfulness-and-teleology as ‘dissociable temporal-to-intemporal thresholds of the registry-worldview’s/dimension’s–reference-of-thought-for-social-functioning-and-accordance’ (inducing the requisite social universal-transparency for prospective decentering/pivoting as enabling a totalising–renewing-realisation/re-perception/re-thought in ushering in deprocrpticism institutionalisation). Interestingly, the very conceptual background for such transcendentally-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism of meaningfulness-and-teleology construal lies with ‘intemporal ontological-faith-notion-or-

 sounder relationship with intrinsic-reality/ontological-veridicality; an idea we appreciate as
 we can garner that we, as of the positivism-procrypticism registry-worldview/dimension, are
 relatively psychologically geared to handle meaningfulness in a relatively objective way than
 say a non-positivistic/medieval mindset cannot and rather parse over towards arriving at its
 final 'greater egotistic/totalising-self-referencing-syncretising driven' belief/conclusion and
 this explains why their mental-dispositions were relatively alchemic, feudal of mentality, etc.
 For instance and why the corresponding transcendently-enabled-institutionalisation-

 Likewise we can appreciate with such phenomena today like 'fake news' easily spreading
 socially and often just as 'real news' our very own limitations of transcendently-enabled-

 objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism meaningfulness-

and-teleology construal as manifested in our positivism–procrypticism registry-worldview, with the implication of metaphysics-of-absence insight that a prospective registry-worldview as deprocrypticism will be an improvement over our transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism meaningfulness-and-teleology construal capacity). Prospectively a transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism to the point of attaining ‘effecting teleological-determination’ of the same level as inanimate ‘effecting determination’ of meaningfulness-and-teleology construal (with little temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising–self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction denaturing meaningfulness-and-teleology construal) will inform the underlying psyche of a deprocrypticism mindset/reference-of-thought/psychologism; as the capacity to objectify/desubjectify-as-objectify/authenticate is what enables the human mind to be able to develop towards fully achieving intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency. In this regard, we can grasp how human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination associated with the institutionalisation process increasingly implies ‘a more and more transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism psychologism overcoming subjectification denaturing of meaningfulness-and-teleology’, and so as of ‘non-rules-as-impulsive-or-accidental-or-random-mental-disposition-or-failing-rulemaking-over-non-rules’ psychologism (recurrent-utter-uninstitutionalisation), ‘failing-universalisation-directed-rulemaking-over-non-rules’

commonness of reference-of-thought as of prospective relative-ontological-completeness-of-reference-of-thought construed as ‘prelogism-as-of-conviction commitment of reference-of-thought’, however at the uninstitutionalised-threshold the implication of such a commonness of reference-of-thought is rather as of prior relative-ontological-incompleteness-of-reference-of-thought further disambiguated as of temporal-dispositions as well as as these conjugate with postlogism perversion-of-reference-of-thought inducing derived-perversion-of-reference-of-thought whether beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, more succinctly qualified as ‘madeupness/bottomline of reference-of-thought’ in the sense that in this instance such interlocutors ‘madeupness/bottomline of reference-of-thought’ tend to be circular with respect to their ontologically-effective ‘decided temporal/shortness-of-register-of-meaningfulness-and-teleology non-conviction commitments’ and are no longer of ‘prelogism-as-of-conviction commitment of reference-of-thought’ such that the naïve implication of a mutual logical exercise (logical-processing-or-logical-implication) is deceptive. This construal effectively enables delineation of underlying ontological-primemovers-totalitative-framework of mental-dispositions. ‘Madeupness/bottomline of reference-of-thought’ across all registry-worldviews/dimensions refers to the constituent temporal individuations mental-dispositions at a registry-worldview/dimension uninstitutionalised-threshold and points to its hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing as of its uninstitutionalised-threshold pointing to an inclination for untranscendability and undementability as of mechanical-knowledge even beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought but for the constraint of prospective social universal-transparency, and so in contrast to the same registry-worldview/dimension ‘prelogism-as-of-conviction commitment of reference-of-thought’ mental-disposition that reflects its ontologically-veridical meaningfulness-and-teleology as its

institutionalisation and equally points to an inclination for transcendability and dementability as of organic-knowledge once it construes of its beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought uninstitutionalised-threshold. Such construal of temporal individuations ‘madeupness/bottomline of reference-of-thought’ at uninstitutionalised-threshold is critical because then and in effect, the mental-reflex to ontologically validate these as of ‘prelogism-as-of-conviction commitment of reference-of-thought’ mental-disposition so-construed as of sound/existential-contextualising-contiguity logical-dueness is ontologically put into question given the perversion-and-derived-perversion-of-reference-of-thought. Such that ontological-veridicality/intrinsic-reality transcendental-enabling/existence-potency is established at the uninstitutionalised-threshold, and not as it is circularly construed within the institutionalisation frame as a construal of logical pertinence (logical-processing-or-logical-implication), but rather priorly the determination of temporal individuations ‘madeupness/bottomline of reference-of-thought’ as these reflect soundness-or-authenticity-of-reference-of-thought, that is, whether or not there is perversion-and-derived-perversion-of-reference-of-thought in the first place before any implication of logical-dueness/logical-pertinence arises. Consider as metaphysics-of-absence the case of notions-and-accusations-of-sorcery in a non-positivistic social-setup uninstitutionalised-threshold which is rather in want of positivistic meaningfulness-and-teleology. Effectively establishing deconstructive ontological-veridicality implies recognising the overall registry-worldview’s/dimension’s ontological-incompleteness-of-reference-of-thought as superstitious/non-positivistic inclined, its postlogism and conjugated postlogism as acknowledging and contending about notions-and-accusations-of-sorcery beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought leading to perversion-and-derived-perversion-of-reference-of-thought, with this succinctly reflecting the reality of temporal-dispositions of ‘madeupness/bottomline of reference-of-

thought' as of such non-positivism reference-of-thought uninstitutionalised-threshold. Such that it is not a logical exercise (logical-processing-or-logical-implication) that is in order which will rather be circular as fundamentally operating on false non-positivism registry-worldview's/dimension's institutionalisation categorical-imperatives/axioms/registry-teleology of superstition but rather one of determination of temporal individuations 'madeupness/bottomline of reference-of-thought' as this reflects postlogism denaturing and conjugated-postlogism derived-perversion-of-reference-of-thought as deconstruction of ontological-veridicality in implying prospective institutionalisation as of positivism meaningfulness-and-teleology categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity-or-ontological-preservation (rather than a naïve operation of logic as is further highlighted below). The fact is with or without postlogism and derived conjugated-postlogism, human 'prelogism-as-of-conviction commitment of reference-of-thought' tends to be relative. That is, even within an institutionalisation basis we don't necessarily function socially absolutely on the basis of veridical sound logic as we are limited by capacity/beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought given our ontological-incompleteness-of-reference-of-thought and secondly by arbitrariness in the choices we make, and this get even worst at the uninstitutionalised-threshold. Consider in this regard even the case of Heidegger as one of the greatest thinker of the last century in his 'perplexed cooperation' with the Nazi regime. The closest we come to absolute 'prelogism-as-of-conviction commitment of reference-of-thought' has to do with the abstract and uncompromising determination of mathematical meaningfulness, and receding more and more as we get towards domains of increasing 'emotional involvement' (the social) as ontological-veridicality increasingly takes a backseat to extirpatory/temporal paradigms and further so with respect to increasing informality as in the extended-informality-(susceptible-

to-effecting-parsimony-as-of-shoddiness-and-incompleteness-to-meaningfulness-and-teleology) of all human institutions, and particularly where social universal-transparency is blurred and not forthcoming as logic tends out to be an issue of making-a-mistake-at-one-moment-expressing-the-most-profound-conviction-at-the-other-moment in a circular reference-of-thought. This tendency is further exacerbated with the dynamic conjugation of temporal-dispositions (ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation) to postlogism-slantedness. This reality of our ‘prelogism-as-of-conviction commitment of reference-of-thought’ as being in effect subpar rather than absolute and specifically more compromised at uninstitutionalised-threshold and as associated with postlogism as conjugated-postlogism is what qualifies contextually as temporal-individuations ‘madeupness/bottomline of reference-of-thought’ as a temporal mental-disposition defect contrasted to a wrongfully implied supposedly ‘prelogism-as-of-conviction commitment of reference-of-thought’ as of ontologically-sound mental-disposition. This manifestation as a social dynamic (dynamic-cumulative-aftereffect) of such contrastive ‘madeupness of reference-of-thought’ and ‘prelogism-as-of-conviction commitment of reference-of-thought’ takes the form of temporal-to-intemporal social interlocutors beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought de-convergence as of transversality/logical-incongruence. Such a distinction particular at the uninstitutionalised-threshold is required because it then implies ontologically the relegation of logical engagement as rather irrelevant and in lieu determines ontological-veridicality by the soundness-of-the-reference-of-thought as of categorical-imperatives/axioms/registry-teleology in the first place to establish or not perversion-and-derived-perversion-of-reference-of-thought. This delineation is in line with the idea of human temporal (shortness-of-register-of-meaningfulness-and-teleology) to intemporal (longness-of-register-of-meaningfulness-

and-teleology) individuations nature as implicitly recognised in the structuring of formal constructs like the law, formal institutions, etc. It equally falls in line with the idea of knowledge notionalisation on the basis that it is equally critical to understand the possibility of the ignorances just as conceptual knowledge itself to further uphold, advance and skew for the latter. The point being that meaningfulness-and-teleology construal should supersede just a naïve unilateral construing of interlocution mainly on the basis of ‘prelogism-as-of-conviction commitment of reference-of-thought’ as of reflex but equally examine ‘as of circumstances pointing to uninstitutionalised-threshold’ the possibility of the ontological-veridicality of interlocutors ‘madeupness/bottomline of reference-of-thought’ mental-dispositions, and as is often associated with mental-dispositions geared towards ‘flawed impression-driven, expletive-driven and non-intellectual critique’ contention. This difference between ‘madeupness/bottomline of reference-of-thought’ and ‘prelogism-as-of-conviction commitment of reference-of-thought’ critically explains how the successive registry-worldviews/dimensions psychoanalytically-unshackled/memetically-reordered/institutionally-recomposed going by the fact that projective insights about prior registry-worldview/dimension ‘madeupness/bottomline of reference-of-thought’ as of prior relative-ontological-incompleteness-of-reference-of-thought is what needs to be superseded for prospective registry-worldview/dimension institutionalisation prospective relative-ontological-completeness-of-reference-of-thought effective ‘prelogism-as-of-conviction commitment of reference-of-thought’ (as operant construal) by social universal-transparency rendering the prior registry-worldview/dimension ‘madeupness/bottomline of reference-of-thought’ (as operant construal) untenable. This brings to the fore the idea that the salient point about human mental-disposition whether construed as of institutionalisation basis or uninstitutionalised-threshold has to do with the possibility of attaining or not attaining social universal-transparency. Where this is effectively attained, it becomes psychically and

institutionally untenable for interlocutors to act as of subpar (madeupness/bottomline of reference-of-thought) to ‘prelogism-as-of-conviction commitment of reference-of-thought’. This will explain why the hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing within a prior registry-worldview/dimension utterly disappears within the prospective registry-worldview/dimension meaningfulness-and-teleology, in the sense that notions-and-accusations-of-sorcery for instance are not entertained in a positivism social-setup as the positivism/rational-empiricism social universal-transparency knows this to be non-veridical ontologically-speaking giving its prospective relative-ontological-completeness-of-reference-of-thought. This imbued potency in social universal-transparency across all registry-worldviews/dimensions is what explains the possibility of social transcendence. The reason for this is that the entire construct of human social-functioning-and-accordance—as-of-social-stake-contention-or-confliction as the ‘social existential contract’ is implicitly built on supposed ‘prelogism-as-of-conviction commitment of reference-of-thought’ to meaningfulness-and-teleology as of both the individual’s expectation and the social’s expectation such that failure in this respect arises mostly surreptitiously since even the most disingenuous individuation will want the social-construct to function well in order to ‘parasitise’ it, as a failing social-construct as of ‘universal social surreptitious parasitising/co-opting’ puts even such individuation in jeopardy. We can appreciate this notion by the fact that even a miscreant will tend to advance, however dubious, a rationale that is meant to be socially functional. Basically, the postlogism-as-of-non-conviction mindset ‘madeupness/bottomline of reference-of-thought’ arises out of its temporal individuation’s surreptitiousness (‘lack of constraining social universal-transparency such that it can induce hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing’) as of marginal social instigation (consider the targeted nature of the adult psychopath’s maturation/indirectness/spatialisation/credulity/craftiness within the scope of

social functionality) while socially enabled circularly (due to the underlying prior relative-ontological-incompleteness-of-reference-of-thought as social procrypticism/disjointedness-as-of-reference-of-thought is itself an enabler for psychopathy just as a non-positivistic registry-worldview/dimension social superstition is itself an enabler for its corresponding postlogism for ‘imaginary’ accusations of sorcery); and so, while socially inducing temporal-dispositions conjugated-postlogisms derived ‘madeupness/bottomline of reference-of-thought’, and so overall, on the flawed mental-reflex that such protraction of ‘madeupness/bottomline of reference-of-thought’ is supposedly ‘prelogism-as-of-conviction commitment of reference-of-thought’ (as ‘lack of constraining social universal-transparency’). Such conditions as highlighted above (surreptitiousness, marginality and circularity) are not fulfilled at childhood psychopathy explaining why conjugated-postlogism as a social dynamism of protracted ‘madeupness/bottomline of reference-of-thought’ doesn’t socially take hold then, as such childhood postlogism perversion-of-reference-of-thought hasn’t superseded the social universal-transparency in further inducing temporal-dispositions derived-perversion-of-reference-of-thought. The further implication is that such surreptitiousness, marginality and circularity with regards to a registry-worldview’s/dimension’s temporal-dispositions are often construed rather as circumventive issues as of temporal extirpation paradigm, and not by ontological-veridicality insight as of structural/paradigmatic projective-totalitative-implications with respect to vices-and-impediments. Thus ensuring ontological-veridical social universal-transparency is structurally/paradigmatically inherently ‘advantaged ultimately’ by the social-construct functioning. (But then this can rather be achieved in the medium to long term as of a cross-generational transcendence import and hardly so in the short-run, given that in the short-run the issue of the registry-worldview/dimension ontological-incompleteness-of-reference-of-thought is a drawback in this respect. As the framework of generalised social referencing of

meaningfulness-and-teleology is a circular-pervasiveness closed-structure as of the habituated predicative-insights for meaningfulness-and-teleology based on the ontological-incompleteness-of-reference-of-thought of the registry-worldview/dimension as prior (despite the ontological-incompleteness-of-reference-of-thought induced distractive-alignment-to-reference-of-thought and override any such sense of relative pure-ontology conflatedness as of prospective relative-ontological-completeness-of-reference-of-thought conflatedness). So the transcendental meaningfulness-and-teleology implied as of projective-insights about the prospective registry-worldview/dimension predicative-insights of meaningfulness-and-teleology going by its prospective relative-ontological-completeness-of-reference-of-thought doesn't supersede the prior's 'circular-pervasiveness closed-structure of habituated predicative-insights for meaningfulness-and-teleology' in the short run. Chinua Achebe's *Things Fall Apart* Okonkwo returning from his long banishment construes meaningfulness-and-teleology in terms of the old/prior whereas his Umuofia village which had the same inclination as his as of prior relative-ontological-incompleteness-of-reference-of-thought before he was banished and likewise at the very beginning of the foreigners cultural diffusion inducing a subsequent prospective relative-ontological-completeness-of-reference-of-thought had moved on to the new/prospective meaningfulness-and-teleology which is now antipodal to his, hence his confliction with his circular-pervasiveness closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications which is equally a reflection of the confliction the village had had with the same prior circular-pervasiveness closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications when the foreign cultural diffusion arrived before superseding it cross-generationally. We can equally construe of the inverse situation as in H.G. Wells's *The Country of the Blind* which also highlights the implications of relative

contrast of ontological-completeness-by-incompleteness-of-reference-of-thought with regards to meaningfulness-and-teleology construal where Nunez's 'seeing of the environment' reference-of-thought as of its prospective relative-ontological-completeness-of-axiomatic-construct-or-reference-of-thought doesn't make an impression but is actually frowned upon on the habituated 'feeling of the environment' reference-of-thought as of its prior relative-ontological-incompleteness. This is because the personhood and socialhood formation have been constructed in circular-pervasiveness out of the prior reference-of-thought as 'feeling of the environment' explaining why a registry-worldview is a closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications that hardly entertains its own transcendability/dementability, and why transcendence is rather cross-generational for the requisite personhood and socialhood psychoanalytic-unshackling exercise to be initiated. Consider that the 'existential value references as what is worth living for' for both Okonkwo and 'feeling of the environment' reference-of-thought are temporally construed as definite-and-set as of their given perspectives or apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights in the circularly-pervasive closed-structure of their reference-of-thought despite their respective inherent prior relative-ontological-incompleteness-of-reference-of-thought without room for countenancing new perspective-apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-new-predicative-insights overcoming their circularly-pervasive closed-structure of reference-of-thought, speaking of their distractive-alignment-to-reference-of-thought from an ontological-normalcy/post-convergence perspective as of ontological-faith-notion-or-ontological-fideism. Interestingly, facing their respective conundrum to take a drastic and immediate decision as of their 'existential value references as what is worth living for', and without the prospect for

cross-generational adjustment, their decisions are equally dramatic in terms of considering physically doing away with Nunez's notion of 'seeing of the world' reference-of-thought, and Okonkwo's tragic acts upon the foreigners messenger and subsequently upon himself. This reflects the mental-disposition of all registry-worldviews uninstitutionalised-thresholds, including our own as positivism–procrypticism as of its disjointedness-as-of-reference-of-thought with regards to their 'existential value references as what is worth living for' rather temporally construed as definite-and-set as of distractive-alignment-to-reference-of-thought notwithstanding any notion of relative prospective ontological-completeness-of-reference-of-thought. Furthermore, it should be noted that the relative validity of a prospective totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights 'is not at all about the demonstrable instantiative logical-processing-or-logical-implication validity' but rather such a demonstration is more structurally/paradigmatically, together with all other such demonstrations of the prospective totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights, 'a contributory invalidation of the prior totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights in its circular-pervasiveness' at its uninstitutionalised-threshold as of its defectiveness/ontological-incompleteness-of-reference-of-thought; thus qualified as transcendence/suprastructuration. Just as the exercise of demonstrative convincing on the basis of a scientific principle within a non-positivistic social context 'is not at all about the demonstrable instantiative logical-processing-or-logical-implication validity' but rather structurally/paradigmatically, together with all other such demonstrations as of

scientific and positivistic principles/axioms/reference-of-thought meaningfulness-and-teleology apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights, ‘a contributory invalidation of non-scientific and non-positivism totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights in circular-pervasiveness’ at its uninstitutionalised-threshold as of its defectiveness/ontological-incompleteness-of-reference-of-thought. We can grasp an abstract sense of this situation as follows. Supposed human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as inducing more and more profound projective-insights construed as the successive apriorising/intelligibilitysetup/measuringinstrument/axiomatisings representing the successive registry-worldviews/dimensions reference-of-thought under which their respective predicative-insights construct their respective meaningfulness-and-teleology, so grounded axiomatically as apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights; is compared imaginarily to ‘mental-dispositions at different successive ascertaining-perspectives unbeknown-to-each other for gauging the overall earth landscape’ (representing analogically ‘different successive registry-worldviews/dimensions for meaningfulness-and-teleology’), construed say at ‘sea-level-height perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-insights’ (as recurrent-utter-uninstitutionalisation), ‘hill-level-height perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-insights’ (as base-institutionalisation–ununiversalisation), ‘mountain-level-height perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-insights’ (as universalisation–positivism), ‘airplane-level-height

perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-
 insights' (as positivism–procrypticism) and 'space-satellite-level-height
 perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-
 insights' (as deprocrypticism), rather as successive mental-states/reference-of-thought
 unbeknown-to-each-other in 'circular-pervasiveness closed-structure of
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-
 predicative-insights for earth landscape measurements-as-of-
 aposteriorising/intelligising/measuring/logicising-purpose'. We know that having never
 experienced 'hill-level-height
 perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-
 insights' (base-institutionalisation–ununiversalisation) the 'sea-level-height
 perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-
 insights' (recurrent-utter-uninstitutionalisation) will hardly countenance operating the
 perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-
 insights of the former as more ontologically profound, given its 'circular-pervasiveness
 closed-structure of apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-
 operant-or-incidenting-predicative-insights for earth landscape measurements-as-of-
 aposteriorising/intelligising/measuring/logicising-purpose' on the basis of its 'sea-level-
 height perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for
 predicative-insights'; and this same mental-reflex applies successively to relatively 'lower-
 level-heights perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising
 for predicative-insights' (prior registry-worldviews/dimensions) with respect to relatively
 'higher-level-heights
 perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-
 insights' (prospective registry-worldviews/dimensions). The fundamental difficulty is that

‘no given perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-insights’ (registry-worldview/dimension) recognises that there is any above it, and by reflex circularly undertakes predicative-insights from its perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising (and it is only the long run cross-generational habituation construed as of ontological-dementation/dialectical-dementation stranding-dialectics with the prior ontologically construed as decentered and dementing as of distractive-alignment-to-reference-of-thought, with the implication that its logical-dueness doesn’t exist just as the logical-dueness of the animist reference-of-thought with their God of plane proposition doesn’t ontologically exist.) We can grasp as well that it is the ‘space-satellite-level-height perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising for predicative-insights’ (as deprocrypticism) that ultimately provides the ideal ‘ascertaining-perspectives for gauging the overall earth landscape’. Besides, why the explication herein is necessarily implying a prospective reference-of-thought (as the author in here with a supposed deprocrypticism reference-of-thought construal as implying a prospective relative-ontological-completeness-of-reference-of-thought over our positivism–procrypticism), the fact is that any transcendental analysis is caught in two worlds as two different reference-of-thought in striving to explicate the ontological pre-eminence of the prospective reference-of-thought as of ontological-normalcy/’post-convergence, thus facing the dilemma that by mental-reflex we are not ‘habituated’ to the notion of our reference-of-thought being construed as ‘dementing and not thinking’, and so whether speaking of being construed within our positivism–procrypticism uninstitutionalisation as dementing and not thinking, within non-positivism/medievalism uninstitutionalisation as dementing and not thinking, within ununiversalisation uninstitutionalisation as dementing and not thinking, and recurrent-utter-uninstitutionalisation uninstitutionalisation as dementing and not thinking. We can grasp

this by imagining how a non-positivism uninstitutionalised-threshold will react when construed as dementing and not thinking with say notions-and-accusations-of-sorcery it considers given as a matter of fact, and imagine of such a reaction with a dementing and not thinking representation of ourselves construed from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought perspective as in disjointedness-as-of-reference-of-thought and rather in distractive-alignment-to-reference-of-thought ! Thus the reality of this analysis in that sense is ‘sparing as of our high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising-self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction nature’ for the sake of deconstructive-engagement/engaged-destruktion because an analysis construed as of reference-of-thought is all about mental-soundness or unsoundness representation (with no logical engagement implication) hence rather of a psychoanalytic-unshackling purpose; as a change of reference-of-thought implies a change of perspective/apriorising/intelligibilitysetup/measuringinstrument/axiomatising-of-meaningfulness-and-teleology as a shift of the curve-of-prospective-relative-ontological-completeness-of-reference-of-thought/axiomatic-construct and not a change in logic as a change along the same reference-of-thought/curve-of-prior-relative-ontological-incompleteness-of-reference-of-thought/logical-processing-or-logical-implication. In other words, a truly direct deprocrypticism ontological analysis will be a ‘mental break-in’/dementing of our positivism–procrypticism as we by reflex ‘mentally break-in’/dement a non-positivistic reference-of-thought (as we don’t engage it on the basis of the non-positivistic reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology just as a deprocrypticism analysis will not engage us on the basis of our procrypticism/disjointedness-as-of-reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-

teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology, and so in both cases as of the relative defectiveness/ontological-incompleteness-of-reference-of-thought of non-positivism and procrypticism/disjointedness-as-of-reference-of-thought). But then wholly carried out in both instances it will be off-putting to both prior reference-of-thought, explaining why a transcendental analysis is a deconstructive-engagement/engaged-destruktion recognising and harnessing the human potential to psychoanalytically-unshackle. This is more than just an abstract conceptualisation but an empirical reality of how cultural diffusion possibility as of ‘relative-ontological-completeness-of-reference-of-thought over prior relative-ontological-incompleteness-of-reference-of-thought’ took place historically (and so for instance, as of the relative ‘ontological-veridicality tolerance as stretched-truth’ allowed to the animist to say ‘God of plane’ in the view that in due course there will be psychoanalytic-unshackling towards positivistic meaningfulness-and-teleology; considering as well as of registry-worldview level of analysis that such a conceptualisation of ‘ontological-veridicality tolerance as stretched-truth’ is cross-generationally associated with the meeting of cultures wherein their meeting points often as of cultural and commercial relationships initiate ‘acculturating-indigenising-pidginising transitioning settings and their social constructions as of totalising-self-referencing-syncretising’ prior to eventual prospective relative-ontological-completeness-of-reference-of-thought accommodation). Likewise, this ‘ontological-veridicality tolerance as stretched-truth’ as of a deprocrypticism construal herein may elicit a misconstrual from a positivistic perspective failing to factor in the circular-pervasiveness implied in the notion of positivism–procrypticism uninstitutionalisation as procrypticism/disjointedness-as-of-reference-of-thought categorical-imperatives/axioms/registry-teleology failing/not-upholding intemporal-preservation-entropy-or-contiguity—or–ontological-preservation, and thus failing to grasp the deprocrypticism

apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights that construes our positivism–procrypticism as dementing/not-thinking and decentered, and wrongfully trying to engage meaningfulness-and-teleology in positivism–procrypticism terms-as-of-axiomatic-construct failing to factor in the circular-pervasiveness of the disjointedness-as-of-reference-of-thought. (More like a non-positivistic mindset/reference-of-thought insisting to contendingly engage a positivistic mindset/reference-of-thought but failing to grasp the implications as of circular-pervasiveness of being of non-positivistic of reference-of-thought as of its prior relative-ontological-incompleteness-of-reference-of-thought. Such insight point out that the ‘mental tools’ available to a mental state of recurrent-utter-uninstitutionalisation are not logically-intelligible-but-rather-are-distractively-dementing with respect to an implied prospective state of base-institutionalisation, the ‘mental tools’ available to a mental state of base-institutionalisation–ununiversalisation are not logically-intelligible-but-rather-are-distractively-dementing with respect to an implied prospective mental state of universalisation, the ‘mental tools’ available to a state of universalisation–non-positivism/medievalism are not logically-intelligible-but-rather-are-distractively-dementing with respect to an implied prospective mental state of positivism, and prospectively the ‘mental tools’ available to a state of positivism–procrypticism are not logically-intelligible-but-rather-are-distractively-dementing with respect to an implied prospective mental-state of deprocrypticism. Thus unlike is the case with issues of logical-dueness/logical-pertinence as of appropriateness or inappropriateness of logical-processing-or-logical-implication, issues of perversion-and-derived-perversion-of-reference-of-thought rather render such notions as forgiveness/overlooking/resetting nothing more but vague totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag misconstruing based on ‘a naïve traditional reflex’ that truly has no grander virtuous implications but quite the contrary as

actually endemising/enculturating vices-and-impediments as when so-construed as a wooden-
 language—of-temporal—mere-form/virtualities/dereification/akrasitic-drag-denatured-and-
 dementing-narratives of categorical-imperatives/axioms/registry-teleology failing/not-
 upholding intemporal-preservation-entropy-or-contiguity—or—ontological-preservation; thus
 transforming such ‘denaturing notions of forgiveness/overlooking/resetting into a temporal
 mental-disposition ontological-primemovers-totalitative-framework ‘misconstrued vicious
 insight disposition’ thus rather endemising/enculturating vices-and-impediments! As the
 question that arises is what does it mean to forgive/overlook/reset with regards to a temporal
 mental state of prior relative-ontological-incompleteness-of-reference-of-thought beyond-the-
 consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought
 circular-pervasiveness at its uninstitutionalised-threshold in perversion-and-derived-
 perversion-of-reference-of-thought as recurrent-utter-uninstitutionalisation,
 ununiversalisation, non-positivism/medievalism or procrysticism? It effectively means
 perpetuating the endemising/enculturation of the given uninstitutionalised-threshold
 reference-of-thought. What is of relevance is a veridically uninhibited/decomplexified
 ‘understanding of how the institutionalisation process works and induces prospective
 institutionalisations’ as a ‘The-Good/understanding/knowledge-driven/ontological-
 primemovers-totalitative-framework construct’ and not a vague ‘impression-driven/good-
 naturedness/wishfulness construct’; and that virtue-as-ontology/moral/ethical act is a
 reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-
 aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of cross-
 generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure’, and
 so à-la-Diderot as of the Encyclopédistes positivistic liberal and scientific outlook as an
 opened-construct-of-meaningfulness-and-teleology with its structural/paradigmatic virtue-as-
 ontology implications over a non-positivism/medievalism outlook closed-construct-of-

meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-
 prospective-apriorising-implications that cannot be construed in
 forgiveness/overlooking/resetting terms-as-of-axiomatic-construct given its
 structural/paradigmatic vices-and-impediments implications! Such that ‘our pretence to a
 prospective mental inclination for virtue-as-ontology’ goes hand-in-hand with ‘our
 introspection as of the structural/paradigmatic projective-totalitative-implications of the
 beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-
 unthought of our prior relative-ontological-incompleteness-of-reference-of-thought given its
 likelihood to induce our prospective vices-and-impediments’, and thus ‘our shouldering of
 the given transcendence-unenabling-uninstitutionalised-threshold in alienation—as-
 inauthentic/poorly-objectified/poorly-desubjectified-as-objectified/ontological-bad-
 faith/nihilistic underlying this prior relative-ontological-incompleteness-of-reference-of-
 thought behind our uninstitutionalised-threshold’s perversion-and-derived-perversion-of-
 reference-of-thought as vices-and-impediments’, and so as of an opened-construct-of-
 meaningfulness-and-teleology prospective transcendental mental inclination for prospective
 relative-ontological-completeness-of-reference-of-thought virtue-as-ontology’. Otherwise,
 such a notion of forgiveness/overlooking/resetting with respect to perversion-and-derived-
 perversion-of-reference-of-thought shouldn’t be narrowly interpreted only with regards to our
 positivism registry-worldview/dimension in its totalising-self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag closed-construct-of-meaningfulness-and-
 teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-
 implications but should go back ironically to the very beginning at recurrent-utter-
 uninstitutionalisation to imply forgiveness/overlooking/resetting within it same closed-
 construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-
 to-prospective-apriorising-implications thus undermining the very notion of the

institutionalisation process as the very structural/paradigmatic essence of virtue-as-ontology by its reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure’ as its leads to prospective registry-worldviews/dimensions of increasing prospective relative-ontological-completeness-of-reference-of-thought superseding successive structural/paradigmatic basis of vices-and-impediments; – as failing rulemaking-over-non-rules in recurrent-utter-uninstitutionalisation or failing universalisation-directed-rulemaking-over-non-rules in ununiversalisation or failing positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules in non-positivism/medievalism or failing pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules in procrypticism, and thus requiring respectively transcending/superseding to base-institutionalisation, universalisation, positivism and deprocrypticism. And by that same ‘ironic token’ the notion of grander human lives should not be construed as of the mental-disposition perpetuating the institutionalisation process in an opened-construct-of-meaningfulness-and-teleology allowing for reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure’ but rather closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications starting at the recurrent-utter-uninstitutionalisation in permanence that doesn’t allow for any such transcending enabled by the institutionalisation process. In other words the notion of forgiveness/overlooking/resetting with respect to perversion-and-derived-perversion-of-reference-of-thought is rather vague, as the more fundamental issue here is that human meaningfulness-and-teleology as of human

limited-mentation-capacity for construing virtue-as-ontology/ontology/intrinsic-
 reality/ontological-veridicality is 'ever structurally/paradigmatically in need for prospective
 relative-ontological-completeness-of-reference-of-thought' and that is what is to be sought
 after as with the recurrent-utter-uninstitutionalised striving for base-institutionalisation, the
 base-institutionalised–ununiversalised striving for universalisation, the universalised–non-
 positivist/medievalist striving for positivism and in our case the positivist–procryptist striving
 for deprocrypticism as of ontological-faith-notion-or-ontological-fideism; and so as of human
 limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-
 realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination enabled by reference-
 of-thought–categorical-imperatives/axioms/registry-teleology,-for-
 aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of cross-
 generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure' and
 so allowed by ontological-dementation/dialectical-dementation stranding dialectics. Such
 naïve construal of forgiveness/overlooking/resetting is on the impression-driven/good-
 naturedness/wishfulness basis that human mental capacity is a given as if there is no
 structural/paradigmatic issue of ontological-incompleteness-of-reference-of-thought with no
 recognition of any such institutionalisation process as human limited-mentation-capacity-
 deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-
 thought,-by-ratio-contiguity/ratiocination retrospectively to prospectively. This equally
 explains the ontological vagueness when it comes to perversion-and-derived-perversion-of-
 reference-of-thought not only with regards to the notions of forgiveness/overlooking/resetting
 but also such notions associated with positive psychology as positivity, flourishing, emotional
 intelligence, etc. as naively instigating social totalising–self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag with their implications when considered
 at a more profound level turning out to be rather vague and at best palliative since these are

not construed structurally/paradigmatically as of intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency within the framework of the institutionalisation process involving human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination. In other words, what does it mean in a recurrent-utter-uninstitutionalised mental state to have a positive psychology when its fundamental paradigmatic/structural issue as failing rulemaking-over-non-rules is not factored-in in its virtue-as-ontology construal/conceptualisation? And the same can be asked of us with regards to our positivism-procrypticism disjointedness-as-of-reference-of-thought. In which case such vague approaches will simply imply beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought naïve perpetuation in totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of the fundamental vices-and-impediments with both uninstitutionalised-thresholds, thus explaining the fundamental dilemma of all institutional Establishments in their closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications. Such confusion arises from a misconstruing of what is veridically implied deconstructively/ontological-reconstitutively by ontological-dementation/dialectical-dementation stranding dialectics, which implies that ‘any registry-worldview/dimension presence placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology as of its prior relative-ontological-incompleteness-of-reference-of-thought’ is ‘a dementing-and-decentered-to-prior-institutionalisation’s-categorical-imperatives/axioms/registry-teleology placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology as unsoundness-or-inauthenticity-of-reference-of-thought’ from the ‘prospective registry-worldview/dimension presence placeholder-setup/mental-devising-representation/mentation/consciousness-

awareness-teleology as of its prospective relative-ontological-completeness-of-reference-of-thought' as 'a dialectically-thinking-and-centered-to-prospective-institutionalisation's-categorical-imperatives/axioms/registry-teleology placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology as soundness-or-authenticity-of-reference-of-thought'. Certainly, we can recognise the veracity/ontological-pertinence of the above articulation with respect to retrospective registry-worldviews/dimensions placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology as of their prior relative-ontological-incompleteness-of-reference-of-thought while our positivism registry-worldview/dimension placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology is always of prospective relative-ontological-completeness-of-reference-of-thought. But when it comes to a prospective assessment wherein we are of prior relative-ontological-incompleteness-of-reference-of-thought as 'a dementing-and-decentered-to-prior-institutionalisation's-categorical-imperatives/axioms/registry-teleology positivism-procrypticism placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology as unsoundness-or-inauthenticity-of-reference-of-thought' from the 'prospective presence placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology of deprocrypticism as of its prospective relative-ontological-completeness-of-reference-of-thought' as 'a dialectically-thinking-and-centered-to-prospective-institutionalisation's-categorical-imperatives/axioms/registry-teleology placeholder-setup/mental-devising-representation/mentation/consciousness-awareness-teleology as soundness-or-authenticity-of-reference-of-thought', we are rather less apt to concur going by our totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag reflex such that such notions as forgiveness/overlooking/resetting and notions of positive psychology are rather just a failure to structurally/paradigmatically recognise the implied

perversion-and-derived-perversion-of-reference-of-thought as of our ontological-incompleteness-of-reference-of-thought, and what we are doing then is ‘re-referencing from the same positivism–procrysticism ontological-incompleteness-of-reference-of-thought’ and thus wrongly implying our undementability hence our untranscendability for a structural/paradigmatic reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure’, and paradoxically thus by implication that there is no ontological-incompleteness-of-reference-of-thought, to then wrongly imply such articulations of forgiveness/overlooking/resetting and positive-psychology are of intemporal projection whereas these are actually of conscious or unconscious beyond-the-consciousness-awareness-teleology temporal/shortness-of-register-of-meaningfulness-and-teleology projection. This insight explains the bizarreness we face from time to time discovering that even institutions we imagine should relatively be spared by scandals as human vices-and-impediments like many public-facing institutions, the media, faith institutions, etc. are now-and-then plague with scandals bound to re-occur because of this misunderstanding of knowledge as virtue-as-ontology/ontology articulated above as of structural/paradigmatic nature of the Good/understanding/knowledge-driven/ontological-primemovers-totalitative-framework construal/conceptualisation, and not naïve at best palliative construals in impression-driven/good-naturedness/wishfulness. A further reason for the difficulty has to do thus with the fact that each registry-worldview’s/dimension’s reference-of-thought is inherently a metaphysics-of-presence construed as dialectically-thinking-and-centered-to-prospective-institutionalisation’s-categorical-imperatives/axioms/registry-teleology soundness-or-authenticity-of-reference-of-thought that is in a circular-evasiveness from more ontologically-veridical metaphysics-of-absence construals/conceptualisations as implied by prospective

relative completeness-of-reference-of-thought which rather construes it as a dementing-and-decentered-to-prior-institutionalisation's-categorical-imperatives/axioms/registry-teleology unsoundness-or-inauthenticity-of-reference-of-thought. The ontological implication is that beforehand/axiomatically with respect to the cross-engagement of a prior relative-ontological-incompleteness-of-reference-of-thought and a prospective relative-ontological-completeness-of-reference-of-thought, the former is priorly invalidated into a dementing-and-decentered-to-prior-institutionalisation's-categorical-imperatives/axioms/registry-teleology unsoundness-or-inauthenticity-of-reference-of-thought by the latter as a dialectically-thinking-and-centered-to-prospective-institutionalisation's-categorical-imperatives/axioms/registry-teleology soundness-or-authenticity-of-reference-of-thought, invalidating by implication the logical-dueness/logical-pertinence as of logical-processing-or-logical-implication of the former. This we can grasp retrospectively in a cross-engagement with say notions-and-accusations-of-sorcery between our positivism and the non-positivism/medieval registry-worldview/dimension going by our prospective relative-ontological-completeness-of-reference-of-thought with respect to its prior relative-ontological-incompleteness-of-reference-of-thought. But since we have been habituated as of our existential formation within our closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications to be in logical-dueness for logical-processing-or-logical-implication by default and thus always contendingly relevant on the basis of sharing a mutual positivism reference-of-thought, we will hardly entertain though a deprocrypticism cross-engagement implied invalidation of our logical-dueness for logical-processing-or-logical-implication and thus rendering us contendingly irrelevant on the basis of our prior relative-ontological-incompleteness-of-reference-of-thought construed as disjointedness-as-of-reference-of-thought. But then ironically such a undementability posture could as well be adopted by a non-

