

Table 1. Mixed-effects logistic regression model for availability of pro-authoritarian accounts

<i>Predictor variables</i>	<i>Outcome variable = Account unavailable</i>
Posting Myanmar content	3.149** (0.995)
Posting doxing content	0.837** (0.316)
Posting violence promotion	0.357 (0.286)
Posting disinformation	-0.066 (0.482)
Posting content targeting ethno-religious minority dissidents	0.051 (0.706)
Intercept	-4.984** (1.136)
N	3112

Table 2. Model's linktest output

<i>Variable</i>	<i>linktest output</i>
_hat	0.191* (0.094)
_hatsq	0.022 (0.014)
Intercept	0.416** (0.130)
N	3112

*p<0.05; **p<0.01

Standard errors are given in parentheses.
