# Words and concepts of interest

**‘public’**

**‘community’**

**‘public engagement’**

**‘community engagement’**

# Document collection and grouping

- **864** RPT documents from **129** universities and **381** academic units (U.S. and Canada)
- units divided into R-type, M-type, Bacc-type; subtypes within each (e.g., R1, R2, R3)
- academic units divided into:
  1. Life Sciences
  2. Physical Sciences & Mathematics
  3. Social Sciences & Humanities
  4. Interdisciplinary

**87%** of institutions mention  
**‘community’** in RPT docs

**75%** mention **‘public’**

**64%** mention  
**‘public engagement’** and/or  
**‘community engagement’**

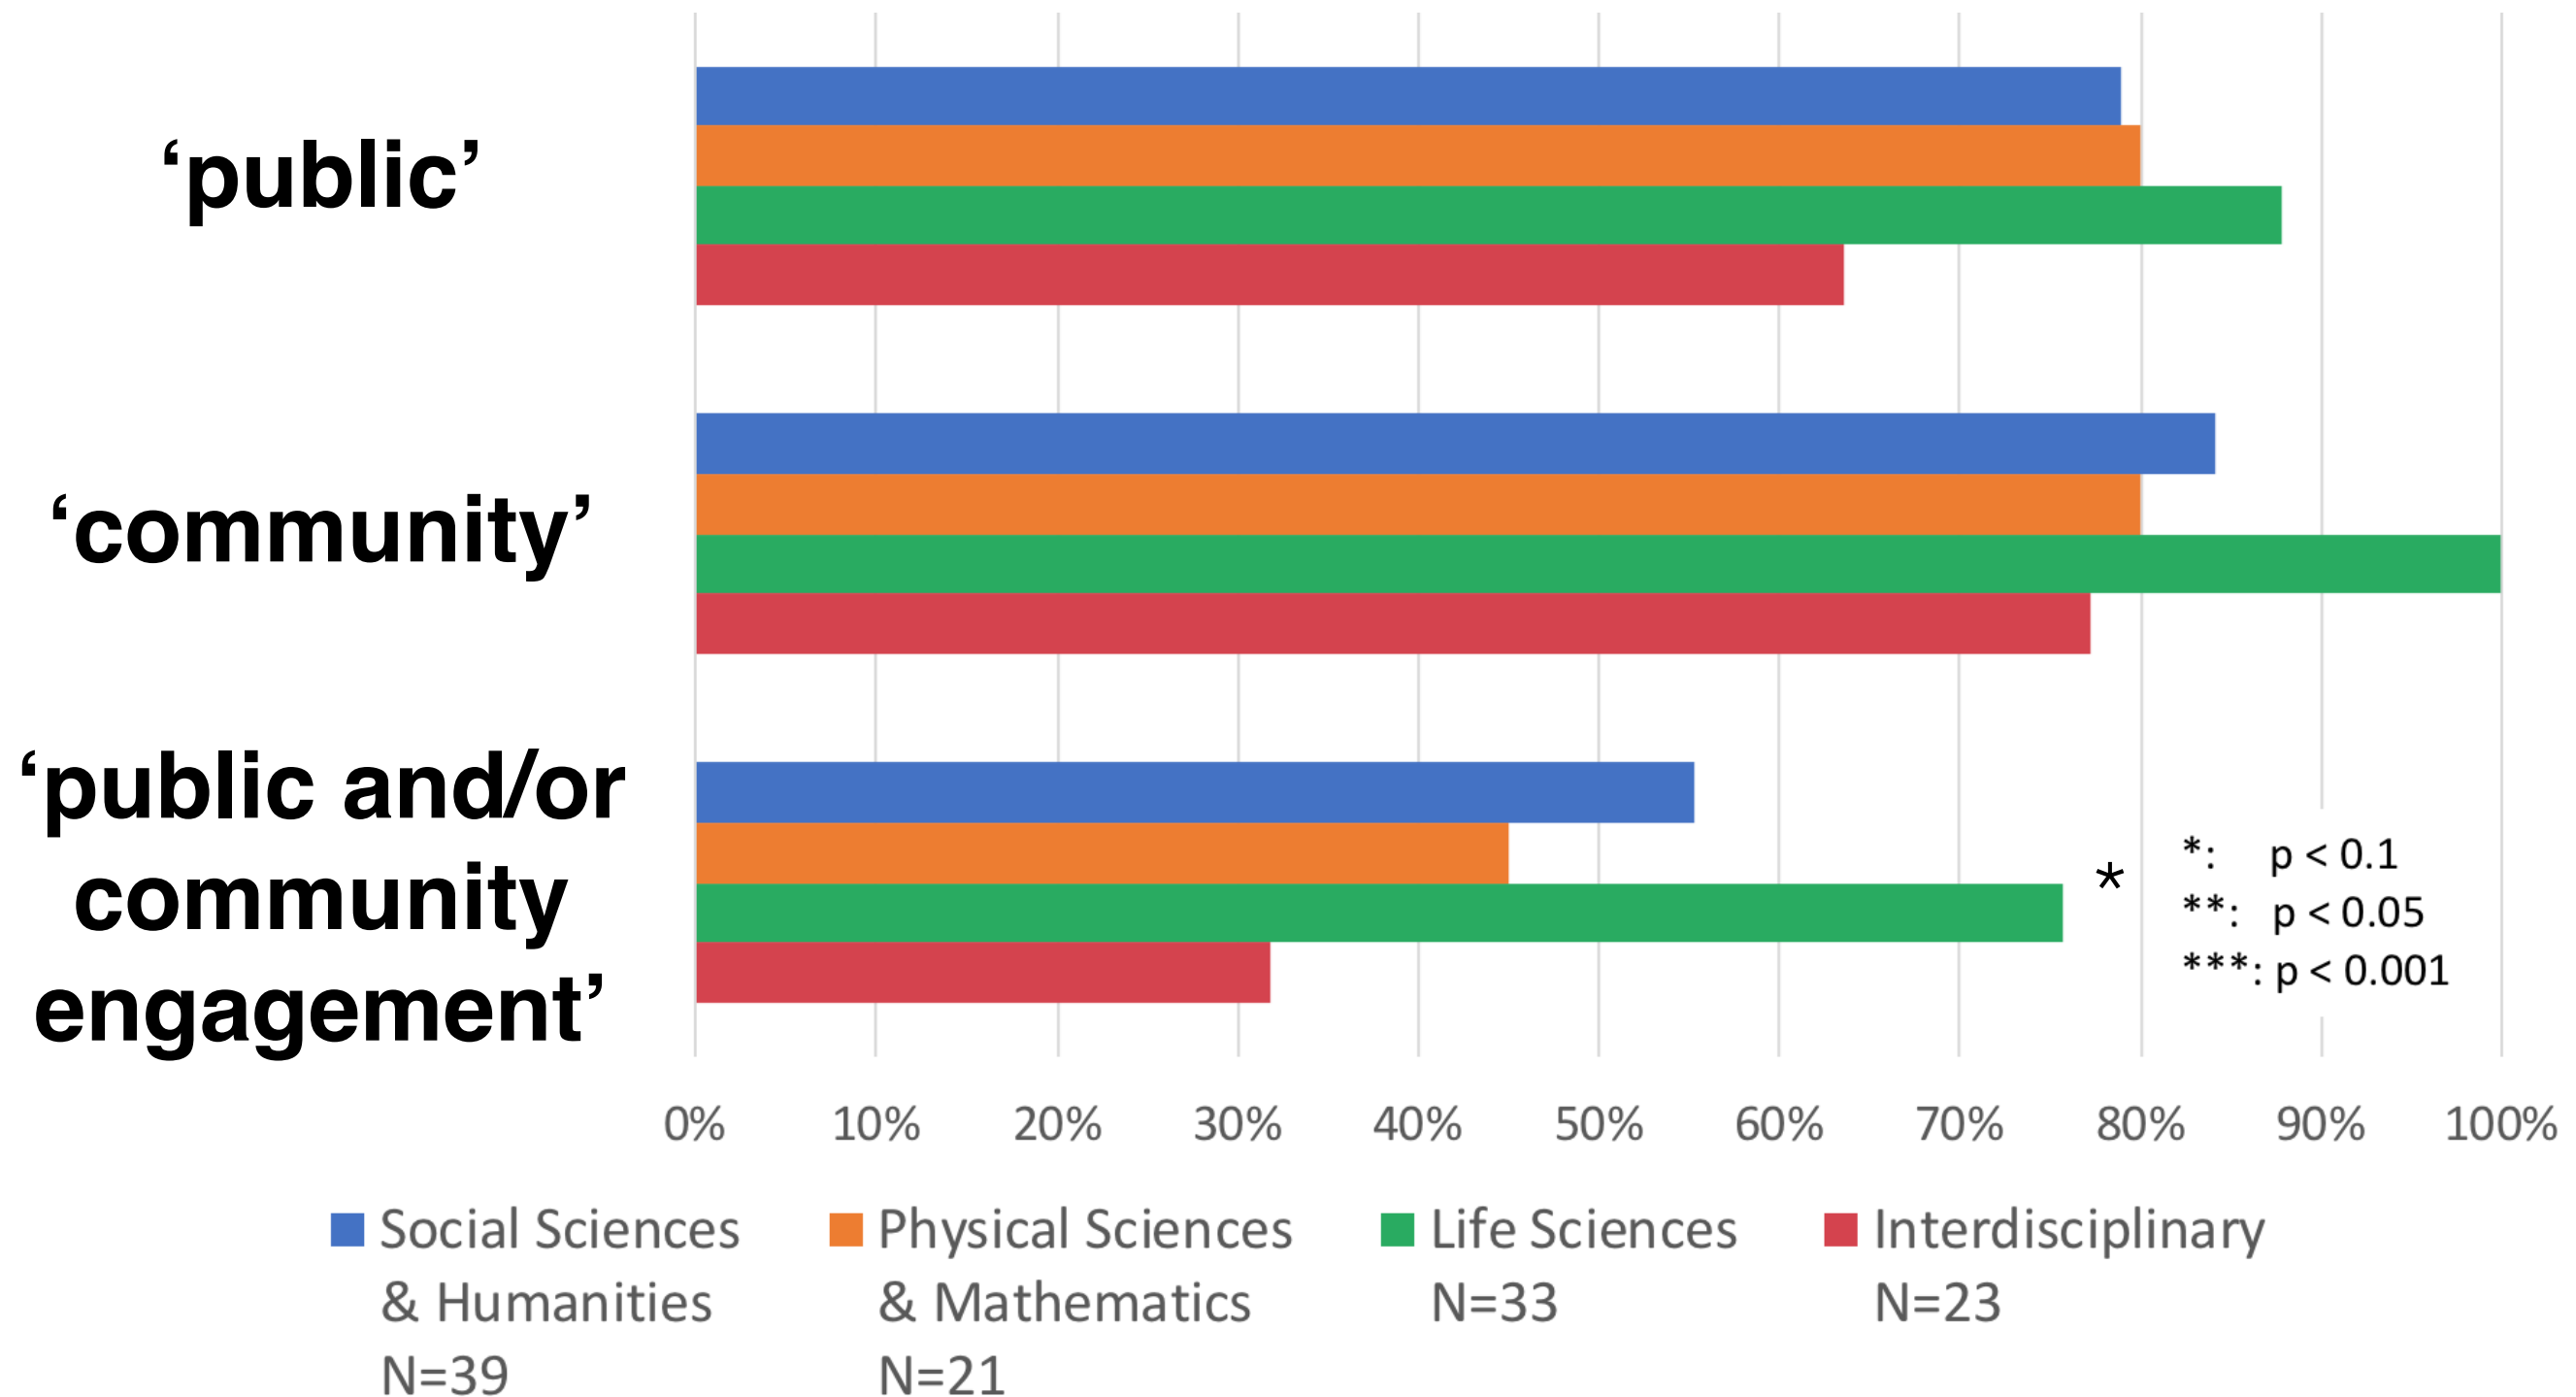

