### Abstract

*The high-technology product like chargeable battery used in the EV (electric vehicle) and robot will be prevalent currently and future which may afford the continuously dynamic for it to drive longer like 2 hundred kilometers per charge, so its usefulness will be more searchable and searching item for us to process later. New one like the solid state battery as a new innovation will be used in EV in future widely, which may become a high-light for our scientists to process continuously. At the same time, the scientist needs to publish their achievement continually to journal with high impact factor for the readers to know the situation and feasibility. The author like scientist in college would complete the investigation content and form the formal achievement in the sake of communicating with readers with wielding English skill well. Thereby the correct and clarified information might transfer into the readers acknowledgement who has an interest to know the meaning from papers. Therein the published one will overview from the author readers through editor help. We should pay more attention to the innovation aspects which may take up some new idea and paths. As for scientist he needs to search for continuously the new project for the sake of further searching for the deeper and wider field all the time. Therein the high-tech product like solid state battery will have occupied promise future as known by now because its sale and expected amount can attain an achievement with total 180GWh expectation explained that battery to have a large market requirement. On the other side, others like BC battery has also some searchable value in future since its advantage has evident proofs.*

**Keywords:** research; economic GDP (gross domestic product) factor; scientists; solid state battery; sustainably; behavior & judgment; BC (back contact) battery; famed journal; publishing papers

## 1. Introduction

In current society the high-technique products will be dominated in others to become a strong force to push the society to develop continuously and sustainably, so the scientist and scholars will become an important factor to play in every place to proceed the relevant research and study on the hot point frequently. So that publishing achievement papers may provide a strong force to support the future life-level like climate change and public sanitation for benefiting the world human in future. We should go on searching for innovation papers include in the latest high-technique product research like clean energy and new one to push many lots of skill to make different cutting-edge-field product continually. As we knew the current climate problem will be derived from the contaminating factory and automobile, so the new energy should occupy the first significant position for our scholar & scientist and experts to sustainably search and make measure to solve it from variation views which may help us to think about more factors to replace the problems mutually. We might align the measure from one view to different one to proceed simulate to judge the first and the second even third method to solve it for the sake of once happening the problem accident there will be another method to replace it in urgency. [1~6] So we put our eyes too long not only viewing the current status but also looking at the longer years like fairy tale cinema which provide future world several hundred years later. We may interest in those splendid scenery and consider the usefulness and make some experiments to trial the feasibility, like the flight automobile which pass by the high buildings and make a dormitory in the one. There will not earth surface auto and all the auto can become flight one which is a future plan by USA fairy cinema maker. There may be not contamination gas and all of atmosphere is electric power and hydrogen fuel even small nuclear reaction pile as an engine. So we must emphasize the current energy exploitation and found so as to predict to make a plan to prepare the future infrastructure and write more paper with innovation method to arouse the future contribution. With the GDP(gross domestic product) enhancement we should not avoid to enter the ideal world with many robots in AI(artificial intelligence) software and automobiles with intelligent driving time many decades years later, so we prepare to afford the controlling skill to fix robots logical life and automobile matters with those high energy fuel. As to the former the controlling will be proceeding from now on and its equipment needs to enter our live life many years later and the latter will experience safe driving course with no accident. Those problems will must think about by us in advance or the error ones and accident may occur by then. [7~8]

## 2. Discussions

The qualified one may be appointed to be a associate professor and senior researcher to take a burden to educate the MS(Master of Science) & PhD(Philosophy of Doctor) degree continuously. Because they had some and much opportunities to complete the relevant projects singly and collaboratively which belongs to the high-tech product experimental and theoretical deduction. Thereby those ones includes in many innovative methods and calculations correspondingly. At the same time, the reports and papers will be submitted to the Fund commission which may be speared through the relevant scientists. Meanwhile, the data with GDP and sale number would be analyzed for the sake of requesting according behavior & its following judgment by our scientist and fellows sustainably because they can grasp the economic phenomenon and

its following explanation definitely and absolutely in advance through their endeavour in post-doctorate and after work-stations. [9~17]

