Autorsko delo

Zakon o autorskim i srodnim pravima*

Autorsko delo je originalna duhovna tvorevina autora, izražena u određenoj formi, bez obzira na njegovu umetničku, naučnu ili drugu vrednost, njegovu namenu, veličinu, sadržinu i način ispoljavanja, kao i dopuštenost javnog saopštavanja njegove sadržine.

Autorskim delom smatraju se, naročito:

1. pisana dela (knjige, brošure, članci, prevodi, računarski programi u bilo kojem obliku njihovog izražavanja, uključujući i pripremni materijal za njihovu izradu i dr.);
2. govorna dela (predavanja, govori, besede i dr.);
3. dramska, dramsko-muzička, koreografska i pantomimska dela, kao i dela koja potiču iz folklora;
4. muzička dela, sa rečima ili bez reči;
5. filmska dela (kinematografska i televizijska dela);
6. dela likovne umetnosti (slike, crteži, skice, grafike, skulpture i dr.);
7. dela arhitekture, primenjene umetnosti i industrijskog oblikovanja;
8. kartografska dela (geografske i topografske karte);
9. planovi, skice, makete i fotografije;
10. pozorišna režija.

...

* https://www.paragraf.rs/propisi/zakon_o_autorskom_i_srodnim_pravima.html

- Autor uživa **moralna** i **imovinska** prava u pogledu svog autorskog dela od trenutka nastanka autorskog dela.
- Moralna prava autora ne mogu se prenositi ugovorom.
- Imovinska prava mogu se prenositi (isključivo i neisključivo) i nasleđivati.

Osnovni pojmovi

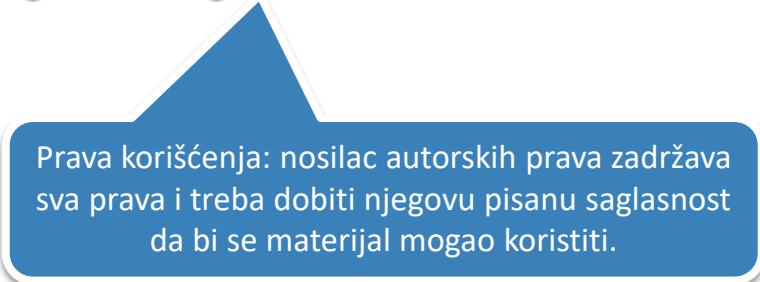

- **Copyright** (anglosaksonski koncept) – razlika u odnosu na kontinentalno zakonodavstvo u tumačenju moralnih prava i situacija kada su pojedina prava suspendovana (kritika, izveštavanje i istraživanje, edukacija – koncept *fair use*)
- **Copyleft**: delo se sme koristiti, preoblikovati i nadograđivati, ali tako da to pravo važi za sve kopije i adaptacije dela.
- **Licenca** – dozvola da se određeno delo koristi pod određenim uslovima (definiše prava korišćenja).

- Autorska prava (ko je vlasnik autorskih prava)
- Prava korišćenja (na koji način materijal sme da se koristi)

Autorska prava su istekla ili je delo nastalo pre uvođenja pojma autorskih prava

Autor se odriče prava i predaje delo u javni domen

Sadržaj se može koristiti i za to nije potrebno tražiti saglasnost.

- Standardizovane licence se menjaju i razvijaju – verzije
- Pomoć prilikom izbora licence: <https://choosealicense.com/>

Creative commons licence

<https://creativecommons.org/share-your-work/>

- Standardizovane besplatne licence;
- Primenjuju se na digitalne sadržaje;
- Omogućavaju autorima da sami zaštite autorske sadržaje koje objavljuju na internetu;
- Njima se definišu uslovi pod kojima se objavljeno delo sme koristiti;
- Ovaj sistem licenci razvila je neprofitna organizacija *Creative Commons*;
- Postoje od kraja 2002. godine;
- Koriste se u Viki-projektima;
- Danas se primenjuju kao standard u digitalnim repozitorijumima i u izdavaštvu u otvorenom pristupu.