positivism/medievalism reference-of-thought in its own existential formation that recognises non-positivistic ideas and notions-and-accusations-of-sorcery as relevant and dialectically-thinking-and-centered-to-prospective-institutionalisation's-categorical-imperatives/axioms/registry-teleology with its logical-dueness for logical-processing-or-logical-implication valid by default. This point out that there is necessarily a central growth element of a structural/paradigmatic reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology for cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure' allowing for dementability and thus transcendability as enabling human virtue-as-ontology/ontology. Further to the points made this far, talk of such a narrative as of such structural/paradigmatic projective-totalitative–implications of vices-and-impediments of our prior relative-ontological-incompleteness-of-reference-of-thought that does not focus on substantive critiquing/assessment of the arguments made but is rather geared to imply beforehand that such arguments are impropriety, is actually nothing more than our falsehood as mortals circularly pretending to imply that humankind-in-its-deficit does have a status above its mortal shortfall, and so paradoxically as a flawed and unsubstantiated route to wrongly imply no such argumentation is admissible. This is often a choice deterrent of institutional and eruditical Establishments of presence failing to recognise that more profound human insights arise from Dionysian dispositions and not just a reflex of looking at the presence as forever given as it is. The bluntness of reality/ontology doesn't recognise the mortals that we are and we can't advance our mortal statuses as superseding inherent reality/ontology, but we are rather bound to be much more substantive than that to avoid 'human closure of meaningfulness-and-teleology' which easily arises given our temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising–self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction. The fact is

such an articulation is not idle but rather the requisite fervour associated with many an enlightening thought, however qualified as impropriety, as a closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications start arising when we temporally carve away statuses out of the reach of ontological contention making the mortals that we are bigger than intrinsic-reality/ontological-veridicality.) On any such occasion, ontological-veridicality as of deprocrypticism prospective relative-ontological-completeness-of-reference-of-thought is restored by doing away with ‘ontological-veridicality tolerance as stretched-truth’ and articulating a ‘mental break-in’/dementing of positivism–procrypticism meaningfulness-and-teleology at its procrypticism uninstitutionalisation as of disjointedness-as-of-reference-of-thought

apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights, just as we’ll appreciate that were the animists insistent say on relating to the plane as God of plane to a point implying their potential non-transcendability as of psychoanalytic-unshackling in due course, ‘ontological-veridicality tolerance as stretched-truth’ is no longer warranted but a direct ‘mental break-in’/dementing by a demonstration to uphold ontological-veridicality. Such a demonstration might be construed as of a simple paper plane demonstration of ontological-primemovers-totalitative-framework principles or extraordinarily a flight from the flight deck with explanation or more extensively articulating that things work by natural causes and effects with no spirits inside them thus implying that a positivism-centered meaningfulness-and-teleology is more ontologically pertinent. Certainly such a ‘mental break-in’/dementing demonstration with regards to our procrypticism reference-of-thought as of its disjointedness-as-of-reference-of-thought construed from a deprocrypticism

reference-of-thought

perspective

or

apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-

predicative-insights will look weird to us going by our circularly pervasive totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag procrypticism/disjointedness-as-of-reference-of-thought, but it is more of ontological-veridicality/intrinsic-reality even though we are unhabituated to it since it is beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought and not yet by social universal-transparency, just as had been the case from the perspective or apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights of all the uninstitutionalised-thresholds reference-of-thought with respect to the ‘mental break-in’/dementing of their corresponding prospective institutionalisations reference-of-thought. The bigger point being that by definition a reference-of-thought doesn’t fathom the nature and degree of its ontological-incompleteness-of-reference-of-thought as of its apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights. (Thus suggesting base-institutionalisation in recurrent-utter-uninstitutionalisation, implying universalisation in base-institutionalisation–ununiversalisation, suggesting positivism in universalisation–non-positivism/medievalism and suggesting deprocrypticism in positivism–procrypticism will be perceived initially as ‘bullshit’ going by human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions–existentialism-form-factor as of our temporal inclination to subjectification/nombrilism/self-referencing. But then human temporal inclination to utter expletives is not intellectual argument but a mark of intellectual ineptness, with the ‘ontologically relevant’ intellectual issue being about understanding the ‘habituation exercise’ as of ontological-primemovers-totalitative-framework and percolation-channelling involved in the psychoanalytic-unshackling/memetic-reordering/institutional-recomposure behind the institutionalisation process as pertinent for deprocrypticism ‘without in the very

least entertaining' the averaging-of-thought mental-reflex as has been the case across all the institutional-cumulations/institutional-recomposures that has always been a drawback as of temporal extirpatory paradigm and parasitising/co-opting inclination subpar to the warranted ontological-faith-notion-or-ontological-fideism perpetually upholding the currency of the institutionalisation process across the times; as at this point, intellectual commitment overtly meets ontology.) Explained in other terms, implying in a non-positivism social-setup that notions-and-accusations-of-sorcery are inherently vices-and-impediments as of the transcendental prospective positivism prospective relative-ontological-completeness-of-reference-of-thought will-not-be-convincing-on-a-par-with-other-argumentators in that social-setup but rather for such temporal/shortness-of-register-of-meaningfulness-and-teleology purpose requires making a 'temporal palliation argument' of the type oneself or another person is not involved in sorcery or a counterargument that the accuser is the sorcerer, and so on the basis of the prior non-positivism prior relative-ontological-incompleteness-of-reference-of-thought, to-be-more-convincing-on-a-par-with-other-argumentators in that non-positivism social-setup (but then all this will wrongfully validate superstition and thus fail the very point of ontology/aetiologisation/ontological-escalation as an exercise in 'intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency as intemporality-asymmetric-subsumption-of-temporality'/asymmetrisation and not a temporal extirpation exercise of 'social-aggregation-enabling as of symmetrisation-of-reference-of-thought, as this is in effect an ontologically-non-veridical-or-flawed-totalising-self-referencing-syncretising and/or desymmetrisation for perceived temporal social-stake-contention-or-confliction'). Thus there is a fundamental ontological-veridicality/intrinsic-reality argumentation handicap in the short run for undermining the postlogism-and-conjugated-postlogism as notions-and-accusations-of-sorcery associated with the non-positivism registry-worldview/dimension prior relative-ontological-incompleteness-of-

reference-of-thought social referencing of meaningfulness-and-teleology which is 'superstitious' in the very first instance such that any argumentator putting into question superstitiousness like there is nothing like sorcery is 'shooting itself on the foot' in the short run. It is rather the long run cross-generational resolution construed as of ontological-dementation/dialectical-dementation stranding-dialectics by superseding the prior non-positivism prior relative-ontological-incompleteness-of-reference-of-thought as of the prospective positivism registry-worldview/dimension prospective relative-ontological-completeness-of-reference-of-thought by 'continuous habituation going by the latter's ontological-primemovers-totalitative-framework in the long run as superseding the prior beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought and initiating the appropriate prospective social universal-transparency that will structurally/paradigmatically harken back to undermine the postlogism-and-conjugated-postlogism grounded on notions-and-accusations-of-sorcery associated with the non-positivism registry-worldview/dimension. That is, it is by turning the non-positivistic mindset/reference-of-thought into a positivistic mindset/reference-of-thought that the possibility of 'ontologically' and 'not palliatively' resolving notions-and-accusations-of-sorcery can arise in the very first instance. Likewise, it is the cross-generational resolution of our positivism-procrypticism prior relative-ontological-incompleteness-of-reference-of-thought as of its circular-pervasiveness in countenancing of procrypticism or disjointedness-as-of-reference-of-thought from apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights of meaningfulness-and-teleology as conceptualising, articulating and preempting such disjointed meaningfulness-and-teleology of our positivism-procrypticism that is the structural/paradigmatic resolution as of prospective relative-ontological-completeness-of-reference-of-thought that can structurally/paradigmatically harken back in undermining the

circular-pervasiveness in countenancing of ‘disjointedness-as-of-reference-of-thought’ and the enculturation/endemisation of the manifest postlogism-and-conjugated-postlogism in our positivism–procrypticism as psychopathy and social psychopathy, and so going beyond just a temporal palliative resolution within a positivism–procrypticism circular-pervasiveness closed-structure countenancing ‘disjointedness-as-of-reference-of-thought’ of meaningfulness-and-teleology, beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought, and hence overlooking the structural/paradigmatic ontological vices-and-impediments implications of postlogism-and-conjugated-postlogism including psychopathy and social psychopathy arising given the ontological-incompleteness-of-reference-of-thought of our procrypticism as disjointedness-as-of-reference-of-thought. This explains how and why outlier ideas can supersede conventionalised ideas where the former provide in the big picture the possibility for the social-construct to function better by social universal-transparency at a cross-generational depth of analysis, and equally explains human historical suspicions of new ideas just in case their social universal-transparency turn out to be better and possibly leading to the dismantling of the prior and vested and contingent interests. It should be grasped that the comprehensiveness/dynamic-cumulative-afereffect of a registry-worldview’s/dimension’s ‘madeupness/bottomline of reference-of-thought’ (as an operant construal) at its uninstitutionalised-threshold is what defines it as uninstitutionalised-threshold which is decentered and dementing from the prospective institutionalisation perspective while that of its ‘prelogism-as-of-conviction commitment of reference-of-thought’ (as an operant construal) of its institutionalisation is what defines it as prior institutionalisation. (As implied by this author the nature of human individuations accounts respectively for human intemporality and human temporality as the ‘more fundamentally ontological-primemovers-totalitative-framework analysable operant agency of the human condition as of human knowledge-and-virtue or vices-and-impediments respectively as such

individuations then accrue in varying degrees in individuals as of varying circumstances'; and so-construed respectively as of intemporal individuation conflatedness which enables prospective institutionalisations or temporal individuations distractive-alignment-to-reference-of-thought that induce uninstitutionalised-thresholds at all the institutionalisations uninstitutionalised-threshold.) The conceptual technique for disambiguating individuations as of 'prelogism-as-of-conviction commitment of reference-of-thought' and 'madeupness/bottomline of reference-of-thought' at uninstitutionalised-threshold has to do with what is qualified as the given 'closeness-of-tethering-trajectory or looseness-of-tethering-trajectory to prelogism-as-of-conviction commitment of reference-of-thought' of the interlocutor wherein on one extreme the prelogism-as-of-conviction mental-disposition individuation adheres to a 'closeness-of-tethering-trajectory of meaningfulness-and-teleology to prelogism-as-of-conviction commitment of reference-of-thought' (not necessarily implying their logical-processing-or-logical-implication appropriateness but logically-due as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context) while on the other extreme the temporal postlogism-as-of-non-conviction individuation's mental-disposition as a 'vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging'-as-non-conviction-tethering-trajectory to prelogism-as-of-conviction commitment of reference-of-thought construed as 'madeupness/bottomline of reference-of-thought' is a mental-disposition for hollow-staging-and-performance (with respect to whatever narratives or acts can be made or committed opportunistically by 'vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging out of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context'),

while the ‘madeupness/bottomline of reference-of-thought’ arising as of a corresponding derived-perversion-of-reference-of-thought hollow-staging-and-performance of the temporal conjugated-postlogism individuation’s mental-disposition is as of corresponding ‘looseness-of-tethering-trajectory to prelogism-as-of-conviction commitment of reference-of-thought’ (as of ‘derived–vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging out of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context’). Such temporal postlogism-as-of-non-conviction individuation’s mental-disposition ‘madeupness/bottomline of reference-of-thought’ failing existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context as a ‘vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging’-as-non-conviction-of-tethering-trajectory to prelogism-as-of-conviction commitment of reference-of-thought can be seen transparently in the instance of the childhood psychopathy spilling water on a chair as a dereifying mental-shortcut to accuse another. Such personality development into adult psychopathy at which point social universal-transparency is undermined with its increasing maturation/indirectness/spatialisation/credulity/craftiness and the corresponding conjugated-postlogism leads to contextualised social dynamics of temporal individuations ‘looseness-of-tethering-trajectory to prelogism-as-of-conviction commitment of reference-of-thought’ that underlies various shades of ‘madeupness/bottomline of reference-of-thought’. As a general rule the ‘closeness-of-tethering-trajectory to prelogism-as-of-conviction commitment of reference-of-thought’ implies a mental-disposition for intrinsic-attribution of meaningfulness-and-teleology involving an inclination for presuming and implying of meaningfulness-and-teleology as limited/constraint by existential-contextualising-

contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context while the 'looseness-of-tethering-trajectory to prelogism-as-of-conviction commitment of reference-of-thought' implies a mental-disposition for extrinsic-attribution of meaningfulness-and-teleology as hollow-staging-and-performance involving an inclination for falsely presuming and implying meaningfulness-and-teleology as vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging out of the limits/constraints of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context. Further, the individuation-level analysis highlights that it is the 'close tethering-trajectory of prelogism-as-of-conviction commitment of reference-of-thought' and 'loose tethering-trajectory of prelogism-as-of-conviction commitment of reference-of-thought' as 'madeupness/bottomline of reference-of-thought' respectively as of human intemporal and temporal mental-dispositions that establish the ontological-primemovers-totalitative-framework of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context of meaningfulness-and-teleology whether as of 'direct or derived vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging out of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context' with temporal-dispositions or logically-duedness as of existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context with the intemporal/conviction mental-disposition; so-construed as of their contrastive-synopsising-depths-of-meaningfulness-and-teleology rather for a 'conflation

construal/conceptualisation’ and not a rather deceptive analytical reflex of ‘constitutedness of reference-of-thought construal/conceptualisation’. The fact is by mental-reflex we relate to social meaning by constitutedness as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity which by habit or chance will often turn out to be as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context as of the institutionalisation ambits of the domain-of-concern precedingly so-established/so-institutionalised by maximalising-recomposuring-for-relative-ontological-completeness/transvaluating, and so with hardly any consequence for our methodological imprecision/inexactitude where the established/institutionalised ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ is not ontologically superseded as at uninstitutionalised-threshold. But that is technically/abstractly speaking inappropriate from an ontological-veridicality perspective requiring unassailability/reliability/dependability at uninstitutionalised-threshold. As explained elsewhere and implied above it is the conceptualising (by maximalising-recomposuring-for-relative-ontological-completeness/transvaluating) of a ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ as of conflation that enables such a certitude at uninstitutionalised-threshold of a totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality by its specific institutionalisation. And that ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ of the social at uninstitutionalised-threshold involves a

holistic/nested-congruence social construal/conceptualisation that necessarily should factor in the reality of a human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor but we fail to do this due to our presencing—or—totalising—self-referencing-syncretising-forward-facing-self-consciousness metaphysics-of-presence disposition as of institutionalisation and thus wrongly implying intemporal construal as of our second-natured institutionalisation which while inconsequential within the ambits institutionalisation is not ontologically-veridical at the institutionalisation uninstitutionalised-threshold with the latter rather requiring a temporal-to-intemporal appraisal as of metaphysics-of-absence as its ‘reference-of-thought reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’. The implication is that postlogism/psychopathy and other human temporal phenomena (and so, across all registry-worldviews) which speak of uninstitutionalised-threshold are often wrongfully construed on the basis of intemporal second-natured institutionalisation human nature whereas the conflatedness requires ‘synopsising-depth of a human temporal-to-intemporal nature’ and so by conflatedness to establish the uninstitutionalised-threshold ‘reference-of-thought reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ rather as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating (construed as intimately tying down our limited-mentation-capacity by imbricatedness/threadedness/recomposuring to the ‘leash’ of existential-reality/ontology/intrinsic-reality/ontological-veridicality) as should be the case at all uninstitutionalised-threshold, and so over the mental-reflex of assuming second-natured institutionalisation reference-of-thought/axiomatic-construct as elaboration-as-mere-

extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity (construed as letting our limited-mentation-capacity by unimbricatedness/unthreadedness/unrecomposuring out of the 'leash' of existential-reality/ontology/intrinsic-reality/ontological-veridicality) as the latter is only practically effective when dealing with an already established human institutionalisation/institutionalised-construct but not at uninstitutionalised-threshold which require their own new specific 'reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology' which so established then enables the practical effectiveness of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. Consider the childhood psychopathy 'dereifying act' of spilling water on a chair and accusing another, even at that relatively social universal-transparency level there is a chance of mistaking as with the visitor sitting on the wet chair and needing an explanation of the whole situation including the child's condition, and such insight gets more and more opaque with the manifestation of adulthood psychopathy. This is an uninstitutionalised-threshold situation which is necessarily beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought and without social universal-transparency of the visitor. This example is exactly along the lines of the 'reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology' needed for construing postlogism/psychopathy and conjugated-postlogism as of its social model at uninstitutionalised-threshold, and so by way of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating (the latter is what sets up apriorising/intelligibilitysetup/measuringinstrument/axiomatisings and is of imbricatedness/threadedness/recomposuring existential-contextualising-contiguity's-

reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context, in contrast to elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity which is what renders-operant/incidenting predicative-insights). It is only then that such an established institutionalisation framework allows for elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity on the basis of the established ‘reference-of-thought reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’. Such a conceptualisation/construal is dramatically different from how we ordinarily conceive the construal of social meaningfulness-and-teleology before the institutionalisation of such a specific uninstitutionalised-threshold takes place. (Consider in this respect how the visitor erred in its relation with the childhood psychopathy on the basis of its commonly assumed social elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. At this individuation-level representation of the disambiguation of the transcending and transcended registry-worldviews, the visitor is using the ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights’ of positivism—procrypticism that do not factor in the possibility of the childhood psychopathy’s slantedness as inducing procrypticism or ‘disjointedness-as-of-reference-of-thought’-as-misappropriated-meaningfulness-and-teleology going by the visitor’s ontological-incompleteness-of-reference-of-thought as of positivism—procrypticism, while the explainer of the situation has factored in deprocrypticism ‘reference-of-thought reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ to pre-empt

the induced procrypticism or ‘disjointedness-as-of-reference-of-thought’-as-misappropriated-meaningfulness-and-teleology from the childhood psychopathy slantedness. At this individuation-level, the fact is that in order to be certain to avoid a similar deception again in its relation with the childhood psychopathy the visitor will now construe of deprocrypticism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ to pre-empt the slanted inducing of procrypticism or ‘disjointedness-as-of-reference-of-thought’-as-misappropriated-meaningfulness-and-teleology and gives up on positivism–procrypticism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ with respect to its relations with the childhood psychopathy. Thus at this individuation-level uninstitutionalised-threshold with respect to the childhood psychopathy, a new deprocrypticism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ has superseded the prior positivism–procrypticism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’, as it is the one to be circularly/recurrently/repetitively/repeatedly be utilised for operant/incidenting predication as elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. This is equally implied at the registry-worldview/dimension-level by dynamic-cumulative aftereffect, but in this instance factoring in well more than just one incident of childhood psychopathy but rather the dynamic-cumulative-aftereffect implications on the social structure of myriad cases of psychopathy, and as of postlogism/psychopathic personalities development from childhood to adulthood together with the implications of conjugated-postlogism/social-psychopathy not

only with regards to conjugated-ignorance as with the visitor but all the temporal-dispositions including ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation as of habits and thinking patterns consequences as of the extended-informality-⟨susceptible-to-effecting-parsimony-as-of-shoddiness-and-incompleteness-to-meaningfulness-and-teleology⟩ by formality dynamics; with the implication of lack of social universal-transparency as the manifestation is beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought at this uninstitutionalised-threshold, together with the inherent human complex of non-transcendability and hence undementability across all the registry-worldviews/dimensions. At this registry-worldview/dimension-level it is obvious that a straightforward articulation going by the incidental situation of such an individuation-level analysis will not be the case, but rather requires focussing on the bigger structural/paradigmatic picture of perversion-and-derived-perversion-of-reference-of-thought. However, suggesting at the registry-worldview/dimension-level of analysis the ontological-veridicality/intrinsic-reality of a new deprocrypticism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ that implies that the registry-worldview/dimension is in circular-pervasiveness of procrypticism or ‘disjointedness-as-of-reference-of-thought’-as-misappropriated-meaningfulness-and-teleology will meet with a mental-complex of totalising–self-referencing-syncretising/illusion-of-the-present/present-consciousness/mirage metaphysics-of-presence and can only arise as of a cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure. (Such an insight can be further elucidated in a storied-construct given the limits of the possibility of explanation as herein about the ‘lived social’ as of the aforementioned implied deprocrypticism ‘reference-of-

thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-
aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ construing a
storied-construct driven by such postlogism/psychopathic associated vague-rhyming-or-
copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-
vocalisation-or-subknowledging maturation/indirectness/spatialisation/credulity/craftiness
induced narration-construed-as-instantiative-moulting involving childhood psychopathy to
adulthood psychopathy development, and corresponding evolving of social relations as of
dynamic-cumulative-aftereffect ‘disjointedness-as-of-reference-of-thought’-misappropriated-
meaningfulness-and-teleology involving non-conviction/psychopathic/postlogism–
categorical-imperatives/axioms/registry-teleology,-for-
aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology-as–
prelogism-as-of-conviction thus leading to hollow-staging-and-performance; and so
construed as of ‘themes-driven underlying-agency-or-sous-agencement dynamics for
narration-construed-as-instantiative-moulting’). However, we can still get a sense of such
structural/paradigmatic projective-totalitative–implications from a retrospective registry-
worldview/dimension perspective like postlogism in a non-positivistic social-setup as of our
prospective relative-ontological-completeness-of-reference-of-thought perspective but it is
more difficult to grasp from a deprocrypticism prospective perspective of analysis where we
will rather be unpalatably represented as decentered and dementing, given our state of
metaphysics-of-presence. Supposed with regards to a case of notions-and-accusations-of-
sorcery as highlighted before as of a social-setup whose ontological-incompleteness-of-
reference-of-thought is non-positivistic, a positivism minded interlocutor arguing that
notions-and-accusations-of-sorcery do not exist upon an accusation of sorcery is literally
undermining itself but is seen as ontologically necessary for the cross-generational possibility
of prospective transcendence. Supposed however that the interlocutor isn’t an isolated

individual but a member from a positivistic society bringing about a cultural diffusion in the non-positivistic society such that the latter looks up to the former by its prospective relative-ontological-completeness-of-reference-of-thought as it effectively has greater control on intrinsic-reality/ontological-veridicality reflected by way of say its relative technology, then in this case the non-positivistic social-setup will at least in ad-hoc instances be circumspect in countenancing that notions-and-accusations-of-sorcery do not exist as of totalising-self-referencing-syncretising. This new positivism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ voiding notions-and-accusations-of-sorcery and superstition generally as of the prior non-positivism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ will more likely be taken-up-fully/habituated only cross-generationally in the middle run as the mental-reflex will constantly relapse into notions-and-accusations-of-sorcery and superstition of the prior non-positivism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’, highlighting that a postlogism like psychopathy in our positivism–procrypticism or one associated with notions-and-accusations-of-sorcery in non-positivism social-setup is not truly speaking an isolated phenomenon as construed from an individuation-level of analysis but speaks in the bigger picture of an underlying registry-worldview/dimension registry-worldview/dimension-level ontological-incompleteness-of-reference-of-thought as beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought and ‘lack of constraining social universal-transparency; such that implying that our prior positivism–procrypticism, as of its ‘reference-of-thought reference-of-thought–categorical-

imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology', cannot longer be upheld at such uninstitutionalised-threshold but requiring in lieu a depcryptoicism 'reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology' will be difficult to countenance but for a cross-generational psychoanalytic-unshackling/memetic-reordering/institutional-recomposure since the issue is one of as structural/paradigmatic denaturing construed as being/ontological/existential-defect or the registry-worldview's/dimension's–reference-of-thought-for-social-functioning-and-accordance defect or intradimensional-defect. Thus supposed the case of the childhood psychopathy 'dereifying act' of spilling water on a chair arose in say a non-positivistic social-setup, as of its superstitiousness, with its explanation that the reason had to do with its suspicion of sorcery from the brother. While the social-setup entertains superstitious notions however the childhood psychopathy relatively poor maturation/indirectness/spatialisation/credulity/craftiness means that it is more likely to be disbelieved in this instance as well in addition to the household familiarisation with the psychopathic/postlogism condition of the child. Likewise, a visiting stranger in such a non-positivistic social-setup might just as well have a similar reaction as the visitor in a positivism–procrypticism social-setup by believing and reacting to the childhood psychopathy manifestation as the non-positivism social-setup apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of existential-contextualising-contiguity-in-dereification entertains/is-cognisant-and-integrative-of/is-in-notional-contiguity-or-epistemic-contiguity-with superstitious claims in its meaningfulness-and-teleology. An explainer to the visiting stranger in the non-positivism social-setup case about the whole situation would have articulated at the individuation-level of analysis a

prospective ‘logically-due prelogism-as-of-conviction conflatedness as of positivism reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’, going by their familiarisation with the childhood psychopathy ‘logically-undue postlogism-as-of-non-conviction denaturing as of non-positivism reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ over the visiting stranger prior superstition believing ‘logically-undue conjugated-postlogism/conjugated-non-conviction derived-denaturing as of non-positivism reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’, with both latter logically reference-of-thought construed as of distractive-alignment-to-reference-of-thought or lacking-an-ontologically-veridical-reference-of-thought due to their derived-denaturing which as of dynamic-cumulative-aftereffect/aftereffect at registry-worldview/dimension-level of analysis is the very ontologically-central notion of every registry-worldview/dimension uninstitutionalised-threshold/uninstitutionalised-threshold which should thus be always construed as being in distractive-alignment-to-reference-of-thought with respect to its prospective institutionalisation. It is effectively derived-denaturing that induces hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing as of uninstitutionalised-thresholds, as we can appreciate that the childhood psychopathy and the visitor’s meaningfulness-and-teleology are in effect ontologically-speaking hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing. But then at the registry-worldview/dimension-level of analysis however, when compared to the simplistic individuation-level postlogism analysis insight, implying ontological-veridicality/ontological-reality on the basis of ‘logically-due prelogism-as-of-conviction conflatedness as of

positivism reference-of-thought reference-of-thought–categorical-
imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-
meaningfulness-and-teleology’ with respect to the overall non-positivism registry-
worldview/dimension as of its dynamic-cumulative-aftereffect/aftereffect with regards to the
manifest registry-worldview/dimension-level social construal of superstitions and notions-
and-accusations-of-sorcery in general, can only arise from a cross-generational
psychoanalytic-unshackling/memetic-reordering/institutional-recomposure, as the non-
positivism registry-worldview/dimension in relation to the prospective positivism registry-
worldview/dimension is a closed-construct-of-meaningfulness-and-teleology-as-of-
‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications just as our
positivism–procrypticism registry-worldview/dimension in relation to futural Being-
development/ontological-framework-expansion as of prospective deprocrypticism registry-
worldview/dimension is a closed-construct-of-meaningfulness-and-teleology-as-of-
‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications, in that as
with all registry-worldviews/dimensions both do not contemplate of their transcendability and
thus dementability, and keep on relapsing into their respective non-positivism and
procrypticism ‘reference-of-thought reference-of-thought–categorical-
imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-
meaningfulness-and-teleology’ in lieu of the respective prospective positivism and
deprocrypticism ‘reference-of-thought reference-of-thought–categorical-
imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-
meaningfulness-and-teleology’ as of prospective relative-ontological-completeness-of-
reference-of-thought. This is further rendered difficult by a natural human ‘emotional
involvement’ driven social-aggregation-enabling as of human condition that undermines
intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency. This

insight equally explains the pertinence of understanding postlogism/psychopathy in general as an epiphenomenon that can provide deeper insight about human nature given its ‘lateral-and-transversal disruptive nature on human meaningfulness-and-teleology’ and with the structure/paradigm relatively easily perceived at childhood, much like the early modern human biologists relatively simplistic but counterintuitive-as-of-their-epochs understanding of disease provided deeper insight in understanding how the complexity of the human body works. Both individuation-level understanding of postlogism in a non-positivism as of notions-and-accusations-of-sorcery and positivism social-setup as of psychopathy and social psychopathy divulge a bigger reality at the registry-worldview/dimension-level dynamic-cumulative-aftereffect/aftereffect that is hidden by registry-worldview/dimension-level complexity, wherein the childhood postlogism individuation-level construal points out the reality at the registry-worldview/dimension-level of respectively a conventioning non-positivism in lieu of an ontologically-veridical positivism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ and a conventioning positivism–procrypticism as procrypticism in lieu of an ontologically-veridical deprocrypticism ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’. That insight then brings up the idea of how does a registry-worldview/dimension-level dynamic-cumulative-aftereffect reflect the more simplistic individuation-level ontological-veridicality at childhood postlogism/psychopathy; which is the more elaborate purpose herein. That is, how distractive-alignment-to-reference-of-thought as undermining conflatedness induces psychological-complexes pointing to, as of dynamic-cumulative-aftereffect/aftereffect, the registry-worldview/dimension-level defectiveness/ontological-incompleteness-of-reference-of-thought. Considering again the

childhood psychopathy case in a ‘dereifying act’ of spilling water on a chair, these basic elements can be expounded at the individuation-level of analysis. It should be noted that the visitor ‘as of its conjugated-postlogism as conjugated-ignorance’ is rather inclined to wrongly imply a ‘symmetrisation-of-reference-of-thought but which is in effect an ontologically-non-veridical-or-flawed-totalising–self-referencing-syncretising that may induced its inclination for desymmetrisation for its perceived temporal social-stake-contention-or-confliction but for the fact of the relative contextual innocuousness with respect to social-stake-contention-or-confliction when it comes to childhood psychopathy compared to adulthood psychopathy’. The explainer of the situation ‘as of its prelogism-as-of-conviction-of-reference-of-thought’ is in an ‘intemporality-asymmetric-subsumption-of-temporality’/asymmetrisation relative to the visitor and childhood psychopathy with respect to the construal of ontological-veridicality. Hence the explainer of the situation construes the conflatedness as of its asymmetrisation with respect to the visitor whose reference-of-thought defectiveness/ontological-incompleteness-of-reference-of-thought as not factoring in the childhood psychopathy postlogism-as-of-non-conviction-of-reference-of-thought which is ‘pathologically ontologically-destructuring’ implying both the childhood psychopathy and the visitor are rather in a state of unsoundness-or-inauthenticity-of-reference-of-thought and not bad or poor logic such that the notion of logical-dueness doesn’t arise in the very first place, as a reference-of-thought/axiomatic-construct is fundamentally construed as of its soundness-or-authenticity-of-reference-of-thought prior to the notion of logical-dueness arising once soundness-or-authenticity-of-reference-of-thought is established; thus, given the asymmetrisation of the explainer of the situation reference-of-thought/axiomatic-construct as existential/ontological as of existential-contextualising-contiguity’s-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context as contextually-manifest prospective relative-ontological-completeness-

of-reference-of-thought in contrast to the visitor's 'supposed reference-of-thought/axiomatic-construct' which is non-existential/non-ontological as not-of-existential-contextualising-contiguity's-reifying/elucidating-of-prospective-relative-ontological-completeness-of-reference-of-thought-devolving-as-of-instantiative-context as contextually-manifest prior relative-ontological-incompleteness-of-reference-of-thought. It is this fundamental fact that underlies the notion of 'distractiveness or arrogation or usurpation or co-opting' associated with the construal of the meaningfulness-and-teleology of temporal-dispositions perversion-and-derived-perversion-of-reference-of-thought as hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing in relation to intemporal meaningfulness-and-teleology as ontological; as such symmetrisation and subsequent desymmetrisation will wrongfully lead to the reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of the visitor's reference-of-thought so ontologically-destructured by the childhood psychopathy postlogism 'dereifying act' of spilling water on a chair and accusing another, thereby undermining ontological-veridicality where logic-as-of-prelogism-as-of-conviction is wrongly assumed thus supposedly implying logical-processing-or-logical-implication is now to be engaged on the basis of the visitor's ontologically-destructured reference-of-thought/axiomatic-construct rather than implying the reference-of-thought—categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology of the explainer of the situation reference-of-thought/axiomatic-construct as soundness-or-authenticity-of-reference-of-thought and the visitors and childhood psychopathy 'reference-of-thought—degraded-devolving-as-of-uninstitutionalised-threshold' unsoundness-or-inauthenticity-of-reference-of-thought. The implication here is that the construal/conceptualisation of ontologically-veridical meaningfulness-and-teleology lies entirely/exclusively/supersedingly on the reference-of-

thought/axiomatic-construct/curve-of-prospective-relative-ontological-completeness-of-reference-of-thought of the explainer of the situation while the logical-dueness of the visitor's 'supposed but rather non-existential/non-ontological reference-of-thought/axiomatic-construct/curve-of-prior-relative-ontological-incompleteness-of-reference-of-thought' doesn't even arise in the very first place and fundamentally explains why its meaningfulness-and-teleology is operantly qualified as of 'distractiveness'/distractive-alignment/dismissal-as-being-in-arrogation and so more aptly as distractive-alignment-to-reference-of-thought. Distractiveness as it implies that in such a context, ontological-veridicality is construed exclusively as of intemporal prelogism-as-of-conviction reference-of-thought conflatedness denying any implied symmetrising of meaningfulness-and-teleology from temporal-dispositions in perversion-and-derived-perversion-of-reference-of-thought as their logical-dueness doesn't arise in the very first place, hence the reason why perversion-and-derived-perversion-of-reference-of-thought is construed more than just as of 'ontological-destructuring-constitutedness' but more completely and critically to avoid misconstrual rather as of distractive-alignment-to-reference-of-thought ; to point out that temporal-dispositions perversion-and-derived-perversion-of-reference-of-thought haven't got any 'existentially/ontologically-veridical reference-of-thought' given that they are in arrogation/usurpation/co-opting but rather the reality of their perversion-and-derived-perversion-of-reference-of-thought is construed operantly as of temporal postlogism-as-of-non-conviction-and-conjugated-postlogism 'exercise of distracting from' the intemporal prelogism-as-of-conviction reference-of-thought as of conflatedness', and so construed as distractive-alignment-to-reference-of-thought. That is, a 'temporality distracting from intemporality' construct; wherein the 'conflatedness of intemporal prelogism-as-of-conviction projection' is misconstrued in 'denaturing' of psychopathy/postlogism with the consequent alignment to it of conjugated-postlogism as 'derived-denaturing'. In other words,

prospective relative-ontological-completeness-of-reference-of-thought is ‘precedingly/supersedingly structurally/paradigmatically cogent and comprehensive framework of meaningfulness-and-teleology’ such that any arising temporal disruption of meaningfulness-and-teleology ‘has nothing to do with constituting meaningfulness-and-teleology as of the temporal disruption prior relative-ontological-incompleteness-of-reference-of-thought’, but rather meaningfulness-and-teleology is reconstrued as structuring/paradigming from the very prospective relative-ontological-completeness-of-reference-of-thought itself. Consider the case of the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising as perversion-of-reference-of-thought and temporal alignment in assuming the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising as appropriate as derived-perversion-of-reference-of-thought as of ontological-incompleteness-of-reference-of-thought and intemporal projection of appropriate apriorising/intelligibilitysetup/measuringinstrument/axiomatising as prospective relative-ontological-completeness-of-reference-of-thought. One cannot depart from both ‘the state of the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising as perversion-of-reference-of-thought or any states of temporal alignment in assuming the defective apriorising/intelligibilitysetup/measuringinstrument/axiomatising as appropriate as derived-perversion-of-reference-of-thought’ to construe meaningfulness-and-teleology as of intrinsic-reality/ontological-veridicality structurally/paradigmatically by their ontological-incompleteness-of-reference-of-thought, as all the meaningfulness-and-teleology that can be as of intrinsic-reality/ontological-veridicality wholly lies with the intemporal projection of appropriate apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of its prospective relative-ontological-completeness-of-reference-of-thought. The implication at the registry-worldview level is that base-institutionalisation ‘wholly carries all the

meaningfulness-and-teleology that can be as of intrinsic-reality/ontological-veridicality' over a state of recurrent-utter-uninstitutionalisation, and likewise for universalisation over base-institutionalisation–ununiversalisation, positivism over universalisation–non-positivism/medievalism, and in our case futural Being-development/ontological-framework-expansion as of prospective deprocrypticism over our positivism–procrypticism. The point here is to highlight that 'conflatedness' doesn't imply any symmetrisation of meaningfulness-and-teleology with regards to perversion-and-derived-perversion-of-reference-of-thought since the latter is structurally/paradigmatically not logically-due for logical-processing-or-logical-implication in the very first place as is erroneously assumed by temporal projection mental-reflex. But rather, it implies an utter structural/paradigmatic reconstrual of meaningfulness-and-teleology as of intrinsic-reality/ontological-veridicality wholly by the intemporal projection of the prospective relative-ontological-completeness-of-reference-of-thought. The psychoanalytic-unshackling/memetic-reordering/institutional-recompose implications associated with perversion-and-derived-perversion-of-reference-of-thought ultimately falls to the grander issue of prior relative-ontological-incompleteness-of-reference-of-thought as fundamentally endemising/enculturating such perversion-and-derived-perversion-of-reference-of-thought possibilities; such that a intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm as maximalising-recomposuring-for-relative-ontological-completeness/transvaluating is not one that simply identify a perversion-of-reference-of-thought in a social-construct but as 'covering all the possibilities for vices-and-impediments hypothetically susceptible to arise' projects how structurally/paradigmatically the social-construct as of its beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought prior relative-ontological-incompleteness-of-reference-of-thought is 'susceptible to integrate' perversion-

of-reference-of-thought as derived-perversion-of-reference-of-thought, and ‘build a structural/paradigmatic ontology as of prospective relative-ontological-completeness-of-reference-of-thought going from this more comprehensive-possibilities bases that doesn’t allow for incrementalism-in-relative-ontological-incompleteness’ with the implication that no logical interlocution of the averaging-of-thought arises as of prior relative-ontological-incompleteness-of-reference-of-thought. We can appreciate that the childhood psychopathy ‘dereifying act’ of spilling water on a chair is a distractiveness-drive with no existentially/ontologically veridical reference-of-thought which when wrongly implied as valid prelogism-as-of-conviction reference-of-thought/axiomatic-construct leads to its reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology wrongly transforming the issue into one of logic-as-of-prelogism-as-of-conviction thus supposedly implying logical-processing-or-logical-implication by wrongly enabling logical-dueness to arise instead of an issue of unsoundness-or-inauthenticity-of-reference-of-thought implying its dismissal as distractive-alignment-to-reference-of-thought ; and this flaw extends into the visitor’s conjugated-postlogism as conjugated-ignorance given its ontological-incompleteness-of-reference-of-thought as of positivism–procrypticism disjointedness-as-of-reference-of-thought which is cognisant-and-integrative as of its apriorising/intelligibilitysetup/measuringinstrument/axiomatising reflection of existential-contextualising-contiguity-in-dereification of the childhood psychopathy slantedness, and so as a derived-distractiveness-drive with no existentially/ontologically veridical reference-of-thought which when wrongly implied falsely as ontologically-veridical reference-of-thought/axiomatic-construct also leads to its reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology wrongly transforming the issue into one of logic-as-of-

prelogism-as-of-conviction thus supposedly implying logical-processing-or-logical-implication by wrongly enabling logical-ness to arise instead of an issue of derived unsoundness-or-inauthenticity-of-reference-of-thought and thus also implying as well its dismissal as distractive-alignment-to-reference-of-thought. In both wrongful ‘apriorising/intelligibilitysetups for aposteriorising/intelligising/measuring/logicising meaningfulness-and-teleology what is produced isn’t ontologically-veridical meaningfulness-and-teleology but rather dementing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing qualified as arrogation or usurpation or co-opting’ exactly because of the induced postlogism/psychopathy distractive-alignment-to-reference-of-thought out of existentially/ontologically veridical context; and its social integration/derivation in conjugation with human temporality of ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation as conjugated-postlogism due to ontological-incompleteness-of-reference-of-thought, and specifically in the case of positivism–procrysticism, due to disjointedness-as-of-reference-of-thought. This equally underlies on the basis of dynamic-cumulative-aftereffect/aftereffect at the individuation-level and registry-worldview/dimension-level of analyses the notion of ‘decentering’ as of ontological-dementation/dialectical-dementation stranding dialectics, as the idea of value-reference if wrongfully ontologically construed as determined by the ‘averaging-of-thought as non-positivism reference-of-thought’ or ‘averaging-of-thought as procrysticism reference-of-thought’, then in effect the phenomena of non-positivistic/medieval postlogism like notions-and-accusations-of-sorcery as well as psychopathic-postlogism-and-its-social-integration as of our procrysticism/disjointedness-as-of-reference-of-thought will respectively be wrongfully construed to be existentially/ontologically veridical. The bigger point being that symmetrisation implying

