

D-POAF® - PromptRegister

Wave ID: _____ | Wave Name: _____ | Version: 1.0 | d-poaf.org

PromptRegister

Prompt ID	Date	Sub-Phase (1-7)	Role	AI Tool / Model Version	Prompt Title	Prompt Text (full)	Context Summary	Output Summary	Quality (1-5)	Reusable?	Issues / Notes	Status	Updated By
P-001	2026-04-28	3	Wave Surfer	Claude claude-sonnet-4-6	Auth Module - Login Flow	Generate a secure login function in Python using JWT tokens. Requirements: [FB-01] User authentication. Context: [RAG snapshot attached]	User auth requirements from spec doc v2.1 (Context V1)	Produced login() function with JWT, 98% test coverage	5	Yes		Active	A. IHSINE
P-002	2026-04-28	3	Wave Surfer	Claude claude-sonnet-4-6	Auth Module - Error Handling	Add comprehensive error handling to the login function. Cover: invalid credentials, expired tokens, rate limiting.	Error handling patterns from DL-002 (Context V2)	Added try/catch, 3 error types, logging	4	Yes		Active	A. IHSINE
P-003	2026-04-29	4	Wave Surfer	GitHub Copilot v2.1	Auth Module - Unit Tests	Write pytest unit tests for the login() and validate_token() functions.	Test coverage requirements from scope doc (Context V2)	12 unit tests generated, 2 refined manually	3	No	Test for token refresh not complete	Refined	S. IHSINE

Prompt Quality Rating Guide

Rating	Meaning	Action Required
5 - Excellent	Prompt produced exactly what was needed. Output required no manual refinement. Highly reusable.	Mark as Reusable. Archive in PromptRegister.
4 - Good	Output was correct with minor adjustments. Context was well-grounded. Reusable with light review.	Mark as Reusable after review by Wave Captain.
3 - Acceptable	Output required moderate refinement. Prompt worked but has improvement potential.	Refine before reuse. Note specific weaknesses.
2 - Poor	Output was significantly off-target. Required major rework. Do NOT reuse without overhaul.	Refine prompt. Identify context gap. Flag for review.
1 - Failed	Prompt produced unusable output or hallucination. Indicates context or model version issue.	Do NOT reuse. Investigate root cause. Update RAG context.

D-POAF® Wave Lifecycle - Phase Reference

#	Phase	Sub-Phase	Primary Role(s)	PromptRegister Activity
1	Instruct & Scope	Intent & Scope	Wave Captain	No prompts yet. Wave Scope Document created.
2	Shape & Align	Contextualize & Extract	RAGer	RAGer structures context. Prompt templates prepared.
3		Design Prompt Actions	Wave Surfer	Prompt Actions created and linked. PromptRegister populated.
4	Execute & Evolve	Build & Generate	AI + Wave Surfer	AI invoked with Prompt Actions. Outputs linked.
5		Coordinate & Validate	Wave Captain + AI	Prompts refined if outputs need correction. Quality ratings entered.
6		Deliver & Monitor	Peacekeepers	PromptRegister finalized. Reusable prompts flagged.
7	Learn & Adapt	Feedback & Evolve	All Roles	Prompts archived or refined. FeedbackRegister updated.
