### Welcome and introductions

MT opened the meeting by thanking panel members for, first of all, applying to become members of the panel and expressing appreciation for their volunteering their time and expertise to Open Science NL and the FAIR data panel specifically.

MT and MC introduced themselves.

### Round of introductions from the advisory panel members

The panel members introduced themselves by presenting a few slides each with the following information:

- Who are you (name, affiliation)?
- What's the expertise/experience you are bringing to the panel?
- What are, in your opinion, the two biggest challenges in putting FAIR data principles into practice, which could be addressed by Open Science NL in the subsequent work programme 2026 and 2027?
- Any potential conflicts of interest you wish to declare.

### Introduction to Open Science NL and the FAIR Data Advisory Panel

MT gave a presentation about Open Science NL and the FAIR Data Panel Advisory Panel (scope and ways of working and future activities of the panel).

### Q&A

Several points were discussed:

- Ensuring coherence between the OSNL programme lines on data and software
- Commitment to making all training materials funded under the national training and community platform for data professionals openly available and making the training itself open to anyone who sees themselves as a data professional (intentionally a broad term was used)
- The need to shift to diamond publishing models

**Actions**

- MT will collect people's preferences for 2 or 3 year terms and make a proposal to the members

**Meeting close**

- MT closed the meeting at 15.00
