

# Effective researcher management

Tanvi Desai (LSE and ONS)

Felix Ritchie (ONS)

# Effective RM: A matter of perspective

---

Negative: researchers as risks	Positive: researchers as collaborators
“we’re doing this to protect the data” (from you)	“doing this allows us to supply you with more detailed data”
“you must limit your output to reduce the chance of disclosure”	“limit your output because we have finite resources, people who produce good output get their results back quicker”

---

Based on a paper by Tanvi Desai and Felix Ritchie