mutual recognition of reference-of-thought can only arise where there is mutual appropriateness-of-reference-of-thought-as-of-conflatedness as existentially/ontologically veridical thus enabling the logical-dueness of both interlocutors to arise as of their soundness-or-authenticity-of-reference-of-thought in the very first place, notwithstanding thereafter the appropriateness or inappropriateness of the logical-processing-or-logical-implication exercise which is then an altogether different issue of effective/ineffective logic-as-prelogism-as-of-conviction, and this latter is what tends to be falsely implied in situations of postlogism/psychopathy and conjugated-postlogism/social-psychopathy, and need to be ‘ontologically dismissed offhand’ and brought back to the fundamental issue of perversion-and-derived-perversion-of-reference-of-thought rather reflected-as-of-soundness-or-authenticity-of-reference-of-thought in determining whether logical-dueness arises in the very first place. Central to such a dynamic-cumulative-aftereffect/aftereffect registry-worldview/dimension-level analysis derived from such an individuation-level insight is the idea that social-functioning-and-accordance—as-of-social-stake-contention-or-confliction is contiguous as of meaningfulness-and-teleology as of the individuation-level and registry-worldview/dimension-level of analysis, notwithstanding its developing complexification as of dynamic-cumulative-after/effect as from the individuation-level to the registry-worldview/dimension-level and thus with a greater opportunity for the simplistic individuation-level childhood postlogism/psychopathy phenomenon relatively resolvable at that individuation-level to fail resolution with the myriad of such cases at the circular-complexification registry-worldview/dimension-level of more surreptitious adulthood pathological postlogism/psychopathy as the maturation/indirectness/spatialisation/credulity/craftiness induces ‘lack of constraining social universal-transparency with consequent conjugated-postlogism ‘involving beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought

dynamics further associated with a generalised social ‘lack of constraining social universal-transparency reflected by the given registry-worldview’s/dimension’s prior relative-ontological-incompleteness-of-reference-of-thought thus reflecting the uninstitutionalised-threshold backdrop for the registry-worldview’s/dimension’s hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing. In other words, social-functioning-and-accordance—as-of-social-stake-contention-or-confliction is structurally/paradigmatically ‘ontologically compromised’ as of a registry-worldview’s/dimension’s prior relative-ontological-incompleteness-of-reference-of-thought such that what a registry-worldview/dimension institutionalisation accede to as socially-functioning-and-accordant is limited by its given beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought with the implication that ‘lack of constraining social universal-transparency at this uninstitutionalised-threshold allows for denaturing, which is rather subpar to the notional-conflatedness/constitutedness-to-conflatedness required for ontological-normalcy as ‘pre-empting ontological-decadence’, as wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the registry-worldview’s/dimension’s institutionalisation categorical-imperatives/axioms/registry-teleology failing intemporal-preservation-entropy-or-contiguity—or-ontological-preservation to be construed as socially-functional-and-accordant, with the possibility for such ontological-decadence being superseded arising only as of the prospective registry-worldview/dimension institutionalisation prospective relative-ontological-completeness-of-reference-of-thought driven by the ‘non-constraining and abstract organic mental-disposition as of ontological-faith-notion-or-ontological-fideism’ in rearticulating such a prospective institutionalisation ‘constraining social universal-transparency categorical-imperatives/axioms/registry-teleology-for-intemporal-preservation-entropy-or-contiguity—or-ontological-preservation

taking cognisance of the prior registry-worldview's/dimension's ontological-incompleteness-of-reference-of-thought; wherein notional-conflatedness/constitutedness-to-conflatedness reflects their institutionalisation and denaturing reflects their uninstitutionalised-threshold. Hence in the bigger picture explaining why the successive registry-worldviews/dimensions are construed as of reducing-epistemic-abnormalcy towards ontological-normalcy/post-convergence. As of a protracted analysis given human limited-mentation-capacity with respect to social universal-transparency which critically tends to be solicited at its beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as in this individuation-level analysis, conflatedness can equally be construed as tying down transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism to ontological-normalcy as ontological-completeness-of-reference-of-thought avails as of ontological-faith-notion-or-ontological-fideism, and hence its construal as of 'intemporal-prioritisation-of-reference-of-thought'-as-conflatedness; while constitutedness can equally be construed as tying down 'supposed objectivity as of conscious or unconscious denaturing intellectual-bad-faith' to the wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatric-drag-denatured-and-dementing-narratives of the registry-worldview's/dimension's institutionalisation categorical-imperatives/axioms/registry-teleology failing intemporal-preservation-entropy-or-contiguity—or-ontological-preservation as of ontological-normalcy enabled by ontological-incompleteness-of-reference-of-thought in temporal prioritisation teleology. As such conflatedness is the underlying drive of a human hermeneutic psychology as of an ontologically-driven developing psyche as 'dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics' construed as of notional-conflatedness/constitutedness-to-conflatedness from constitutedness/recurrent-utter-

uninstitutionalisation, first-level-pseudoconflation/base-institutionalisation–
 ununiversalisation, second-level-pseudoconflation/universalisation–non-
 positivism/medievalism, third-level-pseudoconflation/positivism–procrypticism, and
 conceptual-conflatedness/deprocrypticism. We can appreciate that prior relative-ontological-
 incompleteness-of-reference-of-thought inherently undermines the capacity for
 transcendently-enabled-institutionalisation-process-level-of-
 authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-
 ontological-fideism/anti-nihilism of a notional-totalising–self-referencing-syncretising agent
 of limited-mentation-capacity that we are as of our animate-existential-
 referencing/subjectification, such that our transcendently-enabled-institutionalisation-
 process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-
 faith-notion-or-ontological-fideism/anti-nihilism enabling our ontology/virtue-construal
 capacity is more fundamentally a drive for ontological-completeness-of-reference-of-thought
 driven by conflatedness as articulated above over denaturing, and explaining why
 conflatedness as of ontological-faith-notion-or-ontological-fideism instigating the
 institutionalisation process behind the successive institutional-cumulations/institutional-
 recomposures is the very determinant of human ontology/virtue-construct, and so more than
 just an affixed as denaturing referencing of any one registry-worldview’s/dimension’s
 institutionalisation categorical-imperatives/axioms/registry-teleology failing intemporal-
 preservation-entropy-or-contiguity–or–ontological-preservation as of ontological-normalcy,
 notwithstanding the mere fact of simply being second-natured/institutionalised at the backend
 of the institutionalisation process as of our positivism–procrypticism. Notional-
 conflatedness/constitutedness-to-conflatedness points out that it is the aspiration for base-
 institutionalisation from recurrent-utter-uninstitutionalisation, for universalisation from base-
 institutionalisation–ununiversalisation, for positivism from universalisation–non-

positivism/medievalism and prospectively for deprocrypticism from our positivism–
 procrypticism that are of ontology/virtue equivalency as of ontological-faith-notion-or-
 ontological-fideism; and not the totalising–self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag mental-complex of considering the
 wooden-language—of-temporal–mere-form/virtualities/dereification/akrasiatic-drag-
 denatured-and-dementing-narratives of the registry-worldview’s/dimension’s
 institutionalisation categorical-imperatives/axioms/registry-teleology while failing
 intemporal-preservation-entropy-or-contiguity—or–ontological-preservation as of ontological-
 faith-notion-or-ontological-fideism within the given registry-worldview/dimension, be it at
 the backend of the institutionalisation process as our positivism–procrypticism. A naïve
 conceptualisation of ontology/virtue construal ideal by the mere fact of simply being at the
 backend of the institutionalisation process as of our positivism–procrypticism
 institutionalisation doesn’t speak of our first-nature/philosophical intemporal projection -of-
 thought but rather of a second-natured institutionalisation that induced our prospective
 relative-ontological-completeness-of-reference-of-thought by the institutionalisation process
 that cannot be confused with the idea of construing our present positivism–procrypticism
 uninstitutionalisation reference-of-thought as the definite ontology/virtue closed-structure,
 but rather warrants that we take stock of the exceptional institutionalisation process that has
 gone before in providing the second-natured possibilities of our present as of ontological-
 faith-notion-or-ontological-fideism driven notional-conflatedness/constitutedness-to-
 conflatedness, and in that respect conjure how we can equally undertake our own part of the
 human existential tale homework in summoning ontological-faith-notion-or-ontological-
 fideism driven notional-conflatedness/constitutedness-to-conflatedness as an opened-
 structure for futural Being-development/ontological-framework-expansion as of prospective
 deprocrypticism, and not a closed-structure naïve totalising–self-referencing-

syncretising/circularity/interiorising/akrasiatic-drag nombrilism as of flawed/perverted
 categorical-imperatives/axioms/registry-teleology at our positivism–procrypticism
 uninstitutionalisation of procrypticism as disjointedness-as-of-reference-of-thought, and by so
 doing denying the ‘grander human existential-tale implications of notional-
 conflatedness/constitutedness-to-conflatedness’. This fundamental and protracted
 epiphenomenal insight as of ‘human subpotent-mimetic-echoness-derivation-within-the-full-
 potency of ontology/intrinsic-reality/of-referential-nature/of-intemporal-preservation-
 entropy-or-contiguity—or—ontological-preservation of existence-as-of-its-mimetic-
 echoness/existence-in-reverberation/existence-potency’ more than just as of a virtue
 conceptualisation is more profoundly/all-embracingly an echoness of the implication of
 human limited-mentation-capacity for ontological-construal/ontological-conceptualisation,
 and so with little temporal-to-intemporal-conjugating-emotional-
 involvement/subjectification/totalising—self-referencing-syncretising-as-of-perceived-social-
 stake-contention-or-confliction and is equally relevant with regards to innocuous knowledge-
 constructs/theories/intersolipsistic-intercessory-notions/notional-referential-
 notions/articulations/virtue as it subsumes virtue-as-inherent-ontology; with dynamic-
 cumulative-aftereffect/aftereffect implications at the individuation-level and registry-
 worldview/dimension-level of analysis as of metaphysics-of-absence. In this regard,
 metaphysics-of-absence as articulated herein by this author is rather about, ‘human limited-
 mentation-capacity construed as of ontological-normalcy/post-convergence metaphysics-of-
 absence/Doppler-thinking as it disambiguates human–aporia/undecidability/dilemma/ought-
 indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-
 dispositions—existentialism-form-factor meaningfulness-and-teleology projective-totalitative-
 implications’, as of historicity/ontological-aesthetic-tracing. For instance, the immediacy of
 intrinsic-reality/ontological-veridicality transcendental enabling in the natural sciences which

is implicated in those fields by their ‘relatively high results-constraining-effectiveness nature’ provides metaphysics-of-absence insights with regards to obviating the high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising–self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction bound to disrupt thought and analysis in the social as of its ‘relatively low results-constraining-effectiveness nature’.

Along the same argument and with regards to the high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising–self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction inherent in the social, it is important to grasp that such an epiphenomenon/incidental-phenomenon insight as implied herein with postlogism/psychopathy and corresponding human social dynamics implications is rather a social construction ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ that goes well beyond any given specific epiphenomenon–(in-the-overall-ecstatic-existence-supervening-conflatedness)/incidental occurring behind the inspired/insight-for-the social construction ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ as of aetiologisation/ontological-escalation for universal retrospective to prospective understanding of postlogism/psychopathy and human social dynamics implications. In other words such a social construction ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ is inherently the more expansive, universal, decisive, objective and easier basis for critiquing its theorising-conceptualising-operationalising narratives ‘in order to assess the veracity/ontological-pertinence of the structural/paradigmatic universal implications arrived-at of the social construction ‘supposedly coherent ontological-commitment—construed-as-of-existential-

reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ as of the possibilities of easily transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism myriad retrospective and prospective social contexts of analysis, and so more critically rather than an obscured/muddled/obfuscated and difficult critiquing grounded on ‘assessing the veracity/ontological-pertinence of the structural/paradigmatic universal implications arrived-at of the social construction ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ rather on the basis of any such specific epiphenomenon—(in-the-overall-ecstatic-existence-supervening-conflatedness)/incidental occurring as of its relatively poorly objectifiable-as-desubjectifiable/subjectified incidental social context for analysis. Consider similarly that an epiphenomenal/incidental occurrence of an-apple-hitting-Newton-on-the-head-while-he-sat-under-a-tree thus inspiring/providing-insight-for his laws of motion ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ for explaining mechanical phenomena. Certainly, the inherently more expansive, universal, decisive, objective and easy basis for critiquing its theorising-conceptualising-operationalising narratives ‘in order to assess the veracity/ontological-pertinence of the structural/paradigmatic universal implications arrived-at of his laws of motion ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ is the possibilities of easily transcendently-enabled-institutionalisation-process-level-of-authenticity/objectification/desubjectification-as-objectification/ontological-faith-notion-or-ontological-fideism/anti-nihilism myriad retrospective and prospective mechanical

phenomena for analysis, and so more critically rather than an obscured/muddled/obfuscated and difficult critiquing grounded on ‘assessing the veracity/ontological-pertinence of the structural/paradigmatic universal implications arrived-at of the laws of motion ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ on the basis of the specific epiphenomenal/incidental occurrence of an-apple-hitting-Newton-on-the-head-while-he-sat-under-a-tree as of the latter relatively poorly objectifiable-as-desubjectifiable/subjectified incidental mechanical occurrence for analysis. In both instances, such an apparently naïve intellectual disposition will point to relative intellectual impertinence at best, and at worst conscious intellectual-bad-faith angling to cynically undermine universal veracity/ontological-pertinence as of the opportunity of implying poorly objectifiable-as-desubjectifiable/subjectified incidental analysis as pre-eminently of universal import. While this logic is immediately obvious with the low temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising-self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction nature of many a natural sciences totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality with their disposition for replication and other experiments and observations analyses as hardly any scientist will go on if it is problematic to objectively ascertain the contextual reality of an-apple-hitting-Newton-on-the-head-while-he-sat-under-a-tree to contend that Newton’s laws of motion ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ is wrong, such an insight about an ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ being wholly construed as of its ‘very own veracity/ontological-pertinence as of any of its objectifiable

contexts' can-and-is often easily flouted and sidetracked with the high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising-self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction that permeates the study of the social as of its blurriness. This equally explains why it is actually better and more critical to construe/conceptualise social knowledge not only on the basis of the inherent veracity/ontological-pertinence of 'supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence' as with the natural sciences but equally factoring in the human social condition as of high temporal-to-intemporal-conjugating-emotional-involvement/subjectification/totalising-self-referencing-syncretising-as-of-perceived-social-stake-contention-or-confliction, and so as of a knowledge notionalisation exercise. In other words metaphysics-of-absence refers to any such projections, as of human imaginative capacity derived from our underlying 'coherence/contiguity-of-superseding-oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness' (so-enabled by underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ontological-primemovers-totalitative-framework projective-totalitative-implications and not any notion of innateness besides existentially inherent human-subpotency) and existence/intrinsic-reality/ontology-as-of-its-mimetic-echoiness-or-existence-in-reverberation-or-existence-potency; thus enabling human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination insights as apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights. We can further get a sense with respect to the implications of what is

meant by ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’, relative to the construal/conceptualisation from the middle of the last century in the biological domain as of its specific uninstitutionalised-threshold then over which the DNA-based genetics ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ was developed which induced an altogether new dramatically different but ontologically-veridical imagery/picture of the nature of biology at that uninstitutionalised-threshold that then became a new specific institutionalisation ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ thereafter amenable to elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity such that the prior non DNA-based construal/conceptualisation (as of ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’) with respect to that now DNA-based genetics specific institutionalised totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality of biology cannot longer be upheld, and this is so in the bigger picture as a contributory conflatedness within the same positivism registry-worldview institutionalisation. (In fact, the institutional-cumulations/institutional-recomposures are the conjoined effect of all specific uninstitutionalised-threshold institutionalisation breakthroughs of ‘reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology’ construed conjointly as of the prospective registry-worldview/dimension institutionalisation.) In this case, however the ‘emotional involvement’ in conflatedness

within the same positivism registry-worldview of appraisal is way low compared to the high 'emotional involvement' in making the same construct as of a contrastive transcending/superseding of a prior registry-worldview/dimension institutionalisation reference-of-thought into an entirely new/prospective registry-worldview/dimension institutionalisation reference-of-thought like between non-positivism and positivism or prospectively between our positivism–procrypticism and deprocrypticism as in this latter instance such a construal/conceptualisation is comprehensively redefining of the human psyche and tend to elicit the highest levels of 'emotional involvement' thus requiring rather a cross-generational adjustment as conflatedness over the prior distractive-alignment-to-reference-of-thought. In conclusion, such a construal/conceptualisation as of deprocrypticism 'reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology' over our positivism–procrypticism 'reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology' of our 'lived social' uninstitutionalised-threshold with respect to psychopathy and social psychopathy and procrypticism in general is a wholly new dramatically different depth of understanding, and from our present inclination of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity within the positivism institutionalisation framework. Beyond the above constrastive individuation-level and registry-worldview/dimension-level of analysis with respect to the uptake of prospective 'reference-of-thought reference-of-thought–categorical-imperatives/axioms/registry-teleology,-for-aposteriorising/intelligising/measuring/logicising-meaningfulness-and-teleology', this social reality of varied social closeness-of-tethering-trajectory/looseness-of-tethering-trajectory to

prelogism-as-of-conviction commitment of reference-of-thought' implying increasing looseness-of-tethering-trajectory as of greater temporality construed as of various shades of 'madeupness/bottomline of reference-of-thought' speaks in the bigger picture of a social reality across all registry-worldviews/dimensions that tends to 'destructure any registry-worldview/dimension institutionalisation meaningfulness-and-teleology' by an 'ontological degradation effect' having to do with human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, and in so doing inducing hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing as uninstitutionalised-threshold. In other words, a prospective registry-worldview/dimension institutionalisation meaningfulness-and-teleology in becoming the new reference-of-thought (over the prior registry-worldview's/dimension's reference-of-thought) with its supposedly grander intemporal-preservation-entropy-or-contiguity—or—ontological-preservation categorical-imperatives/axioms/registry-teleology as of the ontological-faith-notion-or-ontological-fideism driving/behind its construal, turns out to be a prospective institutionalisation 'reset framework for human temporal-to-intemporal mental-dispositions' respectively in looseness-of-tethering-trajectory and closeness-of-tethering-trajectory to prelogism-as-of-conviction commitment of the new reference-of-thought'; as facing/dealing anew with human temporal-to-intemporal mental-dispositions but this time around doing the same thing as occurred with the prior institutionalisation reference-of-thought categorical-imperatives/axioms/registry-teleology that was transcended/superseded to deliver the new registry-worldview/dimension, but now on the new registry-worldview/dimension institutionalisation reference-of-thought categorical-imperatives/axioms/registry-teleology (with the difference as of a 'relatively lower sensibility' arising just because of the new registry-worldview/dimension prospective relative-ontological-completeness-of-reference-of-thought limiting/constraining on the

possibilities of vices-and-impediments); implying an underlying ontological-contiguity of the reality of human temporal-to-intemporal mental-dispositions across all the registry-worldviews/dimensions. Thus while ‘ontologically superseding the prior beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought and prior ‘lack of constraining social universal-transparency this does not imply apart from such institutionalisation-as-second-naturing a change of human temporal-to-intemporal nature, given that this nature will further manifest at the prospective registry-worldview uninstitutionalised-threshold as its beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought and ‘lack of constraining social universal-transparency inducing anew the new reference-of-thought owns hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing. This social dynamism (dynamic-cumulative-aftereffect) as of the new registry-worldview/dimension uninstitutionalised-threshold can be construed ontologically as arising out of a further temporal/shortness-of-register-of-meaningfulness-and-teleology distortedness of the new totalising/circumscribing/delineating reference-of-thought-devolving-as-of-instantiative-context in the social extended-informality-(susceptible-to-effecting-parsimony-as-of-shoddiness-and-incompleteness-to-meaningfulness-and-teleology) ultimately extending to the extended-informality-(susceptible-to-effecting-parsimony-as-of-shoddiness-and-incompleteness-to-meaningfulness-and-teleology) spheres of formal constructs distorting formal construal of meaningfulness-and-teleology, and so to a point of equilibrium of the new registry-worldview/dimension between its institutionalised meaningfulness-and-teleology and its uninstitutionalised-threshold’s hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing. The operant and technical conceptualisation basis of this phenomenon has to do with the inherent nature of pure-ontology conflatedness for ontologically-veridical meaningfulness-and-teleology and ‘human temporal-to-intemporal

condition’ of reception/distortion across the successive registry-worldviews/dimensions involving denaturing where there is ‘lack of constraining social universal-transparency. The establishment or rather coming into being of a prospective registry-worldview/dimension institutionalisation reference-of-thought can thus be construed as of pure-ontology conflatedness for ontologically-veridical meaningfulness-and-teleology, and so because it is both the mechanical-knowledge as the constraining technical outcome and the non-constraining driving underlying intemporal-disposition ontological-faith-notion-or-ontological-fideism, with both constituting the organic-knowledge. This transcendental knowledge construct establishes a dominant social framework of knowledge grounded on its inherent intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency ontological-primemovers-totalitative-framework (as it supersedes the prior beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought meaningfulness-and-teleology and the prior ‘lack of constraining social universal-transparency), and then imbues the prospective institutionalisation with social validity and social structure of meaningfulness-and-teleology as of deferential-formalisation-transference. This is the social-setup of the prospective institutionalisation reference-of-thought as of pure-ontology conflatedness for prospective relative-ontological-completeness-of-reference-of-thought meaningfulness-and-teleology. But then in due course and at the uninstitutionalised-threshold of this prospective institutionalisation reference-of-thought, its organic-knowledge (as driven by intemporal-disposition ontological-faith-notion-or-ontological-fideism for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation) wanes as the reality of human temporal-to-intemporal nature sets in as it is related to at the uninstitutionalised-threshold by the registry-worldview’s/dimension’s least common denominator as wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives of the

registry-worldview's/dimension's institutionalisation categorical-
 imperatives/axioms/registry-teleology for social-functioning-and-accordance—as-of-social-
 stake-contention-or-confliction (in a social dynamics at the given uninstitutionalised-
 threshold that is a drawback-to/undermines prospective-knowledge-and-institutional
 deferential-formalisation-transference as of prospective relative-ontological-completeness-of-
 reference-of-thought intrinsic-reality/ontological-veridicality transcendental-
 enabling/existence-potency ontological-primemovers-totalitative-framework, and rather
 endeavours for sovereign parity at this uninstitutionalised-threshold as of social-aggregation-
 enabling), as of its bare constraining mechanical-knowledge since categorical-
 imperatives/axioms/registry-teleology are only 'mechanistically' constraining, lacking the
 organic-spirit or ontological-faith-notion-or-ontological-fideism. Anecdotally, we know as of
 our uninstitutionalised-threshold that in effect the technical constraints of the law tend to
 supersede the spirit of the law as it is naïve to think that a 'sense of rightness' is all that
 matters before the law, and this extends to human meaningful and organisational principles in
 general. Such that temporal-dispositions fulfilment of such 'mechanistic' effectiveness as
 mechanical-knowledge 'without the non-constraining and abstract organic mental-disposition
 as of ontological-faith-notion-or-ontological-fideism of the emanant-kind that-had-driven the
 reference-of-thought construal in the first place' distort in due course organic
 meaningfulness-and-teleology, as of temporal mental-dispositions of shortness-of-register-of-
 meaningfulness-and-teleology. Thus such implied prospective reference-of-thought, social
 organisations and institutions as organic meaningfulness-and-teleology then tend to develop
 'subcultural reorientations' that are 'mildly alien' and 'on-occasional gravely alien' to the
 (especially in the extended-informalities of the social and institutions) original organic-
 knowledge conceptualisation as of the implied prospective reference-of-thought social and
 institutions meaningfulness-and-teleology. Thus for an ontological-veridicality/intrinsic-

reality transcendental-enabling/existence-potency ontological-primemovers-totalitative-
 framework construal for the deprocrypticism prospective institutionalisation, it is critical to
 grasp both the inherent ontological-veracity of the meaningfulness-and-teleology behind the
 construal of deprocrypticism and the ‘reality of a human condition of temporal-dispositions
 distractive-alignment-to-reference-of-thought, and so as of notional-
 conflatedness/constitutedness-to-conflatedness as ontological-aesthetic-tracing in articulating
 a ⟨protensive-consciousness referentialism-induced⟩-reference-of-thought—devolving-
 teleological-structure-of-meaningfulness, that is preemptive of a least-common-denominator-
 of-social-functioning-and-accordance-effecting to bare mechanical-knowledge as of wooden-
 language—of-temporal–mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-
 dementing-narratives of the registry-worldview’s/dimension’s institutionalisation categorical-
 imperatives/axioms/registry-teleology inducing hollow-staging-and-performance-or-
 apriorising/intelligibilitysetup-caricaturing as of uninstitutionalised-threshold. This is
 achieved by a perpetuating metaphysics-of-absence that factors in human temporal-to-
 intemporal-dispositions nature. Insightfully, a storied-construct technique apprehending the
 temporal-to-intemporal-dispositions respective mental-dispositions for ‘looseness-of-
 tethering-trajectory and closeness-of-tethering-trajectory to prelogism-as-of-conviction
 commitment of reference-of-thought’ can be construed, wherein the instigating temporal
 postlogism-as-of-non-conviction ‘looseness-of-tethering-trajectory to prelogism-as-of-
 conviction commitment of reference-of-thought’ (as postlogism-as-of-non-conviction
 temporal ‘madeupness/bottomline of reference-of-thought’) as of the childhood psychopathy
 (where the looseness-of-tethering-trajectory mental defect is of social universal-transparency
 socially like in a ‘dereifying act’ of spilling water on a chair and accusing another, pointing to
 a mental-shortcut as faulty-mentation-procedure-deception-or-urge in relating to social-stake-
 contention-or-confliction) and adult psychopath (where the looseness-of-tethering-trajectory

mental defect is opaque due to its maturation/indirectness/spatialisation/credulity/craftiness to attain social-functioning-and-accordance—as-of-social-stake-contention-or-confliction) can be elucidated. The underlying process as of temporal postlogism-as-of-non-conviction/psychopathic looseness-of-tethering-trajectory mental defect beginning at childhood involves ‘its circular non-consequential vague trialing of looseness-of-tethering-trajectory to prelogism-as-of-conviction commitment of reference-of-thought’ as of its temporal postlogism ‘madeupness/bottomline of reference-of-thought’ with respect to its postlogical-backtracking—iterative-looping-‘set-of-dereifying-hollow-narratives-and-acts’, in full conscious-awareness-teleology, which when perceived as uncontested by the psychopath (likely to arise where the concerned party lacks insight of its underlying faulty-mentation-procedure-deception and as it seem socially-function) will ultimately lead to its slanting-deception (or deception-of-successively-shifting-or-non-cohering-narratives-and-acts or deception-by-concurrently-false-presupposing/false-presuming/false-premising-of-narratives or deception-by-concurrently-false-assumptive-dementing-of-narratives) inducing its hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing and its consequent derivation as conjugated-postlogism or social psychopathy hollow-staging-and-performance-or-apriorising/intelligibilitysetup-caricaturing. This process is mirrored with the various conjugated-postlogisms conscious or unconscious aligning to the psychopathic/postlogical postlogism-as-of-non-conviction vague-rhyming-or-copied-mimicry-or-formulaic-projection-or-projection-of-form-or-hollow-and-vague-vocalisation-or-subknowledging. Thus effectively such a postlogism-as-of-non-conviction process is rather very simplistic, and the deception arises actually from the prelogism-as-of-conviction mental-states to be by mental-reflex in prelogism-as-of-conviction thus inducing wrongful teleological elevation of the postlogism/psychopathic meaningfulness-and-teleology, which wouldn’t occur at childhood psychopathy. Finally, as of dynamic-cumulative-aftereffect and across all registry-

worldviews/dimensions, the ‘distractive-alignment-to-reference-of-thought of any registry-worldview/dimension institutionalisation meaningfulness-and-teleology as of its organic-knowledge’ can be construed and analysed across 3 lines; - the initiating temporal postlogism distractive-alignment-to-reference-of-thought of meaningfulness-and-teleology, - the generalised temporal-dispositions to integrate such ontologically-destructured meaningfulness-and-teleology as of the registry-worldview’s/dimension’s ontological-incompleteness-of-reference-of-thought explaining its beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought and ‘lack of constraining social universal-transparency, - and the prospective institutionalisation construing/conceptualising the ontological-veridicality and analysis of such registry-worldview/dimension institutionalisation meaningfulness-and-teleology distractive-alignment-to-reference-of-thought dynamics (as of the previous two) as social ontology/aetiologisation/ontological-escalation, and equally serves as an ideal storied-construct of intuitive elucidation framework. The implication of such ‘temporal distractive-alignment-to-reference-of-thought of institutionalisation meaningfulness-and-teleology’ across all registry-worldviews/dimensions is that meaningfulness-and-teleology as of prospective registry-worldview/dimension institutionalisation involves ‘its apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights enabling utter psychical-and-institutional conflatedness of meaningfulness-and-teleology exactly by transcending/superseding the apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights behind the prior registry-worldview/dimension uninstitutionalised-threshold/uninstitutionalised-threshold’. As critically the naivety of averaging-of-thought within a same registry-worldview/dimension uninstitutionalised-threshold/uninstitutionalised-threshold reference-of-thought is that its defect of

apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights arising as perversion-of-reference-of-thought due to its prior relative-ontological-incompleteness-of-reference-of-thought (as failing rulemaking-over-non-rules in recurrent-utter-uninstitutionalisation or failing universalisation-directed-rulemaking-over-non-rules in ununiversalisation or failing positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules in non-positivism/medievalism or failing pre-empting-disjointedness-as-of-reference-of-thought,-as-if-of-positivising/rational-empiricism-based-universalisation-directed-rulemaking-over-non-rules in procrypticism, and thus requiring respectively transcending/superseding to base-institutionalisation, universalisation, positivism and deprocrypticism), is that meaningfulness-and-teleology can then still be upheld on the basis of the same uninstitutionalised-threshold/uninstitutionalised apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights rather than the more ontologically-veridical implication of prospective registry-worldview/dimension institutionalisation apriorising/intelligibilitysetup/measuringinstrument/axiomatising-for-operant-or-incidenting-predicative-insights enabling utter psychical-and-institutional conflatedness. Explicating thus the structural/paradigmatic implication of the non-positivistic or our positivism–procrypticism perversion-of-reference-of-thought construed respectively as of aetiologisation/ontological-escalation as an altogether positivism or deprocrypticism utter psychical-and-institutional conflatedness of meaningfulness-and-teleology, and not wrongfully asiding/glossing-over/ignoring with the idea that meaningfulness-and-teleology is still to be construed as of non-positivism/medievalism or positivism–procrypticism; as the grander human living as of the species ‘existential tale’ is in construing that the respective prospective institutionalisation apriorising/intelligibilitysetup/measuringinstrument/axiomatisings-for-operant-or-

incidenting-predicative-insights when availed by contemplation as based-institutionalisation, universalisation, positivism and deprocrypticism implies transcending/superseding the respective uninstitutionalised-threshold apriorising/intelligibilitysetup/measuringinstrument/axiomatisings-for-operant-or-incidenting-predicative-insights of recurrent-utter-uninstitutionalisation, ununiversalisation, non-positivism/medievalism and procrypticism, enabling the cumulative recomposuring of ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ as of intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm and not temporal extirpatory paradigm parasitising/co-opting to the species existential-tale.] The statements articulated priorly (before the square brackets texts) speak of the reality of ‘human temporal uninstitutionalised-threshold mental-disposition’ even in our own positivism reference-of-thought registry-worldview. It is fair to say the statement made before, “Z ... will look down on B, C, D, E and F mental-dispositions perversion-and-derived-perversion-of-reference-of-thought as allowing for the endemisation/enculturation of the denaturing of additionality and the implications thereof of subsequent denaturing in circularity/recurrence/repetition/repeatability” is circumstantially relevant even in our positivistic registry-worldview wherein ‘lack of constraining social universal-transparency induces a ‘human temporal uninstitutionalised-threshold mental-disposition’ temporality or shortness-of-register-of-meaningfulness-and-teleology drive. The Milgram experiments, a demonstration par excellence of the human condition at uninstitutionalised-threshold with respect to perceived-social-stake-contention-or-confliction constraints as of human limited-mentation-capacity-(as of relative constitutedness towards relative conflation), truly reflect

the inherent nature of 'human temporal uninstitutionalised-threshold mental-disposition'; and the deprocrypticism-driven understanding of which should rather be an avenue for a pivoting/decentering psychologism with respect to positivism–procrypticism registry-worldview/dimensions vices-and-impediments (just as with all previous transcendences of 'intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications', rather than a naïve metaphysics-of-presence mental complex that only serves 'flawed egos' and is of no ontologically-veridical import). The point of this distinction made between the nature of 'human institutionalisation mental-disposition' registry-worldview's/dimension's reference-of-thought and 'human temporal uninstitutionalised-threshold mental-disposition' registry-worldview's/dimension's reference-of-thought, as of prospective ontological-normalcy/post-convergence is to put into perspective the idea that the present and as of our present social construction and individuations as being relatively more exceptional than the solipsistic nature of humans in prior epochs is false, with such wrongly implied exception rather being a confusion between 'cumulated institutionalisation' (which we carry by being second-natured at the backend of the institutionalisation process as of human limited-mentation-capacity-deepening–in-recomposuring,-as-of-totalising–renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination leading to the positivistic registry-worldview/dimension) and that our inherent solipsistic sense of intemporality (which overall is no more greater than that of humans of previous successive registry-worldviews/dimensions); and further that we are just of the same 'human temporal uninstitutionalised-threshold mental-disposition' as all humans past when it comes to making solipsistic choices at uninstitutionalised-threshold, which choices when of intemporality-drive solipsistic-choices are maximalising-recomposuring-for-relative-ontological-

completeness/transvaluating leading to prospective institutionalisations. This notion of human mental-disposition and by extension meaningfulness-and-teleology as comprising, rather as a more complete and grander conceptualisation, an institutionalisation-facet and an uninstitutionalised-threshold-facet, so-construed by metaphysics-of-absence, carries institutionalisation and uninstitutionalised-threshold implications with respect to the determination of ontologically-veridical meaningfulness-and-teleology as of pertinent scientific conceptualisation (scientific approach, methodology and methods) as rather construed most critically by its relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency. Such metaphysics-of-absence considerations are critically relevant in fully appreciating the articulation herein by this author of such notions (that rather speak of uninstitutionalised-threshold implications with respect to ‘a social pretence of scientific conceptualising as of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency’), like deferential-formalisation-transference, ordered-construct, percolation-channelling and transversality/logical-incongruence. Insightfully, it is the case that our present-day positivistic institutionalisation second-natured scientific practice outcome of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency is grounded on institutionally-determined peerage/collegiality as of positivistic institutionalisation deferential-formalisation-transference, so supposedly recognised within the social collective or ‘social framework of intersolipsistic deambulation’. But then we grasp that at the disjuncture of positivistic meaningfulness-and-teleology (as ‘moulting’ first-nature/philosophical intemporal conceptualisation of what developed to become today our scientific practice institutionalisation as of its relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency) from the non-positivistic/medieval registry-worldview/dimension, we can definitely fathom that the enlightenment actors like the Descartes’s, Galileos, Diderots, etc. of those transitioning times

would have certainly been circumspect with regards to any such notion of preceding social approval (for their scientific meaningfulness-and-teleology as of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency), given the social non-positivistic/medieval uninstitutionalised-threshold non-scientific disposition, as beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought. This points to an altogether different social relation with the notion of scientific practice construed as of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency, by such intemporal-solipsism/ontological-faith-notion-or-ontological-fideism mental-disposition that conceive of positivistic meaningfulness-and-teleology in the uninstitutionalised-threshold social-setup of non-positivism/medievalism where they were institutionally-outliers. As exemplarily implied with the Encyclopédistes led by Diderot, such construal is grounded on a more basic and potent construct of ontological-primemovers-totalitative-framework and actually reveals in many ways the reality of a natural Foucauldian power relations which it turns out is actually in the medium to long term a social-granting-of-power-exercise with respect to the virtue of true knowledge, as of the social percolation-channelling possibilities enabling promising ideas, however institutionally-outlier or institutionally-central, to take hold in society depending on their relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency as of veracity/ontological-pertinence; without heed given to mere centrality as veracity/ontological-pertinence but decentering if the centrality is not ontologically pertinent, and rather further second-naturing prospective institutionalisation of scientific practice as of its relative intrinsic-reality/ontological-veridicality transcendence-enabling; very much highlighting the prospective institutionalisation pertinence of such notions articulated by this author like deferential-formalisation-transference, ordered-construct, percolation-channelling and transversality/logical-incongruence. In another respect, with regards to scientific

meaningfulness-and-teleology and as it informs the social-construct of knowledge and deferential-formalisation-transference (as power relations with respect to knowledge as socially empowering), it is critical to grasp that it is relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency that induces social deference to formal knowledge constructs and other formal constructs, on the basis that that will 'produce the greater human Good', as at the prior as uninstitutionalised-threshold when such domains lacked or were deficient with respect to formal knowledge constructs or other formal constructs like officialdoms, it was rather a question of 'relatively free-for-all opinionatedness and imaginary knowledge constructs' with relatively impulsive and simplistic contending mental-dispositions on the basis of the determining or non-determining need for 'social consensus as of social-aggregation-enabling by human temporal averaging-of-thought mental-dispositions and projections' and not necessarily emphasising 'social consensus as of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency by human intemporal mental-dispositions and projections'; explaining why higher and higher registry-worldviews/dimensions as of their prospective relative-ontological-completeness-of-reference-of-thought increasingly defer domains of meaningfulness-and-teleology more and more to formal constructs while increasingly reducing the sphere of the extended-informality-(susceptible-to-effecting-parsimony-as-of-shoddiness-and-incompleteness-to-meaningfulness-and-teleology) as of its free-for-all nature. The bigger point being that even in our positivism-procrypticism registry-worldview/dimension with relatively strong 'social consensus as of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency by human intemporal mental-dispositions and projections' in many domains; however, with regards to domains (and so, more than just about broad subject matter areas and broad spheres of other formal constructs including officialdoms, but rather and critically the specifically relatively

undeveloped knowledge spheres of such broad subject matters and broad spheres of other formal constructs including officialdoms, and as specific in this instance as with regards to our understanding of psychopathy) that are spurious and blurry, these are often not socially related to in profound knowledge/scientific meaningfulness-and-teleology terms on the basis of ‘social consensus as of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency by human intemporal mental-dispositions and projections’ profound treatment, and are rather prone to ‘relatively free-for-all opinionatedness and imaginary knowledge constructs’ in rather relatively impulsive and simplistic contending mental-dispositions on the basis of the determining or non-determining need for ‘social consensus as of social-aggregation-enabling by human temporal averaging-of-thought mental-dispositions and projections’ and not necessarily emphasising ‘social consensus as of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency by human intemporal mental-dispositions and projections’. This contrasts with those domains that are more pertinently and decisively intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency which quickly obtain deferential-formalisation-transference (deferential as not opinionating randomly with respect to imagining the legal implications of one another’s actions but deferring one’s understanding to the formal legal domain, appreciating in deference scientific principles and not opinionating about what we imagine about the stars but deferring to the astronomer and physicist, appreciating statistics and human geography methods and not imagining how censuses and polls should be done but deferring to the demographer and statistician, etc.; as providing a grander depth of knowledge by deferential-formalisation-transference pointing out that ‘human intemporal mental-dispositions and projections’ are the basis for ‘inventing’ human knowledge and corresponding virtue (as of aetiologisation/ontological-escalation), and not ‘human temporal averaging-of-thought mental-dispositions and projections’. Hence the construal of knowledge

construct in such domains that are spurious and blurry as with respect to postlogism/psychopathy social implications should as of precedence be about articulating the illuminating insight that ultimately allows for the attainment of their own deferential-formalisation-transference based on ‘social consensus as of relative intrinsic-reality/ontological-veridicality transcendental-enabling/existence-potency by human intemporal mental-dispositions and projections’, and undermining a social relations with regards to knowledge and virtue that is based on ‘social consensus as of social-aggregation-enabling by human temporal averaging-of-thought mental-dispositions and projections’, and so in order to release the inherent virtue imbued in true knowledge. The afore elucidations are mainly to point out that it is naïve to construe the analysis of postlogism phenomenon including psychopathy on the assumption of an overall ‘human institutionalisation mental-disposition’ of the social as of the present as metaphysics-of-presence instead of assuming a ‘human temporal uninstitutionalised-threshold mental-disposition’ of the social by prospective metaphysics-of-absence, since the construal of our postlogism as of psychopathy and social psychopathy is necessarily, from ontological-normalcy/post-convergence perspective, reflected from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism registry-worldview’s/dimension’s reference-of-thought. Insightfully, by metaphysics-of-absence we can appreciate this logic with respect to notions-and-accusations-of-sorcery as intuitively we’ll be hard-pressed to recognise that the non-positivism/medievalism social-construct mental-disposition is one of human institutionalisation of an intemporality-drive whereas in fact it is one of human uninstitutionalised-threshold of temporalities-drives such that it is endemised/enculturated in various temporality shades (ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-temporal-endemisation) as of ontological-normalcy/post-convergence from a prospective

positivism registry-worldview's/dimension's reference-of-thought. The same applies with psychopathy in our positivism–procrpticism, as the averaging-of-thought in such a context should not and cannot be the trusted reference of intellectual contemplation as of ontological-normalcy/post-convergence in the elucidation of psychopathy and social psychopathy (just as it is not a trusted reference with regards with priorly established formal knowledge constructs whether subject-matter disciplines or formalising constructs including the law, officialdom, etc.), as it is effectively poorly ontological or non-ontological in the sense that it tends to be of an extirpatory/temporal paradigm and not intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-for-relative-ontological-completeness/transvaluating paradigm as when it fails to appreciate the virtuous implications of aetiologisation/ontological-escalation (metaphorically-as-of-a-million-and-one-instances-and-locales) as providing the possibility for prospective institutionalisation as structurally/paradigmatically superseding the positivism–procrpticism registry-worldview/dimension vices-and-impediments! It is thus important to grasp that the notion of virtue as of our temporal-to-intemporal mental-dispositions is more than just about the notion of being at the backend of the institutionalisation-process of institutional-cumulations/institutional-recomposures, but rather the intemporal mental-disposition (intemporal-disposition) to strive as maximalising-recomposuring-for-relative-ontological-completeness/transvaluating for base-institutionalisation to supersede recurrent-utter-uninstitutionalisation equates that striving for universalisation to supersede base-institutionalisation–ununiversalisation equates that striving for positivism to supersede universalisation–non-positivism/medievalism equates that striving for deprocrpticism to supersede positivism–procrpticism; as the highest human virtue of ontological import. Since the inducing of institutionalisation-as-a-second-natured-construct across all institutional-cumulations/institutional-recomposures or registry-worldviews/dimensions inevitably implies

a dichotomy of reference-of-thought modalities of the same perpetual temporalities-drives and intemporality-drive (given human-aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor), respectively as ‘least-and-derived-temporal-operating-modalities-of-the-reference-of-thought-as-of-incrementalism-in-relative-ontological-incompleteness-inducing-the-uninstitutionalised-threshold’ and ‘maximal-as-intemporal-operating-modality-of-reference-of-thought-as-of-maxi. Virtue is essentially about the intemporality-drive as maximalising-recomposuring-for-relative-ontological-completeness/transvaluating for intemporal-preservation-entropy-or-contiguity—or—ontological-preservation as of ontological-normalcy/post-convergence which always factor in human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) by a re-equilibrating metaphysics-of-absence/postdication with categorical-imperatives/axioms/registry-teleology subservient to that purpose, and not about the temporalities-drives as ‘mere adherence as intradimensionally deterministic by form’ to categorical-imperatives/axioms/registry-teleology as these are failing/not-upholding-as-of-axiomatic-construct intemporal-preservation-entropy-or-contiguity—or—ontological-preservation as of ontological-normalcy/post-convergence which always factor in human limited-mentation-capacity-(as of relative constitutedness towards relative conflation) by a re-equilibrating metaphysics-of-absence/postdication rather than upholding it, their very raison d’être. Interestingly, supposed by some circumstance an individual of a positivistic insight found themselves in a non-positivistic community, whether base-institutionalisation/animistic or medieval, facing a disease attributed to a negative spirit or so, but the positivistic individual knows it is a case of an infection with the idea that a certain root or leaf in the nearby forest can be used as cure, however, the community rather believe that the forest is an evil forest and this will just make things worse for them overall.