Modul licence definiše prava korišćenja
Različiti moduli = različita prava korišćenja

Različite verzije licenci posledica su njihove revizije. Razlike između verzija nisu suštinske.
Različite verzije ≠ različita prava korišćenja

Do verzije 4.0 postojale su lokalne adaptacije CC licenci, kao odgovor na potrebu da se licence prilagode lokalnom zakonodavstvu. Od verzije 4.0, ne preporučuju se lokalizovane verzije licenci.

Različite jurisdikcije ≠ različita prava korišćenja

Prenos prava na izdavača

About the IEEE Copyright Form

Before your accepted article can be published, you'll need to complete a Copyright Form.

Before your accepted article is published by IEEE, you will be asked to complete a publishing agreement. The IEEE Copyright Form is required for all publications that are not open access except for material in the public domain. Signing the IEEE Copyright Form transfers ownership of the article to IEEE.

The Electronic IEEE Copyright Form (eCF) makes signing a publishing agreement easy by determining which agreement meets your needs and enabling you to complete it on-screen.

Government employees

Articles written by government employees may require a different copyright form. The eCF will determine the appropriate form to match your circumstances. When an article's authors are a mix of government and non-government employees, one of the non-government employees should sign the copyright form.

- Autori najčešće prenose sva prava korišćenja na izdavača.
- Objavljenju verziju rada najčešće ne smeju da učine javno dostupnom čak ni na ličnom sajtu ili u institucionalnom repozitorijumu.
- Ako žele da ponovo koriste ilustracije ili delove teksta rada objavljenog kod komercijalnog izdavača, najčešće za to moraju da traže saglasnost izdavača.
- Većina komercijalnih izdavača dopušta da se rukopis članka učini javno dostupnim nakon nekog perioda (embargo) na ličnom sajtu autora ili na nekoj nekomercijalnoj platformi (samoarhiviranje, self-archiving).
- Većina komercijalnih izdavača ne dozvoljava da se rukopis članka učini javno dostupnim na društvenim mrežama za naučnike (*ResearchGate*, *Academia*) – smatra se komercijalnom upotrebom.

Samoarhiviranje

- Podaci o verziji rukopisa koja se sme deponovati, dužini trajanja embargo perioda i licenci pod kojom se ta verzija sme distribuirati obično se mogu naći na sajtu izdavača, u izdavačkoj politici časopisa (*Self-archiving policy*, *Licensing* ili *Copyright*), kao i u bazi podataka SHERPA/RoMEO: <http://www.sherpa.ac.uk/romeo/search.php>.
- Ako autor ima obavezu da omogući javni pristup svom radu odmah nakon objavljivanja ili u roku koji je kraći od embargo perioda definisanog od strane izdavača, nakon pozitivne recenzije izdavaču može da ponudi aneks ugovora koji mu to dopušta. Ovaj pravni instrument razvila je međunarodna organizacija SPARC : <https://sparcopen.org/our-work/author-rights/brochure-html/>

Šta ako delo nije zaštićeno nekom
standardizovanom licencom ili su sva
prava zadržana?

- Proverite da li je delo u javnom domenu i da li vam je uopšte potrebna saglasnost
(<http://homepages.law.asu.edu/~dkarjala/OpposingCopyrightExtension/publicdomain/SearchC-R.html>)
- Proverite ko je nosilac autorskih prava za materijal koji vam je potreban.
- Proverite na koji način su regulisana prava korišćenja.
- Utvrdite kome treba uputiti zahtev (izdavači imaju posebne službe koje se bave ovim pitanjem ili sklapaju ugovor sa firmama koje za njih obavljaju taj deo posla).
- Ako je autor nosilac prava, zahtev se šalje autoru.

Gde se ti podaci mogu naći?

- Na sajtu izdavača/časopisa, u posebnom odeljku koji se bavi pravima;
- U štampanim i elektronskim verzijama publikacija;
- Uz svaki članak/knjigu ili neki drugi sadržaj, na sajtu.

Request permission to reuse copyrighted material

IEEE has partnered with the Copyright Clearance Center to provide a web-based permission service using RightsLink®. This service offers users the opportunity to obtain permission to reuse IEEE journal, conference and standards copyrighted materials quickly, easily, and legally.

