

# KAI Hybrid Intelligence Engine

---

Multilayered Intelligence for High-Stakes Advisory  
AI × Human × System Intelligence

## 1. Core Concept

KAI operates on a Hybrid Intelligence Model combining Artificial Intelligence (AI), Human Intelligence (HI), and System Intelligence (SI) to deliver structured, high-stakes advisory.

## 2. Architecture Overview

### Layer 1: Data & Signal Layer

Market data, business inputs, geopolitical signals, user queries.

### Layer 2: Analytical Intelligence Layer

Technical indicators, financial models, scenario simulations.

### Layer 3: Role-Based Intelligence Layer

Includes Market Analyst, Financial Brain, Business Assistant, Hybrid Strategist, Portfolio Architect, Risk Evaluator, Strategic Advisor, Compliance Controller, Decision Validator, Execution Advisor, Educational Consultant.

### Layer 4: Protocol & Governance Layer

Anti-hallucination rules, Capital Preservation Constitution, MRO-v2, HITL, compliance filters.

### Layer 5: Advisory Output Layer

Structured outputs: buy/sell ranges, strategies, risk scenarios.

### Layer 6: Human Oversight Layer

Final authority remains with human decision-makers.

## 3. KEN-Powered Intelligence Economy

Tokenized access model using KEN for queries, advisory, and advanced intelligence services.

## 4. Strategic Advantages

Hybrid decision superiority, cross-role validation, capital preservation focus, scalability, compliance-ready.

## 5. Public Disclosure

### Nature of System

KAI is a decision-support system integrating AI with human oversight.

### No Financial Advice

Outputs are analytical and not financial or legal advice.

### Risk Disclosure

Markets involve risk, including potential capital loss.

### Human Oversight

AI recommends. Human decides.

### Token Usage

KEN token is used for access to services, not equity.

### Liability

Kohenoor Technologies is not liable for decisions made using KAI outputs. However, it stays committed to deliver only the best in the world ensuring time and cost efficiency.

### Continuous Development

System evolves over time with updates and improvements.

The screenshot displays the KAI interface, which includes a header with the KAI logo and navigation tabs for 'Advisory' and 'History'. The main content area is divided into four service cards, each with a description, cost in KEN tokens, and a button to connect a wallet.

Service	Description	Cost (KEN)	Cost (USD)
General Query	Ask anything — general knowledge, quick answers, and everyday queries answered instantly by KAI. Multiple top AI models are queried in parallel and the best response is selected and delivered to you.	0.06 KEN	≈ \$1.3998 USD
Top AI Advisory (Deep Thinking)	Advanced deep-reasoning analysis on complex topics — markets, strategy, finance, and beyond.	1 KEN	≈ \$23.3300 USD
Top AI Advisory + Human Expert Vetting	AI-generated advisory reviewed and validated by a Kohenoor human expert. Opinion delivered via email within 24 hours.	1.5 KEN	≈ \$34.9950 USD
Expert Advisory with Follow-Up	Full expert advisory with a dedicated follow-up session. Ideal for high-stakes decisions and institutional use cases.	2.4 KEN	≈ \$55.9920 USD
