[ # 四川 实 Diagnostic 首例 新 预 肺炎 # Case is an employee of a company in Wuhan] Today, the National Health and Medical Commission confirmed the first confirmed case of pneumonia imported from Sichuan province with a new type of coronavirus infection. The patient was a 34-year-old male and an employee of a company in Wuhan. After arriving in Wuhan from Wuhan, he went to a hospital in Chengdu for fever on the 11th, and the hospital was admitted for isolation. At present, patients are treated in isolation at designated hospitals, and their condition is stable. (CCTV reporter Pontin Ding)

Please water retreat

Academician Zhong Nanshan and the mayor of Wuhan are saying that do not go to Wuhan without special circumstances! A lot of universities haven't said that they will postpone the school! Some students have returned to school on the 8th and the 9th. Can the policy of delayed return to school be implemented before the beginning of the month? Everyone must do daily protection and disinfection measures! New Year, everyone and medical staff must be safe! People who commented! Are you embarrassed about the heat of student life? Really want to speak, please walk alone!

Happy \_\_\_s

Request news scrolling to strengthen protection awareness of middle-aged and elderly people. Please strictly control the price of masks to combat bad business in a special period to drive up prices. Enterprises should put social benefits first, and realize a reasonable combination of economic benefits and social benefits. 🙏 Hope everyone is safe. The doctors and staff on the

: There is a big problem. As we are in a fifth-tier city, no one pays much attention to it. No one in the main city wears a mask, let alone the surrounding rural areas. Some people in the rural areas do n't even know this. Whether the central government can issue an order for local governments to increase their publicity efforts, including the village committees, must also pay attention to the villagers. After all, it is a critical moment for migrant workers to return to their hometowns, so everyone can pay attention to it! !! There are also mask problems! !!

Please limit the circulation of game to the market, otherwise it won't be so much. At the same time, let the three major communications operators send information tips! Many people do not play Weibo, especially older people.

JD.com scams money laundering

Do n't be fooled, the new coronavirus is not sars, but it is highly similar to sars. The variability of RNA viruses is unpredictable. It is already a fixed thing from person to person. Eve, a mask for several hundred dollars.

Ask Wuhan to ban unrelated personnel from entering and leaving. As in Beijing in 2003, extraordinary circumstances require extraordinary measures. Strategic decisions cannot be hesitated. All temporary grievances after the epidemic are worthwhile, and life is the most important. The people of Wuhan

I hope to implement a real-name system to buy up to 10 masks for one person at a fair price. Today, I saw a lot of peasant workers without masks on the subway. Some of the elderly who are thrifty, and those who come to work in the city, they may be reluctant to buy those The outrageous price masks are iust the most common blue masks. which will be better or better.

There are so many universities in Wuhan. When it starts next year, isn't it the peak of infection?
