

/home/dynamatic/Dynamatic
/etc/dhls/Buffers/inc/SetUtil.h

```
graph TD; A["/home/dynamatic/Dynamatic  
/etc/dhls/Buffers/inc/SetUtil.h"] --> B[algorithm]; A --> C[iterator]; A --> D[set];
```

The diagram illustrates a header file inclusion structure. A central box at the top contains the file path `/home/dynamatic/Dynamatic/etc/dhls/Buffers/inc/SetUtil.h`. Three arrows originate from the bottom of this box and point to three separate boxes below it, labeled `algorithm`, `iterator`, and `set`. This indicates that `SetUtil.h` includes these three headers.

algorithm

iterator

set
