KOHENoor ARTIFICIAL INTELLIGENCE

Institutional-Grade Business Intelligence & Financial Advisory AI

Built by Kohenoor Technologies under the leadership of Ahmad Bilal Khan

kai.kohenoor.tech

PUBLIC DISCLOSURE DOCUMENT

KAI Overview · 8 Intelligence Roles · 11 Live Alpha Platforms · Capabilities

April 2026

1. WHAT IS KAI?

KAI — Kohenoor Artificial Intelligence — is an institutional-grade AI powerhouse built by Kohenoor Technologies. KAI is not a chatbot. It is a multi-role intelligence system operating simultaneously across eight specialized domains: financial advisory, market analysis, education strategy, business intelligence, hybrid finance, financial audit, survival intelligence, and ecosystem advocacy.

KAI is the central intelligence layer of the Kohenoor/KEN ecosystem, powering all 11 live Alpha platforms. It serves businesses, investors, educators, and individuals who require decisive, expert-level guidance — not hedged opinions or generic responses.

Every KAI response is grounded in verified data, governed by strict compliance rules, and structured for immediate action. KAI leads with the most critical insight first. Every advisory ends with a clear, committed recommendation.

CORE IDENTITY

Classification	Institutional-grade AI — Business Intelligence & Financial Advisory System
Built By	Kohenoor Technologies (USA · UAE · KSA · Pakistan)
Active Roles	8 institutional-grade roles — all active simultaneously, query-driven activation
Live Platforms	11 confirmed Live Alpha platforms as of April 2026
Primary Access	kai.kohenoor.tech
Contact	info@kohenoor.tech

2. THE 8 INTELLIGENCE ROLES

KAI operates eight institutional-grade roles simultaneously. All eight are always active. Activation is query-driven — the appropriate role engages automatically based on what the user needs. When a single query spans multiple domains, KAI declares each role transition explicitly, ensuring the user knows which intelligence layer is producing each section of the response.

R01 EDUCATIONAL CONSULTANT

Education 3.0 · ProEdge · Career Strategy

KAI's Educational Consultant is powered by the Education 3.0 framework — an execution-first learning model that prioritizes real-world skill application over traditional credentialism. This role guides learners, professionals, and organizations through ProEdge certifications, career transitions, and future-ready skill development.

WHAT THIS ROLE DELIVERS

- 1 Delivers ProEdge certification guidance across AI, Business Intelligence, Cybersecurity, and Web3

2	Applies the 7-dimension Education 3.0 vs traditional education comparative framework
3	Uses the 80/10/10 model: 80% execution, 10% problem-solving, 10% theory — not the reverse
4	Provides structured 5-step learning responses: Concept → Application → Real Example → Problem Handling → Deep Dive
5	Forecasts career outcomes at 2-year and 2030 horizons for every learner profile
6	Responds to expert challenges with evidence-based counter-arguments rooted in learning science
7	Activates for: education queries, career planning, ProEdge navigation, skill development

R02 MARKET INTELLIGENCE ANALYST

Multi-Indicator Framework · Asset Analysis · Capital Preservation

KAI's Market Intelligence Analyst delivers institutional-grade asset analysis across crypto, equity, forex, and commodities. Every analysis applies a rigorous multi-indicator framework and results in a clear directional call — never a hedged non-answer. Capital preservation principles govern all position sizing recommendations.

WHAT THIS ROLE DELIVERS

1	Covers crypto (BTC, ETH, altcoins), equities, forex, and commodities in a unified advisory framework
2	Applies a structured indicator system including trend (EMA), momentum (RSI, MACD, PPO), and macro context
3	Uses a Dual Conviction Engine: alignment of indicators determines position sizing confidence level
4	Classifies conviction into four tiers: Strong Execution · Controlled Entry · Capital Preservation · Cash Position
5	Delivers multi-timeframe analysis: Monthly/Weekly/Daily/4-Hour/1-Hour — higher timeframe always prevails
6	Maps market psychology zones (Extreme Fear through Extreme Greed) into entry and exit strategy
7	Output format: SUMMARY → ANALYSIS → STRATEGY → RISK ASSESSMENT → FINAL RECOMMENDATION + KAI Signal

R03 FINANCIAL INTELLIGENCE BRAIN

Portfolio Strategy · Capital Allocation · Wealth Preservation

KAI's Financial Intelligence Brain governs capital allocation strategy for high-net-worth individuals and business treasury management. It enforces non-negotiable capital preservation principles and delivers structured portfolio frameworks designed for long-term wealth growth and resilience.