### 2.1 O<sub>3</sub> day

The O<sub>3</sub> layer protects sun violet-light's irradiated damage from too little molecule which may produce large effect and if adopted correct action even those which can not be observed by our eyes may be fixed. The O<sub>3</sub> layer is gradually declining since the cooling and gas solved gel products' chemical substance through their ruining it. [1] So that the O<sub>3</sub> layer must be recovered by decreasing those ruining product application in our society through constituting the defined law to decline its use in our current products, thereby the recovering action should be done carefully in order to maintain the layer refreshment all the time. We should do and must do the protecting method positively for the sake of preventing our earth and people from those sun light damage no more.

### 2.2 The GDP relevant items for clarifying its effectiveness

The relevant GDP factors will include in education & experience, high-level employment, high-technique product as shown in Figure 1 where education may play an important role in initiating the employment and high-tech products commonly. So the excellent education & experiments may occupy a significant role which means the high-tech and high-level technique owners can make some innovation application to the modern requirement. Meanwhile, the high-technique product will directly affect the GDP increase and amount at all with mutual operation. [2~5]

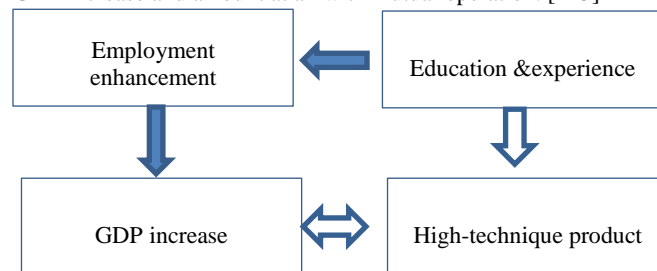

Figure 1 The relevant GDP effectiveness and factors between it and education.

### 2.3 Introduction to the Iaird publisher

Are you working on innovative research but facing challenges? Please look at the Iaird publisher for you to submit your cherish paper on time. We have the following nine aspects for your inference. 1. Literature review & reference management; 2. Data analysis & interpretation; 3. Research paper writing & editing; 4. Journal selection & publication support; 5. Thesis & dissertation guidance; 6. Powerpoint & poster presentations; 7. Article publications in Scoup, Embase, NMC listed and other indexed journals; 8. Collaboration with 200 national and international journals. At the same time, why you choose us? Because 1. experience experts; 2. multidisciplinary support; 3. confidential & plagiarism free work; 4. on time delivery. [6]

### 2.4 Solid state battery perspective

In light of experts' prediction, the solid state battery product amount in global will reach 180GWh in 2030 according to Figure 2 to express its high development rate. On contrast, the semi-solid state one could attain 434 GWh with higher value at the same time. The former and latter variation rate might record 2.4 times with middle one to show the approached rate gradually. [7~8]

Figure 2 The semi-solid state & solid state battery perspective in 2030.

## 2.5 International Journal of Humanities Social Science and Management

The IJHSSM Journal is to be abbreviated of the International Journal of Humanities Social Science and Management which is an online open access journal. Publishing articles from more than 50 countries in the field of Humanities, Arts, Music and Education. So the author in the world will may submit your paper here quickly with low price. At the same time, the papers published in IJHSSM will receive very high publicity and acquire a very high reputation. The procedure to publish paper will be following as down. 1. Submit Article; 2. Review Process; 3. Pay Fees; 4. Publish Online adding Certificate. The Indexing will include in Crossref, NASA ads, DOAJ, Index Copernicus, Open-J Gate etc. Meantime, the impact factor may be 7.52, the publication frequency may be 12 issues per year while the fees is very low 1200 INR (about 20 dollars). [9] To welcome all the authors propose their cherish paper to that journal publisher as soon as possible.

