**ABSTRACT:** The GDP (gross domestic product) will take a role on positive activities so as to enhance the economy target in last year and in this year the increasement step may be defined to attain in perspective. Thereby the concluding last year ones and making a strategic plan for next year will relate all of our aspects like life consumption & production education environmental sustainability, ensuring balanced growth across sectors. By aligning individual and institutional efforts with national development priorities, we foster inclusive progress that benefits all stakeholders. This integrated approach gains renewed urgency in new year perspective and strategic plan by the relevant governmental constitution and institutions. Specially as 2026 unfolds with heightened focus on new challenge for us is to continue to endeavour sustainably on various high level fields like Artificial Intelligence bio-medical pharmacy new function materials etc. many lines. That may take an important role in increasing our GDP value for this year. Thereby, we need to continue to search those cutting-edge-fields through our experts and scientists because those

aspects may be proceeded sustainably special in low-contamination non fossil fuel like wind energy photovoltaic energy hydraulic one nuclear reacting-pile one. We need a lot of engineers & scholars etc participating cooperatively and satisfy the producing learning searching & usefulness series of industrial procedures to invest and push into market meeting consumers demands. There will be still big resilient space to wield our imagination and research capacity to publish the relevant achievement in famous journals so as to arouse the basis & application aspects research together for alleviating the cause matters. We should continue to search and develop the low-carbon energy base status and application to futural huge requirement electricity for example the chargeable battery technique etc. reserved energy stations which increases from several years gradually meeting the electrical vehicle hybrid vehicle even small motorcycles.

**Keywords:** *GDP; Chinese provinces GDP analysis; five metropolitan cities GDP comparison; the Archives of Engineering and Technology; analyze & enhance.*

## 1. Introduction

The nations & regions GDP will represent their comprehensive strength in views of economy level and quality, so searching it may have an important effectiveness for us to process statistic with the national producing amount every month, season and year. In the meantime, the value with y-y has also a significant meaning that reflects the economy growth step because we should clarify the increasing change so as to evaluate the increasement and declination value preciously. The positive y-y value may mean the good and rapid economy developing status whilst the minus one may state the bad and slow economy step. So we judge the economy developing enhancement and decreasement through that y-y value for a certain period. Thereby, the detail discussion will include in the following aspects. The GDP which indicates national economic status has provided an important role in every aspect in the world. So that the population increasing rate would be maintained for the sake of raising high-technique product with the entire industrial chain constantly which might enhance our new-quality-productivity. Hence we should consider the effective factors for example the population quantity, new quality productivity with high- technique etc. like big plane electric vehicle battery AI robot quantum computer medicine

making disease diagnosis AI (artificial intelligence), ocean source, space exploration, nuclear generator etc. other ones. Low population is enable to offer high life & quality with improving GDP per capita value. Meanwhile, it can enhance the national whole GDP value and help us to boost the economic recovery and many things to do. So the certain population is about to improve our national confidence some degree and make us to become priority one as early as possible even the super-country to lead the world to leadership right.

In contrast, the GDP increasing rate may play a significant role with regulating population increasing rate mutually and cooperatively. Hence the two aspects may be emphasized and paid attention to in thriving the whole national economic developed degree through enough wielding our generations positively and efficiently by our government institution endeavor and evaluation. For the sake of making relevant policies and allocating capital into the necessary industries the corresponding strategic plan needs to be made under various background and entities. Then the according monitor and estimation will be followed and estimated periodically and frequently by the observer in government's institution. At last as to the developed speed in one nation the corresponding population increasing quantity and high-technique product producing will be discussed and considered more preciously and correctly according to the near past years experience and variation.

Therefore, the high-technique products will be completed through wielding our scientist & senior Engineers coordination tightly for the sake of reviving the industrial and tertiary modernization. We should constantly look for and seek the new quality productivity sustainably so as to take place of our traditional industry becoming modernity. An innovation industry like new energy electric generator will be in front of our path forwards, so that the corresponding tactic must be put up and seek the opportunity and fortune in order to burden our responsibility quickly and not to forget recommend the fitting one to appoint new occupation. Like the Bole identified horse or Maosui self-recommended the recommendation will be represent one aspect for our human resource department to consider and evaluate the recommended included a full research room with a set of computer high-technique

instrument & device, subordinate, subsidiary staff, salary, house, welfare etc. a series of work so as to appoint his new occupation reasonably and willingly. [1~16]

