

# Türetilmiş Demografik Göstergeler için Latin Amerika (2000-2023): Yaşlanma Endeksi, Başlımlı

de la Serna Tuya, Juan Moisés · ORCID: 0000-0002-8401-8018

DOI: 10.5281/zenodo.19220254

## Research Design

Cross-sectional and longitudinal observational study using secondary data from official statistical sources. Data were harmonized under a standardized protocol with ISO country codes and consistent variable definitions.

## Data Sources

- World Health Organization (WHO) Global Health Observatory
- Pan American Health Organization (PAHO) Core Indicators
- World Bank Open Data
- ECLAC/CEPAL Statistics
- National statistical institutes

## Quality Control

All values verified against primary sources. Data quality scores (high/medium/low) assigned per variable-country-year. Missing values coded as NA. Cross-validation performed against secondary sources.

## Ethical Considerations

All data are aggregated population-level statistics. No individual-level data. No ethical approval required. Published under CC0 1.0 Universal (Public Domain).

## Limitations

Data quality varies across countries and periods. Aggregated data precludes individual-level analysis. Estimation uncertainty higher for lower-income countries and earlier years.