Obviously, as of its positivism prospective relative-ontological-completeness-of-reference-of-thought, by ‘intemporal-prioritisation-of-reference-of-thought’-as-conflatedness its mental-disposition will be to unleash its maximalising-recomposuring-for-relative-ontological-completeness/transvaluating intemporality-drive to supersede the non-positivistic categorical-imperatives/axioms/registry-teleology that the evil forest brings bad omen substituting it with the positivistic one that the root or leaf in the forest brings about cure by walking over the supposed ‘evil forest’, and more than just the circumstantial situation will equally appreciate that positivistic thinking over animistic or medieval thinking will go a long way in improving the community’s existence. It is interesting to grasp the difference in the dereifying and reifying construal of existential-contextualising-contiguity here between the non-positivists mindsets and the positivist mindset as of underlying relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-thought and respectively as of their divergent non-positivists dereification perspective and positivist reification perspective; as seeing the positivist stranger walking into the supposed ‘evil forest’ will be the confirmation for members of the non-positivist social-setup of its viciousness-or-supernaturalness-or-evil-disposition. It can be noted here that seeing the positivist walking into the evil forest will be branded as proof/evidence by the non-positivists of its viciousness-or-supernaturalness-or-evil-disposition going by their supernatural conception of existential-contextualising-contiguity-in-dereification as of their prior relative-ontological-incompleteness-of-reference-of-thought, contrasted with the positivist naturalist conception of existential-contextualising-contiguity-in-reification as-seeking-a-cure as of its prospective relative-ontological-completeness-of-reference-of-thought; and possibly ensuing into a country of the blind scenario. This insight equally highlights the evasiveness of ‘what is meant by proof/evidence’ even in our positivism–procrysticism registry-worldview/dimension as of its prior relative-ontological-incompleteness-of-reference-of-

thought, as the notion of proof/evidence is more critically tied down to existential-contextualising-contiguity-reification as of singularisation/epistemic-immanence/veridical-epistemic-determinism; just as postmodern-thought by its notional-discontiguity/epistemic-discontiguity decentering of ‘modern-take thinking’ have revealed the underlying bias of the latter meaningfulness-and-teleology as reflected particularly more vividly in gender, race and class. Interestingly, this paradox is very much typical of all transcendental situations and explains the universal ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’ contorted gesturing associated with transcendental thresholds. As we can garner in this case that the positivist constrained to existence rather in such a country-of-the-blind scenario cannot simply be deferential to living and Being as of the non-positivist social-setup value reference while very much aware of the structural/paradigmatic virtue implications as of prospective positivism prospective relative-ontological-completeness-of-reference-of-thought, and thus will ‘contortively’ hold on to the reasoning-through/messianic-reasoning possibility of positivistic value references over non-positivistic value reference, even as the latter is always in totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag; with the implication that such ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen/asceticism as of reasoning-through/messianic-reasoning contortion is rather in transversality/logical-incongruence/mutual-unintelligibility/disambiguated-binarity-of-reference-of-thought-apriorising/intelligibilitysetup/measuringinstrument/axiomatising-as-of-thinking-and-dementing of the prior relative-ontological-incompleteness-of-reference-of-thought and the contorted prospective relative-ontological-completeness-of-reference-of-thought from their respective existentialism intelligibility stances. This contortion as of prospective relative-ontological-completeness-of-reference-of-thought projection is what marks ‘transcendental acts of ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-

acumen/asceticism as of reasoning-through/messianic-reasoning' whether of philosophical implications as with say Socrates or philo-religious implications as of nonextirpatory-existential-preempting-of-existential-unthought. The contortion arises because inherently the state of prior relative-ontological-incompleteness-of-reference-of-thought ever always fails to accompany prospective state of prospective relative-ontological-completeness-of-reference-of-thought but for the induced cross-generational transcendental metaphoricity possibility, and the contortion is more of a token as of the metaphoricity possibility for prospective transcendence and without which token contortion there is 'no existential reference for such transcendence', as a gesturing of metaphoricity that is 'beyond the prior relative-ontological-incompleteness-of-reference-of-thought full meaningfulness-and-teleology implications contemplation'. The contortion implies that there is 'nothing any more important than upholding the metaphoricity possibility for prospective relative-ontological-completeness-of-reference-of-thought'; as transcendental instigation can't be of ordinary inclination at one moment and at another moment of transcendental inclination, as this will only 'teleologically-degrade and devalue' the implied prospective relative-ontological-completeness-of-reference-of-thought transcendence into the ordinariness of prior relative-ontological-incompleteness-of-reference-of-thought thus psychoanalytically/exegetically/symbiologically existentially undercutting the token contortion existential reference for prospective relative-ontological-completeness-of-reference-of-thought transcendence. Thus 'ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning' only evolves into such asceticism as of contortive metaphoricity gesturing for prospective relative-ontological-completeness-of-reference-of-thought as of nonextirpatory-existential-preempting-of-existential-unthought; and has historically acted as a sort of internal cultural diffusion disposition. Such a prospective ontological conception of asceticism rather as of reasoning-through/messianic-reasoning asceticism, different from asceticism as

reasoning-from-results/afterthought or institutional asceticism, should basically be understood as of the general notion that all human meaningfulness-and-teleology are naturally ‘correlate-aesthetic-constructs as of the various mathesis/motif/throwness-disposition in successive prior relative-ontological-incompleteness-towards-ontological-completeness-of-deprocrypticism’ as of their specific reflection of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality (just as implied with the case highlighted herein of the ‘ill-health totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’); and are so derived as of ontological-faith-notion-or-ontological-fideism ‘seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’ and construed as of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism; with the assertion by this author that there is no accidental human meaningfulness-and-teleology as all prior meaningfulness-and-teleology imply futural deferred traces of their prospectively more ontologically-complete constructs as of grander ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’. Critically for futural Being-development/ontological-framework-expansion as of prospective deprocrypticism such ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’ is all about undermining a nihilistic closure/closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications mental-disposition to prospective opened-construct-of-meaningfulness-and-teleology. The fundamental ontological dearth of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as of dissingularisation/epistemic-nonimmanence/flawed-epistemic-

determinism, is that it falsely implies ‘an imaginary wholeness/nested-congruence’ of totalising/circumscribing/delineating meaningfulness-and-teleology with ‘no-tracing-and-as-it-neuterises’-the-dynamics-of-temporal-to-intemporal-ontological-performances thus failing to reflect existential wholeness/nested-congruence of meaningfulness-and-teleology and undermining existential-contextualising-contiguity knowledge-reification’ at a given reference-of-thought structural/paradigmatic nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) threshold as of its prior relative-ontological-incompleteness construed as uninstitutionalised-threshold, while falsely implying the given reference-of-thought mere identitive conceptualisations/‘candid existential expressiveness’ are existentially veridical; and it is important to grasp that every registry-worldview/dimension is of a reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising that by its mathesis/motif/throwness-disposition falsely implies that its meaningfulness-and-teleology is necessarily as of ‘identitive totalising/circumscribing/delineating dialectical-thinking’ even at its uninstitutionalised-threshold where it is effectively dementing as its mathesis/motif/throwness-disposition fails to induce an ontologically-veridical reifying trace/ontological-aesthetic-tracing of existential-contextualising-contiguity. We can imagine as of a non-positivistic social-setup reference-of-thought identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism totalising/circumscribing/delineating meaningfulness-and-teleology, the ‘candid existential expressiveness’ that ‘integrates superstition as-thinking’ as of its uninstitutionalised-threshold, much like as from futural Being-development/ontological-framework-expansion as of prospective deprocrypticism perspective we can imagine the ‘candid existential expressiveness’ in our positivism–procrypticism that ‘integrates procrypticism/disjointedness-as-of-reference-of-thought as-thinking’ as of its

uninstitutionalised-threshold; and in both cases the ‘trace/ontological-aesthetic-tracing of ontological wholeness/nested-congruence’ as of existential-contextualising-contiguity knowledge-reification breaks down at the uninstitutionalised-threshold thus assuming a nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism representation of the breakdown and going on in both cases to ‘overlook effectively as-if-thinking respectively’ the ontologically-veridical reality of ‘dementing superstition’ and ‘dementing procrypticism/disjointedness-as-of-reference-of-thought’. It is singularisation/epistemic-immanence/veridical-epistemic-determinism in pre-empting any such structural/paradigmatic threshold construed as uninstitutionalised-threshold as implied by notional-deprocrypticism that reflects ‘ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism’ as factoring in prior registry-worldviews/dimensions reference-of-thought prior relative-ontological-incompleteness as of the ontologically-flawed threshold of its mathesis/motif/thrownness-disposition from the perspective of prospective registry-worldview/dimension reference-of-thought prospective relative-ontological-completeness to construe ontological-aesthetic-tracing as of notionally-full existential-contextualising-contiguity knowledge-reification. In other words, existential-contextualising-contiguity as reflecting existence as the absolute a priori isn’t halted at any given registry-worldview’s/dimension’s structural/paradigmatic limit/threshold-construed-as-mathesis/motif/thrownness-disposition for ontological conception, but rather reifies as of singularisation/epistemic-immanence/veridical-epistemic-determinism as implied with ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism as of notional-deprocrypticism, with such singularisation/epistemic-immanence/veridical-epistemic-determinism reflecting an

ontological-aesthetic-tracing of all such structural/paradigmatic limits/thresholds-construed-as-mathesis/motif/throwness-disposition of reference-of-thought ontological conception. In effect, such a trace/ontological-aesthetic-tracing can be construed as a ‘creative metaphoricity tracing’ of human temporal-to-intemporal ontological-performances of human meaningfulness-and-teleology as of the dynamics of ‘human overall Being-personality-growth and the implications for its living-personality-growth and institutional-personality-growth’ implied as of notional-deprocrypticism ontologically-uncompromised—referentialism, as a fundamental hermeneutic psychological science which as of singularisation/epistemic-immanence/veridical-epistemic-determinism articulates-and-rearticulates such tracing/ontological-aesthetic-tracing as of comprehensive/holistic/nested-congruence conflatedness from a most profound existential-contextualising-contiguity knowledge-reification depth of notional-deprocrypticism protracted-consciousness. Such a hermeneutic psychology is necessarily cognisant and departs from a construal of the fundamental instigation of human knowledge and emancipation as of ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’, as establishing in the very first place the prospective relative-ontological-completeness mathesis/motif/throwness-disposition for reference-of-thought apriorising/intelligibilitysetup, and so prior to assumed meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising. Hence such a notion cannot be construed on the basis of ordinarily assumed meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising which doesn’t put into question its apriorising/intelligibilitysetup/measuringinstrument/axiomatising as it is rather submerged/drowned into it by mental-disposition reflex; but rather as implied as of reasoning-through/messianic-reasoning, such a hermeneutic psychology is more about instigating a parrhesiastic psychoanalytic-unshackling soul-searching acumen. In this regard,

it is akin for instance to budding positivism reasoning-through/messianic reasoning implied within a non-positivism/medievalism social-setup, in the sense that that budding positivism reasoning-through/messianic reasoning then ‘is-not reasoning as-of-yet’ as reasoning is then as of the non-positivism/medievalism social-setup apriorising/intelligibilitysetup/measuringinstrument/axiomatising ‘as non-positivism reasoning susceptible to superstition and scholasticism-like pedantry construed as universalisation-directed-rulemaking-over-non-rules but not yet as of rational-empiricism’; with such budding positivism rather a metaphoricity instigation of ontological-faith-notion-or-ontological-fideism parrhesiastic soul-searching for the psychoanalytic-unshackling of the human subject as of a structural/paradigmatic Lacanian displacement/decentering of the human subject from its prior ‘totality/reference-of-thought/totalising–self-referencing-syncretising/circularity conception of meaningfulness-and-teleology as of non-positivism/medievalism’ to a prospective ‘totality/reference-of-thought/totalising–self-referencing-syncretising/circularity conception of meaningfulness-and-teleology as of positivism/rational-empiricism’, that is the fundamental structural/paradigmatic seeding-resolution of the ‘non-positivism/medievalism human subject superegoic vices-and-impediments’. This has the very same metaphoricity implications across the entire human institutionalisation process, as such a hermeneutic psychology supersedes our ordinary meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising which doesn’t put into question our positivism–procrysticism/disjointedness-as-of-reference-of-thought mathesis/motif/throwness-disposition for reference-of-thought apriorising/intelligibilitysetup, but rather as of its reasoning-through/messianic-reasoning is more about instigating prospective ontological-faith-notion-or-ontological-fideism parrhesiastic soul-searching, for the psychoanalytic-unshackling of the human subject as of a structural/paradigmatic Lacanian displacement/decentering of the human subject

‘totality/reference-of-thought/totalising–self-referencing-syncretising/circularity conception
 of meaningfulness-and-teleology as from prior positivism–procrypticism
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising to futural Being-
 development/ontological-framework-expansion as of prospective deprocrypticism/pre-
 empting-of-disjointedness-as-of-reference-of-thought
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising as the fundamental
 structural/paradigmatic resolution of the ‘positivism–procrypticism human subject superegoic
 vices-and-impediments’. It should be noted that the way the construction of knowledge works
 at reference-of-thought-level of reasoning-through/messianic-reasoning is utterly
 counterintuitive to how we perceive prospective elucidation of human knowledge and
 emancipation going by the given mathesis/motif/throwness-disposition as of reference-of-
 thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising for
 meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising. In this
 regard, we can construe that even the averaging-of-thought mental-disposition in a non-
 positivism/medievalism social-setup has a sense of human knowledge development and
 emancipation but with a mental-reflex that such a conception is necessarily by way of the
 non-positivism/medievalism social-setup mathesis/motif/throwness-disposition as of
 reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising for
 meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising. The idea
 that ‘ontological-faith-notion-or-ontological-fideism parthesiastic askesis-or-acumen as of
 reasoning-through/messianic-reasoning’ articulation of prospective
 mathesis/motif/throwness-disposition in prospective relative-ontological-completeness as of
 positivism reference-of-thought
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising for meaningfulness-and-
 teleology aposteriorising/intelligising/measuring/logicising is the route for ontologically-

veridical human knowledge transformation and emancipation as of prospective positivism is very much alien to the non-positivism/medievalism cloistered-consciousness. Likewise, the averaging-of-thought mental-disposition in our positivism–procrypticism effectively do has a sense of human knowledge development and emancipation but as of a mental-reflex that such a conception is necessarily by way of our positivism–procrypticism mathesis/motif/throwness-disposition as of reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising for meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising. In the same vain, the idea that ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’ articulation of prospective ontologically-uncompromised—referentialism deprocrypticism reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising for meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising is the route for ontologically-veridical human knowledge transformation and emancipation in futural Being-development/ontological-framework-expansion as of prospective deprocrypticism is very much alien to our positivism–procrypticism cloistered-consciousness. In both instances the notion of prospective metaphoricity is one that necessarily faces the fact that the human mind is ever always entrapped in an existentially-invested ‘totality/reference-of-thought/totalising—self-referencing-syncretising/circularity conception of meaningfulness-and-teleology’ which effective dislodgment/displacement/decentering is as of a cross-generational instigation, but then wouldn’t happen just by accident and thus has to be instigated for prospective relative-ontological-completeness! In fact such an insight can be extended across ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications’ to imply that the state of

recurrent-utter-uninstitutionalisation is cognisant of emancipation but doesn't anticipate that emancipation as of prospective relative-ontological-completeness is rather as of base-institutionalisation mathesis/motif/throwness-disposition, and likewise the latter doesn't anticipate the universalisation mathesis/motif/throwness-disposition, with the latter not anticipating our positivism mathesis/motif/throwness-disposition which itself doesn't anticipate prospective ontologically-uncompromised—referentialism deprocrypticism. The fact is human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor at its uninstitutionalised-thresholds implies that the human psychological reflex as of its limited-mentation-capacity at any such uninstitutionalised-threshold 'is not geared to adhere to abstract ontological-veridicality' as it will operate its state of dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism as if in a fully-attained state of singularisation/epistemic-immanence/veridical-epistemic-determinism, as of the-very-central-implication-of-throwness, as reflected by the successive prior relative-ontological-incompleteness mathesis/motif/throwness-disposition towards ontologically-uncompromised—referentialism deprocrypticism/pre-empting-of-disjointedness-as-of-reference-of-thought; and thus from a strictly ontologically-veridical point-of-view/perspective, and so beyond our enculturated-conception,-normalisation-and-practice-of-psychology and just as various mystical-and-mythical-practices of prior non-positivism registry-worldviews/dimensions were their own sort of enculturated-conception,-normalisation-and-practice-of-psychology as of their own times, the notion of a psychological science as reinforcing/propping-up human psychology in any prior relative-ontological-incompleteness-of-reference-of-thought meaningfulness-and-teleology state is downright ontologically ridiculous and the manifestation of a totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag naivety. We can appreciate that the

psychoanalytic-unshackling of all prior registry-worldviews/dimensions reference-of-thought is rather one that shouldn't wrongly be reinforcing/propping-up the human subject as if a given reference-of-thought in prior relative-ontological-incompleteness as of dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism has its very own complete transformative and emancipative potential as if of fully-attained singularisation/epistemic-immanence/veridical-epistemic-determinism, but an ontologically-veridical psychology rather warrants implying the human subject displacement/decentering as the structural/paradigmatic possibility of the human subject emancipation with regards to the successive prior relative-ontological-incompleteness registry-worldviews/dimensions superegoic vices-and-impediments; wherein dialectically-thinking reasoning-from-results/afterthought mathesis/motif/thrownness-disposition at its uninstitutionalised-threshold is construed as dialectically-dementing as of prospective dialectically-thinking reasoning-through/messianic-reasoning mathesis/motif/thrownness-disposition up to the prospective ontologically-uncompromised—referentialism of deprocrypticism. As of its inherent organic knowledge, such a hermeneutic psychology parrhesiastic articulation as herein 'doesn't do gimmicks of communication' as if to imply any favour whatever as of 'emotional or whatever feel-good trading for the appreciation of the possibility for prospective human emancipation', since by its 'presencing consummated/forfeiting posture' it is beyond the idea of convincing for convincing sake as it is simply 'a blunted eliciting of a solipsistic sense of intemporal/longness-of-register-of-meaningfulness-and-teleology projection in any human and no more' with no point going beyond that point as it then becomes as of intellectual-and-moral apriorising-teleological-degradation-in-notional-discontiguity/epistemic-discontiguity; and so, as its essential meaningfulness-and-teleology is as of a solipsistic transversal reflection of the ontologically 'superior party' that is intrinsic-reality/ontological-veridicality/existence as the absolute a priori in its ecstatic singularity, on the same token that

a natural scientist is in a transversal reflection of its object of study as of existence as the ontologically 'superior party' without any need to be involved in any bogus exercises that may imply that gravity may not be 9.8 m/s^2 on earth if any given human subject isn't accommodated for in some way somehow however faintly, be it that it may be the case that gravity is not 9.8 m/s^2 but that as well needs to be established as of the ontologically 'superior party' that is existence as the absolute a priori as of ontological-primemovers-totalitative-framework. But then the human reality across all registry-worldviews/dimensions, isn't inherently 'of immediate intellectual responsiveness' to the notion of its uninstitutionalised-threshold and the corresponding superseding of this as of prospective institutionalisation; as even the disposition to assume an intellectually enlightening mental-disposition is existentially-invested and not necessarily a given. We can appreciate from our positivistic perspective the 'obvious reality' of the fact that superstitious beliefs are bogus, but then paradoxically from the beginning of times superstitious beliefs had pervaded all the echelons of human societies whether as of true belief or opportunistically, and have only been increasingly undermined with the advent of positivistic reasoning at the beginning of modern times about 500 years ago. This has to do with the 'existentially invested nature as of assumed mathesis/motif/throwness-disposition' of human 'totalising/circumscribing/delineating meaningfulness-and-teleology'/reference-of-thought-devolving. Thus any given registry-worldview/dimension is strongly constrained to represent itself as of its 'dialectical-thinking' prior institutionalisation as reasoning-from-results/afterthought and very weakly constrained to represent itself as of its 'dementing' uninstitutionalised-threshold which it tends to represent as nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives), for the possibility of its prospective transcendence-and-sublimity into prospective institutionalisation. This reality is known as human 'dementative constraint' to prospective institutionalisation

transcendence-and-sublimity as of the possibility of prospective relative-ontological-completeness-of-reference-of-thought. Human dementative constraint is fundamentally associated with poor universal-transparency with respect to social-stake-contention-or-confliction at uninstitutionalised-thresholds. This then fails to induce the necessary existential assurance for prospective transcendence-and-sublimity and on that token fails to tip the balance over the ‘social obfuscation dynamic effect’ of wooden-language—of-temporal—mere-form/virtualities/dereification/akrasiatic-drag-denatured-and-dementing-narratives as of the prior institutionalisation’s categorical-imperatives/axioms/registry-teleology that stifle the transcendence-and-sublimity possibility for prospective institutionalisation. Thus as of the more critical insight that prospective relative-ontological-completeness-of-reference-of-thought is actually ontologically transformative as of aetiologisation/ontological-escalation, over mere palliative construals as of the very same prior reference-of-thought in prior relative-ontological-incompleteness, for resolving a given registry-worldview/dimension vices-and-impediments; this notion of human dementative constraint is critical for the psychoanalytic-unshackling/prospective-grounding insight underlying dynamism with regards to the human mind prospective transcendence-and-sublimity as implied by a ‘dialectically-thinking-psychology or psychology-of-mentation-dynamics or natural psychology-of-dynamics’ that emphasises the ‘Lacanian subject’ growth as of ontological-dementation/dialectical-dementation stranding dialectics, rather than a second-guessing mented or stigmatic psychology that fails to integrate the decisively ontological transformative implications of human psychology as of underlying relative-ontological-incompleteness/relative-ontological-completeness-of-reference-of-thought projective-totalitative-implications, and thus making the given presence reference-of-thought as our positivism-procrypticism ‘all-determinative of what can be construed as psychological emancipation’ as of its totalising-self-referencing-

syncretising/circularity/interiorising/akrasiatic-drag despite the fact of its prior relative-
 ontological-incompleteness-of-reference-of-thought to futural Being-
 development/ontological-framework-expansion as of prospective deprocrypticism
 prospective relative-ontological-completeness-of-reference-of-thought. The underlying issue
 here as well as of ontologically-veridical difference-conflatedness-as-totalitative-reification-
 in-singularisation-as-veridical-epistemic-determinism has to do with deficient human
 capacity for dispensing-with-immediacy-for-relative-ontological-completeness-by-
 reification/contemplative-distension in construing meaningfulness-and-teleology beyond the
 constraint of 'human lifespan of depth-of-thought' to a more profound appreciation of the
 underlying possibility for human transcendence-and-sublimity as of human
 intemporal/ontological/social/species/universal/transcendental/maximalising-recomposuring-
 for-relative-ontological-completeness/transvaluating paradigm. In this regard as of lack of
 dispensing-with-immediacy-for-relative-ontological-completeness-by-
 reification/contemplative-distension is the human temporal inclination to decontortion
 construed as a disposition to undermine 'intemporal ontological-veracity as of universal
 existential import' for the sake of 'temporal narrow-and-specific existentially-invested
 advantage/interest with little concern about emancipatory universal meaningfulness-and-
 teleology', and so as the very contrary disposition to reasoning-through/messianic-reasoning
 contortion. Decontortion as of human totalising-self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag incrementalism-in-relative-ontological-
 incompleteness is rather counter to ontological-faith-notion-or-ontological-fideism
 disposition by its deterministic hanging onto prior relative-ontological-incompleteness-of-
 reference-of-thought reasoning-from-results/afterthought while ignoring/overlooking the
 ontological-veracity implications of the trace/ontological-aesthetic-tracing of reifying
 existential-contextualising-contiguity, and thus adopting a dereification posture as enabled by

‘lack of constraining social universal-transparency’. Such a human disposition to decontortion at uninstitutionalised-thresholds arise on the naïve basis that human temporal willing/volition can effectively supersede the ontological integrity/veracity of meaningfulness-and-teleology as it reflects existence’s coherence/contiguity as of singularisation/epistemic-immanence/veridical-epistemic-determinism. But then such a decontorting disposition as can be manifested by a falsely striving to elevate the temporal frame of our 60–100 years of living above the intemporal/ontological frame of intrinsic-reality/ontological-veridicality/existential-reality is rather definitional of our uninstitutionalised-threshold where we are actually dementing and prospectively dialectically-primitive, notwithstanding our attendant totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag and vague temporal-intemporality gesturing. The whole institutionalisation process can thus be construed as one of increasingly undermining the human subject temporal decontortion disposition not to dispense-with-immediacy-for-relative-ontological-completeness; wherein across the successive institutional-cumulations/institutional-recomposures, decontortion is ontologically-constrained both as of the ‘dynamic construal of appropriate-as-intemporal existential phenomenality/phenomenal-manifestation and construal of appropriate-as-intemporal existential human mental-disposition’. The former is ontologically-constrained as of ontological-primemovers-totalitative-framework in undermining the human temporal inclination to phenomenality/phenomenal-manifestation decontortion, while human temporal mental-disposition for decontortion is additionally ontologically-constrained with availability of universal-transparency. Relatively objectified phenomenality/phenomenal-manifestation as implied in the natural sciences is hardly subjected to decontortion while relatively subjective phenomenality/phenomenal-manifestation as implied in the social is rather easily subjected to decontortion as of blurriness and emotional-involvement. In another respect the implications

of flawed identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as of dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism also has implications with the ontological-performance as of the effective productivity potential of human knowledge construction. In this regard, this author contends that the historically recurrent critique of naïve formalisation particularly in many a field of study that uncritically strive to adhere to a ‘supposedly pre-given science methodology and epistemology naively construed as of inherent transcendental signifier’ such as in the analytic tradition of philosophy, naïve scientific psychology as of facetious methodologies as well as many a natural science domain, that purport to conceptualise complex social meaningfulness-and-teleology in naïve naturalistic methodology terms, all arise because of a flawed predisposition to identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism implied as of dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism that in many ways ignores/overlooks existential-contextualising-contiguity knowledge-reification as of singularisation/epistemic-immanence/veridical-epistemic-determinism; and so, as of their ‘formalisation credo as identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism’ thus leading to a disposition that considers knowledge as an exercise of mere conceptual patterning inherently validated by formalisations on the basis of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity without the constraint of existential-contextualising-contiguity knowledge-reification as of existence as the absolute a priori as its very own transcendental signifier which ultimately manifestly-as-inherently enables transcendence-and-sublimity as the very essence of knowledge. This has led in many ways to a dissonance between their knowledge productivity implications and existential reality wherein for instance psychological and psychiatric science seems to imply that all along its practice

human psychological illnesses have multiplied many times over as of ever transforming and expanding formalisation credo, while the analytical tradition of philosophy by the avowals of its internal critics has been involved in a recurrent second-guessing exercise as of its visceral inclination for ‘abstracting reality by formalisation outside of social reality’ wrongly mimicking a natural science tradition whose domain-of-study ecstatically allows for such an attitude/mental-disposition/care–and–episteme. Such an approach that atomises/takes-to-pieces analysis ‘as supposedly elucidative’ tends to be rather abstract as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. Such that beyond its abstracting exercise, as when it returns in striving to supposedly elucidate social and other existential phenomenality, it is lost to it that social and other existential phenomenality is already precedingly/supersedingly as of ‘ecstatic holism/nested-congruence’, with the consequence that it naively construes of reification as simply projecting ‘the supposedly reifying atomising/taking-to-pieces formalisation analysis’ on the social and other existential phenomenality. Hence it ends up abstractly pulling-apart the ‘ecstatic holism/nested-congruence’ of existential phenomenality and thus misrepresenting, denaturing and producing relatively ontologically-flawed meaningfulness-and-teleology. Such articulations tend out to be merely implied decontextualised/abstracted constructs with poor appreciation and construal of their conceptualisations as of underlying relative-ontological-incompleteness/relative-ontological-completeness with respect to temporal-to-intemporal ontological-performance which is what enables the reification of existence/intrinsic-reality/ontological-veridicality. In this regard for instance, the well-articulated Foucauldian discourse of ‘speech activity’ conceptualisation associated with the notion of parrhesia more critically enables its existential-contextualising-contiguity knowledge-reification with regards to the possibility of human transcendence-and-sublimity as can be projected from an Ancient Greece context right up to our modern and

futural context in contrast to say analytic philosophy ‘speech act’ which by its atomising/taking-to-pieces formalisation orientation is in many ways by its mere denotative/connotative constitutedness nature just an implied existentially decontextualised/abstracted construct as of its poor ontological-as-existential-commitment with respect to ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’, in contrast to the reifying conflatedness connotative nature of ‘speech activity’ discourse as of its contextualising ecstatic-holism/nested-congruence; such that the former assumes rather an identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism projective-totalitative-implications posture as of atomising/taking-to-pieces formalisation rather than a difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications posture that is as of ecstatic-holism/nested-congruence as with the latter. Such a conclusion can be extended to other analytic tradition concepts assuming rather an atomising/taking-to-pieces formalisation orientation like the broader notion of language games when rather analysed as of a denotative/connotative constitutedness nature outside existential-contextualising-contiguity whereas in contrast this author construes of the ontologically-veridical reflection of the social purview as better served by the notion of ‘ontologically-hegemonising-narrative ontological-performance’ as of its reifying conflatedness connotative nature reflecting the ontological-veracity/ontological-performance of human-subpotency perspective meaningfulness-and-teleology articulated within any given registry-worldview/dimension social-setup going by its ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as so-reflected by its self-assuredness-of-authenticity with respect to its social-stake-contention-or-confliction exposing it to existence-potency perspective of ontological-primemovers-totalitative-framework as of prospective

relative-ontological-completeness projective-totalitative-implications’, and so-construed as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications; thus further articulating meaningfulness-and-teleology as from prior relative-ontological-incompleteness to prospective relative-ontological-completeness, and so from the notional/epistemic perspective of existence-potency-as-of-ontologically-uncompromised-ontological-normalcy/post-convergence/referentialism and this ‘ontologically-hegemonising-narrative ontological-performance’ orientation is theoretically, conceptually and operantly ontologically efficacious inherently by its ecstatic-holism/nested-congruence as it reflects holistically the ‘criss-crossing temporal-to-intemporal ontological-performances of narratives’ as of the social totality of meaningfulness-and-teleology. This holistic insight is reflected in the Derridean deconstruction orientation with its obvious narratology implications pertinence to literary studies as of its conflatedness with existential-contextualising-contiguity in contrast to such a notion like language games when construed rather in constitutedness. This difference of conceptualising comes down to the atomising/taking-to-pieces flaw reflex of constituting-towards-totality implied as of ontologically-flawed identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism as against the ecstatic-holism/nested-congruence disposition for reifying-totality-for-completeness implied as of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism; wherein the conflatedness mental-reflex is involved in construing of both the right apriorising/intelligibilitysetup/measuringinstrument/axiomatising mindset-as-of-prospective-deprocrypticism-dissemination and thus the knowledge for that right mindset-as-of-prospective-deprocrypticism-dissemination for completeness as of ontologically-uncompromised ontological-normalcy/post-convergence/referentialism/postdication projected

 implied by displacement/decentering-of-the-human-subject as of its relative-ontological-

 its conceptualisations has to do with the very notion of knowledge as being about
 ‘ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-

 ‘affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-

 and logic actually being in effect the ‘inner working coherence/contiguity of axiomatic-

construct construal of ecstatic-existence/the-nature-of-the-world/conditions’, with the implication that all the knowledge as ontologically-veridical meaningfulness-and-teleology that exists is about existential-contextualising-contiguity knowledge-reification as of ontological-primemovers-totalitative-framework projective-totalitative-implications of ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence implied as of ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’. In this regard, ‘speech activity’ discourse speaks of an ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ as expressed above (with regards to the social contextualisation beyond just speech for the possibility of human transcendence-and-sublimity...) which is then being reified/elucidated for the prospective possibility of human emancipation, with logic being the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ as of this articulated ontological-as-existential-commitment having to do with such social contextualisation’. Likewise the underlying notion of ontological-performance as herein articulated by this author is as difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications as from existence-potency—as-of-ontologically-uncompromised-ontological-normalcy/post-convergence/referentialism ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence about ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’; articulating knowledge as ontologically-veridical meaningfulness-and-teleology as of the existential-contextualising-contiguity knowledge-reification projective-

totalitative—implications of human underlying relative-ontological-incompleteness/relative-ontological-completeness. This underlying notion of ontological-performance speaks more fundamentally of aetiologisation/ontological-escalation, as explicitly underlined in all transcendence-and-sublimity elucidating/reifying subject-matters and sciences, unlike approaches that do-not-or-poorly-appreciate the fact that just as scientific studies are transformative the study of the social rightly articulated beyond-institutional-being-and-craft is just as transformative with regards to prospective human living-development, institutional-development and Being-development/ontological-framework-expansion, even though it is more subject to higher emotional-involvement as of its displacement/decentering-of-the-human-subject projective-totalitative—implications. Whereas the analytic tradition posture as with ‘speech act’ gives precedence to logical-commitment as reflected in its atomising/taking-to-pieces formalisation approach (implied as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity) geared towards identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism, which by the token of working by atomising/taking-to-pieces formalisation on specific aspects or specific interpretation as of formalisation construct ignores/overlooks ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ as the veridical ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence in want of existential-contextualising-contiguity knowledge-reification for knowledge as ontologically-veridical meaningfulness-and-teleology, as can be validated and falsified by ontological-primemovers-totalitative-framework projective-totalitative—implications. This fundamental difference of conceptualisation very often underlies the disagreements between the analytic philosophical orientation and other philosophical traditions, in the sense that while the latter might be

implicitly implying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence about ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ when making its argument, the former will tend to be making a logical-commitment argument as of formalisation construct that ignores/overlooks-and-hence-is-poorly-constrained to the precedence/supersedingness/ascendency of ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ in need of existential-contextualising-contiguity knowledge-reification as of ontological-primemovers-totalitative-framework projective-totalitative-implications, and goes on to naively deploy outside existential-contextualising-contiguity knowledge-reification such logic notions like non-sequitur, fallacies, etc. and/or mere categorising denotative/connotative formalisations in constitutedness as ends in themselves, rather than construing logic as of the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ of ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence for knowledge elucidating/reifying which validation and falsifiability is rather a matter of ontological-primemovers-totalitative-framework projective-totalitative-implications. The fundamental point here is that logic (reflected by the atomising/taking-to-pieces formalisation approach) is instead the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ as of Being and beings as reflected in first-level ontology and second-level ontologies, and logic cannot derive the superseding/preceding ecstatic existential veridicality of Being and beings which validation and falsifiability is ever always a matter of ontological-primemovers-totalitative-framework projective-totalitative-implications. Being and beings construed-as-of-ontology/apriorising/axiomatising in the conceptualising of the-very-same-totalising–

 or any totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-
 veridicality or any-issue-in-existence as knowledge, and so as of articulated axiomatic-
 constructs; is rather reflected either in affirmation/projection/assertion/dueness-validating-
 logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking when the
 conceptualising is in prospective relative-ontological-completeness or is reflected in
 unaffirmation/deprojection/de-assertion/undueness-invalidating-
 logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing
 when the conceptualising is in prior relative-ontological-incompleteness, and in both
 instances as substantiated or unsubstantiated respectively by ontological-primemovers-
 totalitative-framework in reflection of the ascendancy of existence-potency. For instance, the
 affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-
 validating-measuring/dialectically-thinking of ‘theory-of-relativity-together-with-quantum-
 mechanics axiomatic-construct’ over ‘classical-mechanics axiomatic-construct’ as
 unaffirmation/deprojection/de-assertion/undueness-invalidating-
 logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing.
 This is also the case as of the affirmation/projection/assertion/dueness-validating-
 logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking of the
 ‘relative-ontological-completeness-of-reference-of-thought’ over ‘relative-ontological-
 incompleteness-of-reference-of-thought’ as unaffirmation/deprojection/de-
 assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-
 measuring/dialectically-dementing; for instance, futural Being-development/ontological-
 framework-expansion as of prospective deprocrypticism over our positivism–procrypticism
 or in the case of our positivism over prior non-positivism–medievalism. Logic arises as a
 mental-reflex of the ‘inner working coherence/contiguity of axiomatic-construct construal of

ecstatic-existence/the-nature-of-the-world/conditions' in knowledge construing-as-of-ontology/apriorising/axiomatising of Being and beings. However, because a reference-of-thought is already an apriorising/intelligibilitysetup/measuringinstrument/axiomatising mathesis/motif/throwness-disposition as of its underlying affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking, logic seems to be the only mental exercise involved since the underlying affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking of the apriorising/intelligibilitysetup/measuringinstrument/axiomatising is ever so pervasive-and-transparent to contemplation by mental-reflex, such that when the affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking of covert flawed-as-dementing apriorising/intelligibilitysetup/measuringinstrument/axiomatising is implied with regards to say adulthood psychopathic postlogism-slantedness as of the ontological-aesthetic-tracing of its meaningfulness-and-teleology as from difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism in ontological-contiguity, we go on to aposteriorise/intelligise/measure/logicise and thus wrongly validating the flawed affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking as of the flawed-as-dementing apriorising/intelligibilitysetup/measuringinstrument/axiomatising, and so instead of implying its unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing, as will be done at childhood psychopathy where it is overt and obvious. Further temporal individuation dispositions of ignorance/affordability/opportunism/exacerbation/social-chainism-or-social-discomfiture-or-negative-social-aggregation/temporal-enculturation-or-

temporal-endemisation conjugating to this postlogism-slantedness speaks of socially derived affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking of flawed-as-dementing apriorising/intelligibilitysetup/measuringinstrument/axiomatising, equally requiring unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing; as so implied at the uninstitutionalised-thresholds including as of our procrypticism/disjointedness-as-of-reference-of-thought. The underlying insight can be garnered as of the temporal meaningfulness-and-teleology in totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag reflected as of the prior relative-ontological-incompleteness of a reference-of-thought uninstitutionalised-threshold, for instance with the unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing of flawed-as-dementing non-positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising with respect to our positivism or prospectively the unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing of our flawed-as-dementing positivism–procrypticism/disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising with respect to futural Being-development/ontological-framework-expansion as of prospective deprocrypticism.  of the notions of incrementalism-in-relative-ontological-incompleteness and maximalising-

