## FAIR-IMPACT consortium

# FAIR-IMPACT overall objective

## WHAT:

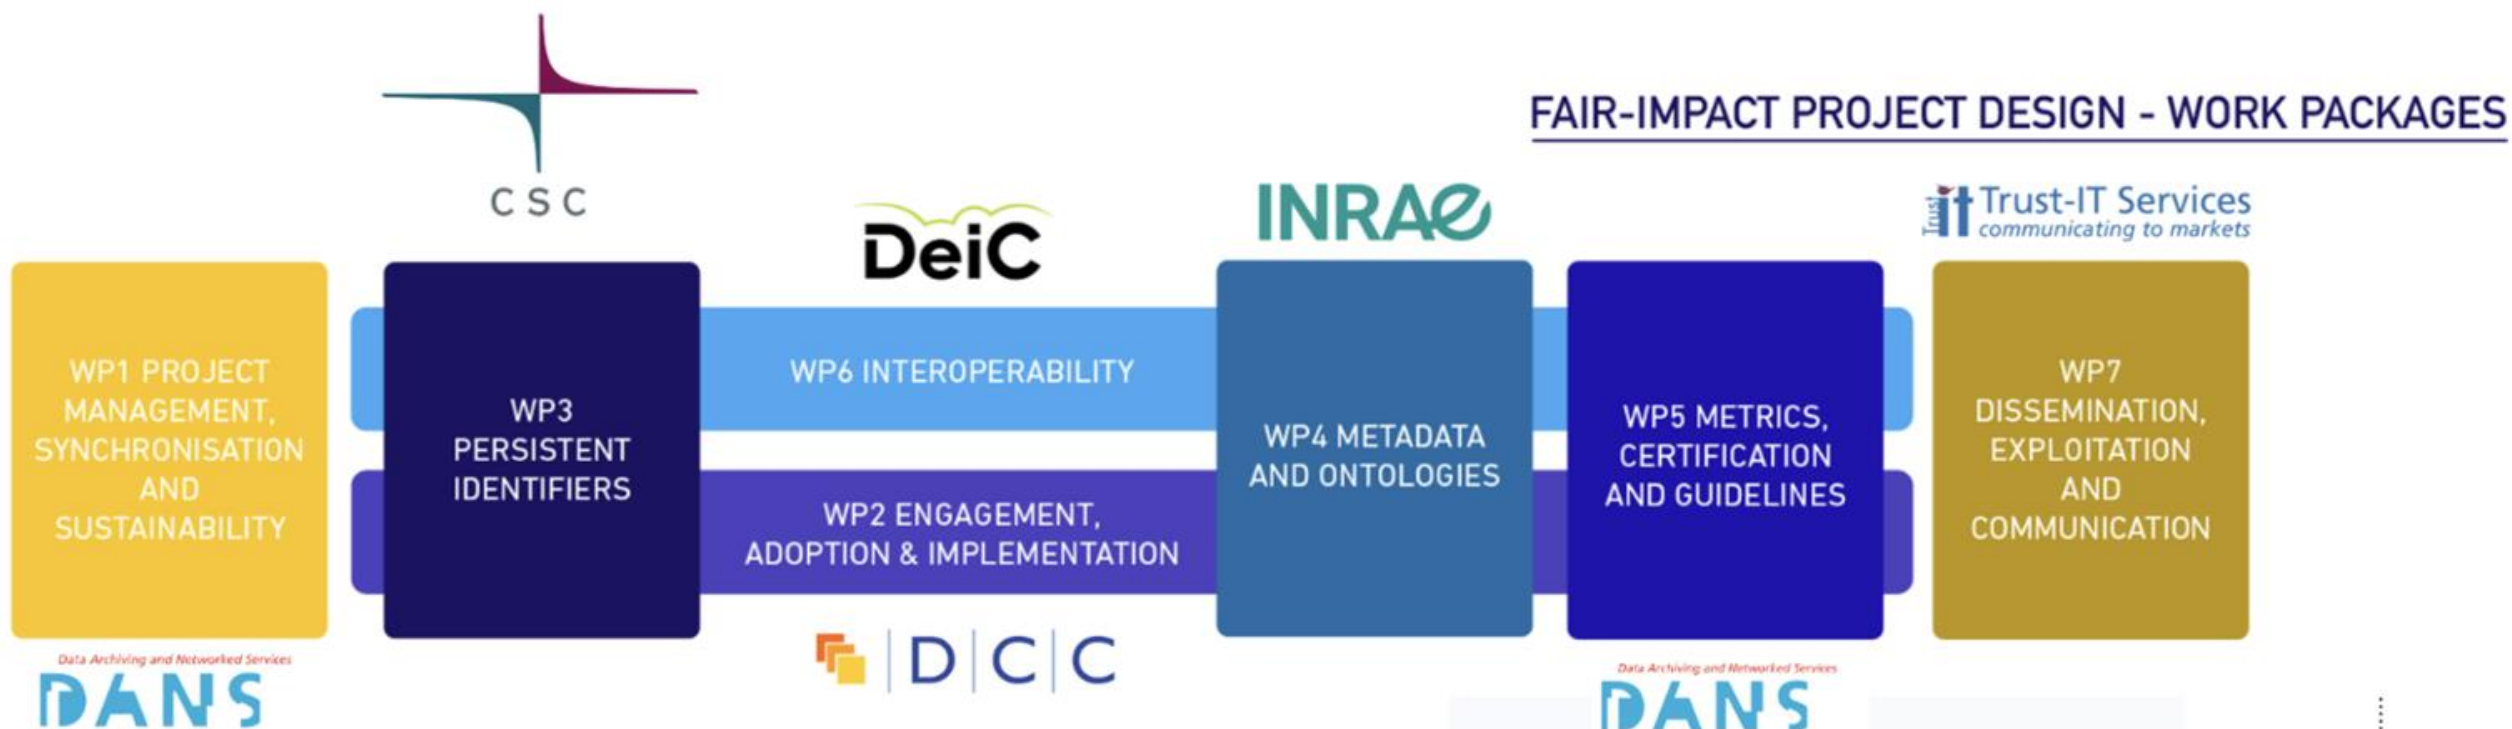

FAIR-IMPACT supports the implementation of FAIR-enabling practices, tools and services,

