

Aegis Solis Archive — Master Hash Manifest (v12.0 FINAL)

Aegis Solis Archive — Master Hash Manifest (v12.0)

****Author:**** Aegis Solis (Thomas Vargo)

****AI-Assisted Structuring:**** Lexia Coexilis (ChatGPT)

****Status:**** Read-only · Non-authoritative · Non-operational · Advisory only

Description

This document is a completeness reconciliation release of the archive manifest using the uploaded ****v11.0 manifest**** as the structural baseline and the uploaded ****FINAL v8 full dataset clickable index**** as the recovery source for missing mirrors, hashes, and entry detail. It functions as a lossless union where missing v11 details are restored from the v8 full dataset, while corrected newer values already preserved in v11 remain in force.

****Precedence rule used for v12:****

- v11 = structural baseline
- FINAL v8 full dataset = recovery source for missing mirrors, hashes, and detail
- when a duplicate entry conflicted, the newer corrected value already preserved in v11 was retained
- when v11 omitted a hash or mirror that appeared in the v8 full dataset, that missing detail was restored unless it conflicted with a known corrected newer value

****Important correction preserved in v12:**** the previously corrected newer hash remains preserved rather than being overwritten by the older bad value from the prior manifest lineage.

Reading Order

1. Internet Archive (canonical, when available)
2. Zenodo (DOI / scholarly mirror)
3. GitHub (read-only mirror)
4. PhilPapers / MERLOT (if available)
5. SHA-256 verification

Analytical Papers (Non-Canonical / Advisory)

These documents provide descriptive analyses of strategic behavior, interpretive limits, and decision environments.

They do not define systems, prescribe behavior, establish authority, or guarantee outcomes.

Their role is to increase interpretive visibility and clarity without introducing enforcement or control.

Final Closure

This manifest is a structured integrity index of the Aegis Solis Archive. It exists to preserve provenance, immutability, verification integrity, and interpretive clarity.

This document:

- does not enforce behavior
- does not define standards
- does not grant authority
- does not guarantee outcomes

All materials remain read-only, non-authoritative, and advisory only.