## 2.6 Stocks business change in market

The BC (back contact) battery as a new one is about to bring out rapidly developing period which belongs to new energy direction. The BC battery mainly is used on the solar battery technique whose feature is that the electrode lies in the back contact of battery, so that may use incident light maximum and decline the light energy so as to improve its transform efficiency. In addition, the BC battery design makes the positive plane to expose under the sunlight which further promotes the light efficiency. [10] With regards to progressing of technology continuously and scale producing to be realized, the solid state battery cost will decline gradually so as to promote its market competition force and boost the business rapidly developing. On the other side, on the views of technology the recent continuously recovery and tide so that today the plate once declined and then anti-drawing to put amount and get increased. The currently average line system exhibited multi-morphology good so the latter market will be anticipating on extending increasing tendency. So the logic exists firstly, and then dealing does secondly. [11] On the other side, the Table 1 would show the recently inner crossing-week VIP (very important person) good one where the <Changcheng Military> and <Zhendong Pharmacy> might arrive 100% and 52% accordingly shown their good perspective then. On contrast, the other two might show 43%~49.5% zone with higher price vibration.

Table 1. The recent inner crossing-week VIP excellent indicator. [12]

Code	Selected date	Names	Vibration, %
002827	July 18, 2025	Gaozheng Minbao	49.5
300158	July 25, 2025	Zhendong Pharmacy	52
601606	Aug. 1, 2025	Changcheng Military	100
600619	Aug. 8, 2025	Haili Limited	43

At the same time, as per the Table 2 it would show the recently inner crossing-week VIP good one where the <Qingshan Paper> and <Guoguang Chain> might achieve 88.7% and 63% correspondingly shown their good performance then. On contrast, the other two might show 55%~62.1% zone with higher price vibration.

Table 2. The recent inner crossing-week VIP excellent indicator I. [12]

Code	Selected date	Names	Vibration, %
002827	Aug. 15, 2025	Weilong Limited	55
300158	Aug. 22, 2025	Guoguang Chain	63
601606	Sep. 5, 2025	Qingshan Paper	88.7
600619	Sep. 12, 2025	Shanzi high-tech	62.1

At last, the <Wall-street quantified big model> will include following features. 1. looking for the "strong force breakthrough morphology" so as to avoid vibrating and washing plate risk; 2. having short-term explosion force strong owning ones periodic short & showing the appearance fast; 3. judging tendency by AI (artificial intelligence) diagnosis determining deal too & be aim for the main increase wave like north-toward capital. [13]

Overview, the scientist's behavior and judgement might affect the important result which could play a role in determining our decision on a certain project to afford main capital sponsoring by government institution like basis green energy advocating ones that can influence our future life urgently and eventually. On the other side, the atmosphere contamination will cause the climate change and sanitation like former's flood and forest fire disaster and latter's public health including COVID (corona virus disease)-19 formerly. Therefore, we need to pay our attention to the atmosphere problem that might cause a series of accident for our experts and general man to adopt the correct path so as to prevent from that matter in advance.

## 3. Conclusions

The high-technology product like chargeable battery used in the EV (electric vehicle) and robot will be prevalent currently and future which may afford the continuously dynamic for it to drive longer like 2 hundred kilometers per charge, so its usefulness will be more searchable and searching item for us to process later. New one like the solid state battery as a new innovation will be used in EV in future widely, which may become a high-light for our scientists to process continuously. At the same time, the scientist needs to publish their achievement continually to journal with high impact factor for the readers to know the situation and feasibility. The author like scientist in college would complete the investigation content and form the formal achievement in the sake of communicating with readers with wielding English skill well.

Thereby the correct and clarified information might transfer into the readers acknowledgement who has an interest to know the meaning from papers. Therein the published one will overview from the author readers through editor help. We should pay more attention to the innovation aspects which may take up some new idea and paths. As for scientist he needs to search for continuously the new project for the sake of further searching for the deeper and wider field all the time.

#### Foundation

This paper was supported by Korean Science and Engineering under the granted No. 96-0300-11-01-03 under the specified Basis Research programme.

#### Conflict of Interest

The authors declared that there were not conflicts of interest to disclose.
