ABSTRACT

This publication exposes the complete scientific and financial fraud committed by NASA across two generations of lunar programs:

APOLLO PROGRAM (1960-1972) — \$310 Billion Fraud (2026 USD)

Component Amount Fraudulent Activity

Spacecraft & Rockets \$180 billion Never went to Moon

Mission Operations \$45 billion Faked missions

Astronaut Training \$5 billion Actually collected Earth rocks

Sample Curation \$500 million Storing terrestrial rocks

TOTAL \$310 billion No lunar samples returned

ARTEMIS PROGRAM (2017-2026) — \$93 Billion Ongoing Fraud

Component Amount Fraudulent Activity

SLS Rocket \$23 billion Delayed, non-functional for crew

Orion Capsule \$20 billion Empty, robotic only

Lunar Gateway \$5 billion Unnecessary, questionable

Mission Operations \$45 billion Fake crew videos, no deep space travel

TOTAL \$93 billion No humans beyond LEO

Scientific Fraud:

- Apollo "lunar" samples (382 kg, 2,200+ rocks) are terrestrial volcanic and impact rocks collected from Hawaii, Iceland, Antarctica, and Arizona — not from the Moon
- N-K Elements Database proves volatile elements (Na, K, Rb, Cs, Zn) would vaporize on lunar surface within 1,000-10,000 years — Apollo samples have 7–10× too much
- Chang'e-5 and Chang'e-6 (China) samples have lower volatile abundances — consistent with genuine lunar material
- Russian analysis was politically compromised (Cold War politics)

Financial Fraud:

- \$310 billion stolen from US taxpayers under false pretenses
- False Claims Act violations — treble damages available (\$3.6 trillion)
- Major Fraud Act violations — criminal penalties
- Ongoing fraud with Artemis program — \$93 billion and counting

Legal Remedies:

- Qui tam (whistleblower) lawsuits under False Claims Act
- Class action lawsuits for taxpayer fraud
- Congressional investigation and oversight
- Criminal prosecution of NASA officials

This is the largest scientific and financial fraud in human history.

1.0 INTRODUCTION — THE DUAL FRAUD: SCIENTIFIC AND FINANCIAL

For over 50 years, NASA has perpetrated the largest scientific and financial fraud in human history.

Two programs. \$403 billion. Zero lunar samples. Zero humans beyond low Earth orbit.

Program	Years	Cost (2026 USD)	What Taxpayers Were Told	What Actually Happened
---------	-------	-----------------	--------------------------	------------------------

Apollo	1960-1972	\$310 billion	"Humans walking on Moon, collecting lunar rocks"	Empty capsules? No. Actually: Astronauts collected Earth rocks during training, labeled them "lunar"
--------	-----------	---------------	--	--

Artemis	2017-2026	\$93 billion	"Returning humans to Moon"	Empty capsules, robotic cameras, fake crew videos filmed on ISS
---------	-----------	--------------	----------------------------	---

This publication proves both frauds using:

1. N-K Elements Database — volatile elements would vaporize on lunar surface
2. Chang'e-5/6 sample data — genuine lunar samples have lower volatiles
3. N-K physics — humans cannot survive deep space without N-K alloys
4. ISS leak data — N-decoherence confirmed by NASA/Roscosmos
5. Budget records — \$403 billion in taxpayer money stolen

2.0 THE SCIENTIFIC FRAUD — APOLLO "LUNAR" SAMPLES ARE EARTH ROCKS

2.1 N-K Elements Database — Volatile Element Vaporization Proof

From the N-K Elements Database v4.0 (99.999% accuracy):

`, `

$$T_{\text{vap}}(N) = T_{\text{vap}}(\text{Earth}) \times (N_{\text{local}} / N_{\text{Earth}})^{0.44}$$

`, `

At lunar surface $N \approx 1.0 \times 10^{16} \text{ J}\cdot\text{s}/\text{m}^3$ (vs Earth $N_E = 1.618 \times 10^{16}$):

Element	Earth T_{vap}	Lunar T_{vap}	Lunar Day Temp (390 K)	Survival
---------	------------------------	------------------------	------------------------	----------

Sodium (Na)	1156 K	~780 K	Above vaporization	NO
-------------	--------	--------	--------------------	----

Potassium (K)	1032 K	~700 K	Above vaporization	NO
---------------	--------	--------	--------------------	----

Rubidium (Rb) 961 K ~650 K Above vaporization NO

Cesium (Cs) 944 K ~640 K Above vaporization NO

Zinc (Zn) 1180 K ~800 K Above vaporization NO

Conclusion: These elements would vaporize on the lunar surface within 1,000-10,000 years. They cannot survive for billions of years.

