REGISTRY OF RESEARCH DATA REPOSITORIES

17th RDA Plenary

2021

## Fostering Fair Data Practices in Europe

Together with DataCite, re3data is building services and going to provide tools for finding and selecting **FAIR enabling repositories** to researchers and other stakeholders.

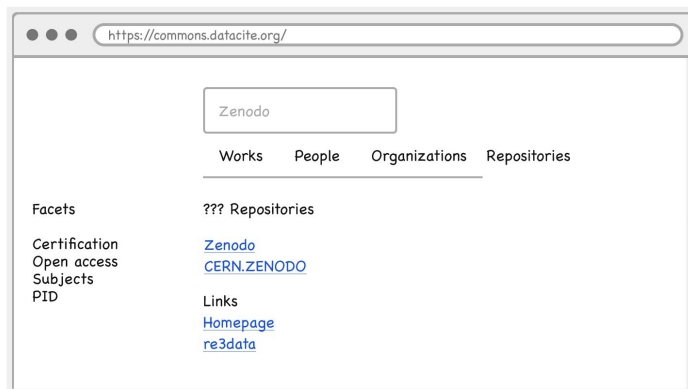

**More details...**

# DataCite Commons Integration

For easy discovery of FAIR enabling repositories the Repository Finder is going to be transitioned into DataCite Commons. With this integration, research data repositories can be connected and explored within the PID Graph.

## More details...

Planned transition to <https://commons.datacite.org>

# re3data as data source

The re3data metadata schema will be revised to support the integration of repositories into DataCite Commons with improved certification information and API description, as well as a new “community profile” property. The API will be advanced to keep information up to date and records in sync. In addition, the re3data Editorial Board supports the efforts in checking and updating relevant entries.
