## ORRI SERVICES AT A GLANCE

Open Responsible Research and Innovation (ORRI) is a process that considers the broader impacts of research and innovation, marking a paradigm shift in their conduct. Its goal is to ensure that the positive societal and economic benefits of research and innovation are fully realized, while minimizing unintended negative impacts. However, implementing ORRI often encounters significant challenges and barriers. Achieving the necessary shift in research and innovation systems is difficult, particularly when ORRI goals and [principles](#) appear to conflict with objectives deemed of higher value, importance, or urgency. Consequently, numerous resources and tools for ORRI have been developed over the past decade.

In order to contribute to achieving REINFORCING's main goal, i.e. to provide meaningful support, services, and resources to as many ORRI enablers as possible to enhance ORRI mainstreaming, we have designed and deployed the [digital ORRI Platform](#) as a one-stop source (OSS) for resources and support services for ERA institutions and territories. The OSS provides a broad range of knowledge and expertise to support organizations and territories on their ORRI journey.

This Deliverable (D3.1) is a cross-chart of **support services**, i.e., an overview of what the REINFORCING project provides for its grantees and the ORRI community at large.

### D3.1.Cross-chart of ORRI Services

The data collected in this deliverable provides inputs to *T5.1 Impact Assessment of Addressed Gaps* and to assess the efficacy of the OSS raising awareness activities in *T6.1 Dissemination, Exploitation and Communication Plan*, and again in M48 (D3.1). It thus serves as an instrument to document usage across the ERA to make adjustments, if necessary, in the next project period.

The cross-chart below provides an overview of the types of service provided and related descriptive statistics of usage. We also supply additional information through features such as the main target group, the mode as well as the status of delivery.

#### Service types comprise:

- **Community Building** for ORRI practitioners (experts, grantees) in Europe and beyond: Platform, Helpdesk, Grants, ORRI Map, Global Network, Global Forum.
- Useful **Resources** to support the design of ORRI practices with concrete **Tools** and **Pathways** for implementing ORRI.
- **Training** and **Mentoring** for **building the capacity** on ORRI and institutionalize the ORRI approach.

#### Service features relate to:

- Main target groups
  - **ORRI Community** (at large)
  - **ORRI Practitioners** (experts, grantees)
- Mode of delivery
  - **Digital** (online)
  - **Physical** (in-person)
- Status of delivery (per August 2025)
  - **Designed** (design available)
  - **Delivered** (in full operation)