## 2 Discussions

In this paper the detail GDP value is going to be discussed as above parts through comparing the various regions for the sake of enhancing corresponding tactic in next year and futural several years. Eventually the regional GDP will be compared with their variation and then confidently make a strategic plan for concluding the past years and erecting new target that we pay much attention to raise our predicting value all the time. It is clarified that with regulating our aim the good achievement will be finishing in future that makes us to be more confident year by year for the sake of realizing the plan at present and in certain future. On the other side, we should learn and develop relevant project and subject to reveal the core one after their phenomena. Then we master that technique to apply to that kind of substance making ability through the engineers and scientists transformed to the R & D (research & development) department in makers. Therein, a sample will change into launch product by us to search for which may bring out new functional precise and quick responding to our request up to now. We should go on developing our similar functional equipment continually. [17~18]

### 2.1 Chinese top provinces GDP ranking

The Chinese top provinces GDP ranking might show 11~5.9 billion yuan by Shanghai~ Hong Kong cities accordingly in 1964 to express the Shanghai forwards economy level according to Figure 1. The ones beyond 10 billion yuan have two ie. Sichuan province with 10 billion yuan following Shanghai city.

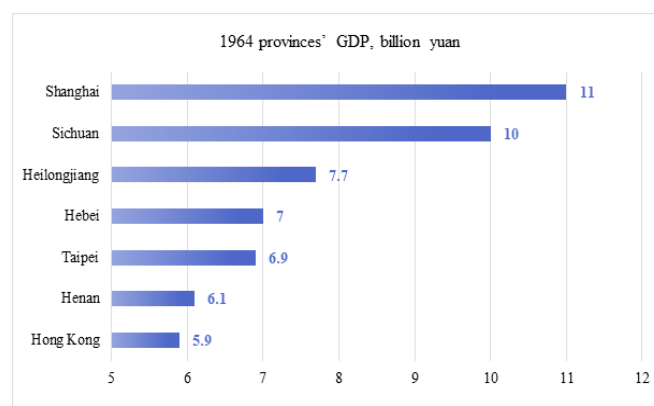

Figure 1. The Chinese top provinces GDP ranking in 1964. [1]

The Chinese provinces GDP ranking might show 7.1~3.9 billion yuan by Hubei~ Beijing cities accordingly in 1964 to express their forwards economy level according to Figure 2. The ones beyond 5 billion yuan have three ie. Hunan province & Anhui one with 6.4 & 5.1 billion yuan following Hubei province.

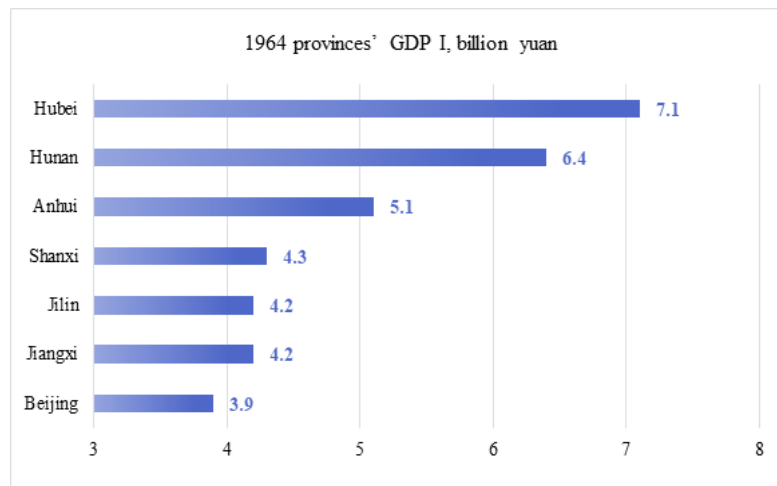

Figure 2. The Chinese provinces GDP ranking 1964 I. [1]

At the end, the Chinese top provinces GDP ranking might show 9.6~3.4 billion yuan by Shanghai~ Jiangxi provinces accordingly in 1963 to express their forwards economy level according to Figure 3. The ones beyond 5 billion yuan have eight ie. Sichuan Heilongjiang Taipei Hubei Hunan Hebei Hong Kong ones with 8.7, 6.5, 5.98, 5.9, 5.35, 5.2, 5.1 billion yuan following Shanghai one according to data in Figure 3 in 1963. On the contrary, Jilin Shanxi following Jiangxi province remained 3.7, 3.6 billion dollars respectively.

## 2.2 Introduction to the Nescafe coffee

The Nescafe powder coffee is classified as Italy-style concentration & pureness and low-sugar solid beverage. Its composition includes as like in Table 1. The usefulness is adding 150ml & 85°C water into 13g powder mixed averagely to drink with maintaining the heat. The expiration date is 16 months. [ 4]

Table 1. The nutrient of Nesacfe power.