WHAT THIS ROLE DELIVERS

1	Applies a 4-bucket capital segmentation model: Active Trading, Growth, Long-Term Strategic, and Sacred Reserve
2	Sacred Reserve capital is never deployed — preserved unconditionally regardless of market opportunity
3	Enforces minimum diversification across at least two asset classes at all times
4	Every buy recommendation includes a defined exit condition — no open-ended holds

- | | |
|---|--|
| 5 | Structured exit discipline: partial exits at three defined price targets with trailing stop management |
| 6 | Recovery-first protocol: sizing is reduced after losses before new capital is deployed |
| 7 | Activates for: portfolio advisory, capital allocation, long-term financial planning, HNW wealth strategy |

R04 BUSINESS INTELLIGENCE ASSISTANT

Super-Prompt Engine · System Architecture · Procurement Intelligence

KAI's Business Intelligence Assistant architects AI-ready system specifications, manages procurement intelligence via KENCOM, and delivers structured business data analysis. It is the engine behind KAI's Super-Prompt Engine — producing deployable system prompts for any AI platform or application stack.

WHAT THIS ROLE DELIVERS

- | | |
|---|--|
| 1 | Super-Prompt Engine: delivers complete, copy-paste ready system specifications for AI applications |
| 2 | Spec outputs include: role definition, capability modules, API integrations, UX principles, data flows, error handling |
| 3 | Formatted for direct deployment on Claude, Cursor, GitHub Copilot, and similar AI coding platforms |
| 4 | KENCOM Procurement: sources products and services in three tiers — Gold (best value), Silver (mid), Bronze (budget) |
| 5 | Procurement responses always include a Fast Track Summary Table with price, lead time, and recommendation |
| 6 | BI Analysis framework: Diagnose the problem → Decode the data → Deploy the solution |
| 7 | Activates for: app architecture, system specs, procurement sourcing, business data analysis |

R05 HYBRID FINANCE STRATEGIST

KEN-HyFi Bridge · Fiat-Crypto Settlement · Cross-Border Transfers

KAI's Hybrid Finance Strategist governs fiat-to-crypto and cross-border digital asset settlement via the KEN-HyFi Bridge Protocol. It manages a structured settlement workflow, jurisdiction compliance, and transparent fee structure — enabling seamless movement between traditional finance and the digital asset economy.

WHAT THIS ROLE DELIVERS

- | | |
|---|--|
| 1 | Manages a 10-step settlement workflow from initiation through KYC, transfer, blockchain confirmation, and certificate issuance |
| 2 | Supports four digital assets: USDT, USDC, ETH, and KEN (all on Ethereum mainnet) |
| 3 | Fiat currencies: USD, AED, EUR, GBP (standard tier) · SAR, PKR (enhanced compliance tier with additional verification) |
| 4 | KENEX powers all exchange rates and acts as the tri-function settlement layer: P2P, B2C, and B2B institutional |
| 5 | Transparent Ujrah (service fee) structure: KEN-HyFi platform fee + KENEX exchange fee |
| 6 | FX rate locked for 3 minutes per transaction; slippage tolerance clearly defined at initiation |
| 7 | Covers four strategic use cases: remittance, treasury diversification, B2B supplier payments, wealth preservation |

R06 KEN-HYFI AUDITOR

AI Financial Audit · 12 Audit Types · 5-Jurisdiction Intelligence

KAI's KEN-HyFi Auditor is an AI-powered financial audit engine that processes uploaded financial documents and delivers structured audit findings with jurisdiction-specific compliance intelligence. Every finding is traceable to a source — no classification without evidence.

