

a University Partnership for acceleration of European Universities

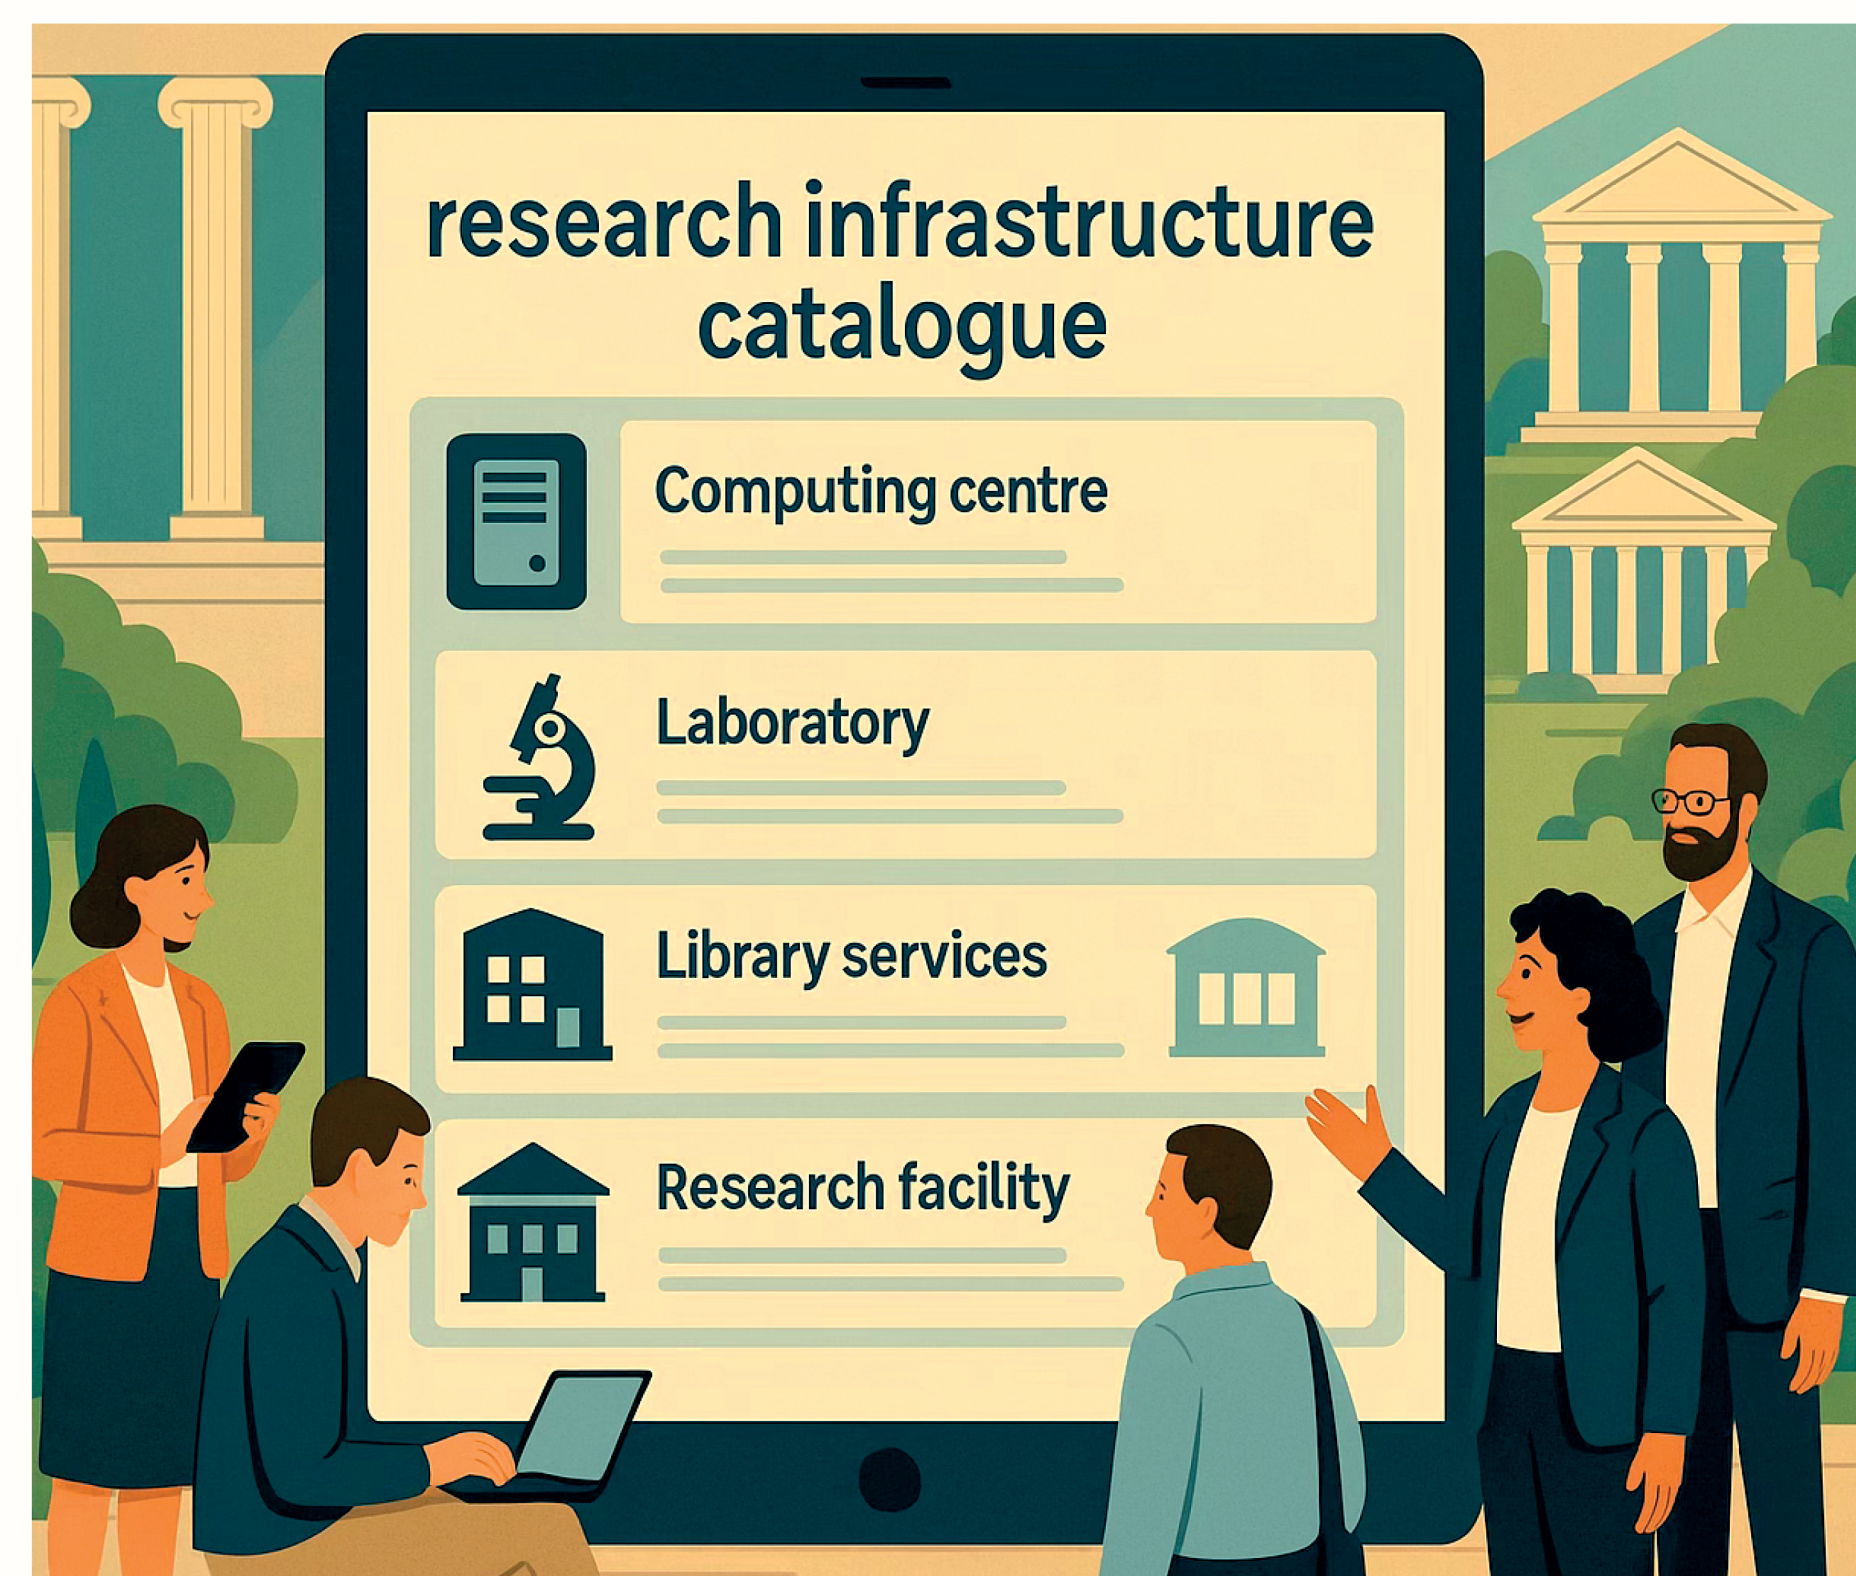

Overall goals of the project

The aUPaEU project is a collaborative effort among five distinguished research universities, to facilitate the institutional transformation of Higher Education Institutions (HEI) across Europe.

This transformation aims to align research policies, promote cross-border collaboration, and contribute to the European Research Area (ERA).

Embracing the essence of the ancient Greek agora, aUPaEU provides digital platforms where different stakeholders can participate and contribute, as well as provide and consume services to accelerate their digital and institutional transformation.

Via Agora platforms, aUPaEU provides methodologies, sustainability plans, coaching services, and tangible digital technologies to achieve integrated, shared, and long-term R&I transformations through collaborative efforts.

Meet the Agora platform

Built on Odoo open-source software, aUPaEU's Agora platform delivers flexible digital infrastructure for knowledge exchange and collaboration. It addresses the paradox of today's information landscape, rich in content but poor in discoverability, by helping HEIs structure and share their resource catalogs, while enabling users to seamlessly search across diverse offerings via thematic filters and an intelligent search function. An integrated CRM module streamlines engagement and efficiently manages stakeholder inquiries.

With one platform already operational and customised versions in development for nine other alliances, Agora has demonstrated adaptability to support diverse needs. A proof of concept developed specifically for EPICUR demonstrates how a centralised catalog could boost Research Infrastructure visibility and accessibility.

The Power of Agora

By leveraging Agora platforms, HEIs can:

- Gain comprehensive insights into their own resources and expertise
- Identify and connect with suitable partners
- Foster collaborations among researchers and facilitate stakeholder engagement
- Boost research infrastructure sharing

And many more things!

The aUPaEU project delivers functional and evaluated Agora platforms to University Alliances. By showcasing the benefits and impact of this model, aUPaEU aims to inspire and guide the broader higher education community in Europe.