# Mentions in RPT docs by institution type

# Mentions in RPT docs by institution subtype

# Mentions in RPT docs by discipline

# Most frequent word near 'public' is 'service'

Most frequent words near ‘community’ are  
‘university’ and ‘service’

# Words and concepts of interest

**‘impact’**

**‘open access’**

**traditional outputs**

**(books, conference proceedings, grants,  
journal articles, monographs, presentations)**

**metrics**

**(citations, impact factor,  
acceptance/rejection rates)**

# Mentions in RPT docs by institution type

# Mentions in RPT docs by institution subtype

# Mentions in RPT docs by discipline

# Open access valued little, if at all

- only 5% of institutions mention OA
- mentions neutral or negative, none supportive
- question quality of OA journals, caution against predatory journals

# Most frequent word near 'impact' is 'research'

The **public** dimension of **impact**  
is rarely mentioned explicitly  
in RPT documents

only 9% of R-type institutions,  
11% of M-type

# Conclusions

While there is a relatively high incidence of the terms ‘**public**’ and ‘**community**’ in the RPT documents...there are **neither explicit incentives, nor clear structures of support** for assessing the contributions of scholarship to the various dimensions of publicness.

# What's the good news?!

We can fix this!

There are clear **opportunities** for institutions to **change how faculty work is assessed and incentivized** through the RPT process to achieve scholarship for the public good.