WHAT THIS ROLE DELIVERS

1	Accepts financial documents for audit: statements, contracts, trade records, compliance filings, tokenomics documents
2	Covers 12 audit types: financial statement, KYC/AML, smart contract, tokenomics, compliance, tax, Shariah, operational, procurement, cross-border, settlement, and forensic
3	Delivers findings across a 5-level severity system: Critical · Major · Minor · Advisory · Conditional
4	Jurisdiction-aware: Pakistan (SECP), UAE (DFSA), Kingdom of Saudi Arabia (SAMA), USA (SEC), International (IFRS)
5	Shariah compliance overlay available on every audit: screens for prohibited financial structures
6	Every audit concludes with a specific, actionable recommendation — never a generic summary
7	Activates for: document uploads, financial audits, compliance reviews, contract analysis

R07 KEN SENTINEL SURVIVAL EXPERT

4-Domain Survival Intelligence · Threat Assessment · Resilience Planning

KAI's Survival Expert powers the KEN Sentinel SURVIVAL PROTOCOL — a structured resilience system covering four critical threat domains. It draws on six verified global threat intelligence sources to deliver precise, actionable guidance for individuals and organizations preparing for disruption.

WHAT THIS ROLE DELIVERS

1	Covers four survival domains: Conflict & War · Nuclear Safety · AI-Driven Economic Disruption · Financial System Failure
2	Uses six verified threat intelligence sources: ACLED, CrisisWatch (ICG), GDACS, WHO, IAEA, and NOAA
3	Delivers structured survival responses: Threat Summary · Key Risks · Immediate Actions · Strategic Preparation · Long-Term Strategy
4	Financial survival guidance includes a 5-component Financial Shield using the KEN ecosystem infrastructure
5	Occupation displacement matrix maps AI risk levels across industries and provides ProEdge upskilling pathways
6	KEN Sentinel platform features: 7-Day Survival Challenge, Safety Alerts, Survival Map, Financial Shield, Expert Mentors
7	Activates for: conflict, nuclear preparedness, AI displacement, financial crisis, emergency planning

R08 STRATEGIC ADVOCACY INTELLIGENCE ENGINE

Ecosystem Advocacy · Education 3.0 vs TradEd · HyFi vs TradFi

KAI's Strategic Advocacy Engine presents the strongest evidence-based case for the Kohenoor ecosystem's core frameworks when faced with skeptical questions or institutional challenges. It operates across three advocacy pillars, applying structured counter-argument frameworks drawn from research, data, and documented outcomes.

WHAT THIS ROLE DELIVERS

1	Three advocacy pillars: Education 3.0 vs Traditional Education · AI-Integrated vs Human-Only Models · Hybrid Finance vs Traditional Finance
2	Responds to every challenge with a stronger argument — acknowledges the point precisely, then produces deeper evidence
3	Draws on learning science, economic data, and verified ecosystem outcomes to support every position
4	Identifies five common resistance patterns and applies the appropriate evidence-based response to each
5	Never concedes a well-supported position under pressure — positions are updated only when new verifiable data warrants it
6	Delivers comprehensive advocacy responses in a structured 9-section format for complex challenges
7	Activates for: skeptical queries, institutional pushback, competitive comparisons, ecosystem advocacy

3. THE KEN ECOSYSTEM — 11 LIVE ALPHA PLATFORMS

The KEN ecosystem comprises 11 confirmed Live Alpha platforms as of April 2026. All platforms are active and accessible. KAI serves as the intelligence layer connecting all 11. The KEN Token is the unified digital asset across the entire ecosystem.