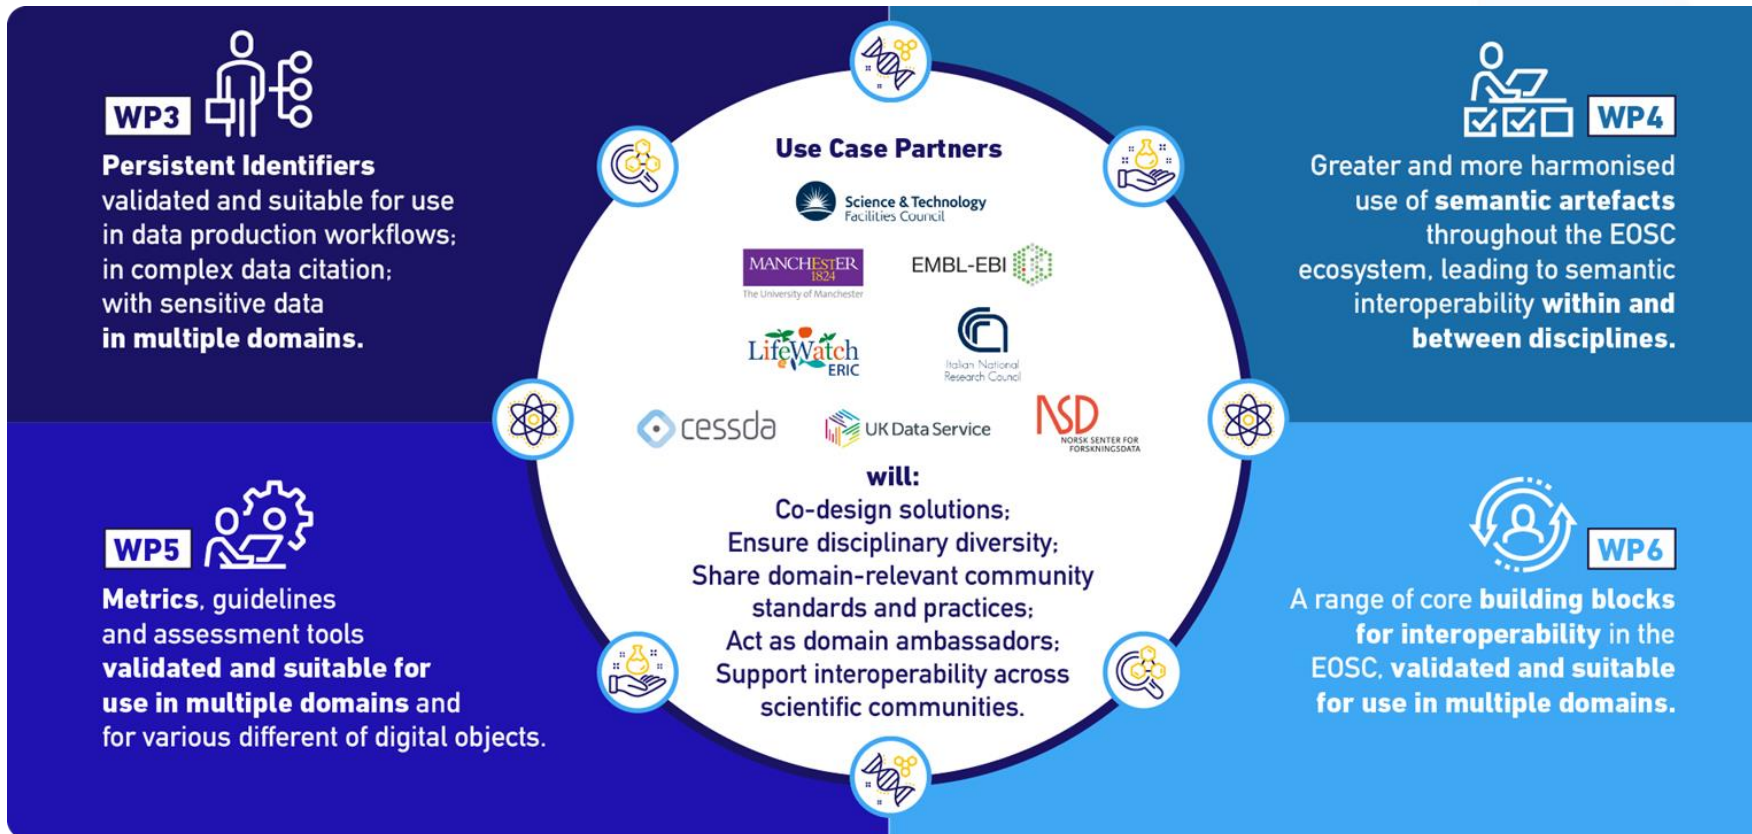

- across scientific communities
  - across research outputs
  - at a European, national, and institutional level
- 
- ★ *Identification of FAIR-enabling components (domain-specific => across domains)*
  - ★ *Coordination and support mechanisms for adoption, implementation and raising awareness*

# FAIR-IMPACT project design

# Practical implementation of the FAIR principles starting with integrated use cases on four scientific domains

## Social Sciences and Humanities

The F-UJI tool will be adapted to fit SSH relevant community standards for FAIR

## Photon & Neutron science

A range of components for cross-domain research data description will be tested

## Life science

Data provenance will be better documented by extending RO-Crate to practices on PID usage

## Agri-food

Metadata providers will implement a common API for federating access to semantic artefacts