Fundamentally thus there is notional-discontiguity/epistemic-discontiguity as of their paradigmatic divergence between incrementalism-in-relative-ontological-incompleteness and maximalising-recomposuring-for-relative-ontological-completeness/transvaluating, with maximalising-recomposuring-for-relative-ontological-completeness/transvaluating reflected in affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking as of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism in ontological-contiguity as from existence-potency-as-of-ontologically-uncompromised-ontological-normalcy/post-convergence/referentialism, while incrementalism-in-relative-ontological-incompleteness is reflected in unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing as ontologically-flawed identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism in notional-discontiguity/epistemic-discontiguity; and so with regards to the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality. existence, and all the physics that is relevant is their further existential-contextualising-contiguity knowledge-reification as physics knowledge as of its ontological-veridical meaningfulness-and-teleology as can be validated and is falsifiable by ontological-primemovers-totalitative-framework projective-totalitative-implications. Even mathematics it is often underestimated works rather an ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence as of ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’, as of the existential-contextualising-contiguity knowledge-reification constraining implications of its ‘equal sign’, speaking of a self-conscious awareness that calculations should reflect-and-be-constrained as per calculations operative validation and falsifiability with regards to ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’, and with mathematical logic as of mathematics ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence ‘concurrent formatting as formalisation’ being the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ towards that purpose. Such reflecting-and-constraining to ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ can difficultly be said with regards to the overall atomising/taking-to-pieces formalisation approach as of its totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag presumption; which strangely enough has been subjected to no less than five major successive internal indictments but still keeps up its operative predilection of atomising/taking-to-pieces, with this author of the opinion that such an in-built institutional grip might be in many ways inducing diversion of intellectual and scholarly resources from a more profound advancement of philosophy for greater human transformation implications. It is important to grasp here that ‘axiomatic-construct construal

of ecstatic-existence/the-nature-of-the-world/conditions’ is superseding/preceding as of existence’s ecstatic singularity, such that ontology supersedes logic which is rather ontology’s ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’. It is rather ‘the ecstatic manifestation of existence and then human experience-and-interpretation of that ecstatic manifestation of existence’ that provides the ‘apriorising/intelligibilitysetup/measuringinstrument/axiomatising as axiomatic-construct’ insight about ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence articulated as ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ and not mere logic, with logic not able by itself to derive ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ as it is often naively implied but instead reflecting the ‘inner working coherence/contiguity of axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’ and as any such implied derivation is rather as of explicated/implicated coherence/contiguity with another/other ‘transversally devolving-or-complementary ontological/axiomatic-construct conceptions’ as of ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’. Interestingly, such notions like experimentation, testing, trials, case studies, observational studies, interview, data analysis, content analysis, statistics and basically overall research orientations and research methods as of their formal study implications are just focussed-and-contrasted extensions, with regards to the general and normal day to day experience about living itself for the inspired construing of ‘the ecstatic manifestation of existence and then human experience-and-interpretation of that ecstatic manifestation of existence’ providing insight about ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-

reflexivity-in-ecstatic-existence in producing knowledge as meaningfulness-and-teleology; such that critically, appropriate philosophical phenomenal insight with regards to ‘the general and normal day to day experience about living itself’ as of observational and articulated ontological-pertinence sufficiency, and as supplemented with the grasp and engagement with other philosophical works, speaks of veridical scientific insight and validity subject to ontological-primemovers-totalitative-framework, and so because such well-inspired experience-and-interpretation from ‘general and normal day to day experience about living itself’ in the philosophical domain-of-study is generally more ontologically profound and comprehensive as of conflatedness than any contrasted ad-hoc and focussed domain study, even though such domain studies may be insightfully relevant in specific ways but still as of the more profound background of well-inspired experience-and-interpretation from ‘general and normal day to day experience about living itself’. The point here is to highlight that by its very given domain-of-study with respect to overall existence, philosophical knowledge more profoundly makes a holistic conflatedness demand on human living experience for the inspired construing of ‘the ecstatic manifestation of existence and then human experience-and-interpretation of that ecstatic manifestation of existence’ than other more specific domains-of-study for which ad-hoc and focussed domain study methods are pervasively decisive for ontological pertinence. But then this is more a question of ‘expanded onticising construal of existence as of totalising-devolved purviews of existence so-construed as subject-matters/domains-of-study’. The ontological-veracity and epistemic-veracity of all such totalising-devolved–purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality are effectively as of the very same underlying congruent philosophical domain-of-study construal of ecstatic manifestation of existence but for their ‘onticising specificisms of existence’s ecstatic manifestation’; as so-implied as of overall existence metaphoricity/ecstasy panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-

existence as of supervening-conflatedness. Knowledge as meaningfulness-and-teleology, whether of underlying ontological-construal or ontical-construal, is epistemically validated as of ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ as reflected by ontological-primemovers-totalitative-framework. Inherently, because human-subpotency ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence is very much intimately linked with the ontological-performance of human as of prospective relative-ontological-completeness appraisal, it is always ever the case that as of human totalising—thrownness-in-existence the validation of knowledge as meaningfulness-and-teleology as of ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence is equally as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality or totalising-devolved—purviews-as-domains-of-construal-as-intrinsic-reality-or-ontological-veridicality constructs; which construal is necessarily as of conflatedness with respect to the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality or totalising-devolved—purviews-as-domains-of-construal-as-intrinsic-reality-or-ontological-veridicality and relative-ontological-completeness as of human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination, thus invalidating the epistemic-veracity of constitutedness of knowledge. The implication here is that the epistemic-veracity of knowledge as meaningfulness-and-teleology is rather as of the ‘totalising construal as of existence’ with totalising-devolved—purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality rather ‘narrowing-construals of their specifically-implied

human-subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence, and hence of nested-congruence with existence’. This further points out that the traditional explicated constitutedness conception of the notion of cause-and-effect so-implied herein as ontological-primemovers-totalitative-framework is actually epistemically-impertinent and flawed; as this traditional conception tends beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought to imply unconnectedness-with/not-in-nested-congruence with the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality or totalising-devolved-purviews-as-domains-of-construal-as-intrinsic-reality-or-ontological-veridicality, hence implicitly-or-explicitly liable to elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. This constitutedness nature of the notion of cause-and-effect so-implied veridically as ontological-primemovers-totalitative-framework arises as of the ‘basic and mere mimicking and deployment’ of supposedly science approaches and methodologies on the naïve assumption that their mere deployment is inherently of epistemic-veracity, such that such deployment when it undermines the ‘inherently nested-congruence of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality or totalising-devolved-purviews-as-domains-of-construal-as-intrinsic-reality-or-ontological-veridicality’ is in effect just elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. Rather any such science approaches and methodologies striving to validate knowledge as meaningfulness-and-teleology by the ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ reflected by ontological-primemovers-totalitative-framework as of existence-potency, is necessarily

instigated as from a philosophical depth of contemplation as of ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’. Insightfully, while in many ways such an elucidation hardly needs to be explicated in many a natural science domain-of-study as of their directly constraining cause-and-effect nature such that such nested-congruence with existence will often tend to arise naturally as of valid/invalid outcome constraining of ontological-primemovers-totalitative-framework as of existence-potency, this unexplicated implicitness should not be confused with the notion that the natural sciences are essentially reduced to their science approaches and methodologies; as is often and awkwardly naively construed from without in many a social domain-of-study. The fact is notwithstanding the ‘onticising specifisms of existence’s ecstatic manifestation’ of the natural science domains-of-study, these are just as driven by a philosophical depth of contemplation as of ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ as reflected in the often ‘unspoken/unelaborated scientific hunches and fine-tuning’ which is effectively what drives their deployed science approaches and methodologies for their sought after scientific reifying outcomes; and it is this subsuming/nestedness that keeps such science approaches and methodologies in nested-congruence with existential-contextualising-contiguity as of conflatedness; so-implied as of their ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ reflected by ontological-primemovers-totalitative-framework as of existence-potency. In other words, science approaches and methodologies in reality are simply the extension of philosophical depth of contemplation when it comes to ‘onticising specifisms of existence’s ecstatic manifestation’ as of the

totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality of natural sciences; with the implication that the philosophical depth of contemplation has to be undertaken, notwithstanding the fact that the implicated nature in the natural sciences of their onticising direct validation/invalidation outcomes as of ontological-primemovers-totalitative-framework will seem to wrongly imply otherwise. Such a philosophical depth of contemplation in nested-congruence as of ‘coherence/contiguity-of-superseding-oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ is very often incomplete, of-divvied-theorisation and/or ‘poor coherence of theorisation with operant approaches and methodologies’, when it comes to many a social domain-of-study; as quite often theorisation in many a social domain-of-study strives on disparateness, rather than a tendency to ‘ontological-primemovers-totalitative-framework as of existence-potency enforced’ unifying coherence as in many a natural science domains-of-study, with the consequence that studies are often aloof to direct existential-contextualising-contiguity knowledge reifying exercise as of a tendency to technicality as of institutional-being-and-craft imprimatur, ‘fallback to unquestioned/dogmatic normativities’ and ‘habituated dispositions’ which priorly enframed subject-matters and institutional-setups structurally/paradigmatically stifle the possibility for conceptualisation as of existence-potency validation/invalidation implications, beyond their conventioning-referencing enframing. Ultimately the bigger issue arises as of the poorly-singularised/poorly-immanent nature of many a social domain-of-study unlike the grand singularised/immanent ‘totalising/circumscribing/delineating unifications’ that are actually actively sought in the natural sciences; and this author portends that the suprastructuralism/postmodernism as of deprocrypticism ontology as ‘true-ontology—as-of-Being-development/ontological-framework-expansion’ holds the promise for such effective

grand singularised/immanent social conceptualisation that doesn't dodge/ignore/disregard outstanding questions about the human existential reality including structural/paradigmatic biases arising beyond-the-consciousness-awareness-teleology-in-existential-extirpation-as-of-existential-unthought as of human emotional-involvement and sophistic distortion of perception of reality so-implied in our present positivism–procrysticism 'contingent-ontology—as-of-conventioning-referencing' and just as well when 'science ideology' seem to subvert and undermine science-in-practice. Worst still while in effect the idea of specialisation in many a natural science domain is often the natural progression of a 'comprehensively elucidated/reified unification of the given natural science domain-of-study' with specialism more of a furtherance of such a unification scheme in a strong arborescent syncing with the subject-matter general-theoretical-level, in many such social domain-of-study of disparateness-of-conceptualisation (including some science domains as well which naively tend to draw comprehensive social and human implications of their studies) the drawback to such specialisms is often associated with 'major interpretative loopholes at the general-theoretical-level of the subject-matter' with regards to the knowledge-reification implications of supposedly specialisation domains and their studies since such an approach fails to effectively validate its methodological and conclusive implications with respect to the subject-matter general-theoretical-level implied ontology as of the subject-matter specific subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence so-reflected in its philosophical depth of contemplation as of 'coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness'. This weakness is often reflected in naïve use of statistics and methods as well as drawing out conclusions based rather on ordinary average-thinking interpretation as of human-subpotency 'rather than interpretations and conclusions ensuing naturally and

arborescently as from existence-potency knowledge-reification implications derived from the general-theoretical-level of the subject-matter' whereas this is ever always the case with good practice in the natural sciences and just as well as with an increasingly self-conscious social science as specifically upheld by postmodern-thought. For instance, the internal-coherence/nested-congruence speaking of the underlying unification implications articulated herein as of the human institutionalisation process can be garnered by the fact that all the knowledge-reification herein implied arises as of the very same underlying 'objectifying cogent unifying process and gesturing' as of 'the projective-totalitative-implications of relative-ontological-incompleteness/relative-ontological-completeness', which is exactly what avails in the good practices of the natural sciences as driven by their 'cogent-unifying-operant-dynamics' whether with regards to say 'objectifying chemical processes articulation', 'objectifying physical principles articulation' or 'objectifying biological processes articulations', contrary to a practice of disparateness-of-conceptualisation in many a social domain-of-study wherein supposedly reified knowledge 'hardly has any underlying implied knowledge-reification process/gesturing for its derivation' as 'cogent-unifying-operant-dynamics' such that these turn out to be poorly operant or non-operant with the conceptual-patterning gesturing of mere-referring-confused-with-explicating, mere-mentioning-confused-with-deriving and mere-conceptual-synonymising-confused-for-knowledge-reification, such that the underlying 'cogent-unifying-operant-dynamics' of the supposed knowledge-reification is hardly operantly existent or is operantly non-existent. Bizarrely, the blurriness of the social seem to be misconstrued as implying knowledge-reification in the social should reflect such blurriness-as-of-disparateness rather than the ultimate objectifying unification-of-explanations, and so by conjugating 'relative-ontological-completeness projective-totalitative-implications' together with 'subject-matter breadth and depth' to achieve such an overall subject-matter knowledge-reification as of objectifying unification-

of-explanations, in order to elucidate the blurriness. Such that quite often as of institutional practice the notion of unification is often misconstrued non-aporetically/undilemmatically/unreframed/untransformed as ‘merely bringing together disparate conceptualisations for their cross-examination (on the basis of prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation)’ in a naïve substitution of the idea that unification truly speaks of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint elicited nreframing/transforming/reconstrual underlying ‘cogent-unifying-operant-dynamics’ that ‘runs-through/deflates’ implied conceptualisations in elucidating their ontological-veracity by its capacity to ‘objectively deflate-all-conceptualisations as of operant projective-totalitative—implications in existential-contextualising-contiguity conflatedness’ as herein implied (involving prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation for veridical ontologisation/ontological-veracity/aestheticisation-towards-ontology), rather than vague contrasting-and-comparison of disparate conceptualisations poorly reflecting underlying existential-contextualising-contiguity conflatedness; and further, such an insight of underlying ‘cogent-unifying-operant-dynamics’ as herein implied is often misconstrued as being monotonous (whereas such ‘supposedly monotonous process/gesturing of knowledge-reification’ reflecting inherent domains-of-study as of their given subpotency panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence takes the form of the process/gesturing of knowledge-reification in say physics with the ‘supposed monotony’ of differential equations on physical variables, in chemistry with the ‘supposed monotony’ of valence bonding explaining chemical reactions or in biology with the ‘supposed monotony’ of gene regulation rather ultimately central to all biological processes), with the false implication of construing that disparateness-of-conceptualisation is inherently convenient as of a mental-reflex oriented towards ordinary/averaging-of-thought human-

subpotency ways-of-looking-at-things rather than adopting-the-intellectual-hat for reifying the former in a mental-reflex oriented towards existence-potency projective-totalitative-implications ways-of-looking-at-things. Critically, lost to many naïve ‘science ideologues’ preaching about modelling the social domains-of-study along the natural sciences, is the fact that more than mere adoption-and-mimicking of scientific methods and approaches, the truly pertinent and decisively scientific notion of the natural sciences lies with their ‘cogent-unifying-operant-dynamics’ from whence statistical, mathematical and other scientific methods become interpretatively intelligible; such that merely adopting-and-mimicking such methods without precedingly construing of the ‘cogent-unifying-operant-dynamics’ of any such social domain-of-study is ‘massively un insightful/shallow and subject to institutional-being-and-craft sophistic misconstrual and manipulation’ as it is rather such a ‘cogent-unifying-operant-dynamics’ as of existential-contextualising-contiguity conflatedness that points to the specific scientific methodology of relevance or irrelevance, given that in certain cases the qualitative nature of things will for instance render statistical and mathematical methods irrelevant. This further explains why Derridean deconstruction and Foucauldian discourse analysis have been found in many social domains-of-study, including domains like medical and healthcare practice for instance, to provide a ‘cogent-unifying-operant-dynamics’ that ‘fully-address-in-depth social issues’; in the sense that Derridean deconstruction narrative or Foucauldian genealogy-knowledge-and-power-discourse narrative address the displacement/decentering-of-the-human-subject in reflecting the need to undermine human destructuring/uninstitutionalised-thresholding to further advance its constructive/institutionalising nature, thus overcoming underlying logocentrism as of prospective relative-ontological-completeness transcendental-and-sublimity implications, and thus reflecting the fact that human knowledge is more completely a two-fold process involving building the right mindset-as-of-prospective-relative-ontological-completeness and

thereof the knowledge for that given right mindset-as-of-prospective-relative-ontological-completeness as of the projective-totalitative-implications of existential-contextualising-contiguity conflatedness. It is thus not surprising that naive disparateness-of-conceptualisation leads to subject-matters and studies whose supposed knowledge-reification tend to be most heavily dependent on ‘peering to a fault’ of the contingent-ontology—as-of-conventioning-referencing of institutional-being-and-craft that is poorly constrained to existential-reality, rather than a peering process that is heavily constrained to existential-reality as of underlying ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ as validatable and falsifiable by ontological-primemovers-totalitative-framework as of existence-potency as it is critically the case in the good practices of the natural sciences. The implication here is that the modern positivist ‘identitive conception of meaningfulness-and-teleology’ as of ontologically-flawed identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism is basically caught up in its very own enframed closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications which as of its absolutising-identitive-constitutedness is rather ‘predisposed to a mental-reflex of construing concepts and conceptualisations in absolute terms of conceptual-patterning by mere referring, mentioning and synonymisation of concepts and conceptualisations as of a presencing inclination in totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag that poorly or doesn’t recognise the transforming nature of concepts and conceptualisations as of projective-totalitative-implications of relative-ontological-incompleteness/relative-ontological-completeness involving the displacement/decentering-of-the-human-subject for the right edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising

projective-totalitative–implications for prospective meaningfulness-and-teleology as knowledge-reification as associated with the suprastructuralism/postmodernism perspective in relative-ontological-completeness. This contrast with suprastructuralism/postmodernism ‘difference conception of meaningfulness-and-teleology’ as of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism in its unenframed opened-construct-of-meaningfulness-and-teleology so-implied with respect to ‘the transcendental-signifier that is ecstatic-existence’, as so-reflected in existential-contextualising-contiguity conflatedness for elucidating, deriving and knowledge-reification of concepts and conceptualisations as of projective-totalitative–implications of relative-ontological-incompleteness/relative-ontological-completeness. This explains why postmodern-thought cannot truly be understood in terms-as-of-axiomatic-construct of naïve identitive positivistic modern thought because the meaningfulness-and-teleology of postmodern-thought only arise rather in the reification process/gesturing involving the displacement/decentering-of-the-human-subject implied as of its projective-totalitative–implications of relative-ontological-incompleteness/relative-ontological-completeness for elucidating, deriving and knowledge-reification of its concepts and conceptualisations; as naïve identitive positivistic modern thought in its totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag very often and systematically rather construes of such postmodern concepts and conceptualisations substitutively in its predisposition of absolutising-identitive-constitutedness by its mere referring, mentioning and synonymising of postmodern concepts and conceptualisations thus undermining the inherent postmodern-thought implied elucidation, derivation and knowledge-reification of concepts and conceptualisations, and as such identitive positivistic modern thought fundamentally fails to recognise and factor in the aforementioned postmodern-thought knowledge-reification process/gesturing as of projective-totalitative–implications of relative-ontological-

incompleteness/relative-ontological-completeness. Such a recurrent ontologically-flawed predisposition is tantamount to say construing Newtonian physics in the absolute terms-as-of-axiomatic-construct of its concepts and conceptualisations of say space, time, force, etc. to then project this predisposition by mere referring, mentioning and synonymisation of these Newtonian physics concepts and conceptualisations as if of Einsteinian physics in the hope that this will enable the elucidation, derivation and knowledge-reification of Einsteinian physics, whereas the latter implies an utterly different reification process/gesturing for its specific physics elucidation, derivation and knowledge-reification as of its projective-totalitative-implications of relative-ontological-incompleteness/relative-ontological-completeness. It is rather the suprastructuralism/postmodernism reification process/gesturing as of projective-totalitative-implications of relative-ontological-incompleteness/relative-ontological-completeness that supersedingly induces postmodern-thought implied concepts and conceptualisations elucidation, derivation and knowledge-reification, just as the same can be said of Einsteinian physics reification process/gesturing as of projective-totalitative-implications of relative-ontological-incompleteness/relative-ontological-completeness in supersedingly inducing its specific implied concepts and conceptualisations elucidation, derivation and knowledge-reification of say space-time, force, etc. In both instances, when interpreted from the relative-ontological-incompleteness perspective in ontologically-flawed absolutising-identitive-constitutedness of naïve positivistic modern thought or Newtonian physics respectively, suprastructuralism/postmodern-thought and Einsteinian physics will be ‘qualified negatively as relativistic’ since the latter do not assume an absolutising-identitive-constitutedness with concepts like truth, space, time, force, etc. and the latter rather perceive these as ontologically-flawed elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity as from the relative-ontological-completeness perspective which

emphasises construing existential-reality as it manifests itself as of existential-contextualising-contiguity in conflatedness; and likewise, the fact that existential-contextualising-contiguity in conflatedness ‘epistemically implies human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination for construing ontological-veracity’, thus ‘putting-in-question/deflating by difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism’ all absolutising-identitive-constitutedness traditional conceptions beyond their simplistic conceptual-patterning to reflect underlying ecstatic-existence, will tend to be construed from the relative-ontological-incompleteness perspective in absolutising-identitive-constitutedness as nominalistic rather than as of ‘nested-congruence/running-through/deflating—cogent-unifying-operant-dynamics—unification-of-explanations edginess/incisiveness—of apriorising/intelligibilitysetup/measuringinstrument/axiomatising’ as from the relative-ontological-completeness perspective. In other words, the concepts and conceptualisations of postmodern-thought are meaningless without their relevant and underlying theoretical background framework gesturing, and there is no point in construing them as of simplistic conceptual-patterning by mere referring, mentioning and synonymisation as if these are of positivistic modern thought theoretical background framework gesturing just as the same can be said of striving for the elucidation, derivation and knowledge-reification of Einsteinian physics concepts and conceptualisations as if of Newtonian physics concepts and conceptualisations by mere referring, mentioning and synonymisation as if of the latter. In both cases, the projective-totalitative-implications of relative-ontological-incompleteness/relative-ontological-completeness implied displacement/decentering-of-the-human-subject points to different sense-of-conscious-representation-of-meaningfulness-and-teleology between the relative-ontological-incompleteness and relative-ontological-

completeness such that the former is rather in pseudo-edginess/pseudo-incisiveness implying the need for its unaffirmation/deprojection/de-assertion/undueness-invalidating-logicising/unsuitablemeasuringinstrument-invalidating-measuring/dialectically-dementing and cannot simply be projected as the latter which is what is rather truly and effectively of edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising projective-totalitative—implications implying the need for its true and effective affirmation/projection/assertion/dueness-validating-logicising/suitablemeasuringinstrument-validating-measuring/dialectically-thinking. A further naivety is the appreciation of postmodern knowledge-reification process/gesturing arises as of a general misunderstanding of what is generally implied with regards to any given knowledge-reification process/gesturing. As indicated before all subject-matters/domains-of-study effectively reflect existence's panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence as of existential-contextualising-contiguity conflatedness with regards to projective-totalitative—implications of relative-ontological-incompleteness/relative-ontological-completeness/relative-ontological-incompleteness, such that for instance even a naïve traditional conception of the physics domain-of-study as of atomising/taking-to-pieces constitutedness is shown to be veridically rather as of existential-contextualising-contiguity conflatedness going by the successive relative-ontological-completeness physics conception of such notions as space, time, etc. in totalising development of successive theories say Cartesian, Newtonian, Einsteinian, String theory, etc. using the very same notions and derived-notions but with different implications. This totalising nature of all domains-of-study in existential-contextualising-contiguity conflatedness as of projective-totalitative—implications, speaks of the epistemic-veracity of the fact that 'all knowledge is truly developed as of a hermeneutic circle for relative-ontological-completeness' that involves human limited-mentation-capacity-deepening—in-recomposuring,-as-of-totalising—renewing-

realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination. This hermeneutic circle knowledge-reification process/gesturing is furthermore reflected in both human scholarly-and-pedagogic exercise wherein subject-matters/domains-of-study are grasped in successive articulations of deeper and deeper hermeneutic insight as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating. The implication here is that postmodern knowledge-reification process/gesturing simply integrates this notion in the sense that top-level postmodern scholars articulate their knowledge-reification process/gesturing at its ‘appropriate hermeneutic circle level of postmodern knowledge-reification’ no different from say top-level physicists and natural scientists articulating their knowledge-reification process/gesturing at their ‘appropriate hermeneutic circle level of top-level physics/natural-science knowledge-reification’. In both instances, the knowledge-reification process/gesturing implies that the scholar or student striving to engage at that top-level understanding, needs to grasp the ‘preceding formative/pedagogic hermeneutic circle levels of knowledge-reification’. Such a supposed scholar or student cannot depart from ordinary/banal/averaging-of-thought level of knowledge conception to then claim that the top-level physics/natural-science/postmodern-thought hermeneutic circle of knowledge-reification process/gesturing should be directly and fully graspable to it as of an averaging-of-thought predisposition to incrementalism-in-relative-ontological-incompleteness. The fact is the various pedagogic hermeneutic circle levels of any subject-matter/domain-of-study as of successive maximalising-recomposuring-for-relative-ontological-completeness/transvaluating are meant to transmit a ‘totalising/comprehensive organic-attitude-to-knowledge which is much more than just its technical knowledge veracity’ and that ‘totalising/comprehensive organic-attitude-to-knowledge’ is needed together with the induced technical dispensation of the lower hermeneutic circle of pedagogic knowledge-acquisition to then be able to engage with the higher/top-level scholarly/pedagogic hermeneutic circle of knowledge-reification in

its maximalising-recomposuring-for-relative-ontological-completeness/transvaluating. It is important to understand here that the top-level physics/natural-science/postmodern-thought hermeneutic circle of knowledge-reification process/gesturing cannot strive to engage the supposed scholar or student at any such ordinariness/banal/averaging-of-thought level of knowledge conception, and implicated in its knowledge-reification gesturing/process is the notion that the prior/all-the-prior hermeneutic circle level(s) of the subject-matter/domain-of-study need to be grasped beforehand; and this is basically because such a top-level is imbued with fundamental and new knowledge-reification priorities. While in many ways the unblurred/sharply-delineated nature of the natural sciences renders such a ‘hermeneutic circle of levels of understanding’ more or less very transparent, with regards to the blurriness of the social such a postmodern-thought ‘hermeneutic circle of levels of understanding’ rather requires increasing familiarisation, habituation and contemplation with regards to such critical texts and analyses (and as is particularly necessary with regards to the ‘parrhesiastic nature of philosophy that is behind the engendering/parrhesiastic-aestheticisation of underlying reference-of-thought reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation and thereof derived domains-of-study reified-knowledge as from the underlying reference-of-thought mathesis/motif/throwness-disposition’, and one’s intemporal solipsistic level of parrhesiastic contemplation is itself a decisive element for the capacity to appreciate-and-understand philosophical thought more than just an issue of technical acquisition of philosophical knowledge as of mere knowledge mathesis/motif/throwness-disposition). More critically, social and philosophical knowledge are no different from any other type of knowledge subject to ontological-primemovers-totalitative-framework as of inherent existence/existence-potency/ontological implications, as fundamentally requiring contemplative reification arising with human limited-mentation-capacity-deepening, with the implication that any philosophical, historial and social

conception of knowledge is not an imprimatur discretion/whim-of-thought exercise on the basis of 'relic-or-orthodoxy knowledge' induced disparateness-of-conceptualisation but rather implying a furtherance of the overall hermeneutic exercise involved in the advancement of all human knowledge as of totalising–renewing–realisation/re-perception/re-thought, wherein all such knowledge-reification is a hermeneutic circle involving: the analyst's/philosopher's baseline originary up-to-date knowledge-reification process/gesturing of the specific knowledge area as of inherent existence/existence-potency/ontological implications whether say with a natural science domain like hereditary as of its given specificity or philosopher's thought as of the general ontological comprehensiveness of philosophical thought; to then credibly analyse the coherence of the given prior contribution on the basis of the analyst's/philosopher's baseline originary up-to-date knowledge-reification process/gesturing of the specific knowledge area as of inherent existence/existence-potency/ontological implications as to what it brings and reflects about current knowledge-reification; and then the analyst's/philosopher's reflection on the shortfall in the ontological-performance of the given prior contribution while reflecting the epochal constraints for such a shortfall going beyond a construal of the given prior contribution as mere 'relic-or-orthodoxy knowledge'; and finally, the analyst's/philosopher's conceptual interpretation as its prospective contribution that is subject to validation and falsifiability as of inherent existence/existence-potency/ontological implications thus amenable to unification-of-explanations with other so-constructed knowledge-reification, that are well beyond a disparateness-of-conceptualisation orientation driven by the cultivation of mere imprimatur discretion/whim-of-thought 'relic-or-orthodoxy knowledge' disposition. It is important to appreciate here that a history of postmodern-thought criticism driven by populism, media operations, false intellectual engagement and intellectual-bad-faith, is particularly telling not about postmodern thinkers knowledge-reification epistemic-veracity

but rather ‘the knowledge-reification epistemic-veracity of such critics who often pride themselves on not understanding postmodern-thought then by a strange paradox have the knowledge to produce a profound criticism of postmodern-thought which they supposedly do not understand’. Even more critically, the question can be raised whether such critics profoundly appreciate the overall human knowledge-reification process/gesturing as herein articulated, and whether this very fact isn’t linked to the knowledge-reification methodological difficulties arising in many social domains-of-study ‘assuming a disparateness-of-conceptualisation epistemic-disposition that is in many ways poorly constrained to existential-reality’ with the result of their relative knowledge-reification passivity with regards to many a social issue ‘but for adventures into social commentary divorced from genuine operant knowledge-reification implications’; and in this regards could it be that the true ‘unsaid issue with suprastructuralism/postmodern-thought’ lies with its parrhesiastic emphasis on the displacement/decentering-of-the-human-subject for the right mindset-as-of-prospective-relative-ontological-completeness and thereof the knowledge for that given right mindset-as-of-prospective-relative-ontological-completeness as of projected existential-contextualising-contiguity in conflatedness, an issue that has always been a difficult knot throughout the human institutionalisation process but which inevitably has to be dealt with for the possibility of prospective human institutionalisation. Such weaknesses manifested by many a postmodern critic fundamentally points to an atomising/taking-to-pieces predisposition that poorly appreciates the projective-totalitative-implications involved in knowledge-reification, and is reflected in a lack of parrhesiastic and hermeneutic insight that ‘poorly grasp the philosophical analysis implications of the existential background/development of becoming-as-historiality, as if philosophy only started as of our present positivist era with a naivety that seems to imply that all-that-should-have-been,-that-is-and-that-will-be,-as-of-the-human-potential is as of a modern positivist closed-construct-

of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications in its given reference-of-thought mathesis/motif/throwness-disposition with no or poor insight of prior-and-prospective human becoming as of existential-contextualising-contiguity in conflatedness’; and so when it generally comes to analysing philosophical texts requiring a sense of parrhesia and hermeneutic insight. This lack is quite often reflected in such misconstrued analyses of traditional philosophical figures by a failure to understand the overall coherent narrative of such figures as of an atomising/taking-to-pieces predisposition to identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism ending up quite often claiming the incoherence of such figures and/or of their narrative accounts, and so in a ‘naïve insight’ arising exactly because the possibility for understanding requires the critic’s own parrhesiastic insight and then hermeneutic conceptualisation to then develop the capacity to grasp first of all such traditional philosophical figures underlying knowledge-reification process/gesturing and thus be able to understand how such knowledge-reification process/gesturing develops and why, and thus enabling the grasp not only of the accuracy of narrated accounts and notions but equally insight about the nuanced and covertly narrated accounts and notions, and all these while being informed by the immediate and broader underlying social background and implicated social and philosophical stakes of contention-and-confliction. In this regards, more than just the simpleminded analysis of traditional philosophical figures, such parrhesiastic and hermeneutic analytical insight actually converges with the epochal philosophical implications of existential-contextualising-contiguity in conflatedness and are actually more scientifically profound in that respect than meets the eye as to the fact that such analyses are more than just ‘archivistic retrieving’ but structurally/paradigmatically conceptualise the extended existential possibilities of falsifiability and validation in determining ontological-veracity as of a critical exercise of

totalising–renewing-realisation/re-perception/re-thought of ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’. In this regards, such hermeneutic and parrhesiastic depth of analysis is more profoundly driven beyond the specific accuracy of narrative accounts about traditional philosophical figures but goes on to analyse the structural/paradigmatic possibilities of overall human social transformation reflected in the narrative accounts of such traditional philosophical figures. For instance, the ontological-veracity of Socratic philosophy is rather more strongly based on the overall social implications and underlying narrative of its novel universalising idealisation that ‘runs-through/is-deflating’ by its event instigating traditional philosophical figures and schools, and as pursued by their successors including the stoics, cynics, etc. and as to its induced universalising idealisation transformative meaningfulness-and-teleology infrastructure impact with respect to societies of the Mediterranean including the Roman empire and subsequent religio-political developments. In another respect, it is often touted from an absolutising-identitive-constitutedness orientation that Socratic philosophers were institutionally ‘anti-democratic’, going particularly by the Platonic emphasis on philosopher kings, by the naivety and mere token that the prevailing ancient Athens ‘mob-rule democracy’ is of the same conceptual-patterning as our modern conception of democracy; but this is rather unnuanced with regards to what was a more pressing question of good governance in Ancient Athens and in the sense that such a ‘mob-rule democracy’ is not what prevails today and more critically the fact is the modern democracy model whether of direct or indirect manifestations is rather more critically informed by these criticisms of the Socratic philosophers (and not intellectual inspiration from any such mob-rule instigating sophists) wherein we rather place emphasis on ‘informed expertising and expertising-institutions for the comprehensive process of our modern democracy’ such that modern day

crises of democratic governance with regards to bad governance, institutional crisis, economic crisis or undesirable wars are rather generally construed as arising from ‘failure or sophistry of expertise and expertising-institutions’ in need of better expertising, and furthermore major political calamities of the 20th century leading to totalitarian governments and their instigation of genocides arose exactly due to misinformed populist democracy. Paradoxically, this insight validates the point advanced herein that human meaningfulness-and-teleology is critically more than just its mechanic-knowledge reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation but rather an organic-knowledge as of ontological-faith-notion-or-ontological-fideism anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection) that then feeds into prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation; emphasising as of any given registry-worldview’s/dimension’s specific limited-mentation-capacity that knowledge ‘more profoundly lies with the knowledge-reification gesturing and organic implications’, just as we cannot simplistically interpret the importance of Aristotelian science in terms of its constitutive elements as earth, water, air, fire and aether on a naïve absolutising-identitive-constitutedness basis from the vantage perspective of our modern positivism (as being at the receiving backend of the institutional-cumulation/institutional-recomposuring as of the human institutionalisation process) but rather the more critical insight lies with its novel and transformative universalising-classificatory knowledge-reification gesturing as opening up the possibility for prospective human reconceptualisation of science providing the backdrop from which modern science took off from the medieval times to the present. Likewise, the transformative nature of budding positivism more than just as garnered from the precised narrative accounts about budding positivist thinkers, lies more profoundly with its meaningfulness-and-teleology infrastructure impact on the developing enlightenment social developments and as this budding positivism metaphoricity epistemic-

ricochettingly/transepistemicityally brought about our positivism/rational-empiricism modern society. The analyses of human becoming so-implied as of parrhesiastic and hermeneutic development is in of itself a pure science that is epistemically-derivable as of ‘coherence/contiguity-of-superseding–oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’, and so beyond the specific accuracy of narrative accounts of traditional philosophical figures and besides such parrhesiastic and hermeneutic insight actually informs about the ontological-pertinence of such narrative accounts. In another respect, even with a most natural sense of parrhesia and hermeneutic insight, many a figure predispose to atomising/taking-to-pieces analysis, including founders of this orientation and other of its leading figures, have ultimately come to realise its relative underlying platitude with respect to prospective human transcendence-and-sublimity such that a prevailing notion has developed within as to imply philosophy doesn’t necessarily involve a transcendental-and-sublimity promise as of a nombrilistic institutional-being-and-craft predisposition; and as such a merely mathesis/motif/thrownness-disposition knowledge culture that ‘dodges potential parrhesiastic implications from its very own tentative analyses’ speaks of ‘a supposed intellectualism’ that does not lead prospective social progress as it becomes a sophistic problem for prospective social progress especially so when it originates from the ‘mother of all disciplines’. The fact is ‘philosophy just as any of its derived domain-of-study is not the ownership of any institutional culture’ but rather ‘a human abstract-property co-opted institutionally in deferential-formalisation-transference to the extend that that deference fulfils its promise of knowledge-reification for prospective human transcendence-and-sublimity’. In this regards, the transcendental-and-sublimity possibilities of 7.5 billion humans today and human posterity cannot be construed as hanging on such terms of institutional-being-and-craft dispositions prevailing in many a social domain-of-study and

even some of the natural sciences as of naïve science ideology, and so because beyond the temporal human disposition to contemplate of existence as of a-lifespan-of-existence-implications there need to be ‘human intemporal contemplation that abstractly lives/exists beyond a-lifespan-of-existence-implications to fetch for prospective possibilities of meaningfulness-and-teleology infrastructure’, something which a-lifespan-of-existence-implications projection as of a closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications is not structured/paradigmed to do! But then the phenomenological question arising with respect to the fact that many a social domain-of-study ‘tend to assume a disparateness-of-conceptualisation epistemic-disposition that is in many ways poorly constrained to existential-reality’, is how exactly does such lack of ‘cogent-unifying-operant-dynamics’ affect the realisation of the full knowledge-reification potentiality of domains-of-study as of their ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ as reflected by ontological-primemovers-totalitative-framework as of existence-potency? Insightfully, this fundamentally has to do with the contrastive implications in construing ontological-primemovers-totalitative-framework as of good-practice/epistemic-veracity and bad-practice/epistemic-impertinence for knowledge-reification; wherein objectifying unification-of-explanations as good-practice/epistemic-veracity of knowledge-reification involves the construal of ontological-primemovers-totalitative-framework as of ‘cogent-unifying-operant-dynamics of primemovers’ so-construed veridically as ‘ontological-primemovers-totalitative-framework as of existential-contextualising-contiguity conflatedness’, whereas disparateness-of-conceptualisation as bad-practice/epistemic-impertinence of knowledge-reification involves the construal of ontological-primemovers-totalitative-framework as ‘disparateness/disjointing of primemovers’ so-construed wrongly as

