

Supplementary Material to the Paper "Towards a Goal-Centric Assessment of Requirements Engineering Methods for Privacy by Design"
Requirements Engineering Method Goal (MG) 6: Enabling response to changes

Goals	Subgoals	Questions	Criteria/Metrics
MG6: Enabling response to changes	MG6.1: identification of changes	Q6.1.1: What is likely and unlikely change in regulations?	M6.1.1.1: change rate
		Q6.1.2: Does method help to identify relevance of changes?	M6.1.2.1: number of changes successfully addressed
		Q6.1.3: Can method help identify req-s, functions requiring changes?	M6.1.3.1: number of changes successfully addressed
		Q6.1.4: Can I find compliance implementation easily?	M6.1.4.1: number of controls identified
	MG6.2: facilitation of changes implementation		M6.1.4.2: usability
		Q6.2.1: Can we implement changes in reasonable time?	M6.2.1.1: time to implement changes
		Q6.2.2: Does method make it easy to make changes without impacting other components?	M6.2.2.1: difficulty of changes implementation
