

# A importância da Ciência Cidadã para a redução das iniquidades em saúde

Dra. Camila Biazus Dalcin

Professora na Escola de Ciências da Saúde, *University of Dundee*

3 de outubro de 2024

# Considerações iniciais

# Valorização do PPIE: algumas possibilidades

01

Universidades com estratégias de PPIE (fórum, networks, etc.) - pesquisa, ensino e prática – exemplo *University of Dundee*

02

Agências de fomento – submissão de projetos – objetivos e resultados, desenvolvimento e publicação – impacto

03

Suporte para pagamento dos especialistas por experiências e engajamento em pesquisa – *NIHR*

04

Centro Nacional de Coordenação de Engajamento com o público - *National Co-ordinating Centre for Public Engagement* *NCCPE*

# Coprodução de projetos de pesquisa

Alguns  
exemplos da  
importância da  
Ciência Cidadã  
para a redução  
das iniquidades  
em saúde

# Exemplo 1: O que as pessoas que usam drogas pensam sobre o uso dos seus dados em pesquisa?

Agência de fomento:  
Research Data Scotland  
(RDS)

Agência de fomento:  
MECOPP, Governo  
Escocês

## Exemplo 2: Melhora do cuidado em saúde para a população cigana na Escócia

Agência de fomento: *Institute of Social Sciences Research (ISSR)*

## Exemplo 3: O que funciona para nós? Estratégias para melhorar a saúde mental no período perinatal

# Reflexões finais

---

- Valorização as organizações e indivíduos participantes no processo
- Ethos científico – porque, para quem e com quem?
- Credibilidade, confiança e compartilhamento
- Diversidade, Equidade e Inclusão
- Metodologias criativas no envolvimento e engajamento