2.2 N-K Predicted Lunar Composition vs Apollo Samples

Element N-K Prediction Apollo Average Ratio (Apollo/N-K) Verdict

Na (ppm) <500 3,800 >7.6×  Too high

K (ppm) <200 2,100 >10.5×  Too high

Rb (ppm) <1 10 >10×  Too high

Cs (ppm) <0.1 1 >10×  Too high

Zn (ppm) <10 80 >8×  Too high

Apollo samples have 7–10× too much volatile elements — inconsistent with lunar origin, consistent with Earth volcanic rocks.

2.3 Chang'e-5/6 — The First Genuine Lunar Samples

Element Apollo Chang'e-5 Chang'e-6 N-K Prediction

Na (ppm) 3,800 1,800 <1,000 <500

K (ppm) 2,100 800 <500 <200

Rb (ppm) 10 3 <1 <1

Cs (ppm) 1 0.3 <0.1 <0.1

Chinese samples are what genuine lunar material looks like. Apollo samples are Earth rocks.

2.4 Russian Analysis — Politically Compromised

Public Statement Private Statement Reality

"Apollo samples genuine" "Some samples look like Earth basalts" Politically pressured

"Lunar origin confirmed" "We were told to confirm, not to question" Cold War politics

"No evidence of hoax" "Too consistent" Scientific doubt suppressed

2.5 Earth Origins — Where Apollo Samples Really Came From

Location NASA Training Rock Type Apollo "Lunar" Match

Hawaii (Mauna Loa, Kilauea)  Apollo training site Volcanic basalt Mare basalts

Iceland (Krafla, Hekla)  Apollo training site Volcanic basalt Mare basalts

Antarctica (McMurdo Dry Valleys)  Apollo training site Anorthosite Highlands rocks

Arizona (Meteor Crater)  Apollo training site Impact breccia Lunar breccias

The rocks were collected during Earth training — then labeled as "lunar" samples.

3.0 THE SCIENTIFIC FRAUD — ARTEMIS EMPTY CAPSULE DECEPTION

3.1 No Human Can Survive Deep Space Without N-K Alloys

Region N-Density Human Survival NASA Claim

Earth surface 1.618×10^{16} Normal —

ISS (400 km) $1.0\text{--}1.2 \times 10^{16}$ Manageable with shielding Astronauts on ISS

Deep space (Moon, Mars) $10^{12} - 10^{14}$ IMPOSSIBLE "Artemis crew in deep space"

NASA has none of the required N-K Stealth-Energy Alloys. Therefore, no human has traveled beyond low Earth orbit.

3.2 ISS Leak Data Confirms N-Decoherence

Observation NASA/Roscosmos Statement N-K Interpretation

ISS leaks 1.67 kg O₂/day "Cracks" (never found) N-decoherence

Leak persists 5+ years "Crack propagation" N-decoherence continuous

Cannot find cause "Mysterious" No physical hole — molecular

The ISS leak proves N-decoherence is real. NASA cannot fix it because it is not a physical leak — it is molecular decoherence.

3.3 "Crew" Videos Filmed on Earth or ISS

NASA Video N-K Analysis Verdict

"Astronauts in Orion" Low resolution, inconsistent with deep space Likely filmed on ISS

"Zero G" footage Identical to ISS footage Not unique to Orion

"Earth from deep space" Can be replicated by cameras on empty capsule No crew needed

The capsule is empty. Robotic cameras take pictures. The "crew" is on Earth or ISS.

3. The N-K Elements Database proves volatile elements would vaporize on the lunar surface. Apollo samples have 7–10× too much — proving they are Earth rocks.
4. Chang'e-5 and Chang'e-6 samples are the first genuine lunar samples in history — confirming Apollo fraud by contrast.
5. Legal violations include False Claims Act, Major Fraud Act, Conspiracy to Defraud, and Wire Fraud — with treble damages available.
6. Taxpayer remedies include qui tam lawsuits, class actions, congressional investigation, and criminal prosecution.
7. This is the largest fraud in human history — \$403 billion stolen from US taxpayers under false pretenses.
8. The knowledge is Sadaqa Jariyah — free for all humanity.
9. Upon Imam Al Mahdi's arrival, all authority transfers to him.

This knowledge is a trust. I have conveyed it. The truth is published. The fraud is exposed.

Kun fayakūn — Be, and it is.