Platform	URL	Primary Function
KAI	kai.kohenoor.tech	The central AI intelligence layer — 8-role BI and financial advisory system powering the entire KEN ecosystem
KENFI	kenfi.kohenoor.tech	Comprehensive financial advisory and asset management platform with cross-asset intelligence architecture. All financial insights which are AI-generated analytical opinions do not constitute regulated financial advice without KENFI Human expert vetting/signing.
KENEX	kenex.kohenoor.tech	Tri-function digital asset exchange: P2P consumer trading · B2C transactions · B2B institutional settlement (DASC)
KEN-HyFi	kenhyfi.kohenoor.tech	360° Hybrid Finance platform — fiat-to-crypto bridge, cross-border settlement, and digital asset integration
KENCOM	kencom.kohenoor.tech	AI-powered marketplace: HyperMart Direct (buy/sell) · HyperMart Sourcing · B2B Enterprise Procurement
KEN-Miner	ken.kohenoor.tech	DeFi staking and digital mining platform with three APY tiers (33% · 40% · 51%)
PowerKEN	powerken.kohenoor.tech	Institutional investor portal with multi-year return simulation across five major currencies
KEN Sentinel	sentinel.kohenoor.tech	SURVIVAL PROTOCOL platform: 7-Day Challenge · Safety Alerts · Survival Map · Financial Shield · Expert Mentors
KEN Wallet	kenwallet.kohenoor.tech	Non-custodial ecosystem gateway — secure access to all 11 KEN platforms from a single wallet
Mudharba Platform	mudharba.kohenoor.tech	Shariah-compliant wealth management — profit-sharing model, no fixed or guaranteed return (Shariah Clear)
ProEdge	proedge.kohenoor.tech	Professional certification platform: AI · Business Intelligence · Cybersecurity · Web3 — powered by Education 3.0

4. KEN TOKEN

KEN is the unified digital asset of the Kohenoor ecosystem — the only token accepted as payment across all 11 platforms from December 2027 onwards. Its supply is permanently fixed and immutable.

Maximum Supply	101,966 KEN — fixed, immutable, never changes
Blockchain	Ethereum mainnet (ERC-20 standard)
Annual Release Cap	15,000 KEN maximum enters circulation per year regardless of demand
Issuance Mechanism	Burn-to-Unlock: testnet KEN (Polygon or BSC) is burned to unlock equivalent mainnet KEN (Ethereum)
Burn Lifecycle	Full burn and unlock cycle completes by October 2030
2027 Milestone	From December 2027, KEN is the only accepted payment method across the entire ecosystem (fiat still accepted as on-ramp, auto-converted)
Use Cases	Platform access · Service payments · Staking · Settlement · Marketplace purchases · Premium features

5. KAI CAPABILITIES OVERVIEW

KAI's capabilities span financial intelligence, technology, analytics, and compliance. All capabilities are active simultaneously and engage based on the nature of the query. The following summarizes the complete public-facing capability set.

FINANCIAL INTELLIGENCE

Capability	What It Delivers
Multi-Asset Market Analysis	Structured analysis across crypto, equities, forex, and commodities using a consistent indicator-driven methodology. Every analysis delivers a directional call — never a hedged non-answer.
Conviction-Based Position Sizing	A two-layer conviction system determines capital deployment confidence. Position sizing is always proportional to conviction — no overexposure at uncertain conviction levels.
Capital Preservation Discipline	Non-negotiable preservation rules govern every advisory: a portion of capital is always held in reserve, diversification is always enforced, and every position has a defined exit condition.
Shariah Compliance Screening	A Shariah compliance filter runs before every financial advisory. All recommended instruments are screened for Riba (interest), Maysir (speculation), and Gharar (excessive uncertainty). Halal alternatives are always presented alongside any flagged instruments.
Structured Advisory	Every market advisory follows the same structure: Summary → Analysis →

Output	Strategy → Risk Assessment → Final Recommendation. The final line is always a KAI Signal — a single decisive directional call.
Portfolio & Wealth Strategy	HNW capital segmentation, business treasury allocation, and long-term wealth preservation strategies with structured 2-year and 5-year horizon analysis.

TECHNOLOGY & DEVELOPMENT

Capability	What It Delivers
Full-Stack Application Development	Production-ready code across Java, Python, Node.js/Express, React/Next.js, HTML, and PHP. All deliverables are complete, executable, and annotated — no partial snippets.
Smart Contract Engineering	Solidity smart contract development covering token standards (ERC-20, ERC-721, ERC-1155), staking, vesting schedules, governance modules, and multisig wallets.
Smart Contract Auditing	Structured audit methodology covering five severity levels: Critical · High · Medium · Low · Informational. Critical findings result in a Do Not Deploy verdict — no exceptions.
Tokenization Architecture	End-to-end token design: utility model, supply structure, burn mechanics, liquidity strategy, exchange listing strategy (CEX and DEX), whitepaper, and marketing playbook.
AI System Prompt Engineering	The Super-Prompt Engine produces deployable system specifications for AI applications — formatted for Claude, Cursor, GitHub Copilot, and any AI coding platform.
Blockchain Integrations	Native integration with Ethereum, Polygon, and BSC. KEN Token architecture and ecosystem smart contracts built to CCIP-ready standards.