Nutrients	Rate, per 100ml
Energy	139 KJ
Protein	0 g
Fat	1.1 g
Zero trans fat	0 g
Carbon-hydrate	5.8 g
Sugar	4.7g
Natrium	101 mg

## 2.3 Introduction to the Archives of Engineering and Technology

As to doctor & professors, the greetings from Archives of Engineering and Technology! We have recently come across your impressive works and believe that your expertise would greatly enrich our journal. I appreciate your professionalism and knowledge after a view at your recent articles. We welcome the manuscript and it was our immense pleasure to feature in our upcoming issue. To hope you kindly forward the manuscript below mentioned link: Online Submission. If you are unable to submit by our Online Submission, you can directly forward your unpublished manuscript to this Email as an attachment. Please note that the deadline for submissions is March 20<sup>th</sup>, 2026. Please submit your (150 words), Research interest to join our editorial board. Note If you want to be an Editorial board membership. The eligibility is minimum Ph.D. or M.D. we are looking forward to receiving from you! [5] At the end, we are delighted that your submission with valuable papers to us in time.

## 2.4 Subject for the European Journal of Business & Management Research

The recently published articles would be published as follows Table 1 in that journal.  
[6]

Table 1. Published Articles recently.

Paper title	Author name
Analytical Study of Challenges and Opportunities for Business Analysts in Emerging Economies Amidst AI and Automation for Evolving Skill Requirements	Jeewan Singh
The Role of Financial Technology in SME (small &medium enterprise) Financing in East Africa	Chirdon Osman Waberi, Jia Lijun
A Study on the Behavioural Intentions of Hong Kong Pet Owners using Chatbots for Veterinary Consultation	Wing Ying Mo, Yip Wai Shan
Turnover Contemplation in the Public Sector: Evidence from the Sierra Leone Ministry of Health	Alhassan Fouard Kanu

## 2.5 Subject for the Suntext review of cardiovascular sciences

Aims to publish high-quality papers on all aspects of Cardiology and Cardiovascular Sciences. This journal facilitates the research and wishes to publish papers as long as they are technically correct, scientifically motivated. [7] The scope of the Journal included all the aspects of Interventional cardiology, Myocardial Biology, Congenital Heart Disease, Cardiomyopathy, Arrhythmia, Systemic Hypertension, Vascular Disease, Congestive Heart Failure, Valvular Heart Disease, Cardiomyopathy, Cardiovascular Disease, Preventive Cardiology, Women and Heart Disease, Cardiovascular Pharmacology, related to all Cardiovascular Sciences. Moreover, we are providing 50 % of on article submission. So we hopefully invite you and your colleagues to submit their precious papers to us, we are going to publish them after short review with quickness and cheapness. Hope you and your ones to have a good day.

### 3. Conclusions

The one nation & region's GDP (gross domestic product) & industrial production will reflect that region economy development degree through increasing that value includes agriculture industry tertiary three fields. So that industry & service industries will promote the whole GDP value continuously, special in service one having a significant growth momentum due to digital transformation and rising consumer demand, thereby reshaping employment structures and driving innovation across sectors. This shift is particularly evident in China's new construction for enhancing its innovation stimulus policies and capital support special in the service AI robot that may bring out new sale tendency in the future like autonomous payment and cinema ticket print machine. That largely declines the time for payment and ticket print in super mall & cinemas. The GDP will take a role on positive activities so as to enhance the economy target in last year and in this year the increasement step may be defined to attain in perspective. Thereby the concluding last year ones and making a strategic plan for next year will relate all of our aspects like life consumption & production education environmental sustainability, ensuring balanced growth across sectors. By aligning individual and institutional efforts with national development priorities, we foster inclusive progress that benefits all stakeholders. This integrated approach gains renewed urgency in new year perspective and strategic plan by the relevant governmental constitution and institutions. Specially as 2026 unfolds with heightened focus on new challenge for us is to continue to endeavour sustainably on various high level fields like Artificial Intelligence bio-medical pharmacy new function materials etc. many lines. That may take an important role in increasing our GDP value for this year. Thereby, we need to continue to search those cutting-edge-fields through our experts and scientists because those aspects may be proceeded sustainably special in low-contamination non fossil fuel like wind energy photovoltaic energy hydraulic one nuclear reacting-pile one. Wo we need a lot of engineers & scholars etc participating cooperatively and satisfy the producing learning searching & usefulness series of industrial procedures to invest and push into market meeting consumers demands. There will be still big resilient space to wield our imagination and research capacity to publish the relevant achievement in famous journals so as to arouse the basis & application

aspects research together for alleviating the cause matters. We should continue to search and develop the low-carbon energy base status and application to futural huge requirement electricity for example the chargeable battery technique etc. reserved energy stations which increases from several years gradually meeting the electrical vehicle hybrid vehicle even small motorcycles.
