## Author notes

*Khadija Abdul-Malik is affiliated with Council for Scientific and Industrial Research (CSIR-Ghana) and focuses on Business research in Africa.*

## Abstract

Comparative business dynamics in African regions have been a subject of interest for scholars seeking to understand regional economic development and business practices across different countries. Theoretical synthesis and critical review are employed to develop insights into the comparative dynamics of businesses across different African regions within Ghana's context. This theoretical framework offers a comprehensive foundation for understanding the complex interplay between regional characteristics and business practices in Ghana, highlighting areas where further research is needed. Future research should focus on empirical studies to validate these findings and explore specific case studies that illustrate how theoretical insights translate into practical applications.