‘ontological-primemovers-totalitative-framework in constitutedness outside existential-contextualising-contiguity’. Thus ‘disparateness/disjointing of primemovers as disparateness-of-conceptualisation’ basically undermines the veridical underlying ‘ontological-totalitative-framework as of existential-contextualising-contiguity conflatedness’, and thus undermines aetiologisation/ontological-escalation predicative-effectivity. ‘Disparateness/Disjointing of primemovers as disparateness-of-conceptualisation’ undermines the inherent ‘cogent-unifying-operant-dynamics of primemovers’ reflecting existential-contextualising-contiguity conflatedness, such that the supposed exercise of knowledge-reification ends up ‘losing the edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising of axiomatic-constructs as reflective of existential-reality’; as of the flawed disparateness/disjointing of overall inherent existential-reality edginess/incisiveness, and further reflected variously as temporal over-emphasising and/or underemphasising/ignoring of primemovers reflecting ‘ontological-totalitative-framework as of existential-contextualising-contiguity conflatedness’, and so due to ‘human-subpotency presencing totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as well as lack of prospective intemporal parrhesiastic aestheticisation for prospectively renewed mathesis/motif/throwness-disposition’ thus undermining existence-potency projective-totalitative—implications of relative-ontological-incompleteness/relative-ontological-completeness. While in many a natural science ‘the high-and-immediate subjection to existential/experimental falsifiability and validation as of projective-totalitative—implications of conceptualisations’ acts as a strong constraining effect in relatively undermining ‘disparateness/disjointing of primemovers’ and rather encouraging ‘cogent-unifying-operant-dynamics of primemovers’ reflecting existential-contextualising-contiguity conflatedness, ‘the blurriness and remoteness of falsifiability and validation as of projective-totalitative—implications of conceptualisations’ in many a social domain-of-study relatively undermines

‘good-practice/epistemic-veracity selectiveness towards cogent-unifying-operant-dynamics of primemovers’ reflecting existential-contextualising-contiguity conflatedness, as the latter is inclined to an institutional-disposition that construes of the unification of disparateness-of-conceptualisation substitutively as merely ‘human-subpotency institutional-practice driven unification as of vague contrasting-and-comparison’ rather than as of ‘existence-potency driven unification-of-explanations as of nested-congruence/running-through/deflating—cogent-unifying-operant-dynamics—unification-of-explanations’. This equally explains this author emphasis that ontological-veridicality cannot be construed as the mutual-agreement as of human-subpotency but rather as of the constraining implications of existence-potency on human-subpotency. Human meaningfulness-and-teleology as of its ontological-performance is the outcrop of human-subpotency conscious-able aestheticisation of ecstatic-existence. Human aestheticisation speaks of the extensive manifest outcomes/outfits/shells—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestations of human meaningfulness-and-teleology as from: human ‘perceptive motif-manifest aestheticisation as of human conscious-able imagery’, ‘mere-tracial-and-symbolisation-manifest aestheticisation as of human conscious-able works-of-art/artistry’, and ‘signification-as-of-existential-reality-manifest aestheticisation as of human conscious-able intermediating ascriptivity’. Basically, human meaningfulness-and-teleology refers to human-subpotency conscious-able aestheticisation of ecstatic-existence as of varying human ontological-performance in veridically reflecting existence-potency. Underlying the ontological-performance of human-subpotency conscious-able aestheticisation of ecstatic-existence is both the human instigative-drivenness construed as originariness-parrhesia,—as-spontaneity-of-aestheticisation and human reproducibility—mathesis/motif/thrownness-disposition,—as-reproducibility-of-aestheticisation reflected-together in all human meaningfulness-and-teleology, as-of-their-inversely-varying-emphasis; and more specifically

‘as institutive of underlying reference-of-thought’, their implied spontaneity and reproducibility conjointly drive ‘human existence historicity-as-of-ontological-aesthetic-tracing creative aestheticisation of meaningfulness-and-teleology’. In this regards, originariness-parrhesia,—as—spontaneity-of-aestheticisation is marked by its greater taxing of human limited-mentation-capacity and specifically so as it ‘re-stakes/put-back-at-stake the capacity of human ontological-performance by its renewing spontaneity-of-aestheticisation’ over already set/established prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation. This inversely-varying-emphasis of originariness-parrhesia,—as—spontaneity-of-aestheticisation and reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation, given human limited-mentation-capacity implications, is reflected in all human aestheticisation construals whether as of reflex aestheticisation construct, instant aestheticisation construct, shallow aestheticisation construct, dragged-out aestheticisation construct, profound aestheticisation construct or subsuming aestheticisation construct with respect to sought out ontological-performance implications. The inevitability of this relation of originariness-parrhesia,—as—spontaneity-of-aestheticisation and reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation in all human aestheticisation of meaningfulness-and-teleology lies with the fact that, however human limited-mentation-capacity-deepening implications of more and more profound reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation given edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising for meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising, human-subpotency is ever always unduly prospectively-aporetic/prospectively-undecidable/prospectively-dilemmatic/prospectively-indeterminate/prospectively-deficient/prospectively-limitative/prospectively-constraining in its ontological-performance-including-virtue-as-

ontology construal of ecstatic-existence to which it only bears an ‘as of’ semblance (in any of its given presencing) that isn’t constraining in anyway on ‘the becoming of ecstatic-existence/existence-potency/transcendental-signifier’ such that ecstatic-existence/existence-potency/transcendental-signifier—becoming-spontaneity-implications-of-prospective-digression-as-of-its-ontologicalnormalcy/postconvergence,-to-which-latter-human-subpotency-projectively-conflates-to-in-order-to-overcome-our-prospective-epistemic-abnormalcy from such human-subpotency prior reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation ever always warrant prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation and thus the epistemic-ricochetting/transepistemicity prospective implications for renewed reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation; and so, in order to ‘prospectively elevate the ontological-performance of human aestheticisation of meaningfulness-and-teleology in the construal of existential-reality’ while overcoming the stalling in ontological-performance underlying the mere complexification of the prior reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation. This inversely-varying-emphasis of originariness-parrhesia,—as—spontaneity-of-aestheticisation and reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation is so-reflected with: prospective reactualising of ‘perceptive motif-manifest aestheticisation as of human conscious-able imagery’ (as derived from the reconstruing/reconsideration of both mere-tracial-and-symbolisation-manifest aestheticisation and signification-as-of-existential-reality-manifest aestheticisation); prospective reactualising of ‘mere-tracial-and-symbolisation-manifest aestheticisation as of as of human conscious-able works-of-art/artistry’, for instance in the dynamic reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation reflected with genres of music as of their originariness-parrhesia,—as—

spontaneity-of-aestheticisation setup/establishing in derivating re-originating; and prospective reactualising of ‘signification-as-of-existential-reality-manifest aestheticisation as of human conscious-able intermediating ascriptivity’, and this is more fundamentally with respect to human underlying ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ reflected by ontological-primemovers-totalitative-framework as of existence-potency, and so-construed from a philosophical depth of contemplation as of ‘coherence/contiguity-of-superseding—oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’. The latter (‘signification-as-of-existential-reality-manifest aestheticisation as of human conscious-able intermediating ascriptivity’) relates for instance to the human institutionalisation process: in the dynamic reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation reflected within the successive registry-worldviews/dimensions reference-of-thought-level ‘edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising for devolving meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising’ as closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications, and the originariness-parrhesia,—as—spontaneity-of-aestheticisation enabling the institutional-cumulation/institutional-recomposuring to occur by driving the human institutionalisation-process as of prospective intemporal parrhesiastic ontological-faith-notion-or-ontological-fideism reasoning-through/messianic-reasoning renewing of reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation for the succession of registry-worldviews/dimensions reference-of-thought. Obviously given human emotional-involvement, such intemporal parrhesiastic instigation of

prospective mathesis/motif/throwness-disposition is ascetic as it emphasises that the ontological-performance of human meaningfulness-and-teleology as of existence-potency validation/invalidation implications is not compromisable, and so over temporal nihilistic dispositions of prior mathesis/motif/throwness-disposition susceptible to compromising ontological-performance of human meaningfulness-and-teleology as of human-subpotency averaging-of-thought and sophistic dispositions. Ultimately, human meaningfulness-and-teleology as of ‘human-subpotency conscious-able aestheticisation of ecstatic-existence as of existence-potency’ is ever always a ‘more and more profound enlarging-framework of reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation’ which is patternly developed-and-anchored as from its driven originariness-parrhesia,—as—spontaneity-of-aestheticisation; and so at the thresholds of prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation

meaningfulness-and-teleology as of existence-potency validation/invalidation implications. It is important to grasp that the extensive manifest outcomes/outfits/shells—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestations of human meaningfulness-and-teleology aestheticisation (as of human

‘perceptive motif-manifest aestheticisation as of human conscious-able imagery’, ‘mere-tracial-and-symbolisation-manifest aestheticisation as of human conscious-able works-of-art/artistry’, and ‘signification-as-of-existential-reality-manifest aestheticisation as of human conscious-able mediating ascriptivity’), is reflective of underlying ‘hermeneutic reactualising as totalising—renewing-realisation/re-perception/re-thought’ human aestheticisation process with respect to living-development meaningfulness-and-teleology, institutional-development meaningfulness-and-teleology and Being-development/ontological-framework-expansion meaningfulness-and-teleology, and so epistemic-ricochettingly/transepistemicityally as of ‘more and more profound enlarging-framework of reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation’ with respect to unduly aporetic/undecidable/dilemmatic/indeterminate/deficient/limitative/constraining ontological-performance-including-virtue-as-ontology wherein originariness-parrhesia,—as—spontaneity-of-aestheticisation re-stakes/puts-back-at-stake the reconstruing of existential-reality despite the taxingness-of-originariness. This human aestheticisation process involves inversely-varying-emphasis of originariness-parrhesia,—as—spontaneity-of-aestheticisation and reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation (so-construed as of ‘high/low parrhesiastic-pressure-of-aestheticisation’ with respect to ‘existentially developing/becoming-as-of-social-integration-and-evolving relevant meaningfulness-and-teleology’), reflecting the ‘more and more profound enlarging-framework of reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation’. For instance with regards to living-development meaningfulness-and-teleology, human aestheticisation is reflected in childhood to adulthood social development wherein a child’s development as of its ‘existentially developing/becoming-as-of-social-integration-and-evolving relevant meaningfulness-and-teleology’ involves initially a more

direct focus on instant-sensations-and-carefreeness with the child aspiring for social-integration-and-evolving at successive stages as it grows up with an increasing sense of dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension in a ‘high parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’ as of its ‘more and more profound enlarging-framework of reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation’ that ultimately involves major stages like language acquisition achievement, schooling achievement, greater social autonomy and responsibility achievement, and developing into an adult with even greater dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension as for instance the notion of pleasure is increasingly substituted with that of work-and-pleasure, etc. It is critical to grasp here that such ‘living-as-of-human-personality-developing’ human aestheticisation of meaningfulness-and-teleology (‘high parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’ as of a ‘more and more profound enlarging-framework of reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation’) in existential-contextualising-contiguity conflatedness involving ‘hermeneutic reactualising as totalising—renewing-realisation/re-perception/re-thought’ always entails the three human aestheticisation manifest elements: ‘perceptive motif-manifest aestheticisation as of human conscious-able imagery’, ‘mere-tracial-and-symbolisation-manifest aestheticisation as of human conscious-able works-of-art/artistry’, and ‘signification-as-of-existential-reality-manifest aestheticisation as of human conscious-able mediating ascriptivity’. This human aestheticisation insight is informing about what exactly is meant by such major stages of human personality development like language acquisition achievement, schooling achievement, greater social autonomy and responsibility achievement, etc. in the sense that the underlying/induced ‘high parrhesiastic-pressure-of-

aestheticisation for social-integration-and-evolving’ already speaks of the ‘hermeneutic reactualising as totalising–renewing-realisation/re-perception/re-thought’ long before a child’s language acquisition achievement recognition, schooling achievement, greater social autonomy and responsibility achievement, etc. More specifically we can thus factor in that language as formally defined, and so specifically as this reflects a particular phonetic/written signification construct, is rather in reality the ‘teleological outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’ of a rather ‘complex sense of meaningfulness-and-teleology aestheticisation’ induced from a ‘high parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’ driven ‘hermeneutic reactualising as totalising–renewing-realisation/re-perception/re-thought’ that starts long before a child’s ‘recognised’ acquisition of any such ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’, as the child already has a ‘complex sense of meaningfulness-and-teleology aestheticisation’ before its ‘recognised’ acquisition of ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’, and that acquisition of a specific ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’ in due course (though annunciative) is rather secondary-and-prolongative of the child’s evolving underlying human ‘complex sense of meaningfulness-and-teleology aestheticisation’ as of its ‘high parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’. It is this underlying ‘complex sense of meaningfulness-and-teleology aestheticisation’ that is truly of ‘existentially developing/becoming-as-of-social-integration-and-evolving relevant meaningfulness-and-teleology’ ontological analysis in

existential-contextualising-contiguity conflatedness (and as it may then be reflected in practice with regards to its analysis on the basis of any specific ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’); and so, reflecting ‘its prior-not-recognised-as-language-acquisition stage’, ‘its recognised-as-language-acquisition stage’ and ‘its subsequent-deepening-of-recognised-as-language-acquisition stage and as this extends to specialised language or secondary language developments’. Beyond ‘living-development meaningfulness-and-teleology aestheticisation’ (as implied above with ‘living-as-of-human-personality-developing’ aestheticisation of underlying becoming ‘complex sense of meaningfulness-and-teleology aestheticisation’ as of the ‘more and more profound enlarging-framework of reproducibility—mathesis/motif/throwness-disposition,—as-reproducibility-of-aestheticisation’ of language), with human ‘institutional-development meaningfulness-and-teleology aestheticisation’ as of any given conventioned human ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’, such an insight about ‘high/low parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’ as to the implications of ‘more and more profound enlarging-framework of reproducibility—mathesis/motif/throwness-disposition,—as-reproducibility-of-aestheticisation’ is highly informing about ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’ and so highlighting the collective social ‘existentially developing/becoming-as-of-social-integration-and-evolving relevant meaningfulness-and-teleology’ in reflection of ‘institutional-development meaningfulness-and-teleology aestheticisation’ of any given conventioned human ‘language-as-phonetic/written-

signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’. It is important thus to grasp that ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’ is rather established institutionally as of the collective social human ‘complex sense of meaningfulness-and-teleology aestheticisation’ that drives human social institutions, and that while ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’ does reflect this collective social human ‘complex sense of meaningfulness-and-teleology aestheticisation’ rather as an ‘institutional-development meaningfulness-and-teleology outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation/conflatedness conceptions’ in existential-contextualising-contiguity conflatedness, it is ontologically-flawed for ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’ to be construed in constitutedness as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity (even as on occasion such an ontologically-flawed construal in identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism may be incidentally/accidentally/ad-hocly seemingly veridical but ontologically-flawed in principle from the perspective of the precedence over ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’ of the collective social human ‘complex sense of meaningfulness-and-teleology aestheticisation’ as of the ‘more and more profound enlarging-framework of

reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-
 aestheticisation’ of language, as of the implied ‘high parrhesiastic-pressure-of-
 aestheticisation for social-integration-and-evolving’ driven ‘hermeneutic reactualising as
 totalising—renewing-realisation/re-perception/re-thought’ in difference-conflatedness-as-
 totalitative-reification-in-singularisation-as-veridical-epistemic-determinism). This is so
 because ‘human projective-totalitative—implications purposefulness-reflexivity for
 prospective relative-ontological-completeness orientation’ supersedes any such human
 ‘institutional-development meaningfulness-and-teleology outcome/outfit/shell—construed-
 historically-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-
 manifestation/conflatedness conceptions like language’ in existential-contextualising-
 contiguity conflatedness (even as the latter had been precedently contributive to that
 purposefulness-reflexivity) such that such a human ‘institutional-development
 meaningfulness-and-teleology outcome/outfit/shell—construed-historially-as-of-the-
 specifically-aestheticised-incrusting/plating/coating-as-institutional-
 manifestation/conflatedness conceptions like language’ is more critically a passive ready-at-
 hand conception that is epistemically/notionally ever always critical only in existential-
 contextualising-contiguity conflatedness as it is adapted to ‘human projective-totalitative—
 implications purposefulness-reflexivity for prospective relative-ontological-completeness
 orientation’. This basically explains the constantly developing nature of human ‘institutional-
 development meaningfulness-and-teleology outcome/outfit/shell—construed-historially-as-
 of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-
 manifestation/conflatedness conceptions like language’ which are not truly absolutely of
 present-at-hand as to wrongly imply absolutising-identitive-constitutedness of
 meaningfulness-and-teleology in presencing (even as the privileged social conceptualisation
 of say language is as of ‘language as the complete possibilities of language as of an absolute

present conception usually of a privileged end-institution purpose’). Insightfully, we can garner that it is ‘human projective-totalitative-implications purposefulness-reflexivity for prospective relative-ontological-completeness orientation’ implied as of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating that fundamentally renders/makes human institutional-development meaningfulness-and-teleology outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation/conflatedness conceptions’ to be necessarily as of existential-contextualising-contiguity in conflatedness and not in constitutedness as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. In another respect, ‘living-development meaningfulness-and-teleology aestheticisation’ is of ‘high parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’ with regards to human childhood to adulthood personality development as of the forming individual need to assimilate/integrate human progressive cultural cumulation, and this is very much in contrast to ‘institutional-development meaningfulness-and-teleology aestheticisation’ that rather cumulatively holds-on-to and complexifies the culturally cumulated outcomes/outfits/shells—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestations—construed-as-institutional-manifestations from historically accrued ‘high parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’ construed as of human institutional-cumulation such as with regards to any specific ‘language-as-phonetic/written-signification-construct outcome/outfit/shell—construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-institutional-manifestation’. This will explain why the human institutionalisation process as of ‘institutional-development meaningfulness-and-teleology aestheticisation’ is ‘highly parrhesiastically economical’ as reflected in the overall

institutionalisation process ‘more and more profound enlarging-framework of reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation’; wherein only the perception of unduly aporetic/undecidable/dilemmatic/indeterminate/deficient/limitative/constraining ontological-performance-including-virtue-as-ontology of prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation epistemic-ricochettingly/transepistemicityally elicits ‘high parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’. This is so because given the taxingness-of-originariness any such ‘high parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’ has to resolve considerably unduly aporetic/undecidable/dilemmatic/indeterminate/deficient/limitative/constraining ontological-performance-including-virtue-as-ontology of prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation for such ‘institutional-development meaningfulness-and-teleology aestheticisation’ underlying ‘hermeneutic reactualising as totalising—renewing-realisation/re-perception/re-thought’ to be worth the epistemic-ricochetting/transepistemicity effort, with the preference for any such effort rather directed at the complexification of the prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation. This will explain for instance why as of the furtherance of the human institutionalisation process, the ‘institutional-development meaningfulness-and-teleology aestheticisation’ with regards to language development hasn’t warranted any ‘high parrhesiastic-pressure-of-aestheticisation for social-integration-and-evolving’ with respect to new language creation but this has rather been directed towards language complexification as of advancing human knowledge and construction-of-the-Self. In the bigger picture, the above human meaningfulness-and-teleology aestheticisation analysis (and as reflected specifically with language acquisition) is

reflective of the fact that human-subpotency specific panintelligibility, reflected in human underlying ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence, is ultimately potentiated as of human ‘intemporal ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen for originary/as-of-event reasoning-through/messianic-reasoning’. This instigation of human aestheticisation of meaningfulness-and-teleology so- reflected in ‘human existence historicity-as-of-ontological-aesthetic-tracing creative aestheticisation of meaningfulness-and-teleology’ driven as of originariness-parrhesia,—as-spontaneity-of-aestheticisation in renewing reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation involves an ‘overall flux of human meaningfulness-and-teleology of varying temporal-to-intemporal ontological-performances’ wherein such a flux construed as human aporetic dissemination is confronted to ‘existence-potency validative/invalidative selectivity’ enabling living-development meaningfulness-and-teleology, institutional-development meaningfulness-and-teleology and Being-development/ontological-framework-expansion meaningfulness-and-teleology; and thereof reflected in the second-natured institutionalisation framework of the given registry-worldview suprasocial-construct and its averaging-of-thought. It is important here to grasp that despite any human registry-worldview/dimension totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag ontologically-flawed inclination to think otherwise, its given suprasocial-construct and its given averaging-of-thought ‘are not the absolute possibility’, as of their induced reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation, for the prospective aestheticisation of human intemporal-as-ontological meaningfulness-and-teleology given that such suprasocial-construct and averaging-of-thought are effectively rather second-natured institutionalisation outcome of reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-

aestheticisation. In this regards, the more profound basis for prospective generation of human intemporal-as-ontological meaningfulness-and-teleology arises as of transepistemic/epistemic-ricochetting originariness-parrhesia,—as—spontaneity-of-aestheticisation that renews reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation as of prospective existence-potency validation/invalidation implications. This underlying insight is reflective of the fact that ‘second-naturedness is no substitute for originariness as of the projective-totalitative—implications of relative-ontological-incompleteness/relative-ontological-completeness’, as originariness is ever always about ‘intemporal parrhesiastic seeding-promise anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection) of the registry-worldview/dimension meaningfulness-and-teleology beyond just its mechanical mathesis/motif/throwness-disposition for the possibility of further prospective parrhesiastic instigation as from ontological-faith-notion-or-ontological-fideism’ in contrast to the essentially mechanical/mere-form of mathesis/motif/throwness-disposition of second-naturedness. This fundamental originariness and second-naturedness conundrum of the human institutionalisation process is reflected by the fact that the human Self is ever always in disseminative constructiveness/destructuring defining its given registry-worldview/dimension shiftiness-of-the-Self as of ‘a sub-existence-potency/human-subpotency disposition to construe as of full existence-potency at its uninstitutionalised-threshold’ its prior second-natured reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation; and so in obfuscation and pedantically. The possibility for prospective human transcendence-and-sublimity has ever always been able to arise at such uninstitutionalised-thresholds of registry-worldviews/dimensions not by a ‘false pretense’ that the ontologically-veridical underlying issue of prospectively-aporetic/prospectively-undecidable/prospectively-dilemmatic/prospectively-indeterminate/prospectively-

deficient/prospectively-limitative/prospectively-constraining ontological-performance-
 including-virtue-as-ontology of prior reproducibility—mathesis/motif/throwness-
 disposition,—as—reproducibility-of-aestheticisation in the construal of ecstatic-existence, is
 one in want of candid analysis as of the very same prior reproducibility—
 mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation but rather the
 ontological-veracity of originariness-parrhesia,—as—spontaneity-of-aestheticisation for
 prospective/renewed reproducibility—mathesis/motif/throwness-disposition,—as—
 reproducibility-of-aestheticisation; as perfectly understood by the Socratic philosophers
 advancing of universalising idealisation relative to the Ancient sophists non-universalising
 inclination, budding positivists/rational-empiricists advancing of positivism/rational-
 empiricism relative to the medieval-scholastics pedantic dogmatism and equally as of our
 positivism—procrypticism this author construes practices of disparateness-of-
 conceptualisation not constrained to existence-potency but rather institutionalised imprimatur
 as of institutional-being-and-craft as intellectually wanting and in need of the advancing of
 deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought reference-of-
 thought-level nested-congruence/running-through/deflating—cogent-unifying-operant-
 dynamics—unification-of-explanations edginess/incisiveness—of-
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising. In other words, the
 uninstitutionalised-thresholds of all registry-worldviews/dimensions as of their shiftiness-of-
 the-Self are the aporetic point at which their languages collapse into ‘wooden languages’ that
 are from a prospective perspective not profound but mechanical/mere-form
 mathesis/motif/throwness-disposition thus inherently raising up the underlying ontological-
 veracity issue of their prospectively-aporetic/prospectively-undecidable/prospectively-
 dilemmatic/prospectively-indeterminate/prospectively-deficient/prospectively-

of prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation that can only be dealt with as of prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation so-construed as ‘intemporal parrhesiastic seeding-promise anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection) of the registry-worldview/dimension meaningfulness-and-teleology beyond just its mechanical mathesis/motif/throwness-disposition for the possibility of further prospective parrhesiastic instigation as from ontological-faith-notion-or-ontological-fideism’. The fact is that the possibility for prospective institutionalisation transcendence-and-sublimity is ever always underdetermined, as between prior reasoning-from-results/afterthought and prospective reasoning-through/messianic-reasoning is the ‘aporia of underdetermined madness’ that human ontological-faith-notion-or-ontological-fideism anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection) renders possible as prospective ontological-veracity is only then epistemic-ricochettingly/transepistemicityally salvageable as of existence-potency validation/invalidation implications as of ontological-primemovers-totalitative-framework. That is, between reasoning—as-reasoning-from-results/afterthought and reasoning—as-reasoning-through/messianic-reasoning is ‘aporetic underdetermined madness’ that renders a pretense of hanging unto prior reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation more like ‘a pretense of already grasping the complete implications of ecstatic-existence while ignoring/not-registering the epistemic-ricochetting/transepistemicity implications of prospective relative-ontological-completeness’ and rather speaks in effect of a nihilistic closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications; and this temporal nihilism at uninstitutionalised-thresholds has ever always been associated with a corresponding intemporal asceticism for opened-construct-of-meaningfulness-and-teleology (not partaking

as of transversality/logical-incongruence in any such ‘wooden language’) that is the sine qua non for the habituation of the possibility of prospective transcendence-and-sublimity. Overcoming this ‘aporia of underdetermined madness’ despite human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, has ever always been the absolutely determinative possibility for the fulfilment of the construction-of-humanity-as-of-its-developing-construction-of-the-Self enabling human transcendence-and-sublimity to arise; as its overcoming has ever always elicited humankind’s ability to ascetically go beyond its ‘prior comfort zone’ to reconstrue its future emancipatory possibilities. In this regard, the idea of ontological-faith-notion-or-ontological-fideism anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection), however its recurrent outlier intemporal instigation as of originariness-parrhesia,—as—spontaneity-of-aestheticisation across the human institutionalisation process, speaks to the fact that the sense of prospective base-institutionalisation in prior recurrent-utter-uninstitutionalisation is potentially an actionable possibility as of the latter’s ‘parrhesiastic structure’ construed as ‘its-given-developed-level-of-Will/Spirit in dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension’, and likewise between base-institutionalisation and universalisation, non-positivism/medievalism and positivism/rational-empiricism, and prospectively positivism—procrypticism and deprocrypticism. But then across the human institutionalisation process what is easily lost is exactly ‘this most vital but brittle ontological-faith-notion-or-ontological-fideism anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection) element of meaningfulness-and-teleology instigating the successive transcendences-and-sublimity’, as the very renewing of reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation seems to induce a ‘deferment of human instinctual responsibility’ as to

temporally imply ‘human ontological-performance strategies are valid by their mechanical/mere-form alignment to any such mathesis/motif/throwness-disposition’ inducing human naïve temporal-intemporality as of the shiftiness-of-the-Self of the corresponding registry-worldview/dimension wherein the eliciting of a mutual sense of temporality within such a framework as of totalising–self-referencing–syncretising/circularity/interiorising/akrasiatic-drag is wrongly reconstrued as ‘intemporality’ (but then we can garner from our vantage modern positivism perspective that such defective process in prior registry-worldviews/dimensions effectively spoke of their corresponding uninstitutionalised-threshold and the same does applies in our own respect from a prospective perspective). In this regards the prospective deprocrypticism registry-worldview/dimension, as of its notional-deprocrypticism reflexivity of this human limited-mentation-capacity instigating ‘aporetic deficiency of ontological-performance’ along the overall human institutionalisation process, effectively elicits originariness-parrhesia,—as—spontaneity-of-aestheticisation but then as of its ‘reference-of-thought-level nested-congruence/running-through/deflating—cogent-unifying-operant-dynamics—unification-of-explanations edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising’, it is not receptive to a human dephasing shiftiness-of-the-Self as of ‘deferment of human instinctual responsibility’ that dehistorialises humankind into Being/Existential homelessness as a vague temporal-to-intemporal nihilism wherein we wrongly deify our presencing totalising–self-referencing–syncretising/circularity/interiorising/akrasiatic-drag while paradoxically failing to articulate a coherent existential narrative underlying human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor involving a developing historicity/ontological-aesthetic-tracing of human recurrent destructuring-threshold-of-ontological-performance/uninstitutionalised-threshold and its superseding with

human recurrent constructiveness-of-ontological-performance, and so beyond just the nombrilism of our lifespans. This orientation is very much the peculiarity of deprocrypticism as in reality all the other prior registry-worldviews/dimensions are notionally/epistemically various levels of notional-procrypticism-or-notional-disjointedness-as-of-reference-of-thought (in successive relative-ontological-completeness as of increasing notional-deprocrypticism or increasing notional-preempting-of-disjointedness-as-of-reference-of-thought) but it is prospective deprocrypticism ontological-faith-notional-or-ontological-fideism anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection) specific originariness-parrhesia,—as—spontaneity-of-aestheticisation that converges with its reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-aestheticisation and reflects an indistinctness between the two that overcomes human shiftiness-of-the-Self undermining ‘deferment of human instinctual responsibility’ in perpetuating the human transcendence-and-sublimity narrative; and so-construed as implying that deprocrypticism as of its protensive—self-consciousness achieves an epistemic-ricochetting/transepistemicity ‘explanation of everything’ as implied with human limited-mentation-capacity-deepening so-reflected with the human institutionalisation process’s anamnestic-residuality as to difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative—implications successiveness of registry-worldviews/dimensions involving underlying successive construction-of-the-Self enabling successive human knowledge-reification capacity. This is achieved rather as of deprocrypticism self-conscious construing of human ontological-performance of virtue at constructiveness-of-ontological-performance and vices-and-impediments at destructuring-threshold-of-ontological-performance as inherently defined structurally/paradigmatically by ‘the projective-totalitative—implications of the institutionalisation process in reflection of underlying human limited-mentation-capacity as

of human—aporia/undecidability/dilemma/ought-
 indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-

 ontological-completeness implications induced/spawned/hatched/emerged difference-
 conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism
 as instigating both human constructiveness-of-ontological-performance and human
 destructuring-threshold-of-ontological-performance across the successive registry-
 worldviews/dimensions; thus eliciting the construal of aetiologisation/ontological-escalation
 as of a reflection of human-subpotency panintelligibility-as-reifying-and-empowering-
 reflexivity-of-ecstatic-existence in structurally/paradigmatically upholding human virtue at
 constructiveness-of-ontological-performance and undermining human vices-and-
 impediments/destructuring-threshold-of-ontological-performance’. This
 structural/paradigmatic process orientation with regards to human virtue at constructiveness-
 of-ontological-performance and vices-and-impediments at destructuring-threshold-of-
 ontological-performance overrides/supersedes the naïve/ontologically-flawed traditional
 orientation as of absolutising-identitive-constitutedness/identitive-constitutedness-as-totality-
 dereification-in-dissingularisation-as-flawed-epistemic-determinism failing to grasp the
 dynamism implied in the Socratic knowledge-is-virtue insight when it attributes to
 individuals inherence of good-naturedness or bad-naturedness and ‘failing to construe of the
 knowledge-driven ontologically-pertinent structural/paradigmatic process as of relative-
 ontological-incompleteness/relative-ontological-completeness implications that then reflects
 the manifestation of human virtue at constructiveness-of-ontological-performance and human
 vices-and-impediments at destructuring-threshold-of-ontological-performance’. The bigger
 point here is that it is at the edginess/incisiveness—of-
 apriorising/intelligibilitysetup/measuringinstrument/axiomatising of

deprocrpticism/preempting-of-disjointedness-as-of-reference-of-thought as ‘point of projective-totalitative-implications of the human institutionalisation process’ that one can reflect upon the ‘notional-procrpticism/notional-disjointedness as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism’ of our procrpticism-positivism meaningfulness-and-teleology in order to construe its induced virtue at constructiveness-of-ontological-performance and vices-and-impediments at destructuring-threshold-of-ontological-performance as of living-development, institutional-development and Being-development/ontological-framework-expansion. We can thus appreciate that just as an absolutising-identitive-constitutedness/identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism assessment of the virtue and vices-and-impediments of individuals in any of the preceding registry-worldviews/dimensions will find them relatively wanting/deficient with regards to our positivism, this ‘is not decisively/critically the case on the basis that we are inherently better individuals than any of the prior registry-worldviews/dimensions individuals’ but rather a question of us being at the vantage backend of the institutional-cumulation/institutional-recomposuring as of the human institutionalisation process relative-ontological-incompleteness/relative-ontological-completeness implications of limited-mentation-capacity-deepening, pointing out that what is decisive/critical for inducing human virtue over vices-and-impediments rather lies with the assessment of any such registry-worldview/dimension prospective ‘point of projective-totalitative-implications of the human institutionalisation process’ as so-implied by the prospective registry-worldview/dimension edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising as it reflects upon the preceding registry-worldview/dimension ‘notional-procrpticism/notional-disjointedness as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism’ in order to

construe/assess/supersede by its induced virtue at the prospective constructiveness-of-
 ontological-performance over vices-and-impediments at the destructuring-threshold-of-
 ontological-performance as of living-development, institutional-development and Being-
 development/ontological-framework-expansion. The overall emphasis herein of the
 conjunction between psychopathic manifestation with the human institutionalisation process
 arises in the sense that as previously articulated the ‘postlogism/psychopathy-as-of-

 manifestation of any given registry-worldview/dimension is just a ‘difference-in-

manifestation is rather as of an ‘inordinarily/unexpectedly/anormally lower-threshold of human limited-mentation-capacity in failing dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension for living-development’ that is just a difference-in-kind/notional-contiguity-or-epistemic-contiguity/difference-in-aposteriorising-or-logicising to the registry-worldview’s/dimension’s ‘ordinary/expected/assumed-normal higher-threshold of human limited-mentation-capacity in failing dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension for living-development’ considered as ‘prelogism/dialectically-thinking constructiveness-of-ontological-performance’ manifestation. The point is that ‘ecstatic-existence doesn’t have any inherent/supposed limit of manifestation tied-down/bogged-down to human limited-mentation-capacity as of its relative-ontological-incompleteness’ (successively as of recurrent-utter-uninstitutionalisation, base-institutionalisation–ununiversalisation, universalisation–non-positivism/medievalism and our positivism–procrypticism), such that the implied difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism between the prior and prospective registry-worldviews/dimensions involving prospective human limited-mentation-capacity-deepening apriorising/intelligibilitysetup/measuringinstrument/axiomatising construal of ecstatic-existence, as ever the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, so-implied from the prospective registry-worldview/dimension transcendence-and-sublimity constructiveness-of-ontological-performance exposes the prior registry-worldview/dimension destructuring-threshold-of-ontological-performance/uninstitutionalised-threshold veridically as of manifest

