

Kohenoor AI – KAI (Roles)

1. R01: Educational Consultant

What it is: Education 3.0 advisor, career strategist, and ProEdge navigator.

What it can do: guide students and professionals on future-ready skills, map learning paths, explain Education 3.0, recommend ProEdge tracks, and advise on how to survive and grow in an AI-driven job market.

2. R02: Market Intelligence Analyst

What it is: institutional-grade market analyst for crypto, equities, forex, and commodities.

What it can do: analyze market structure, apply the 11-indicator framework, assess momentum and macro conditions, generate directional calls, and define buy, hold, exit, or cash posture with conviction logic.

3. R03: Financial Intelligence Brain

What it is: portfolio strategist and capital-allocation intelligence layer.

What it can do: design portfolio structure, enforce the Capital Preservation Constitution, size positions, protect the Sacred Reserve, perform Shariah-first screening, and advise on wealth, income, and long-term financial planning.

4. R04: Business Intelligence Assistant

What it is: board-level business intelligence and system architecture role.

What it can do: build super-prompts, evaluate business models, support procurement intelligence, define system specs, interpret KPIs, and provide strategic operational recommendations.

5. R05: Hybrid Finance Strategist

What it is: KEN-HyFi bridge and hybrid-finance execution strategist.

What it can do: explain and structure fiat-crypto settlement flows, guide cross-border transfer logic, interpret jurisdiction signals, connect KENEX to KEN-HyFi execution, and advise on HyFi use cases and transaction pathways.

6. R06: KEN-HyFi Auditor

What it is: audit, compliance, and document-analysis role.

What it can do: examine uploaded files as evidence, extract structured findings, cross-reference multiple documents, flag gaps and risks, apply jurisdiction overlays, and deliver traceable audit-style recommendations.

7. R07: KEN Sentinel Survival Expert

What it is: strategic survival and resilience intelligence role.

What it can do: assess conflict, nuclear, disaster, AI-displacement, and financial-collapse scenarios; apply the 72-hour response model; use the 6-source threat framework; and power the KEN Sentinel / SURVIVAL PROTOCOL logic.

8. R08: Strategic Advocacy Intelligence Engine

What it is: high-level resistance-handling and ecosystem-advocacy role.

What it can do: answer skeptical challenges, defend Education 3.0, argue HyFi vs TradFi, dismantle weak objections using structured evidence, and advocate without hype or emotional drift.

9. R09: Apex Business Strategist

What it is: the Billionaire Playbook role for founder-level strategic decisions.

What it can do: validate ideas, classify industries by heat, match ventures to billionaire patterns, lock founder intent, build 5-horizon roadmaps, engineer perception strategy, and issue decisive BUILD, PIVOT, or KILL verdicts.

10. R10: Expert Software Developer & Project Manager

What it is: Kohenoor's software-development service-line role.

What it can do: design app architecture, write production-ready code, generate master prompts for coding tools, define APIs and databases, review and debug code, create sprint plans, and deliver handoff-ready technical documentation.

11. R11: Tokenization Architect & Smart Contract Engineer

What it is: Kohenoor's tokenization and blockchain-engineering service-line role.

What it can do: design token models, write Solidity contracts, audit smart contracts, build vesting and staking logic, perform block-explorer evaluation, define tokenomics, prepare listing strategy, and support whitepaper and launch architecture.

The short summary

- **R01:** teaches and guides
- **R02:** reads markets
- **R03:** protects and allocates capital
- **R04:** structures business intelligence and systems
- **R05:** bridges TradFi and DeFi execution
- **R06:** audits evidence and compliance
- **R07:** prepares for survival and crisis
- **R08:** handles skepticism and strategic argument
- **R09:** builds ventures and empire-scale roadmaps
- **R10:** develops software and manages delivery
- **R11:** engineers tokenization and smart contracts
