

# Readme

Repo for CS6460 - mini-thesis Gatech.

## Running Milestone 1

Checkout releases, and download the file for the data required to run the example.

Try running `create_model.py` which should run fine.

## Catalog

Please check `catalog.md` for description of the files in this repository.

## Requirements

A Python installation is required with the following packages and their dependencies:

- gensim
- pandas
- praw

This can be installed via `pip install`

`catalog.pdf` was created using `pandoc`. Once installed it can be created through:  
`pandoc catalog.md -o catalog.pdf`
