Back-Page Worksheet: Household Roster, Age, and School Attendance

At the start of the interview, read the following to the respondent:

Please tell me the names of all the members in your household, their ages, and whether they currently attend school. Household members are all persons who have lived and eaten together in the same residence for the last six months or who intend to live and eat together from now on. Household members do not need to have a blood relationship with the household head and may include adults, children, or infants.

Write the names and ages all household members. For each member 6-years-old or older, record whether that member goes to school.

Name of household member	Age in years	Goes to school?
1.		No Yes
2.		No Yes
3.		No Yes
4.		No Yes
5.		No Yes
6.		No Yes
7.		No Yes
8.		No Yes
9.		No Yes
10.		No Yes
Total Number of Members :		Number “Yes”:

After finishing, write the total number of household members next to “Household size” on the right side of the header of the scorecard. Also, use this number to mark the appropriate response to Question 1. Then use the information about members’ ages and school attendance to mark Question 2. Remember, if there are no household members ages 6 to 18, then mark response option A (“No members ages 6 to 18”).
