

Deliverable n. D8.6.

MOOC and field schools and training workshop exams

Responsible: Irma Terracciano (CRA/CREA)

D8.6: MOOC and Field Schools and Training workshops exams – report on the training actions (M35)

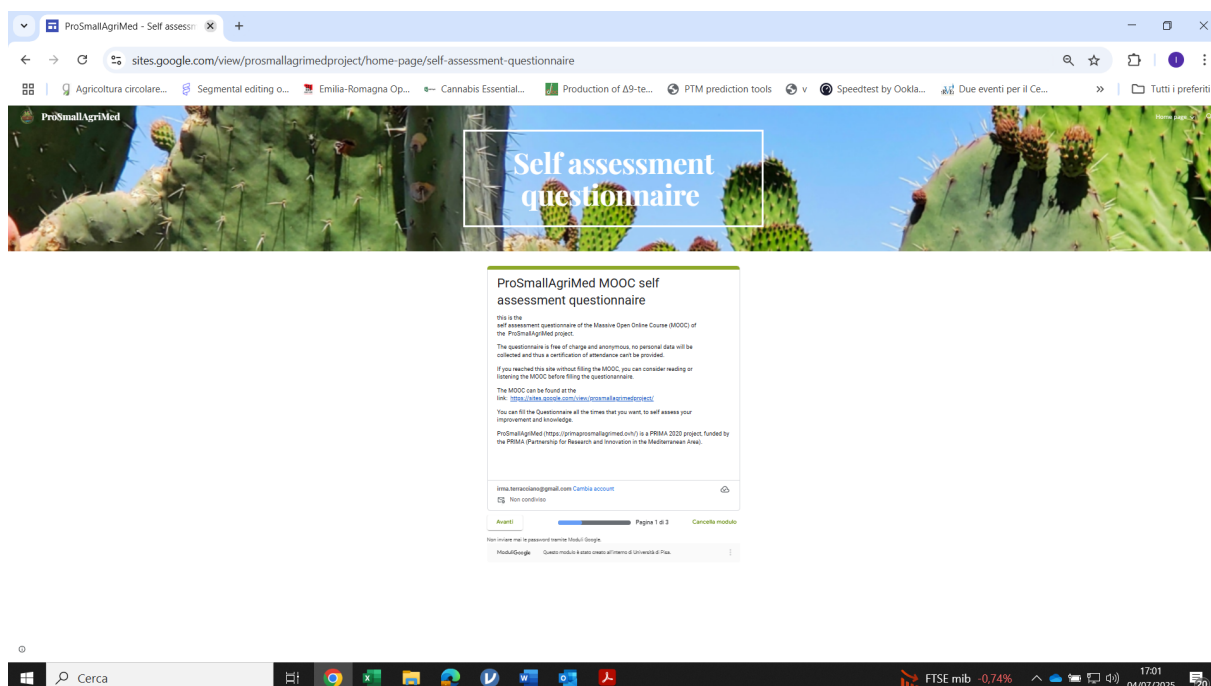

The training actions were carried out both in person with the organization of Workshop and Field School and in online mode through the MOOC. For both, self-assessment questionnaires were administered to evaluate the level of learning of the students after these actions.

- **List of workshops and field schools carried out:**

- **Morocco (18-21 September 2023): A new technology in agriculture : application to Cactus Pear. Meeting place : Essaouira Farmer Cooperative**
Organizers: Abderrahman Ait Hamou, Naïma El Ghachtouli, Silvio Gianinazzi, Ilham Zouitane, Monica Ossino and Vivienne Gianinazzi-Pearson.
- **Algeria (27-28 November 2023): New technology in agriculture: application to Barbary fig cactus. Meeting place:** INRAA – Alger. **Organizers and speakers:** Hicham Messaoudi, Amel Meddad-Hamza, Silvio Gianinazzi, Vivienne Gianinazzi-Pearson and Nadhira Oulbsir.
- **Tunisia (15-17 April 2024): New technology in agriculture: application to Pear Cactus**
Meeting places: INAT, **Organizers:** Nabeul et Zaghuan, Sonia Labidi, May Granier, Sofiène Hammami, Besma Sghaier, Karim Aounallah, Sana Dhane, Silvio Gianinazzi, Vivienne Gianinazzi-Pearson.

The teaching materials illustrated during the trainings and field schools are attached in PDF files, they include the self-assessment questionnaires administered to students and participants and related to the workshops above listed.

- **MOOC:** the MOOC self-assessment questionnaire will be available on the MOOC soon at the link <https://sites.google.com/view/prosmallagrimedproject/home-page/soil-management> in the last session “<https://sites.google.com/view/prosmallagrimedproject/home-page/self-assessment-questionnaire>” as shown in the picture below:

It consists of 31 questions (multiple choice with 3 answers of which only one is correct) on all the topics covered in the MOOC. As soon as the questionnaire is completed and sent, the student or farmer or whoever has filled it in automatically receives a report on the scores achieved to be able to self-evaluate the learning of the MOOC topics.