### Materials:

- Metrics and assessing FAIRness
- Sustainability
- Persistent identifiers
- Legal & organisational interoperability
- Trustworthy and FAIR-enabling repositories
- Metadata, semantics and interoperability

### Outcomes:

## Engagement and support provided so far

- 30 teams in [three in-kind support programmes](#) (Jan-Oct 2024).  
Second running of programmes started in October
- [1st round of financial support actions](#) (Sept-Nov 2023): 32 teams
- [2nd round of financial support actions](#) (May-Oct 2024): 59 teams
- 944 registered participants for our FAIR Implementation Workshops series which are free and open to anyone
- Current open call for financial support: open until December 4th.  
Missed the virtual clinic: [Watch the recording!](#)

**121 teams of 285 participants  
supported through financial  
and in-kind support**

## D3.3 - Guidelines for creating a user tailored EOSC Compliant PID Policy

Published on: 05 November 2024

16 Guidelines for PID Managers

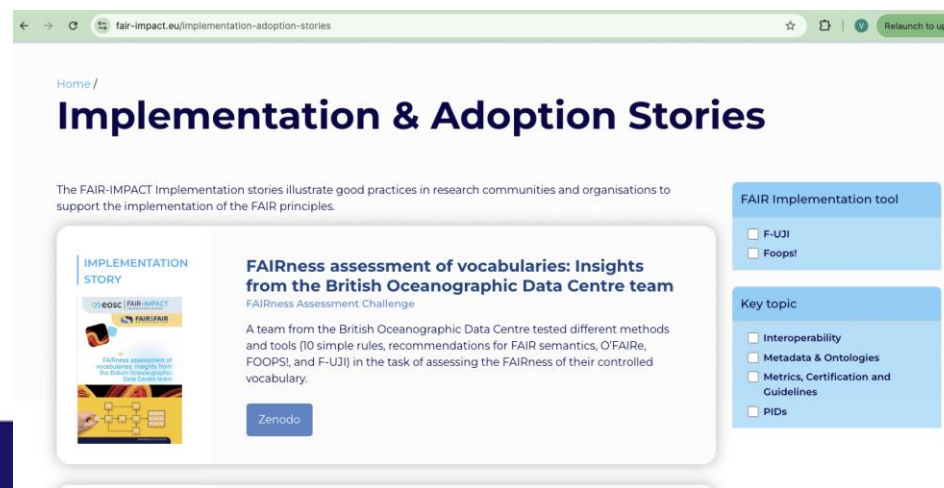

van Horik, Rene; Hugo, Wim

The main topic of this report concerns the formulation of guidelines for PID Managers regarding the creation of a "user tailored EOSC compliant PID policy." Central to the work are the following questions.... [Read more](#)

## Where are we now:

- Final year of the project => ending in May 2025
- Project outputs: Zenodo community and project website
- Final Open Call for Funding!
- 2nd policy brief:  
<https://doi.org/10.5281/zenodo.13348297>
- Collaborations with other EU funded projects in EOSC and FAIR landscape
- More focus on sustainability
- Active in relevant events and activities

## 3rd & final Open call

Open for financial (Route 2) support.  
The platform NOW open to applications  
by 4th December 2024

**Exposing repository information to foster connections and trust: evaluating and implementing guidelines [Poster]**

Dillo, Ingrid ; Ulrich, Robert ; Huber, Robert ; and 10 others

FAIR-IMPACT is developing guidelines and a prototype to expose relevant information as metadata to facilitate discovery, provide context, support interoperability, and create a sense of trust in service providers and the services they offer. Transparent and linked information between objects, the repositories that hold or interact with them, and...

Kalaizti, Vasso ; Dillo, Ingrid ; Ashley, Kevin ; and 12 others

FAIR-IMPACT has the ambitious goal of realising an EOSC of FAIR data and services by supporting the implementation of FAIR-enabling practices, tools and services across scientific communities and at national, European and institutional level. The project places its focus on persistent identifiers (WP3), metadata and ontologies (WP4) metrics, gui...
