

Meet the Geo Data Team:

Your partners in FAIR and Open Research at the Faculty

Who we are?

The Geo data team support researchers throughout the entire research lifecycle with regard to research data management, research software management, IT infrastructure and data privacy & ethics. With training, workshops, and Promoting Open Science across the faculty. Whether you need advice on a data management plan, privacy and ethics (GDPR/AVG), data publication, or reproducible research workflows, the Geo Data Team is here to help you do it confidently and in line with Open Science principles. We are also directly involved in research projects, contributing expertise on data management, research software, and IT infrastructure to strengthen the technical and FAIR aspects of research.

Meet the Team

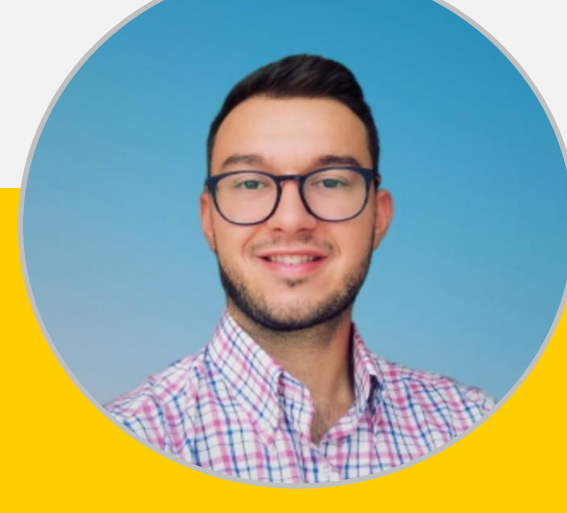

Garrett Speed
Data Steward

Contact point for
Sustainable Development
and Human Geography &
Spatial Planning
Departments

**Maisam Mohammadi
Dadkan**
Data Steward

Contact point for
Sustainable Development
and Human Geography &
Spatial Planning
Departments

Aristotelis Kandylas
Data Steward

Contact point for Earth
Sciences Department

Vincent Brunst
Data Coordinator

- Contact point for Physical Geography department
- Participation in research projects
- Contributions to educational programs

