## Back-page Roster: Household Membership And School Attendance

Read to the respondent: *Please tell me the names and ages of all members of your household. A household is a person or group of persons, related or unrelated, who—for at least 6 of the last 12 months—normally cook, eat, and live together in the same dwelling unit, acknowledge one household head, and share living arrangements.* Record names, ages, and presence in at least 6 of the past 12 months. List the head of the household first, even if he/she is not the respondent, even if he/she is not a participant in your organization, and even if he/she is absent. For your own later use with the third scorecard indicator, note the name of the (oldest) female head/spouse (if she exists). Then ask: *Are there any other persons such as small children or infants that we have not listed? Are there any others who usually live here who may not be members of your family (such as domestic servants, lodgers, or friends)?* Again, record names, ages, and presence. Mark whether each person is a household member based on the full set of rules in the “Guidelines to the Interpretation of Scorecard Indicators”. In the scorecard header, record the total next to “Number of household members:”, and circle the response to the first scorecard indicator.

For each household member who is 6 to 12-years-old, ask: *Is <name> currently in school?* Based on the responses, circle the response for the second indicator.

Keep in mind the full rules in the “Guidelines for the Interpretation of Scorecard Indicators”.

First Name	Age	Has <name> been present at least 6 of the last 12 months?		Is <name> a household member? (apply rules)		If <name> is a household member 6- to 12-years-old, is he/she currently in school?
