DOI: 10.5281/zenodo.15168196

1

Choose or create the
analytical method.

2

Search for the analytical
method DOI or assign a
new one if it does not
exist.

3

Generate datasets in stable
formats linked to the
samples' IGSNs (International
Generic Sample Number).

4

Store the datasets in a trusted
repository with cataloged
metadata.

5

Assign a DOI to each
dataset.

6

Cite the DOIs of methods and
datasets, along with the IGSNs of
samples, in publications.

LABORATORY

DATA MANAGEMENT

MAKE YOUR RESEARCH

F

Findable

Easily findable data,
with unique identifiers
and detailed, accessible
metadata.

A

Accessible

Data and metadata
hosted in a reliable
repository accessible
to both humans and
machines.

I

Interoperable

Interoperable data and
metadata compatible with
other tools and data sources,
using common standards and
shared languages.

R

Reusable

Comprehensively
documented data with
explicit usage licenses
enabling cross-domain
application.