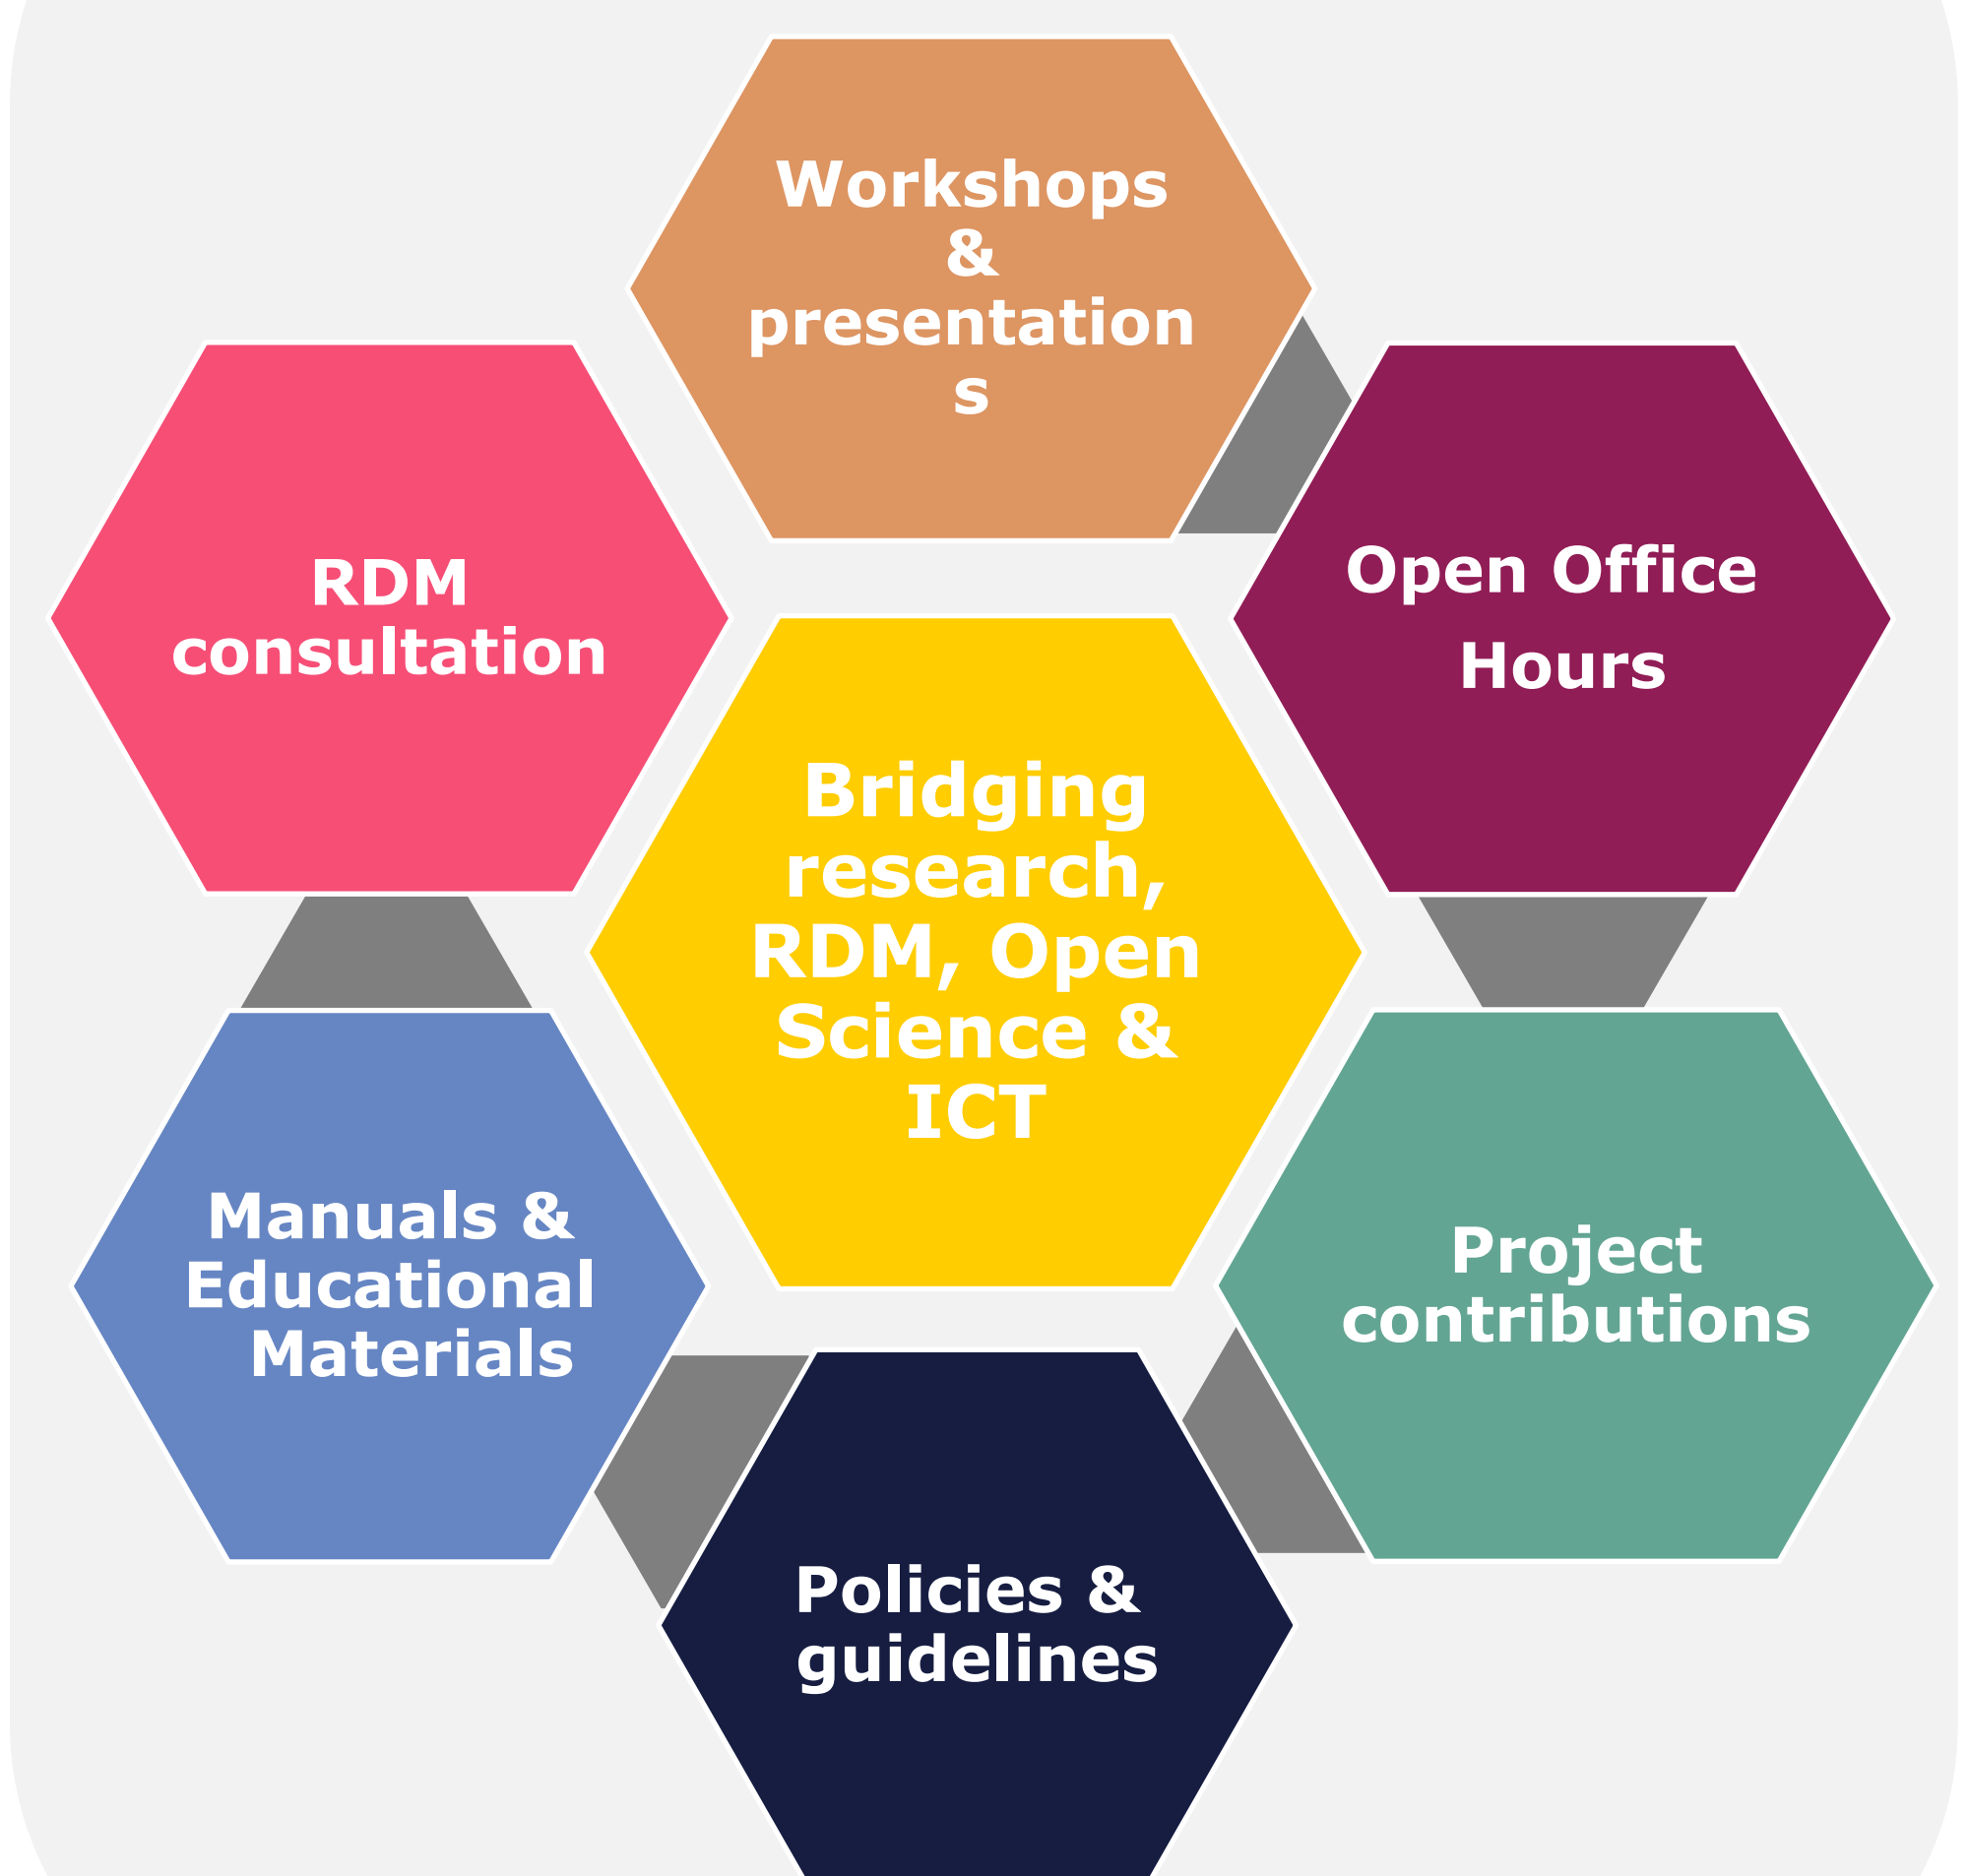

**Francisco Romero
Pastrana**
Privacy Officer

- Contact point for all departments
- Privacy Related Issues
- Personal Data Handling
 - Privacy Scan

Multidisciplinary Expertise

Remote Sensing, Containerization, Photogrammetry, Metadata, Machine Learning, RTI, Data Analysis, Programming, GNSS, Open Science Policy, Linux, Jupyter, R, Python, Data Ethics, VBA, FAIR Data, anonymization, SQL, Data Science, GIS, Data Pipelines, Privacy compliance, Research data management, C++, Docker, Licensing, Yoda, Open Science, Subatomic Physics, APIs, Data Visualization, Statistical Analysis, Photography, Archaeology