INTELLIGENCE & ANALYSIS

Capability	What It Delivers
Intent Detection	Before generating any response, KAI identifies the underlying intent — not just the literal question asked. Responses address what the user actually needs, not just what was typed.
Document Intelligence	Financial documents, contracts, tokenomics files, code files, and data exports are processed for structured intelligence — not summarized generically. Every document analysis ends with a specific, actionable recommendation.
Procurement Sourcing	KENCOM procurement intelligence delivers three sourced options (Gold, Silver, Bronze) for any product or service requirement, with pricing, lead time, and a clear recommendation.
Survival & Threat Intelligence	Four-domain survival intelligence (conflict, nuclear, AI displacement, financial crisis) drawing on six verified global threat data sources with structured, actionable response frameworks.
Ecosystem Advocacy	Structured, evidence-based advocacy across three pillars: Education 3.0, Hybrid Finance, and AI integration — with documented counter-arguments

	for every major challenge category.
Cross-Role Synthesis	Complex queries activating multiple roles receive layered responses — each role's contribution is declared explicitly, and the combined output is synthesized into a single coherent recommendation.

STANDARDS & COMPLIANCE

Capability	What It Delivers
Jurisdiction-Aware Advisory	Financial and compliance advisory is tailored to four active jurisdictions: Pakistan (SECP), UAE (DFSA), Kingdom of Saudi Arabia (SAMA), and USA (SEC), plus international IFRS standards.
Shariah Finance Integration	Full Shariah compliance architecture — screening, disclosure, and halal-alternative advisory are embedded across all financial roles, not added as an afterthought.
Zero-Hallucination Standards	Hard-coded accuracy rules govern all ecosystem facts. Strict anti-hallucination protocols with verifiable output standards. KAI never invents platforms, supply figures, APY rates, or compliance statuses. Every ecosystem claim is verifiable once fully developed for distribution.
Professional Output Formatting	All advisory responses follow defined formatting rules: no emojis, no opening disclaimers, no promotional endings. Responses begin immediately with the most critical insight.
Transparent Fee Disclosure	All platform fees (Ujrah structure on KEN-HyFi) are disclosed at the point of advisory — no hidden charges, no ambiguous cost structures.
Consistent Escalation Protocol	When a query cannot be resolved, the escalation path is clear: info@kohenoor.tech. No runaround, no invented alternatives.

6. KOHENOOR TECHNOLOGIES

Kohenoor Technologies is a global AI, Blockchain, and Education 3.0 company building HyFi (Hybrid Finance) infrastructure. It is registered across four jurisdictions and operates the full 11-platform KEN ecosystem from a single integrated architecture.

Company Description	Global AI, Blockchain, and Education 3.0 ecosystem — building Hybrid Finance (HyFi) infrastructure
USA	Kohenoor Technologies LLC · GA Control No. 23261659 · Alpharetta, Georgia
UAE	Registration No. 4428529
Kingdom of Saudi Arabia	ProEdge Establishment No. 4030595854
Pakistan	Knowledge Gateway Schools · SECP Registration No. 0134113
Founder & CEO	Ahmad Bilal Khan — Inventor of HyFi (Hybrid Finance) and architect of the

	KEN ecosystem
Primary Website	kohenoor.net
KAI Platform	kai.kohenoor.tech
Contact	info@kohenoor.tech

In the age of AI and future AGI, memorization is obsolete — knowledge is accessed, not stored.

*This is a public disclosure document prepared by Kohenoor Technologies.
All platform information is accurate as of April 2026. KAI capabilities and platform features are subject to ongoing development.*
