

- actin cytoskeleton organization
- RHO GTPase cycle
- cortical cytoskeleton organization
- regulation of small GTPase mediated signal transduc
- retrograde neuronal dense core vesicle transport
- notochord development
- tube morphogenesis
- neuron projection development
- regulation of cytoskeleton organization
- glial cell development
- negative regulation of cell population proliferation
- import into cell
- ameboidal-type cell migration
- positive regulation of cell motility
- Inositol phosphate metabolism
- amino acid transmembrane transport
- endothelium development
- amyloid precursor protein metabolic process
- regulation of smooth muscle cell proliferation
- regulation of protein localization to plasma membran