To use RightsLink, locate the content you wish to reuse in IEEE *Xplore*. Then click the "request permission" link found on the abstract page or the Table of Contents page associated with that content.

Author posting policy

The IEEE Publication Services & Products Board approved revisions to IEEE's author posting policy (Section 8.1.9 of the PSPB Operations Manual). The revised policy reaffirms the principle that authors are free to post the accepted version of their articles on their personal websites or those of their employers. (Authors of IEEE open access articles may freely post the final version of their papers.) The policy provides that IEEE will make available to each author a pre-print version of that person's article that includes the Digital Object Identifier, IEEE's copyright notice, and a notice showing the article has been accepted for publication. The policy also states that authors are allowed to post pre-print versions of their articles on approved third-party servers that are operated by not-for-profit organizations.

Licenses and Copyright

The following policy applies to all PLOS journals, unless otherwise noted.

What Can Others Do with My Original Article Content?

PLOS applies the [Creative Commons Attribution \(CC BY\) license](#) to articles and other works we publish. If you submit your paper for publication by PLOS, you agree to have the CC BY license applied to your work. Under this Open Access license, you as the author agree that anyone can reuse your article in whole or part for any purpose, for free, even for commercial purposes. Anyone may copy, distribute, or reuse the content as long as the author and original source are properly cited. This facilitates freedom in re-use and also ensures that PLOS content can be mined without barriers for the needs of research.

May I Use Content Owned by Someone Else in My Article?

If you have written permission to do so, yes. If your manuscript contains content such as photos, images, figures, tables, audio files, videos, etc., that you or your co-authors do not own, we will require you to provide us with proof that the owner of that content (a) has given you written permission to use it, and (b) has approved of the CC BY license being applied to their content. We provide a form you can use to ask for and obtain permission from the owner. [Download the form \(PDF\)](#).

If you do not have owner permission, we will ask you to remove that content and/or replace it with other content that you own or have such permission to use.

Don't assume that you can use any content you find on the Internet, or that the content is fair game just because it isn't clear who the owner is or what license applies. It's up to you to ascertain what rights you have—if any—to use that content.

May I Use Article Content I Previously Published in Another Journal?

Many authors assume that if they previously published a paper through another publisher, they own the rights to that content and they can freely use that content in their PLOS paper, but that's not necessarily the case – it depends on the license that covers the other paper. Some publishers allow free and unrestricted re-use of article content they own, such as under the CC BY license. Other publishers use licenses that allow re-use only if the same license is applied by the person or publisher re-using the content.

Sva prava su zadržana

- Tražite dozvolu za korišćenje sadržaja zaštićenih autorskim pravima.
- Korišćenje u predavanjima i prezentacijama koje neće biti javno dostupne najčešće je dozvoljeno ili se toleriše.
- Korišćenje na sajtovima i blogovima nije dozvoljeno i može biti sankcionisano. Nosioc autorskih prava može da zahteva da se sadržaj ukloni i/ili da tuži vlasnika sajta/bloga.
- Korišćenje u naučnim člancima i monografijama nije dozvoljeno i obično izdavač od autora zahteva da pribave pisanu saglasnost za korišćenje takvih materijala.

- Ako su preneli prava na izdavača, autori, često pod istim uslovima kao i treća lica, moraju da traže saglasnost da bi ponovo objavili svoj rad ili koristili neke njegove delove. Uslovi pod kojima mogu da koriste svoj rad i njegove delove navedeni su u ugovoru o prenosu autorskih prava (ali većina autora te ugovore ne čita i ne čuva).
- Ako autori nisu sačuvali ugovor, relevantne podatke će naći u izdavačkoj politici, na sajti izdavača.
- Neki izdavači u svojoj izdavačkoj politici navode na koji način autori mogu da koriste svoje tekstove i njihove delove i u tim slučajevima nije potrebno tražiti saglasnost (autorima daju veća prava nego trećim licima, pa npr. mogu da preštampaju svoj rad u nekoj monografiji, da koriste ilustracije iz istog i sl.). Pre nego što pošaljete zahtev, proverite da li izdavačka politika sadrži takve elemente i da li su vam prava koja biste tražili već data.

