

G-EPIC WP3 Dataset – Belgian sample

Dataset construction: Kenneth Hemmerechts and Nohemi Jocabeth Echeverría Vicente (Vrije Universiteit Brussel).

Description: Data on background characteristics and measures of political self-efficacy in Dutch-speaking secondary schools in Belgium (April–May 2023). The dataset includes pre- and post-survey information about five classes and 99 students.

Access: The raw national dataset is restricted due to GDPR considerations. To access the pseudonymised cross-national dataset, a 24-month embargo period after the end of the project is foreseen (01/04/28). This allows the project team sufficient time to write and publish research papers based on this data, as explained in the Data Management Plan. After this period, interested researchers should contact the authors and community manager (gepicproject@gmail.com) to submit an application to access the dataset.
