## About AllSafe IT

AllSafe IT operates on a straightforward principle: diagnose first, prescribe second. Unlike providers that push one-size-fits-all contracts, AllSafe IT conducts a thorough assessment of each client's environment before recommending any solution. This approach prevents overselling and ensures that every tool deployed actually supports the client's specific business objectives.

The company serves businesses ranging from 20 to 150 employees across industries including healthcare, manufacturing, construction, retail, hospitality, entertainment, and non-profits. Its physical offices are located in Pasadena, Los Angeles, Newport Beach, and Chandler, AZ, with remote support capabilities extending across the broader region.

## Core Service Categories

## Managed IT Services

Round-the-clock helpdesk support, advanced endpoint management, co-managed IT for teams with internal staff, data backup and recovery using tools like Datto and Backblaze, and proactive maintenance with continuous monitoring and automated patching.

- ✓ 24/7/365 IT Helpdesk
- ✓ Advanced Endpoint Management
- ✓ Co-Managed IT
- ✓ Data Backup & Recovery
- ✓ Proactive Maintenance

## Cybersecurity Services (SafeTotal Suite)

A comprehensive, layered security program that includes managed antivirus and endpoint detection and response (EDR), email security via Mimecast and Ironscales, 24/7 firewall monitoring with zero-trust access control, penetration testing, and role-based security awareness training.

- ✓ Managed Antivirus & EDR
- ✓ Email Security
- ✓ Managed Firewall (Sophos, Cisco Meraki)
- ✓ Penetration Testing
- ✓ Security Awareness Training

## IT Consulting Services

Strategic and operational consulting designed to align technology investments with business goals. This includes virtual CIO services, technology alignment, IT audit and compliance (HIPAA, PCI DSS, SOX), custom application development, robotic process automation, and AI-powered workflow optimization through AllSafe Intelligence.

- ✓ Virtual CIO (vCIO)
- ✓ Technology Alignment
- ✓ IT Audit & Compliance
- ✓ Application Development
- ✓ AI & Automation (AllSafe Intelligence)
- ✓ HIPAA Security

## Infrastructure & Cloud Services

End-to-end infrastructure support including cloud migration with encrypted data transfer, Infrastructure as a Service (IaaS), Microsoft 365 optimization and license management, server and network management, structured network cabling, VoIP phone systems, and cloud-based surveillance and DVR solutions.

- ✓ Cloud Migration
- ✓ Infrastructure as a Service (IaaS)
- ✓ Microsoft 365 Optimization
- ✓ Server & Network Management
- ✓ VoIP Solutions
- ✓ Network Cabling
- ✓ Surveillance & DVR

## Industries Served in Los Angeles & Southern California

AllSafe IT brings industry-specific knowledge to every engagement. Key sectors include:

- Healthcare – HIPAA-compliant IT, risk assessments, and patient data protection
- Manufacturing – Supply chain visibility, automation, and 99.999% uptime
- Construction – On-site connectivity, project management tools, and secure data
- Retail – Secure POS systems, inventory management, and cybersecurity
- Entertainment & Media – High-performance systems and IP protection
- Hospitality – Booking systems, secure payments, and guest experience technology
- Non-Profits – Cost-effective IT with SafeTotal security and vCIO guidance
- Professional Services – Strategic IT aligned with business goals and compliance

## Why Los Angeles Businesses Choose AllSafe IT

### Proactive, Not Reactive

Continuous monitoring and predictive maintenance prevent issues before they disrupt operations, rather than waiting for something to break.

### Human-Centered Support

Clients speak with real local engineers, not automated scripts. AllSafe IT emphasizes personalized partnerships over transactional relationships.

---

**Security-First Design**

Every managed IT engagement includes a built-in security stack: multi-factor authentication, endpoint detection and response, next-generation firewall, and email security.

**Local Expertise**

Physical offices in Pasadena and Los Angeles mean technicians understand regional compliance requirements, local building codes for cabling, and the specific challenges of Southern California industries.

**Transparent Advisory Approach**

AllSafe IT diagnoses before prescribing. The team will not oversell hardware or software and only recommends solutions after a thorough assessment of each client's environment.

**Recognized Performance**

AllSafe IT has been named to the Inc. 5000, Channel Futures MSP 501, and CRN MSP 500 (2024), with a 4.8-star client rating and 98% client retention.

# The AllSafe IT 30-Day Onboarding Process

New clients follow a structured four-week onboarding designed to stabilize, standardize, and align technology with business operations:

Week 1	<b>Stabilize &amp; Gain Visibility</b> Inventory existing systems, deploy monitoring tools, and establish baseline performance.
Week 2	<b>Standardize &amp; Protect</b> Implement security policies, patch management, and endpoint protection across all devices.
Week 3	<b>Resilience &amp; Performance</b> Deploy backup and disaster recovery solutions, test failover systems, and optimize network performance.
Week 4	<b>Alignment &amp; Action</b> Conduct a strategic review, present a technology roadmap, and align IT with business goals.

# Compliance Frameworks & Certifications

AllSafe IT supports clients in meeting the following regulatory and compliance requirements:

**Regulatory Compliance**

- HIPAA – Healthcare data security and patient privacy

**Technology Partners & Certifications**

- Apple Consultants Network Member

- PCI DSS – Payment card industry data security for retail and hospitality
- SOX – Sarbanes-Oxley financial controls
- CCPA – California Consumer Privacy Act
- NIST Cybersecurity Framework

- Microsoft Partner
- Sophos Partner
- Datto Partner (backup and disaster recovery)
- Cisco Meraki (network and firewall)
- Mimecast & Ironscales (email security)

## Service Areas: Los Angeles & Southern California

AllSafe IT provides on-site and remote IT support across the following communities and regions:

- Los Angeles (Hollywood, Burbank, Glendale, Culver City, Northridge, Inglewood)
- Pasadena, Arcadia, Monrovia, Pomona, San Fernando Valley
- Santa Monica, Torrance, Long Beach, Westlake
- Orange County (Newport Beach, Costa Mesa, Irvine, Lake Forest, Anaheim)
- Chandler & Phoenix, Arizona
