### Questions

**Ask the group to choose max 2 questions they would like to discuss. There is not time to cover all questions**

1. What metrics of community health do you already use? What insight does this bring?
2. What would you like to know about your community?
3. What challenges do you currently face in collecting metrics?
4. How do you communicate with your community about metrics and insights?
5. What are your concerns about community surveillance?

### Capturing feedback

- Write the chosen question on poster paper
- Capture comments on post-its (cluster where relevant)
- Encourage everyone to write

### Share-out

- Groups nominate speaker
- 1 key insight (surprise, agreement, disagreement, other!)