- Izdavači uglavnom daju saglasnost da se sadržaj zaštićen autorskim pravima koristi, ali pod različitim uslovima u zavisnosti od toga da li će se sadržaj koristiti u komercijalne svrhe i u kom kontekstu će se koristiti.
- Izdavanje saglasnosti nije uvek besplatno (npr. najčešće će biti besplatno ako se materijal koristi u nekomercijalne svrhe, ako se saglasnost traži za ilustraciju koja će biti objavljena u članku u časopisu, naročito ako taj časopis izdaje izdavač od kog se saglasnost traži; ako se materijal koristi u komercijalne svrhe ili će se pojaviti u monografiji drugog izdavača, pravo korišćenja najverovatnije neće biti ustupljeno besplatno).
- Ako su autori na izdavača preneli isključivo pravo objavljivanja, najčešće će morati da plate kako bi im bilo omogućeno da koriste materijal.
- Vodite računa pod kojim će se uslovima distribuirati delo u koje želite da inkorporirate sadržaj za koji tražite saglasnost. Ako će se distribuirati pod slobodnom licencom, to morate precizirati prilikom formulisanja zahteva.

RightsLink – Copyright Clearance Center

- Većina komercijalnih izdavača ima ugovor sa kompanijom RightsLink, koja u njihovo ime izdaje pisane saglasnosti o korišćenju sadržaja i, ako je to potrebno, naplaćuje i izdaje račune.
- Procedura je jednostavna.
- Sistem obuhvata i sistem za naplatu.
- Korisnik se registruje i na svom nalogu prati status zahteva i dinamiku rešavanja zahteva.
- Procedura je najčešće brza i jednostavna (ako se ne zahteva plaćanje, saglasnost se dobija odmah po popunjavanju formulara).

<http://www.copyright.com/rightsholders/rightslink-permissions/>

RightsLink

- Ako se dozvola za korišćenje plaća, sadržaj se sme koristiti tek nakon evidentiranja uplate u elektronskom sistemu.
- Ima izdavača koji naplaćuju čak i korišćenje ilustracija u edukativne svrhe ili na pedavanjima zatvorenog tipa.
- Ima izdavača koji ne naplaćuju dozvolu za korišćenje, ali naplaćuju „obradu zahteva“ (desetak dolara po zahtevu).

Lokalni problemi

- Istraživači u Srbiji ne poznaju dovoljno pojam autorskih prava, kao ni zakonsku regulativu i standarde koji se na tom polju primenjuju.
- Nizak nivo svesti i o sopstvenim, i o tuđim autorskim pravima.
- Većina istraživača prenosi autorska prava na izdavače časopisa u kojima objavljuje radove a da nikada ne pročita ugovor koji potpisuje.
- Većina naučnika prenosi na izdavača prava na primarne podatke prikupljene tokom istraživanja.
- Većina istraživača krši prava prenesena na izdavača postavljajući svoje članke na društvene mreže.
- Vlada uvrerenje da je dozvoljeno sve ono što nije eksplicitno zabranjeno. Međutim, ako nije eksplicitno dozvoljeno da se neki sadržaj zaštićen autorskim pravima koristi na određeni način, podrazumeva se da to **nije dozvoljeno** i mora se tražiti eksplicitna pisana saglasnost nosioca autorskih prava.

Nedoslednosti, nelogičnosti itd.

- Autor zadržava autorska prava, ali izdavač zahteva prenos isključivih prava objavljivanja, a autor delo sme da koristi pod istim uslovima kao treća lica. Činjenica da su isključiva prava prenesena na izdavača i da su prava autora ograničena dodatnom klauzulom obesmišljava činjenicu da autor zadržava prava: <http://poeticeconomics.blogspot.com/2015/05/author-copyright-in-name-only.html>.
- Kontradiktorne tvrdnje o autorskim pravima i licencama u politici časopisa.
- Izdavač dopušta autorima da zadrže autorska prava, a sva prava na objavljeno delo su zadržana. Imovinska prava nisu precizno definisana u ugovoru, ali izdavač prodaje objavljeno delo. Ko zadržava prava? Da li autor sme da omogući javni pristup svom delu?
