

Fig 7 related cells quantifications:

Quantitative single cell analysis of embryos β -catenin^{+/-} or materno-zygotic mutant for β -catenin stained for DAPI (Ch1), NANOG (Ch2), GATA6 (Ch3) and total β -catenin (Ch4). The number after each file name depicts the embryo image number. Manually curated for ICM and TE cells, manually genotyped based on total β -catenin staining