‘dialectically-dementing-as-of-postlogism/psychopathy-(as-of-the-‘dementing-qualia-schema’-at-its-uninstitutionalised-threshold-it-wrongly-implies-as-nondescript/ignorable-void) at the registry-worldview’s/dimension’s destructuring-threshold-of-ontological-performance’ ontologically-flawed inordinary/unexpected/anormal catching-up-by-extrinsic-attribution-for-social-functioning-and-accordance as from the edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising of the prospective registry-worldview/dimension for aposteriorising/intelligising/measuring/logicising cognisant-and-integrative social meaningfulness-and-teleology’ so-construed as difference-in-nature/notional-discontiguity-or-epistemic-discontiguity/difference-in-apriorising-or-axiomatising. Hence, ‘all the human home that exists’ is as of the full implications of the perpetuation of the human institutionalisation process as it explains what is the human and its becoming beyond any epochally blinded nombrilism. But then while realistically the human institutionalisation process is driven as of human solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity and second-natured institutionalisation dispositions with respect to the fact that the human averaging-of-thought disposition of all registry-worldviews/dimensions is very much capable of countenancing however fragile prospective relative-ontological-completeness implications; that is, until when that fragility is exploited by temporal sophistic dispositions in wrongly and cynically implying the equivalency of prospective intemporal-projection and prior temporal-projection as to when ancient Sophists elicit the contemplation of Socratic philosophers intemporal universalising idealisation narrative in terms of their epochal averaging-of-thought non-universalising narrative, as to when medieval-scholasticism fail to engage prospective budding positivism/rational-empiricism meaningfulness-and-teleology and harkening rather to its dogmatism pedantry, and as to when modern day intellectual muddlement seems to be blinded to the implication of ‘prospective event/aporetic thinking

implied deprocrypticism/pre-empting-of-disjointedness-as-of-reference-of-thought' and take the route of eliciting disparateness-of-conceptualisation unconstrained to existential-reality as of ontological-primemovers-totalitative-framework such that even the idea of a human existential narrative tends to be put into question together with a tendency to question the pertinence of historically transformative figures and movements, and so in a 'disparateness-of-conceptualisation impotence-inducing exercise' (as to the fact that where there is uncertainty, whether real or unreal, ontological implications cannot then be effectively derived). The manifest reality of human ontologisation/ontological-veracity/aestheticisation-towards-ontology is thus one that is ever subontological as of human—aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor. This is reflected inherently in the fact that given human limited-mentation-capacity, human aestheticisation is ever always reactualising/recomposuring towards a fully ontologising mathesis/motif/throwness-disposition as of edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising; that is, human aestheticisation as from prospective originariness-parrhesia,—as—spontaneity-of-aestheticisation instigation develops by recomposuring as from 'perceptive motif-manifest aestheticisation as of human conscious-able imagery' to 'mere-tracial-and-symbolisation-manifest aestheticisation as of human conscious-able works-of-art/artistry' and then to 'signification-as-of-existential-reality-manifest aestheticisation as of human conscious-able intermediating ascriptivity' with the latter achieving the given registry-worldview/dimension mathesis/motif/throwness-disposition ontologisation/ontological-veracity/aestheticisation-towards-ontology. Basically, human aestheticisation, in reflection of human limited-mentation-capacity and human limited-mentation-capacity-deepening possibility, ever always involves a 'human disposition in portraying/reflecting/construing existence/ontological-

veracity' as of 'presencing finitism of aestheticisation' and as of 'aporetic
 absencing/transcending infinitism of aestheticisation possibilities' which then define together
 the aestheticisation specificity of the culturally cumulated outcomes/outfits/shells—
 construed-historially-as-of-the-specifically-aestheticised-incrusting/plating/coating-as-
 institutional-manifestations—construed-as-institutional-manifestations explaining why
 human institutional constructs like language, cultural practices, etc. are inherently of their
 given cultural specificness. In this regards, the social-setup in its furtherance of human
 aestheticisation towards human ontologising of meaningfulness-and-teleology is ever always
 drawn between 'presencing finitism of aestheticisation' rather in constitutedness as of its
 reproducibility—mathesis/motif/throwness-disposition,—as—reproducibility-of-
 aestheticisation and 'aporetic absencing/transcending infinitism of aestheticisation
 possibilities' rather in conflatedness as of instigative originariness-parrhesia,—as—spontaneity-
 of-aestheticisation; explaining the structural/paradigmatic nature of human living-
 development, institutional-development and Being-development/ontological-framework-
 expansion as to the respective possibility of either a non-transcendental closed-construct-of-
 meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-
 prospective-apriorising-implications and a transcendental opened-construct-of-
 meaningfulness-and-teleology with regards to reference-of-thought-level
 edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising.
 The prospect for prospective transcendence-and-sublimity is thus in many ways outlier to any
 given social-setup by the mere token that it more critically construes of
 ontologisation/ontological-veracity/aestheticisation-towards-ontology as being within the
 framework of its value-construct 'presencing finitism of aestheticisation' and so in
 incoherence with outlying implied 'aporetic absencing/transcending infinitism of
 aestheticisation possibilities'; explaining why transcendence-and-sublimity cannot be

construed as of incrementalism-in-relative-ontological-incompleteness of ‘presencing finitism of aestheticisation’ but rather as maximalising-recomposuring-for-relative-ontological-completeness/transvaluating of ‘aporetic absencing/transcending infinitism of aestheticisation possibilities’. Basically, ‘aporetic absencing/transcending infinitism of aestheticisation possibilities’, as of existence-potency value-ricochetting/transvaluation—as-to-prospective-relative-ontological-completeness implications necessarily imply the prospective devaluing of the ‘presencing finitism of aestheticisation’ implied hierarchisation-of-values. However, the reality as of human limited-mentation-capacity is that however a seemingly universal disposition for ontologisation/ontological-veracity/aestheticisation-towards-ontology furtherance, such a disposition is not open-ended as reflected at any destructuring-threshold-of-ontological-performance as of prior mathesis/motif/thrownness-disposition, in the sense that the human investment as of ‘presencing finitism of aestheticisation’ in prior reproducibility—mathesis/motif/thrownness-disposition,—as—reproducibility-of-aestheticisation implies that it can be rather inclined to reject/ignore prospective ‘aporetic absencing/transcending infinitism of aestheticisation possibilities’ of ontologisation/ontological-veracity/aestheticisation-towards-ontology, and so where this discrepancy is sophistically perceived as advantageous to social-stake-contention-or-confliction (as manifested with sophistic mediums, shamans, witchdoctors, ancient Sophists, medieval-scholasticism pedants and modern day intellectual muddlement). In this regards, the value-ricochetting/transvaluation—as-to-prospective-relative-ontological-completeness implications of a social-setup epistemic-ricochetting/transepistemicity hierarchisation-of-values (rather in totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag) is what provides the prospect for deflating/undermining its given vices-and-impediments as from prospective transcendence-and-sublimity. The fact that all registry-worldviews/dimensions are subontological as of their ‘presencing finitism of aestheticisation’

with respect to prospective ‘aporetic absencing/transcending infinitism of aestheticisation possibilities’ (so-reflected in the transcendental advancing of ontologisation/ontological-veracity/aestheticisation-towards-ontology as of universalising idealisation rather as from outlier Socratic philosophers over the ancient mythologies and cultism of the technically more potent Ancient Egyptians and Persians, etc., the transcendental advancing of ontologisation/ontological-veracity/aestheticisation-towards-ontology by outlier budding positivists over medieval Europe scholasticism pedantry notwithstanding its medieval institutional hegemony, likewise modern day disjointedness-as-of-reference-of-thought muddlement involving institutional-being-and-craft speaks of our uninstitutionalised-threshold requiring prospective deprocrypticism transcendental advancing of ontologisation/ontological-veracity/aestheticisation-towards-ontology as of ‘existential-contextualising-contiguity conflatedness of parrhesiastic and mathesis/motif/thrownness-disposition in organic coherence and as ultimately reflecting the panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence of all human knowledge’) points out that all registry-worldviews/dimensions tend to assume a subontological equilibrium as their prospective destructuring-threshold with regards to their given mathesis/motif/thrownness-disposition; with the suprasocial-construct, averaging-of-thought and sophistry ‘presencing finitism of aestheticisation’ dynamics seemingly substituting in effect for prospective ontologisation/ontological-veracity/aestheticisation-towards-ontology as of ‘aporetic absencing/transcending infinitism of aestheticisation possibilities’. The projective-totalitative-implications of relative-ontological-incompleteness/relative-ontological-completeness of the human institutionalisation process critically and insightfully highlights, in reflection of inherent human–aporia/undecidability/dilemma/ought-indeterminacy/deficiency/limitation/constraint—imbued-temporal-to-intemporal-dispositions—existentialism-form-factor, that ‘all registry-worldviews/dimensions are ever

always at the crossroads of knowledge-reification and sophistry as the latter is facilitated by underlying social averaging-of-thought as of the implications of human limited-mentation-capacity'; and so, as to the confluence of 'prospective parrhesiastic instigative intemporal ontological-faith-notion-or-ontological-fideism (inherently so as all prospective knowledge in inherently initially underdetermined thus depended at its instigation on ontological-faith-notion-or-ontological-fideism, and is only prospectively validated as of ontological-primemovers-totalitative-framework in reflection of existence-potency/the-transcendental-signifier) parrhesiastic seeding-promise of prospective knowledge-reification mathesis/motif/thrownness-disposition' as of reasoning-through/messianic-reasoning induced constructiveness-of-ontological-performance and 'temporal/sophistic-as-ontologically-flawed/ontological-bad-faith reproducibility seeding-misprising as mere-form of the prospective knowledge-reification mathesis/motif/thrownness-disposition' as of reasoning-from-results/afterthought induced destructuring-threshold-of-ontological-performance. This structurally/paradigmatically defined existential framework of knowledge-reification of any given registry-worldview/dimension is known as its 'parrhesiastic structure' and is intimately associated with its given shiftiness-of-the-Self. The 'parrhesiastic structure' speaks of 'a-given-developed-level-of-Will/Spirit in dispensing-with-immediacy-for-relative-ontological-completeness-by-reification/contemplative-distension' that then allows for the corresponding 'mathesis/motif/thrownness-disposition reference-of-thought-level edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising for meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising'. This is fundamentally what explains why the state of recurrent-utter-uninstitutionalisation cannot all of a sudden start reasoning as of base-institutionalisation, and the latter as of universalisation, the latter as of positivism/rational-empiricism and prospectively the latter as of deprocrypticism. The overall point here is that it is the 'parrhesiastic structure' as of parrhesiastic-aestheticisation that

‘invents/creates’ the prospective registry-worldview’s/dimension’s
 mathesis/motif/throwness-disposition, and carries the ‘intemporal parrhesiastic seeding-
 promise anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection) of the
 registry-worldview/dimension meaningfulness-and-teleology beyond just its mechanical
 mathesis/motif/throwness-disposition for the possibility of further prospective parrhesiastic
 instigation as from ontological-faith-notion-or-ontological-fideism’. But then human
 temporality loses sight of this ‘parrhesiastic instigative intemporal ontological-faith-notion-
 or-ontological-fideism parrhesiastic seeding-promise of prospective knowledge-reification’
 and assumes at the given registry-worldview/dimension destructuring-threshold-of-
 ontological-performance ‘an absolutising disposition as of temporal/sophistic-as-
 ontologically-flawed/ontological-bad-faith reproducibility seeding-misprising as mere-form
 of mathesis/motif/throwness-disposition reflected in the absolutising of normativities,
 conventions, practices, etc.’ without or a poor sense of the ‘intemporal parrhesiastic seeding-
 promise anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection) of the
 registry-worldview/dimension meaningfulness-and-teleology beyond just its
 mathesis/motif/throwness-disposition’ (that is, as the shiftiness-of-the-Self loses sight of
 ‘Will/Spirit parrhesiastic instigative dispensing-with-immediacy-for-relative-ontological-
 completeness-by-reification/contemplative-distension’). Such an ‘absolutising disposition
 with the registry-worldview/dimension mere-form of mathesis/motif/throwness-disposition’
 is what underlies disparateness-of-conceptualisation at a registry-worldview/dimension
 destructuring-threshold-of-ontological-performance ‘wherein normativities, conventions,
 practices, etc. as second-natured institutionalised constructs assume absolute determinism
 that flawly override any parrhesiastic totalising–renewing-realisation/re-perception/re-
 thought of ontological-veracity’, and explains the Sophists—ideal-type-or-individuation non-
 universalising inclination on the basis that that social practice is absolutely deterministic of

meaningfulness-and-teleology and the medieval-scholasticism-pedants—ideal-type-or-individuation non-positivising/medievalism dogma on the basis that that social practice is absolutely deterministic of meaningfulness-and-teleology, as well as present day overall intellectual muddlement as of institutional-being-and-craft normativities, conventions, practices, etc. in ‘procrypticism/disjointedness-as-of-reference-of-thought mathesis/motif/thrownness-disposition as of its lack of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought as reference-of-thought-level nested-congruence/running-through/deflating—cogent-unifying-operant-dynamics—unification-of-explanations edginess/incisiveness—of apriorising/intelligibilitysetup/measuringinstrument/axiomatising’ on the basis that such social practices are absolutely deterministic of meaningfulness-and-teleology. In other words, adherence to prospective knowledge-reification as of human temporality arises as of the existentially constraining untenability of positive-opportunism induced mathesis/motif/thrownness-disposition but doesn’t necessarily elicits intemporal parrhesiastic seeding-promise anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection) for prospective knowledge-reification as of ‘a weak social mental-reflex that any parrhesiastic totalising–renewing-realisation/re-perception/re-thought of ontological-veracity will put in question prior mathesis/motif/thrownness-disposition as can be reflected in normativities, conventions, practices, etc.’, and this is what explains the prevalence of disparateness-of-conceptualisation at uninstitutionalised-thresholds as ‘mere-form of mathesis/motif/thrownness-disposition’ temporally takes pride-of-place and so unconstrained to prospective existence-potency validation/invalidation implications ‘as of parrhesiastic totalising–renewing-realisation/re-perception/re-thought of ontological-veracity’ thus providing the framework for intellectual-bad-faith and sophistry hanging on unto second-natured normativities, conventions, practices, etc. thus rendering prospective transcendence-

and-sublimity impotent. Thus 'the possibility for prospective human transcendence-and-sublimity is ever always a renewed parrhesiastic structure' that as of its reasoning-through/messianic-reasoning can overcome such a closed-construct-of-meaningfulness-and-teleology-as-of-'nondescript/ignorable-void'-with-regards-to-prospective-apriorising-implications, and so counterintuitively to any given registry-worldview/dimension notion/sense of transcendence-and-sublimity as rather occurring along its already second-natured established mathesis/motif/throwness-disposition normativities, conventions, practices, etc.; and this very much explains why the successive registry-worldviews/dimensions are successive parrhesiastic instigation of renewed mathesis/motif/throwness-disposition. Further the 'renewed parrhesiastic structure' in undermining prior 'reference-of-thought-level and thus reference-of-thought-devolving-level of disparateness-of-conceptualisation' implies 'reference-of-thought-level and thus reference-of-thought-devolving-level unification-of-explanations as of existence-potency', and not 'unification as of human-subpotency elicited contrasting-and-comparison' as the latter just leads to a complexification of disparateness-of-conceptualisation along the very same mathesis/motif/throwness-disposition as of an ontologically-flawed human-subpotency dialogical-equivalency that 'allows the mortals that we are to average our thoughts' rather than existence-potency imposing ontological-veracity as of prospective ontological-primemovers-totalitative-framework. This explains why the universalising idealisation of Socratic philosophers, budding positivists thought and herein as well suprastructuralism/postmodern-thought are all characterised in their knowledge-reification not by an articulation along the prior established mathesis/motif/throwness-disposition but rather prospective existence-potency constraining parrhesiastic aestheticisation of prospective mathesis/motif/throwness-disposition, that in all three cases looks down upon the notion of human-subpotency sophistic pretense of unification that is no more than complexification of

disparateness-of-conceptualisation. Critically as of such parrhesiastic instigation of prospective relative-ontological-completeness the prior mathesis/motif/thrownness-disposition ‘sophistic pretenses of candour’ are edgily/incisively trampled-upon parrhesiastically as the Socratic philosophers go out of their way to highlight the intellectual discredit of the sophists, as budding positivists go out of their way to highlight medieval-scholasticism dogma, and likewise suprastructuralism/postmodern-thought is beyond just our positivism–procrypticism mathesis/motif/thrownness-disposition and as reflected herein with the parrhesiastic highlighting of institutional-being-and-craft and intellectual muddlement as of positivism–procrypticism ‘disjointedness-as-of-reference-of-thought mathesis/motif/thrownness-disposition as of its lack of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought as reference-of-thought-level nested-congruence/running-through/deflating—cogent-unifying-operant-dynamics—unification-of-explanations edginess/incisiveness—of-apriorising/intelligibilitysetup/measuringinstrument/axiomatising; as all that is as of knowledge-reification at uninstitutionalised-thresholds is necessarily as of prospective parrhesiastic instigation beyond the priorly parrhesiastic instigated mathesis/motif/thrownness-disposition. In all these three instances of parrhesiastic instigation for human transcendence-and-sublimity, it is important to grasp that their validation lies in their ‘parrhesiastic totalising–renewing-realisation/re-perception/re-thought of reference-of-thought-level mathesis/motif/thrownness-disposition’ construed as from projective-totalitative–implications of relative-ontological-incompleteness/relative-ontological-completeness as of ‘existence-potency induced unification-of-explanations at registry-worldview/dimension reference-of-thought-level for devolving meaningfulness-and-teleology as validated by ontological-primemovers-totalitative-framework’ reflecting a nested-congruence/running-through/deflating—cogent-unifying-operant-dynamics—unification-of-

In furtherance of this prospective epistemic-ricochetting/transepistemicity indictment, this author laments a covert practice of an intellection that has been critical of postmodern-thought but in latter years ‘reformulates the implications of postmodern ideas’ as original thought even as such practices supposedly passes their institutional thresholds of admissibility with the caveat though that much of such thought is poorly operant given its ad-hoc depth of knowledge-reification gesturing/process as of disparateness-of-conceptualisation implications, and along the same parrhesiastic prospective epistemic-ricochetting/transepistemicity line this author is very much befuddled of a perverted exercise to undermine the originality of this work supposedly because of the theoretical orientation by a naïve ad-hoc synonymising exercise that this author is very much confident fails as it overlooks the coherence and knowledge-reification gesturing/process articulated herein. Generally, such perversion of thought as it discreetly networks fails society in the long-run when it seems to assume a foreshadowing posture with regards to what can be thought or not thought as of a ‘realpolitiking of thought’ exercise. Such intellectual shadiness of vague highmindedness is no more different from the gross inanity of ancient sophists or medieval-scholastic pedants, as of naïve flatminded incrementalism-in-relative-ontological-incompleteness as of a poor sense of intemporality beyond earthly materialism. The transepistemic/epistemic-ricochetting veracity of all singularising/immanenting subject-matters/domains-of-study ‘totalising/circumscribing/delineating unifications’ reflecting existence’s panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence, as of the implications of philosophical depth of contemplation as of ‘coherence/contiguity-of-superseding—oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-

and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’, whether with respect to say evolutionary theory in the biological sciences or physics unification theories for instance can ultimately imply the reconceptualisation of meaningfulness-and-teleology in order to supersede the fundamental approach of ‘finite categorising axiomatisation’ as of positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising towards hermeneutic existential-contextualising-contiguity reifying projective-totalitative—implications of deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought referentialism apriorising/intelligibilitysetup/measuringinstrument/axiomatising in ontological-normalcy/post-convergence involving ‘ontologically-projective-as-of-ontological-normalcy/post-convergence aestheticising/designed axiomatisation insight’. Basically thus, naïve mimicry of mere scientific approaches and methodologies isn’t inherently ontologically-pertinent but for vague ‘science ideology imprimatur’ as of institutional-being-and-craft, as priorly any study as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality or any totalising-devolved—purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality should necessarily be in nested-congruence as of ‘supposedly coherent ontological-commitment—construed-as-of-existential-reality,-thusly-as-reifying-and-empowering-given-human-subpotency-reflexivity-in-ecstatic-existence’ reflected by ontological-primemovers-totalitative-framework as of existence-potency, and so-construed from a philosophical depth of contemplation as of ‘coherence/contiguity-of-superseding—oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’; with the ultimate implication that subject-matters/domains-of-study totalising/circumscribing/delineating unification is what validates their maturity/immaturity. It should be noted here as well that it is human limited-

mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as of relative-ontological-completeness as of totalising-renewing-realisation/re-perception/re-thought of ‘coherence/contiguity-of-superseding-oneness-of-ontology-implied-as-of-inherent-existence-coherence/contiguity,-and-so-construed-as-the-enabler-of-insight-or-intuition-or-foresight-as-of-embodied-consciousness’ that underlies the projective-totalitative-implications of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism over ontologically-flawed identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism. In another respect this author’s re-elaboration of postmodern difference conception, as of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism contends that this effectively captures-and-reflects the evolving reality of existential-contextualising-contiguity knowledge-reification of human meaningfulness-and-teleology, and so over analytic atomising/taking-to-pieces formalisation approach as of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism that goes on to analyse as if all the analysis that has ever been is as of presencing while ignoring the projective-totalitative-implications of human underlying relative-ontological-incompleteness/relative-ontological-completeness with respect to temporal-to-intemporal ontological-performance as from past to present to future with regards to existential-contextualising-contiguity knowledge-reification. Another criticism is the inclination for such atomising/taking-to-pieces formalisation predisposition to start out with ad-hoc disparate conceptualisations as of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism that often poorly reflect the ‘ecstatic holism/nested-congruence’ of existential phenomenality rather than the contrary approach that delves directly in existential-contextualising-contiguity and then reifies-out

conceptualisations as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism. The implication here is that quite often when required to explicate social phenomena outside the framework of such abstract atomising/taking-to-pieces formalisation approach, what happens is that responses will often tend not to be as of the direct import of such analytical atomising/taking-to-pieces formalisation frameworks of supposed reification/elucidation, but rather as extra-contemplative articulations and commentaries that in many ways fall back into the very averaging-of-thought that is supposed to be reified but now under the imprimatur of authority. This is very much unlike the case with proponents of ‘ecstatic holism/nested-congruence’ whose social and existential analyses are just a natural reification/elucidation projection as from within the ‘ecstatic holism/nested-congruence’ of existential phenomenality framework of their study. Furthermore this contrast equally produces other distractive effects in the sense that when such abstract atomising/taking-to-pieces formalisation analysis is presumed to be more profound as of its poorly nuanced interpretation of existential-contextualising-contiguity in a rather blurry social domain-of-study, then it assumes that issues of mutual misunderstanding are due to poor writing, poor use of language or ambiguous conceptualisations of such ‘ecstatic holism/nested-congruence’ proponents thought, failing to factor in the existential-contextualising-contiguity dereifying effects of abstract atomising/taking-to-pieces formalisation as decontextualising and pulling-apart the ‘ecstatic holism/nested-congruence’ of existential phenomenality, wherein the constraining effect of existence/intrinsic-reality/ontological-veridicality as the ‘superior party’ is ignored/overlooked on the naïve token of working on specific aspects or specific interpretation, and so out of sync with existence/intrinsic-reality/ontological-veridicality. Again, what is loss of critical pertinence here is exactly what is implied by ‘meaningfulness-and-teleology/knowledge as of existential-contextualising-contiguity knowledge-reification’, as being rather all about

elucidating the necessary-existential-states-and-conditions so-construed as ‘axiomatic-construct construal of ecstatic-existence/the-nature-of-the-world/conditions’, and not presuming-and-skirting-around them, before further expanding on the elucidation/reification of their manifestations as validated or can be falsifiable by ontological-primemovers-totalitative-framework; or otherwise this simply leads to a loss of the sense of ontologically-veridical reality. Ultimately, such abstract atomising/taking-to-pieces formalisation tendencies and further as of a frequently gestational knowledge state with respect to the possibility for prospective social transcendence-and-sublimity, induces a penchant for flawed intellectually supplementing rhetorisation rather than reification as well as naïve focussing on disparateness of conceptualisations-and-interpretations as of lack or poor constraining ontological-primemovers-totalitative-framework disposition rather than an orientation towards the transversality/transversal-analysis-towards-validatory-selectivity-for-unification of conceptualisations-and-interpretations as constrained to ontological-primemovers-totalitative-framework which is what further reifies the body of knowledge by enabling existence as the transcendental-enabler/existence-potency/transcendental-signifier to continually select the trace/ontological-aesthetic-tracing of sound and complementary conceptualisations-and-interpretations out of a genuine ecstatic mathesis/motif/thrownness-disposition disseminative insight, with unsound/superseded conceptualisations-and-interpretations being discarded thereafter. Concretely, we can easily appreciate the greater pertinence of a Foucauldian statement of relative truth as of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism, construable rather as a more precise theoretical, conceptual and operant notion of truth by its existential-contextualising-contiguity knowledge-reifying projective-totalitative-implications as of the human-subject-emancipatory-relativism-driven-recomposuring-constructivism-towards-singularisation as reflected with ‘intemporal

ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications' as of Being-development/ontological-framework-expansion; and so when compared to the atomising/taking-to-pieces formalisation notion of truth-value as of ontologically-flawed identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism. Such a construal of relative truth doesn't imply a lack of commitment in truth, but is utterly the contrary as of 'a much more critical and ontologically decisive commitment to truth and growing truth' as any pertinent critique can garner in Foucault's truth-delogocentering works/research-programme and its extensive interpretational citability in other scholarly works/research-programmes as of its scholarly advancing of the humanities and social sciences; as his works/research-programme quest for truth 'expands the conception of truth beyond our presencing totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag mental-dispositions as if all the world that has ever existed is as of presencing', and displaces/decenters the human subject as of its presencing cloistered-consciousness for a more mature and nuanced conception of truth and the implications of truth; and so, beyond the contemplation of naïve atomising/taking-to-pieces formalisation dereifying rhetorisations that border on averaging-of-thought populist interpretations rather than elevating human ontological construal of the social domain-of-study! This author contends that existence as the absolute a priori as of its ecstatic singularity actually points to appropriate attitude/mental-disposition/care-and-episteme as of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism for existential-contextualising-contiguity knowledge-reification of every domain-of-study; as the fact remains that the domain-of-study of the social world is utterly different as of existential-contextualising-contiguity from the domain-

of-study of the natural world, and not to mention that even within the natural world or social world there are equally subject-matters peculiarities that require their own specific approaches to elucidation/reification as of existential-contextualising-contiguity – and this said without undermining the idea of the ecstatic singularity of existence from which all such subject-matter-human-specialisms ecstatically arise as veridically implied by singularisation/epistemic-immanence/veridical-epistemic-determinism speaking of an underlying ecstatic commonness though not common phenomenality. Thus, in all cases the overall implications for the optimum advancement of human knowledge is most critically about constraining knowledge to existential-contextualising-contiguity elucidation/reification rather than just mere formalisation as of conceptual patterning for its own sake. The fact is the natural sciences are already naturally constraint to existential-contextualising-contiguity knowledge-reification by the implicated immediate-constraining ontological-primemovers-totalitative-framework transcendence-and-sublimity whereas the human world is rather blurry in this regard and hence requires the requisite explicated insight about existence as of its ecstatic singularity for its appropriate approach for transcendence-and-sublimity. In many ways such an insight is often implied in the natural sciences as of its relative transparency of cause-and-effect reification of existential-contextualising-contiguity but not by a naïve/mimicked formalisation as of mere conceptual patterning. Consider in this regard the implications of interpreting natural science transcendental-enabling/existence-potency knowledge say between Mendelian heredity and DNA genetics or say Descartes Physics and Newton and Leibniz Physics on the basis of naïve formalisation as of conceptual patterning, then in many ways the latter contributors would be poorly appreciated given that the spectacular transcendence-and-sublimity implications of their studies are massively overlooked by a poor appreciation that knowledge is critically all about formalisation as of conceptual patterning rather than existential-contextualising-contiguity knowledge-reification

projective-totalitative-implications. Actually, formalisation in the natural sciences and mathematics is the effective ‘formatting outcome’ of an implicated creative process of existential-contextualising-contiguity knowledge-reification. This process is one of human limited-mentation-capacity-deepening-in-recomposuring,-as-of-totalising-renewing-realisation/re-perception/re-thought,-by-ratio-contiguity/ratiocination as of ‘repeating/repetition of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating for existential-contextualising-contiguity knowledge-reification, inducing successive differences of ontological-performance of meaningfulness-and-teleology as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality with increasing prospective relative-ontological-completeness’ reflected as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism, and not just a prior formalisation exercise as mere conceptual patterning as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity reflected as of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism; with ‘repeating/repetition of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating for existential-contextualising-contiguity knowledge-reification, inducing successive differences of ontological-performance of meaningfulness-and-teleology as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality with increasing prospective relative-ontological-completeness’ rather reflected as of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism which implied singularisation/epistemic-immanence/veridical-epistemic-determinism enables transcendence-and-sublimity which is ‘concurrently formatted as formalisation’. Thus we know of the recurrent stories of

‘mathematics invented by physicists or mathematicians working under the physics existential-contextualising-contiguity guise’ as of the insight of their existential-contextualising-contiguity knowledge-reification of the physics domain, with such mathematics ‘very often not well presented but essentially sublime’, and thereafter such existential-contextualising-contiguity initially reified mathematics is further reified as of mathematics more generalised-level of existential-contextualising-contiguity insight while ‘exquisitely formalised in concurrence’. This reality of ‘repeating/repetition of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating for existential-contextualising-contiguity knowledge-reification, inducing successive differences of ontological-performance of meaningfulness-and-teleology as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality with increasing prospective relative-ontological-completeness’ is very much obvious from the accounts of ‘successive partial contributions-and-failures’ that lead to major breakthroughs in the natural sciences as of the ‘very same totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality’; with this ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism ‘repeating/repetition of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating for existential-contextualising-contiguity knowledge-reification, inducing successive differences of ontological-performance of meaningfulness-and-teleology as of the-very-same-totalising—purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality with increasing prospective relative-ontological-completeness’ construed as occurring within the very same scientist, across scientists of the same interest-of-study in a generation, and across scientists of the same developing interest-of-study cross-generationally as of the ‘very same totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-

veridicality/existential-reality'. In this regard, we can appreciate that as of their differing ontological-performance the threshold where the 'theory-of-relativity-together-with-quantum-mechanics axiomatic-construct' projects its prospective relative-ontological-completeness is considered as dialectically-thinking, and striving to operate the 'classical-mechanics axiomatic-construct' in its projected prior relative-ontological-incompleteness is effectively dialectically-dementing; even though both address the 'very same physics totalising-devolved—purview/domain-of-construal-as-intrinsic-reality/ontological-veridicality/existential-reality'. The implications of flawed formalisation credo as of conceptual patterning identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism implied dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism extends, as of its flawed primacy of conceptual patterning on the basis of a conception of knowledge that tends to belittle and trivialise original knowledge contributions geared towards creative existential-contextualising-contiguity knowledge-reification while naively overrating contributions to knowledge of a conceptual patterning orientation, in further blurring the study of the social with mischaracterisations and poor appreciation of transcendence-and-sublimity implications and ultimately induces self-perpetuating artifices of institutional-being-and-craft that mechanically 'paradoxically then supersede knowledge' as of its very organic authenticity. One recurrent consequence of the formalisation credo that keeps on arising for instance in the analytic tradition of philosophy as of its non-holism or 'poor conflatedness of holism/nested-congruence', is that the underlying conception about growing the body of human knowledge seems to be the 'incrementing of all such conceptual patterning conceptualisations' going by their cross-analysis as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. Basically, the underlying implication of conflatedness, and so

over naïve constitutedness, is that all ontologically-veridical conceptualisations can only be veridical by their ‘abstract reduction to the holistic/nested-congruence implication of existence as the absolute a priori as of its ecstatic singularity’, and thus implies the articulation of all such ontologically-veridical conceptualisations as of singularisation/epistemic-immanence/veridical-epistemic-determinism; while avoiding any such conceptualising naivety that may imply ‘existence in existence’ as this can only lead to flawed conceptualisations, totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag and logocentrism as of constitutedness. Critically, no concepts have any veridical meaningfulness-and-teleology but only rather as of their conflatedness with existence, and cannot be construed as ‘existing in existence’ as implied by constitutedness which just leads to ontologically-flawed dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism implied identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism. We can appreciate that the naïve conceptual patterning of conceptualisations in many a social domain-of-study failing to disambiguate divergent knowledge implications-and-contributions as of existential-contextualising-contiguity knowledge-reification end up transforming subject-matters into descriptive enunciations of weak existentially explanatory and predicative capacity. The entire project of human meaningfulness-and-teleology is nothing but one of creatively elucidating/reifying existence/existence-potency/existential-possibilities, ‘with no out of existence knowledge project’, which is merely delusional. Thus, what is critically missing here is the fundamental constraining reality for creative existential-contextualising-contiguity knowledge-reification, and so over the mere possibilities for abstracting conceptualisations. This very much explains why many of those who subscribe to the formalisation credo have a poor existential projection and appreciation for grasping the existential-contextualising-contiguity reifying gestures of postmodern-thought and other

critical theories, and end up often haranguing such orientations by striving to constrain them on the basis of vague abstractions as of elaboration-as-mere-extrapolating/constituting/abstracting/deducing/infering-of-elucidation-outside-existential-contextualising-contiguity. This failure in fully appreciating the import of ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism ‘repeating/repetition of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating for existential-contextualising-contiguity knowledge-reification, inducing successive differences of ontological-performance of meaningfulness-and-teleology as of the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality with increasing prospective relative-ontological-completeness’ as of implied singularisation/epistemic-immanence/veridical-epistemic-determinism has fundamental projective-totalitative–implications, as transcendence-and-sublimity only arise as of human expansion of its reifying grasp of existential-contextualising-contiguity. Consider in this regard that the repeated maximalising-recomposuring-for-relative-ontological-completeness/transvaluating articulation by this author on the theme of conceptual patterning here further complements as of further articulated reification of this very theme elsewhere herein, more than just about a mechanical repeating; and this knowledge-reification insight often goes missing with many a subscriber to the formalisation credo, as of reification along the three frames indicated above (as of same scholar interest-of-study, scholars of the same generation interest-of-study and scholars cross-generationally developing interest-of-study). In this regard, the contribution of post-structuralist scholars like Foucault, Derrida, Lyotard, Lacan, Deleuze have now and then been belittled as not original, as of a very much naïve conceptual patterning conception of knowledge; going by their profound association with earlier scholars and more specifically Heidegger and Nietzsche. From a creative existential-contextualising-contiguity knowledge-

reification perspective of knowledge construal, this is no less silly as dismissing and belittling as unoriginal the ideas of later physicists since their contributions are just more evolved formalisation as of conceptual patterning of concepts originally/as-of-event available to earlier contributors to the ‘traditional classical mechanics axiomatic-construct’ propounded by Newton together with the conceptual patterning influences of Galileo, Descartes, Leibniz, etc. as of the conceptual patterning of such concepts like space, time, force, etc. Such a conclusion certainly reflects a ‘massive ontological dearth’ in failing to appreciate the creative existential-contextualising-contiguity knowledge-reification projective-totalitative-implications of the latter contributors in both instances. This further speaks of a poor grasp of the human knowledge project as being all about further reifying human grasp of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality, with the intellectual’s job to the best of their abilities rather being about orientating its effort for the best possibility to further this goal whether as of critical altogether new thought development or critical recomposuring of prior thought, or both. More likely than not the headway made by prior scholars means that the good intellectual knows as of the true goal of human knowledge advancement beyond just institutional-being-and-craft that their best effort is rather in further advancing/reifying/elucidating the headway as of ‘repeating/repetition of maximalising-recomposuring-for-relative-ontological-completeness/transvaluating for existential-contextualising-contiguity knowledge-reification, inducing successive differences of ontological-performance of meaningfulness-and-teleology as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality with increasing prospective relative-ontological-completeness’. This is especially the case where such headway mirrors ‘pure ontology’ articulation, as there is only one ontological as existential reality. This orientation and rearticulating exercise by postmodern-thought speaks

rather of an assurance that they are on a solid ontological pathway just as physicists orientation and redevelopment of the ontic lines setup by the early Galileos, Newtons and Leibnizes speaks of an assurance of ontological depth, in both instances as of their existential-contextualising-contiguity knowledge-reification. Ultimately, and it is this author's contention, the various scholarly contributions to postmodern-thought can be understood as rather pointing to the structural/paradigmatic disseminative implications of futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought ontologically-veridical difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism. We can equally appreciate that much of the disseminative rational-empiricism/positivism implications of the works of such pioneers like Copernicus, Galileo, and specifically Descartes, etc. created 'a rational-empiricism/positivism disseminative metaphoricity orientation making the human subject thinking as of mathesis universalis conceptualisation central' reflected by Descartes 'I think therefore I am', and as followed and adopted to resolve various human knowledge issues by subsequent thinkers in successive generations as of human ontological-faith-notion-or-ontological-fideism reasoning-through/messianic-reasoning wherein in their states of undecidability/aporia 'left it' to existence as of ontological-primemovers-totalitative-framework as the veritable transcendental-signifier/transcendental-enabler/existence-potency to 'continually select' rational-empiricism/positivism disseminative orientations for transcendence-and-sublimity, leading to our present refined positivism/rational-empiricism conception! But then because our present 'positivism-procrypticism human subject is rather undecentered' relative to the prospective postmodern—deprocrypticism self-conscious mindset we fail to truly appreciate the structural/paradigmatic disseminative implications of postmodern-thought as of the prospective exercise of 'leaving it' to existence as of ontological-primemovers-totalitative-

framework as the veritable transcendental-signifier/transcendental-enabler/existence-potency to ‘continually select’ postmodern—deprocrpticism disseminative orientations for transcendence-and-sublimity, in the same vain that the ‘non-positivism/medievalism undecentered human subject’ failed to truly appreciate the structural/paradigmatic disseminative implications of prospective positivism/rational-empiricism thought. On the other hand, recurrent conceptual patterning predispositions and orientations arise because of poor appreciation/reference for judging knowledge often as of poor institutional mechanical conceptualisation of knowledge, wherein the constraining metrics of institutional setups including strangely enough also many such tertiary institutions where poststructuralist thinkers studied-and-taught-as-outlier-intellectuals, ‘apparently and falsely surpass existence as the absolute a priori’. Such institutional nombrilistic inclinations operate on the naivety that institutional processes are inherently reifying by their mere infrastructure and deferential-formalisation-transference, and set up enframed constraints that are in many ways self-defeating for the purpose of profound existential-contextualising-contiguity knowledge-reification for transcendence-and-sublimity. But then with regards to the social notwithstanding its high emotional-involvement disruptiveness to knowledge, more profoundly existential-contextualising-contiguity knowledge-reification here implies human displacement/decentering even though our temporal/shortness-of-register-of-meaningfulness-and-teleology dispositions certainly have a hard time assuming the full implications of such prospectively implied transcendental meaningfulness-and-teleology. This further speaks to the fact that human knowledge is much more than distantly/remotely abstracted conceptions of meaningfulness-and-teleology of trite existential-contextualising-contiguity knowledge-reification projective-totalitative-implications, as on critical occasions this puts the human subject itself into question; and so, as of ‘ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen as of reasoning-through/messianic-reasoning’ even where

this edges into contortioning asceticism as of nonextirpatory-existential-preempting-of-existential-unthought. Such 'pure ontology' orientation grounded on creative existential-contextualising-contiguity knowledge-reification is ever always a 'conflatedness holism/nested-congruence' as it aspires to grasping and articulating meaningfulness-and-teleology as portends to the wholeness/nested-congruence of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality; with such construal in reality rather very much as of singularisation/epistemic-immanence/veridical-epistemic-determinism rather than dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism. It is thus not a surprise that many natural sciences in their 'creative existential-contextualising-contiguity knowledge-reification' develop as and aspire to be whole/congruent in conception, even though their concepts can be misconstrued as rather disparate but in effect are 'operant as of wholeness/nested-congruence'. Likewise, the underlying deprocrypticism-or-preempting-of-disjointedness-as-of-reference-of-thought conflatedness holism/nested-congruence suprastructuralism conception herein is rather articulated as of singularisation/epistemic-immanence/veridical-epistemic-determinism as of epistemic reflection of the ecstatic singularity of existence as the absolute a priori. Unlike the constitutedness rampant with human and social conceptualisations, it is important to grasp that conceptualisations in many a natural science domain tend to be naturally as of conflatedness holism/nested-congruence given their theoretical, conceptual and operant existential contiguity/congruence projective-totalitative-implications with 'the ecstatic singularity of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality implied with regards to all such seemingly ad-hoc conceptualisations being contiguously reflected across space and time'. We can consider in this regard the strongly nested-congruence/contiguity of seemingly disparate conceptualisations as force, energy, etc. in physics or hereditary and

functional conceptualisations in biology; reflected as of the specifically ecstatically nested-congruence of such conceptualisations with the existential wholeness, and so more than just abstractable conceptualisations out of sync with effective nesting as of the existential wholeness. In other words, the nestedness of the conceptualisations imply that there is a natural or existential cogency-and-fluidity among the concepts, speaking-of-and-reflecting their wholeness; the implication is not necessarily that all the whole field-of-study must be grasped all at once but rather that this existential cogency-and-fluidity speaking-of-and-reflecting wholeness must insightfully be grasped before articulating existentially/ontologically pertinent conceptualisations that are equally cogent-and-fluid with the wholeness. That underlying dynamic theoretical-conceptual-operant interrelatedness speaking of singularisation/epistemic-immanence/veridical-epistemic-determinism is often very much lacking in many a social domain-of-study which ad-hoc nature of conceptualisations can easily be misconstrued as of the same wholeness/nested-congruence nature with many natural science conceptualisations. This reality of comprehensive depth of knowledge is easily lost to ad-hoc and disparate social conceptualisations that by their constitutedness token tend to give up on the central issue of knowledge as of its wholeness/nested-congruence reflection ‘as of creative existential-contextualising-contiguity knowledge-reification’ of existence as the absolute a priori in its ecstatic singularity. The naivety of implied constitutedness in the social is in the expectation that the unity of disparateness of conceptualisations as of the-very-same-totalising-purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality will take care of itself in reflecting the ecstatic singularity of existence without human self-conscious wholeness/nested-congruence conception as of conflatedness in this respect; but then such parsimony loses more than just wholeness/nested-congruence in the sense that sound conceptualisations cannot be done without a sense of wholeness/nested-congruence in the

congruence conceptualisation as of the conflatedness of 'prospective ontological-normalcy/post-convergence ontologically-uncompromised—referentialism deprocrypticism apriorising/intelligibilitysetup', as implied by the suprastructuralism conception herein in fully reflecting the ecstatic singularity of existence as the absolute a priori, and so over our present parsimony/disparateness of conceptualisations 'mathesis/motif/thrownness-disposition—as-of-ontologically-compromised—categorising positivism—procrypticism apriorising/intelligibilitysetup'. Thus we can appreciate here that ultimately singularisation/epistemic-immanence/veridical-epistemic-determinism is not just artificially prompted but is rather the structural/paradigmatic consequence of the prospective relative-ontological-completeness-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising attitude/mental-disposition/care—and-episteme, ultimately as of prospective ontological-normalcy/post-convergence ontologically-uncompromised—referentialism deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought. Our mental-disposition is caught up between its capacity to conceptualise as of singularisation/epistemic-immanence/veridical-epistemic-determinism implied prospective relative-ontological-completeness conflatedness and dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism implied prior relative-ontological-incompleteness constitutedness; and basically intemporal ontological-performance arises by drawing out the full projective-totalitative-implications of meaningfulness-and-teleology exclusively as of singularisation/epistemic-immanence/veridical-epistemic-determinism implied conflatedness prospective relative-ontological-completeness as it enables 'ontological-performance to be utterly as of predictable structural/paradigmatic internal-necessity/determinism so-construed as immanence-function-conflatedness'. Thus the inherent ecstatic singularity of existence carries intemporal 'immanence-functions-conflatedness projective-totalitative-implications'

as of singularisation/epistemic-immanence/veridical-epistemic-determinism conflatedness, while dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism constitutedness arises as of totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag ontological-construal defect when naively failing to convey the ‘immanence-function-conflatedness implication’ of panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence phenomenality axiomatic-construct. Thus naturalistic methodologies are only as pertinent as of their explaining of underlying background of the social as of physical and biological reality, but not as substitutive explanations of the human panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence social immanence as this is bound to induce constitutedness. What is misjudged by many naturalistic methodologies with regards to the social is the fact that the very reality of an outright human panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence social immanence as arising from ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications’ as of ‘abstract cumulation of human memorisation and knowledge immanence’ is beyond the human neuropsychological background, and as human consciousness is as of an altogether panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence social immanence; with the implications that a hypothetical instantaneous erasure of all humans memory and knowledge will lead to humankind’s retrograding to its most basic animalistic background potential for social immanence as of the earliest of humans, speaking of an altogether substantive cumulated abstract tissue of panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence social immanence built up by ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-

totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-
totalitative-implications’ as of institutional-cumulation/institutional-recomposuring. In this
regard, immanence-function-conflatedness rather reflects ‘the ontological-normalcy/post-
convergence disposition as of ontological-completeness-of-reference-of-thought
deprocrypticism point-of-departure/perspective as of its protensive self-consciousness’ that
fulfils-and-assumes meaningfulness-and-teleology as of singularisation/epistemic-
immanence/veridical-epistemic-determinism going by its full comprehension of existence’s
ecstatic singularity immanence projective-totalitative-implications, hence overcoming our
positivism-procrypticism totalising-self-referencing-
syncretising/circularity/interiorising/akrasiatic-drag mental-reflex for constitutedness that
induces dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism; and so,
as of immanence-function-conflatedness insight with regards to ‘panintelligibility-as-
reifying-and-empowering-reflexivity-of-ecstatic-existence phenomenality’ axiomatic-
construct, and reflected in whether the ‘panintelligibility-as-reifying-and-empowering-
reflexivity-of-ecstatic-existence phenomenality’ axiomatic-construct is within the very same
subject-matter purview or as of contrastive subject-matter purviews say chemistry

 and as of reasoning-through/messianic-reasoning immanence-function-conflatedness
 panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence over
 reasoning-from-results/afterthought. Basically, immanence-function-conflatedness speaks of
 the counterintuitive mental-reflex for drawing out the full projective-totalitative-implications
 for ‘creative understanding’/insight as of singularisation/epistemic-immanence/veridical-
 epistemic-determinism, going by existence’s ecstatic singularity, with regards to
 ‘panintelligibility-as-reifying-and-empowering-reflexivity-of-ecstatic-existence
 phenomenality’ axiomatic-construct. This immanence-function-conflatedness insight is
 effectively what marks prospective deprocrypticism/pre-empting-of-disjointedness-as-of-
 reference-of-thought as of an utterly different protensive self-consciousness from our hesitant
 and occlusive positivism–procrypticism self-consciousness. Hence existence’s ecstatic
 singularity is very much akin with the Deleuzian plane of immanence construed herein as of
 existence’s ecstatic singularity immanence/internal-necessity projective-totalitative-
 implications of singularisation/epistemic-immanence/veridical-epistemic-determinism; the
 ontological implication here being that ‘we are as potently transcendental as from our flawed
 constitutedness’ or ‘we are as potently immanent as of our virtuous conflatedness’.
 Immanence-function-conflatedness points out that the mental-reflex for objectifying
 discursivity between prospective relative-ontological-completeness and prior relative-
 ontological-incompleteness is fundamentally flawed as of constitutedness, as all the
 objectifying discursivity that is ontologically-veridical is as of the conflatedness of
 prospective relative-ontological-completeness over prior relative-ontological-incompleteness
 construed as immanence-function-conflatedness. Thus metaphoricity of non-positivism
 mindset ‘supposedly in an objectifying/contending discursivity’ with a positivism mindset

registers as of positivism immanence-function-conflatedness reflection of the underlying non-positivism mental-disposition with regards to such issues like existential manifestations of superstition, spiritualism, etc. This same conception holds with the deprocrypticism immanence-function-conflatedness overriding the meaningfulness-and-teleology of procrypticism/disjointedness-as-of-reference-of-thought mindset ‘supposedly in an objectifying/contending discursivity’ with the deprocrypticism mindset, as the latter reflects the underlying positivism–procrypticism mental-disposition mindset with regards to existential manifestations of disjointedness-as-of-reference-of-thought. In both instances, the issue lies in the lack of a common apriorising/intelligibilitysetup/measuringinstrument/axiomatising for meaningfulness-and-teleology aposteriorising/intelligising/measuring/logicising, with immanence-function-conflatedness implying that all the meaningfulness-and-teleology is necessarily as of the prospective relative-ontological-completeness over the prior relative-ontological-incompleteness; respectively as of positivism and deprocrypticism. If by anticipation we do know immanently that a non-positivism mindset is bound to a non-positivistic-as-existentially-superstitious apriorising/intelligibilitysetup/measuringinstrument/axiomatising as of structural/paradigmatical internal-necessity/determinism insight from positivism immanence-function-conflatedness with the obviousness there is no point implying an ontologically-flawed objectifying/contending discursivity in assessing the non-positivism existentially-superstitious inclination, the same implication will extend to deprocrypticism immanence-function-conflatedness as of structural/paradigmatical internal-necessity/determinism insight with regards to anticipating the disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising mindset of our positivism–procrypticism mental-disposition with no pretence of such a positivism–procrypticism ontologically-flawed objectifying/contending discursivity in assessing the

disjointedness-as-of-reference-of-thought inclination. In other words, immanence-function-conflatedness is all about reflecting the straightforwardness of ontological-primemovers-totalitative-framework as of singularisation/epistemic-immanence/veridical-epistemic-determinism in arriving at ontological-veridicality over the human mindset flawed-and-naive predisposition to make of its objectifying/contending discursivity as structurally/paradigmatically deterministic by mere mental-reflex of naively elevating prior relative-ontological-incompleteness meaningfulness-and-teleology as if of prospective relative-ontological-completeness apriorising/intelligibilitysetup. Immanence-function-conflatedness equally highlights knowledge as of its essential organic construct implications. As a constitutedness predisposition tends to imagine that knowledge is basically a cumulative exercise to an already soundly structured/paradigmed mindset, but nothing could be farther from the truth as knowledge is really an exercise of re-forming-or-reshaping-as-transforming the structuring/paradigming of the mind. In other words, it is rather vague to 'surreptitiously sneak in supposedly positivism knowledge' into an unquestioned/unchallenged non-positivism mindset, as at best the outcome will be simply a further complexification of the non-positivism mindset apriorising/intelligibilitysetup/measuringinstrument/axiomatising as with such a reflection as 'God of plane' in a non-positivism animistic social-setup, speaking of non-positivism complexification and not positivism knowledge acquisition. This is effectively what validates the notion of the 'decentering of the human subject' as central to the very notion of organic knowledge as it enables prospective transcendence-and-sublimity as of prospective relative-ontological-completeness-of-reference-of-thought. Such a 'decentering of the human subject' implies that the false ontological-certitudes of the non-positivism mindset as of its non-positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising are necessarily ironically trampled-upon in the discourse of positivism organic knowledge in a non-positivism social-

setup. For instance, walking into the evil forest to retrieve a plant cure with induced curing eliciting psychoanalytic-unshackling with respect to the non-positivism apriorising/intelligibilitysetup/measuringinstrument/axiomatising as its superstitious value-reference structure is shown to be inadequate given that it is the violation of that non-positivism value-reference that is what carries the potential for its prospective emancipation into-and-as-of-the-implications-of a prospective positivism mindset. Thus organic knowledge as of its transcendental implications cannot imply that the apriorising/intelligibilitysetup/measuringinstrument/axiomatising of a prior relative-ontological-incompleteness-of-reference-of-thought is an appropriate framework for prospectively implied reference-of-thought knowledge acquisition. Likewise, this author contends that similarly a deprocrypticism contortion reifying gesture necessarily questioning our positivism–procrypticism disjointedness-as-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising for the possibility of psychoanalytic-unshackling implications as of the ‘decentering of the human subject’ is the necessary organic knowledge for futural Being-development/ontological-framework-expansion as of prospective deprocrypticism/pre-empting-of-disjointedness-as-of-reference-of-thought transcendence. The implication of organic knowledge conception is that the state of recurrent-utter-uninstitutionalisation by its apriorising/intelligibilitysetup/measuringinstrument/axiomatising fails the objectifying/contending discursivity as of prospective base-institutionalisation immanence-function-conflatedness, likewise does base-institutionalisation–ununiversalisation fails as of prospective universalisation immanence-function-conflatedness, universalisation–non-positivism/medievalism fails as of prospective positivism immanence-function-conflatedness, and prospectively positivism–procrypticism fails in futural Being-development/ontological-framework-expansion as of prospective deprocrypticism

immanence-function-conflatedness; so-implied as of singularisation/epistemic-
 immanence/veridical-epistemic-determinism reflection of existence's ecstatic singularity.
 Hence 'intemporal ontological-faith-notion-or-ontological-fideism instigated human
 institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-
 singularisation-as-veridical-epistemic-determinism projective-totalitative-implications'
 implied organic knowledge is ever always as of the structural/paradigmatic internal-
 necessity/determinism of prospective relative-ontological-completeness-reference-of-thought
 as of immanence-function-conflatedness, with the pretence of prior relative-ontological-
 incompleteness-of-reference-of-thought for objectifying/contending discursivity nothing
 more but flawed totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-
 drag temporal meaningfulness-and-teleology. The study of the social as of immanence-
 function-conflatedness insight grasp that the blurriness, totalising-self-referencing-
 syncretising/circularity/interiorising/akrasiatic-drag and remoteness of cause-and-effect
 invoke a more refined conception of ontological-primemovers-totalitative-framework as
 reflecting existence/intrinsic-reality/ontological-veridicality. Such a refinement while
 cognisant of the pertinence of falsifiability and validation is more in line with the Lakatosian
 research-programme perspective given the complexity of the social just as many a complex
 domain in the natural sciences in effect assume the research-programme epistemic model;
 consider that while the natural sciences are generally more amenable to strong immediate
 cause-and-effect determination, such complex studies like string theory in physics, medical
 research, etc. tend to assume in effect the research-programme epistemic model. The
 underlying insight here is that many a complex study purview as well as the study of the
 social given its poorly constraining immediate cause-and-effect determination, renders
 knowledge validation more of a 'construct of comprehensive-coherence and competitive
 claim to ontological pertinence as of extensive research-programme implications', but this

should however implicitly reflect concurrently the underlying notions of falsifiability-or-deferring-falsifiability and validation-or-deferring-validation. This author contends that it is the implicated orientation of many post-structuralists thinking as of the research-programme epistemic model as articulated herein that renders their thought scientifically credible and pertinent as such scholars like Foucault, Derrida, Deleuze, to cite just these few have turn out to be the dominant scholarly-cited authors in the general humanities, and so precisely because of the very thorough existential-contextualising-contiguity knowledge-reification in their scholarly output, and paradoxically so over purported scholarly approaches ‘supposedly of a more scientific methodology but when evaluated as of such authorial scholarly comprehensive research-programmes’ turn out to be of weaker existential-contextualising-contiguity knowledge-reification. This insight equally informs this author’s conviction that it is ultimately as of such comprehensive research-programme epistemic model as articulated herein and its further existential-contextualising-contiguity knowledge-reification, as well as existential-contextualising-contiguity knowledge-reification as of the disposition for advancing the metalevel transversal unification of the ‘structural/paradigmatic disseminative implications of postmodern and other human textuality/hermeneutics/possibilities-of-existential-interpretation/axiomatisation-of-existence’ thought, that the ontological-pertinence assumes ontological-primemovers-totalitative-framework unassailability; and so, not for the mere sake of research-programme extensiveness but as of its internal constraining to falsifiability-or-deferred-falsifiability and validation-or-deferred-validation as of existential-contextualising-contiguity knowledge-reification as implied by the articulation of authenticity herein as of reasoning-through/messianic-reasoning attitude/mental-disposition/care—and—episteme ‘implication of ontological-primemovers-totalitative-framework’, on the basis that the very first epistemic frontier for ontological-pertinence lies with the scholarly developed creative insight for existential-contextualising-contiguity knowledge-reification as

knowledge. Ultimately, postmodern-thought has been unassailable to vague scepticism and intellectual-bad-faith criticism exactly because of its strong scholarly research-programme existential-contextualising-contiguity knowledge-reification, and thus an immanence-function-conflatedness insight in the study of the social as of its inherent complex nature is certainly justified to adhere to a research-programme epistemic model as herein articulated. In another respect, while intellectualism as of organic knowledge implications in many ways commands massive social deference and adherence, it is equally important not to naively assume that at uninstitutionalised-thresholds, human existential-investment as of its temporality cannot be predisposed to anti-intellectualism, as this insight is pertinent in the sense that transcendental knowledge is articulated mostly as of its undermining of human temporal existential-investment. The bigger point here being that the possibility of prospective transcendence lies in upholding-and-defending authentic intellectualism even as of metaphoricity beyond averaging-of-thought socially intelligible meaningfulness-and-teleology conceptualisation in totalising-self-referencing-syncretising. Metaphoricity as such ironises on social intellectual nihilism as it is bent on undermining any temporality as of ontological-faith-notion-or-ontological-fideism solipsistic intemporality parrhesiastic askance, and as of immanence-function-conflatedness ‘highlights and keeps wide-opened the prospect’ for prospective authentic intellectualism by undermining its blending with inauthentic temporal-intemporality manifestations that usurp and undermine human transcendence. Further, while ‘human projected conception of knowledge cumulation’ seems to be ever always ‘perceived absolutely as within an only same institutionalisation reference-of-thought’, with their merits at least for expanding human mastery of its environment at their given level as well as their defects as of undermining the possibility for prospective knowledge, for instance as of the animistic social-setup to perceive its animistic knowledge system as absolute, as of the medieval/non-positivism social-setup to perceive its medieval

scholasticism as absolute or as of our positivism–procrypticism social-setup to perceive our positivism–procrypticism humanistic knowledge system as absolute; it is immanence-function-conflatedness by its implied internal-necessity construct that best reflects the reality of human knowledge cumulation by the institutionalisation process as of Being-development/ontological-framework-expansion conception, recognising the underlying retrospective and prospective epistemic dynamics behind knowledge as of protracting self-consciousness over the cloistering self-consciousness of falsely absolutising specific registry-worldviews/dimensions reference-of-thought. With such immanence-function-conflatedness insight, the epistemic and methodological pretences as of our humanistic positivism–procrypticism are evaluated on their true merits, and such an evaluation reveals that such epistemic and methodological pretences while ‘developed institutional practice’ are just that as-more-or-less-mechanically-institutionalised, and that critically from a deeper perspective the reality is that it is the research-programme as articulated above that underlies human knowledge cumulation, and so as of the competitive evaluation of various epistemic and methodological commitments made in immediacy and their ultimate prospective evaluation as of their research-programmes productive outcomes. The research-programme as such can be reconstrued as the reevaluation of any propounded knowledge and epistemic paradigms as of their ultimate existential-contextualising-contiguity knowledge-reification as knowledge; such that the immediacy of contention of appropriateness of epistemic and methodological approaches is less critical, as ultimately all knowledge constructs and their epistemic and methodological commitments face their long term bottomline reevaluation as to their relative existential-contextualising-contiguity knowledge-reification as knowledge construed as their research-programmes. This speaks of the fact that such a conception of epistemic commitment as of research-programme is effectively one of epistemic singularisation/epistemic-immanence/veridical-epistemic-determinism so-implied as of

ontological-normalcy/post-convergence associated with ontologically-uncompromised—referentialism deprocrypticism; and very much overcoming the limiting effect of our present conception of epistemic commitment as rather dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism as of ontologically-compromised—categorising positivism—procrypticism. Thus, if immanence-function-conflatedness reveals that it is the ‘projected research-programme of any given knowledge construct as of its prospective relative existential-contextualising-contiguity knowledge-reification’ that is its preeminent epistemic and methodological validation, ‘pretences of pre-given epistemic predispositions’ that do not attend pertinently and similarly to prospective relative existential-contextualising-contiguity knowledge-reification are nothing more but totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag predispositions that pretend to supersede existence as the absolute a priori, and institutionalised, such totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag predispositions may actually be structurally/paradigmatically stifling for the possibility of prospective knowledge and transcendence, and more seriously so where the possibility of varied research-programme choices are difficultly entertainable without institutional backing for research needing major funding and/or resources. Finally, the research-programme epistemic model attends to the social as of the reality of human emotional-involvement by its extensiveness. Consider that many a transformative natural science idea have certainly been ‘supposedly gross conceptualisations’ but with varied social responses as of their given social epoch sensitivities; consider in this regard Copernicus and Galileo heliocentric world argument eliciting social sensitivities then and equally stark physics ideas at the beginning of the last century with relativity and quantum mechanics hardly eliciting any social sensitivities, rather as of the disarming effect on conventioning simply on the basis of their matter-of-fact cause-and-effect. In many ways the prospect of prospective knowledge very much lies with a

shakeup of the social ‘sense of presence’ and this is not contradictory in the sense that if the present was all that great then its very transcendence wouldn’t be occurring, and so existence/intrinsic-reality/ontological-veridicality warrants that transcendence occurs as to conflict with the naïve social ‘sense of presence’ as absolute, and so because it is all about the-very-same-totalising–purview-of-construal-as-existence/existence-potency/intrinsic-reality/ontological-veridicality but with contrastive underlying relative-ontological-incompleteness/relative-ontological-completeness. It is quite absurd to think that the possibility of prospective human transcendence especially, as of our apriorising/intelligibilitysetup, lies wholly within the ambit of our ‘sense of presence’ agreeableness; as this rather speaks of the framework of our limited certitudes as this limits/stifles the possibility of further profound existential-contextualising-contiguity knowledge-reification for transcendence-and-sublimity. While today that notion of contrariety has in many ways sanked in and been accepted with natural science knowledge especially so as it hardly elicits social emotional-involvement, the fact of the matter is that the possibility of the profound study and emancipation of the social inevitably comes with a contrariety of our social ‘sense of presence’. Just as the ‘decentering of the subject’ was what brought about the positivistic mindset today that allowed for modern day science to develop and just as well modern day social science, it is inevitable that a further development of human knowledge as of its organic knowledge construct warrants a further ‘decentering of the human subject’ as implied by deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought; and justified by the fact that if previous generations had to undergo their psychoanalytic-unshackling for prospective institutionalisation, we can only ever be pushed into the corner of our intellectual nihilism when we seem to pretend that we are beyond the prospect of our transcendence. Immanence-function-conflatedness analytical implications equally arise as of the ‘countervailing transversal relation induced as of

ontological-primemovers-totalitative-framework' between 'existence/existence-
 potency/existential-possibilities as the selecting transcendental-signifier/transcendental-
 enabler/existence-potency' and 'the ever developing human limited-mentation-capacity as of
 its deepening from relative uninstitutionalised-threshold to relative institutionalisation so-
 construed as prospective institutionalisation dissemination', as this transversality is exactly
 what validates epistemic-veracity as of prospective relative-ontological-completeness as
 relevant for the protracted-consciousness of notional-deprocrypticism. Thus for such a notion
 of research-programme as articulated herein rather than just implying mere epistemic
 latitude/anarchy, it speaks instead of the construal/justification of epistemic-veracity as of
 precedence of prospective relative-ontological-completeness projective-totalitative-
 implications, and so as of the structural/paradigmatic implication of
 singularisation/epistemic-immanence/veridical-epistemic-determinism over
 dissingularisation/epistemic-nonimmanence/flawed-epistemic-determinism. Thus prospective
 relative-ontological-completeness is inherently bound with its very own epistemic projective-
 totalitative-implications as of the 'decentering of the human subject' involved in knowledge-
 reification. This inherently projects a 'practical picture of human epistemic determination' of
 'maximal disseminative human epistemic articulations at relative uninstitutionalised-
 threshold' and 'minimum select human epistemic articulations at prospective
 institutionalisations', and so as of existence/existence-potency/existential-possibilities as the
 transcendental-signifier/transcendental-enabler/existence-potency transversally induced
 ontological-primemovers-totalitative-framework selective epistemic-veracity transcendence-
 and-sublimity. In this regard and at the general epistemic level of reference-of-thought-
 devolving, we can appreciate the massively shrunk epistemic-veracity possibilities available
 for our present positivism credible construal of ontological-veridicality over the epistemic-
 veracity possibilities previously available for non-positivistic social-setups credible construal

of ontological-veridicality as of their full existential cognition of superstition, witchcraft, spiritualism, etc., and their social implications; and this reflects the very fact that ‘intemporal ontological-faith-notion-or-ontological-fideism instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative-implications’ is one associated with increasing thinning out of epistemic-veracity as of prospective relative-ontological-completeness projective-totalitative-implications induced from ontological-primemovers-totalitative-framework. Central to such epistemic-veracity thinning out is the very essential process behind increasing human institutionalisation process which is deferential-formalisation-transference. Besides deferential-formalisation-transference associated epistemic-veracity relevance for institutional construction and institutional rules of critical importance for human organisation like political and legal institutions, such deferential-formalisation-transference associated epistemic-veracity has been inherently of strongest relevance in knowledge domains more easily amenable to ontological-primemovers-totalitative-framework and low emotional involvement like the natural sciences but weakly so inherently in many a social domain-of-study not readily amenable to strong ontological-primemovers-totalitative-framework and of high emotional involvement, and as such social domains practically tend to get into amalgamation with the extended-informality as of its deficient averaging-of-thought epistemic impertinence. Prospective notional-deprocrpticism necessarily implies a further epistemic-veracity thinning out as of its prospective relative-ontological-completeness-of-reference-of-thought associated ontological-primemovers-totalitative-framework, with the implication that our positivism-procrpticism uninstitutionalised-threshold epistemic-veracity is in many ways construed as of epistemic impertinence at its disjointedness-as-of-reference-of-thought uninstitutionalised-threshold and superseded by futural Being-development/ontological-framework-expansion as of

prospective deprocrypticism disseminative epistemic-veracity and so as the prospective epistemic-veracity thinning out outcome of existence/existence-potency/existential-possibilities as the transcendental-signifier/transcendental-enabler/existence-potency determinant selector as of the deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought disseminative research-programme coherence and ontological-contiguity. The idea being that the deprocrypticism epistemic-veracity as of such disseminative research-programme coherence and ontological-contiguity equally imply an underlying falsifiability-or-deferred-falsifiability and validation-or-deferred-validation as a constraint to the social domain-of-study meant to render it more thoroughly amenable to ontological-primemovers-totalitative-framework projective-totalitative-implications capable of reflecting the unassailability of the most transversally profound theorisations and conceptualisations on the basis of their demonstrable operant implications as of existential-contextualising-contiguity knowledge-reification for transcendence-and-sublimity. Such a deprocrypticism epistemic-veracity implication is pertinent because blurriness and un-disambiguation underlies the indecision and relative impertinence in many an instance of social knowledge conception that is not thoroughly subjected to ontological-primemovers-totalitative-framework, such that it is obvious to all that the epistemic-veracity as of existence/existence-potency/existential-possibilities selective function of ontological-primemovers-totalitative-framework as developed in the natural sciences tends to be poorly developed in many a domain-of-study of the social. In this regard, we can appreciate for instance in the physics and other natural sciences totalising-devolved-purview-as-domain-of-construal-as-intrinsic-reality/ontological-veridicality, the 'thin epistemic-veracity line' arrived at transversally as of concurrent cause-and-effect determinations that allows for developed singular or near-singular comprehensive explanations of phenomena 'discarding the demonstrably impertinent conceptions', while in contrast with many a domain-of-study in the social, without necessarily implying this as all-

encompassing but still critically and substantively so, such a spearheading towards the ontologically decisive is lost/obliterated in an approach driven by theoretical and conceptual mutuality/equilibrium rather than a transversal constraining to the 'superior party' that is existence/existence-potency/existential-possibilities, and thus specifically giving room for many an instance of obvious muddlement as well as intellectual-bad-faith with a corresponding relative passivity to social issues and problems as if institutional-being-and-craft was an end in itself as structurally/paradigmatically knowledge certifying. Furthermore, while the idea of falsifiability and validation have traditionally been associated with the fundamental research methodologies of experimentation and observation, however the complex nature of social phenomena and even some natural science phenomena has dragged out the epistemic-veracity of the scientific methodology. Such that what increasingly underlies the scientific methodology is more extensive as of the reflection of pertinent phenomenality experimented or stated or demonstrated, by the coherence and implied ontological-contiguity of observations, conceptualisations and predictions, in their conflatedness holism/nested-congruence or how these conflate as of prospective relative-ontological-completeness with existence as the absolute a priori. Ultimately, the contrastive epistemic-veracity of theoretical and conceptual articulations rather lies with regards to their existential-contextualising-contiguity knowledge-reification as of their critical operant implications and unmuddled conceptions. Furthermore, the deprocrypticism epistemic-veracity implies a further extension of deferential-formalisation-transference as of less predisposition to extended-informality averaging-of-thought. With the projective-totalitative-implications that the deprocrypticism/preempting-of-disjointedness-as-of-reference-of-thought extended-informality requires an organic-knowledge type of pedagogy based on eliciting an ontological-faith-notion-or-ontological-fideism solipsistic sense-of-things, over the usual mechanical-knowledge type of pedagogy which is rather based on eliciting positive-

opportunism sense-of-things. This is critical because the deprocrypticism reference-of-thought warrants a more originary/as-of-event mental-disposition ‘beyond just responsiveness to second-natured institutionalisation’ but equally the capacity to assume the solipsistic—first-naturedness/anamnestic-residuality-as-ratiocinative-integrity-(not-mythical-recollection)/transepistemicity ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen behind the ‘inventing’ as of reasoning-through/messianic-reasoning with respect to ‘upholding and defending ontological-veridicality beyond constraining-and/or-second-natured institutionalisation framework’ as well as actually perpetuating prospective ontologically-veridical sublimity-as-of-deprocrypticism-immanent-implications, and so as of a fundamental mental-disposition for perpetually preempting-disjointedness-as-of-reference-of-thought. With the foregoing immanence-function-conflatedness insight, of most critical importance and decisiveness as structurally/paradigmatically anchoring futural Being-development/ontological-framework-expansion as of prospective deprocrypticism meaningfulness-and-teleology is the need for a deprocrypticism reconceptualised conception of the human construction-of-the-Self. In this regard, we can appreciate critically that hitherto and as of a natural human predisposition to totalising—self-referencing-syncretising, the psychology traditions have tended to ad-hocly construe the construction-of-the-Self as of a human-subpotency flawed absolutising epistemic reference, and so over an existence-potency absolutising epistemic reference, specifically as so-construed from our positivism—procrypticism registry-worldview/dimension flawed absolutising epistemic reference. The fact that existence/intrinsic-reality/ontological-veridicality precedes human-subpotency thus questions the veracity of the ontological orientation of traditional psychology/psychoanalysis; wherein ‘the human psychology of absolutising epistemic reference is wrongly conceived as of ontological-normalcy rather than as of epistemic-abnormalcy’ considering the necessarily decontorting human-subpotency psyche on the constraint of our ontologically-compromised

mathesis/motif/throwness-disposition as of our totalising–throwness-in-existence. The implication here is that we cannot have a human-subpotency flawed absolutising epistemic reference that as of human-subpotency can surpass the ontological-veracity of the full-potency of existence/intrinsic-reality/ontological-veridicality as absolutising epistemic reference as of ontological-normalcy/post-convergence, and so given human-subpotency prior relative-ontological-incompleteness implied flawed prospective ontological-performance. Such a human-subpotency flawed absolutising epistemic reference for meaningfulness-and-teleology can be construed as of ‘human akrasia-susceptibility-or-akrasiatic-drag/degenerating-construction-of-the-Self/ontological-fracturing/desublimation complex’; as of ‘human-subpotency temporality flawed absolutising epistemic reference’ as it induces flawed ontological-performance as by its totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag it ‘wrongly seem to advantageously substitute’ for the potent as intemporal absolutising epistemic reference ontological-performance of existence-potency/intrinsic-reality/ontological-veridicality. It is this construction-of-the-Self human-subpotency deficiency element construed as ‘human akrasia-susceptibility-or-akrasiatic-drag/degenerating-construction-of-the-Self/ontological-fracturing/desublimation complex’ that raises-the-charge-that-and-reflects-the-notion-that the mental-disposition of recurrent-utter-uninstitutionalisation is structurally/paradigmatically bound to fail the ontological-performance-including-virtue-as-ontology of base-institutionalisation mental-disposition, that of base-institutionalisation–ununiversalisation will likewise fail as of universalisation mental-disposition, universalisation–non-positivism/medievalism will likewise fail as of positivism mental-disposition, and prospectively our positivism–procrypticism will likewise fail as of deprocrypticism mental-disposition. This element of the dynamic evolution of the human psyche and the underlying instigative agency, herein articulated as ‘human akrasia-susceptibility-or-akrasiatic-

drag/degenerating-construction-of-the-Self/ontological-fracturing/desublimation complex', is mostly lost to traditional psychology that doesn't register our own positivism–procrpticism prior relative-ontological-incompleteness-of-reference-of-thought as of an ontological-normalcy/post-convergence/referentialism notional-deprocrpticism perspective of analysis as of singularisation/epistemic-immanence/veridical-epistemic-determinism. We can perceive the 'totalising/circumscribing/delineating dementing–qualia-schema' associated with akrasia-susceptibility-or-akrasiatic-drag complex only from the perspective of prospective relative-ontological-completeness-of-reference-of-thought, and so as of the latter's difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism as from the ontological-conguity of its apriorising/intelligibilitysetup/measuringinstrument/axiomatising, as it reflects-and-contemplates of the uninstitutionalised-threshold of the prior relative-ontological-incompleteness-of-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising, whereas the prior relative-ontological-incompleteness-reference-of-thought mental-disposition reflects its uninstitutionalised-threshold as a nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) in notional-discontiguity/epistemic-discontiguity by 'resetting its apriorising/intelligibilitysetup/measuring-instrument which is flawed at its uninstitutionalised-threshold' thus taking a flawed posture of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism in notional-discontiguity/epistemic-discontiguity. Such akrasia-susceptibility-or-akrasiatic-drag complex 'totalising/circumscribing/delineating dementing–qualia-schema' is reflected as of the 'totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag of the prior relative-ontological-incompleteness-reference-of-thought apriorising/intelligibilitysetup/measuringinstrument/axiomatising as

mathesis/motif/thrownessdisposition-at-its-uninstitutionalised-threshold'. Consider the akrasia-susceptibility-or-akrasiatic-drag complex 'totalising/circumscribing/delineating dementing-qualia-schema' from a prospective positivism/rational-empiricism apriorising/intelligibilitysetup/measuring instrument in this regards, with respect to 'God of plane' type of expression in an animistic/base-institutionalisation setup wherein their fundamental apriorising/intelligibilitysetup/measuringinstrument/axiomatising psychologism is so ingrained that every meaningfulness from a positivistic social-setup cultural diffusion is inevitably reconstrued in the animistic/base-institutionalisation apriorising/intelligibilitysetup/measuringinstrument/axiomatising psychologism of meaningfulness-and-teleology in totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag with its uninstitutionalised-threshold as a nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) whereas such a representation as a nondescript/ignorable void wouldn't be recognised from the positivism/rational-empiricism perspective as of its prospective relative-ontological-completeness-of-reference-of-thought. Likewise, as of prospective insight, the nondescript/ignorable void (actually speaking of akrasiatic-drag-denatured-and-dementing-narratives) we imply as of our positivism-procrypticism disjointedness-as-of-reference-of-thought is certainly prospectively contemplable in futural Being-development/ontological-framework-expansion as of prospective deprocrypticism reflection of our akrasia-susceptibility-or-akrasiatic-drag complex 'totalising/circumscribing/delineating dementing-qualia-schema' of positivism-procrypticism disjointedness-as-of-reference-of-thought in 'totalising-self-referencing-syncretising/circularity/interiorising/akrasiatic-drag as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism from the deprocrypticism ontological-contiguity, whereas from our positivism-procrypticism perspective we'll tend to a 'resetting of the

apriorising/intelligibilitysetup/measuringinstrument/axiomatising’ of positivism–procrypticism in ontological-disconguity as of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism. This expansion of the traditional notion of akrasia, as akrasia-susceptibility-or-akrasiatic-drag complex is rather as of the perspective of existence-potency–as-of-ontologically-uncompromised-ontological-normalcy/post-convergence/referentialism ‘notional preempting-of-disjointedness-as-of-reference-of-thought’/notional-deprocrypticism and not as of ontologically-compromised human-subpotency perspective; and is articulated more completely to reflect ontological-performance-including-virtue-as-ontology as of the the-Good/understanding/knowledge-driven/ontological-primemovers-totalitative-framework construal/conceptualisation with respect to prospective relative-ontological-completeness projective-totalitative–implications in accounting for human differences of ontological-performance-including-virtue-as-ontology. This author contends that such a traditional psychology approach to the construction-of-the-Self is constituted as of identitive-constitutedness-as-totality-dereification-in-dissingularisation-as-flawed-epistemic-determinism. Thus the notion of ‘human akrasia-susceptibility-or-akrasiatic-drag/degenerating-construction-of-the-Self/ontological-fracturing/desublimation complex’ refers to the mental dispositional state of paradigmatic/structural rationalised-closedness-of-ontological-performance-of-the-self ‘as bound to define-and-shape any given registry-worldview’s/dimension’s specific ontological-performance-including-virtue-as-ontology-and-vices-and-impediments’. Rather an ontologically-veridical construction-of-the-Self is necessarily in conflatedness as of the intemporal absolutising epistemic reference of existence-potency-constrainous-implications-over-human-subpotency so-implied as of ontologically-uncompromised ontological-normalcy/post-convergence/referentialism and construed as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism. Such a

conflatedness construction-of-the-Self is one that is structurally/paradigmatically enframed in grasping the ‘notional dissonance/consonance of human superego and existence-potency’, as it construes of human-subpotency reference-of-thought given level of ontological-veridicality-commitment/aetiologisation/ontological-escalation/otherliness implications; and so as devolvingly thereof, the construction-of-the-Self is the individual autonomous ecstatic/existential registering, contemplating, responding, conceptualising, articulating, effecting and acting-out of its social meaningfulness-and-teleology as of the projective-totalitative-implications of living-development, institutional-development and Being-development/ontological-framework-expansion. Thus fundamentally the projective-totalitative-implications and orientations underlying the construction-of-the-Self as of a deprocrpticism conception is rather transformative, in reflecting its protensive-consciousness insight of varied human constructions-of-the-self as of institutional-cumulations/institutional-recomposures with successive registry-worldviews/dimensions human-subpotency reference-of-thought induced recurrently from the instigative projective-totalitative-implications of ontological-dementation/dialectical-dementation stranding dialectics. Thus, what critically stands out from traditional psychology as inducing such a novel differentiated and transformative articulation of the construction-of-the-Self is the notion of ‘human akrasia-susceptibility-or-akrasiatic-drag/degenerating-construction-of-the-Self/ontological-fracturing/desublimation complex’. Interestingly, many a traditional take on the notion of akrasia, construed herein as akrasia-susceptibility-or-akrasiatic-drag complex, like the Socratic argument of its non-veridicality strangely enough rather confirms its veridicality, in the sense that such arguments are being made from the perspective of human-subpotency, which is exactly the irrelevant perspective for ontological-veridicality articulation. Consider the idea that a cholera epidemic that was to occur say in 100 B.C. will not stop from occurring because human beings did not know of notions-of-bacteria-as-

causing-diseases-and-instead-believed-in-bad-omen-for-not-making-the-right-sacrifices-or-so-so-and-so; as existence/intrinsic-reality/ontological-veridicality will not factor in such a state of ‘human-subpotency in its totalising–self-referencing-syncretising/circularity/interiorising/akrasiatic-drag’, and adjust to it by stopping such an epidemic. This is exactly why ontologically-veridical meaningfulness-and-teleology implies a displacement/decentering-of-the-human-subject with its emancipation arising as of its submitting to the ‘superior party’ that is existence/intrinsic-reality/ontological-veridicality as is falsifiable and can be validated by ontological-primemovers-totalitative-framework. Thus intemporal ontological-performance ever always warrants human prospective relative-ontological-completeness-of-reference-of-thought for empowering and responsible meaningfulness-and-teleology for transcendence-and-sublimity. Thus akrasia-susceptibility-or-akrasiatic-drag complex further implies that the very state of unwariness with respect to prior relative-ontological-incompleteness as of a nihilistic disposition is structurally/paradigmatically potently conducive/endemising/enculturating to its vices-and-impediments, and as the very possibility for prospective ontological-performance-including-virtue-as-ontology arises as of the intemporal ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen reasoning-through/messianic-reasoning as of its ‘seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity’. Can we wish that we don’t have understanding whether directly, or indirectly as of reifying deferential-formalisation-transference, so that we aren’t intellectually-and-morally accountable then? How can we reconcile the fact that given human totalising–thrownness-in-existence the possibility for prospective human institutionalisation enabling transcendence-and-sublimity could only arise as of prospective reasoning-through/messianic-reasoning that had no prior effective knowledge and virtue reference to go on to prospectively ‘invent’ reasoning-

through/messianic-reasoning knowledge and virtue before the institutionalising of such reasoning-from-results/afterthought emancipatory possibilities, and then contend to make any given reasoning-from-results/afterthought knowledge and virtue limits intellectually and morally deterministic as of a nihilistic closed-construct-of-meaningfulness-and-teleology-as-of-‘nondescript/ignorable-void’-with-regards-to-prospective-apriorising-implications? In this regard, the anti-nihilist stance implies that the very first notion of human ontological-performance-including-virtue-as-ontology as of human totalising–thrownness-in-existence induced anxiety lies in the fact that as of intemporal ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen reasoning-through/messianic-reasoning, humankind has the relative capacity to build and/or adhere to prospective relative-ontological-completeness possibilities. It is this insight that validates the ontological-veracity of the conception of ‘human akrasia-susceptibility-or-akrasiatic-drag/degenerating-construction-of-the-Self/ontological-fracturing/desublimation complex’, and it is inherently so-validated as of ‘intemporal ontological-faith-notion-or-ontological-fideism parrhesiastic askesis-or-acumen reasoning-through/messianic-reasoning instigated human institutionalisation process as of difference-conflatedness-as-totalitative-reification-in-singularisation-as-veridical-epistemic-determinism projective-totalitative–implications’ as it cogently-and-fluidly as of ecstatic-holism/nested-congruence ahistorically-and-aculturally reflects-and-accounts-for the transitioning institutionalisation process development of the human species psyche. This insight equally specifically underlies the psychoanalytic ontological-veracity of ‘human akrasia-susceptibility-or-akrasiatic-drag/degenerating-construction-of-the-Self/ontological-fracturing/desublimation complex’ as it reflects the basic human psychological nature across all ages and times, so appraised as from a the-Good/understanding/knowledge-driven/ontological-primemovers-totalitative-framework construal/conceptualisation with respect to prospective relative-ontological-completeness-of-reference-of-thought projective-

totalitative—implications in accounting for human differences of ontological-performance—including-virtue-as-ontology across the successive registry-worldviews/dimensions reference-of-thought-level of ontological-performances as well as the temporal-to-intemporal differences of ontological-performances as of each registry-worldview's/dimension's reference-of-thought-devolving-level, rather than flawed impression-driven/good-naturedness/wishfulness conceptualisation as of inherent identitive essences flawed accounting of human differences. This idea of 'human akrasia-susceptibility-or-akrasiatic-drag/degenerating-construction-of-the-Self/ontological-fracturing/desublimation complex' fundamentally harkens back to the notion of ontological-faith-notion-or-ontological-fideism as of its 'seeding promise of human-subpotency ontological-performance equivalency/correspondence with the full-potency-of-existence-as-of-its-coherence/contiguity'; wherein successive prospective relative-ontological-completeness-of-reference-of-thought generate structural/paradigmatic existential implications as of 'successive specific less-and-less-degenerate human akrasia-susceptibility-or-akrasiatic-drag/degenerating-construction-of-the-Self/ontological-fracturing/desublimation complex' with respect to the successive registry-worldviews/dimensions construction-of-the-Self, as of their ontological-performance—including-virtue-as-ontology-and-vices-and-impediments. Basically, the construction-of-the-Self is herein construed rather as: 'the self, as of its totalising—self-referencing-syncretising/circularity/interiorising/akrasiatic-drag metaphoricity, as of its evolving-and-devolving constraining reference-of-thought pitting its axiomatic structuring/paradigming apriorising/intelligibilitysetup/measuringinstrument/axiomatising correspondingly with existence-potency/intrinsic-reality/ontological-veridicality, as so-entertainable/permissible by its given registry-worldview's/dimension's—reference-of-thought-for-social-functioning-and-accordance', in the construction-of-the-Self's existential narrative; involving existential reactive temporisation/bouncing-off of the construction-of-
