

Nobel Prize winning proof that most doctors lack fundamental medical knowledge and thus sicken us with devastating chronic diseases

"We are so constituted that we can never receive other proteins into the blood than those that have been modified by digestive juices. Every time alien protein penetrates by effraction, the organism suffers and becomes resistant. This resistance lies in increased sensitivity, a sort of revolt against the second parenteral injection which would be fatal. At the first injection, the organism was taken by surprise and did not resist. At the second injection, the organism mans its defences and answers by the anaphylactic shock."

In other words, injecting alien proteins is extremely dangerous and causes the development of allergy to the protein. But doctors inject numerous food proteins listed below:

- [Finding a Path to Safety in Food Allergy](#), p. 241

"Allergens in Vaccines, Medications, and Dietary Supplements

Physicians and patients with food allergy must consider potential food allergen exposures in vaccines, medications, and dietary supplement products (e.g., vitamins, probiotics), which are not regulated by labelling laws. Also, excipients (i.e., substances added to medications to improve various characteristics) may be food or derived from foods (Kelso, 2014). These include **milk proteins; soy derivatives; oils from sesame, peanut, fish or soy; and beef or fish gelatin. The medications involved include vaccines;** anesthetics; and oral, topical, and injected medications. With perhaps the exception of gelatin, reactions appear to be rare overall, likely because little residual protein is included in the final preparation of these items. The specific risk for each medication is not known.

Vaccines also may contain food allergens, such as **egg protein or gelatin."**

Predictable result, an explosion of food allergies. But that's not all. Allergy to the bovine folate receptor alpha, a cow's milk protein, causes 75% of autism cases.

Allergy to bovine insulin, another cow's milk protein, causes type 1 diabetes. Since there are thousands of such proteins, we have not even discovered all the diseases induced by this monumental incompetence.

Most doctors should have their licenses revoked as they are not qualified to practice medicine.

Vaccines and Biologics injury table based on mechanistic evidence – Mar 2019
