

Independent rates

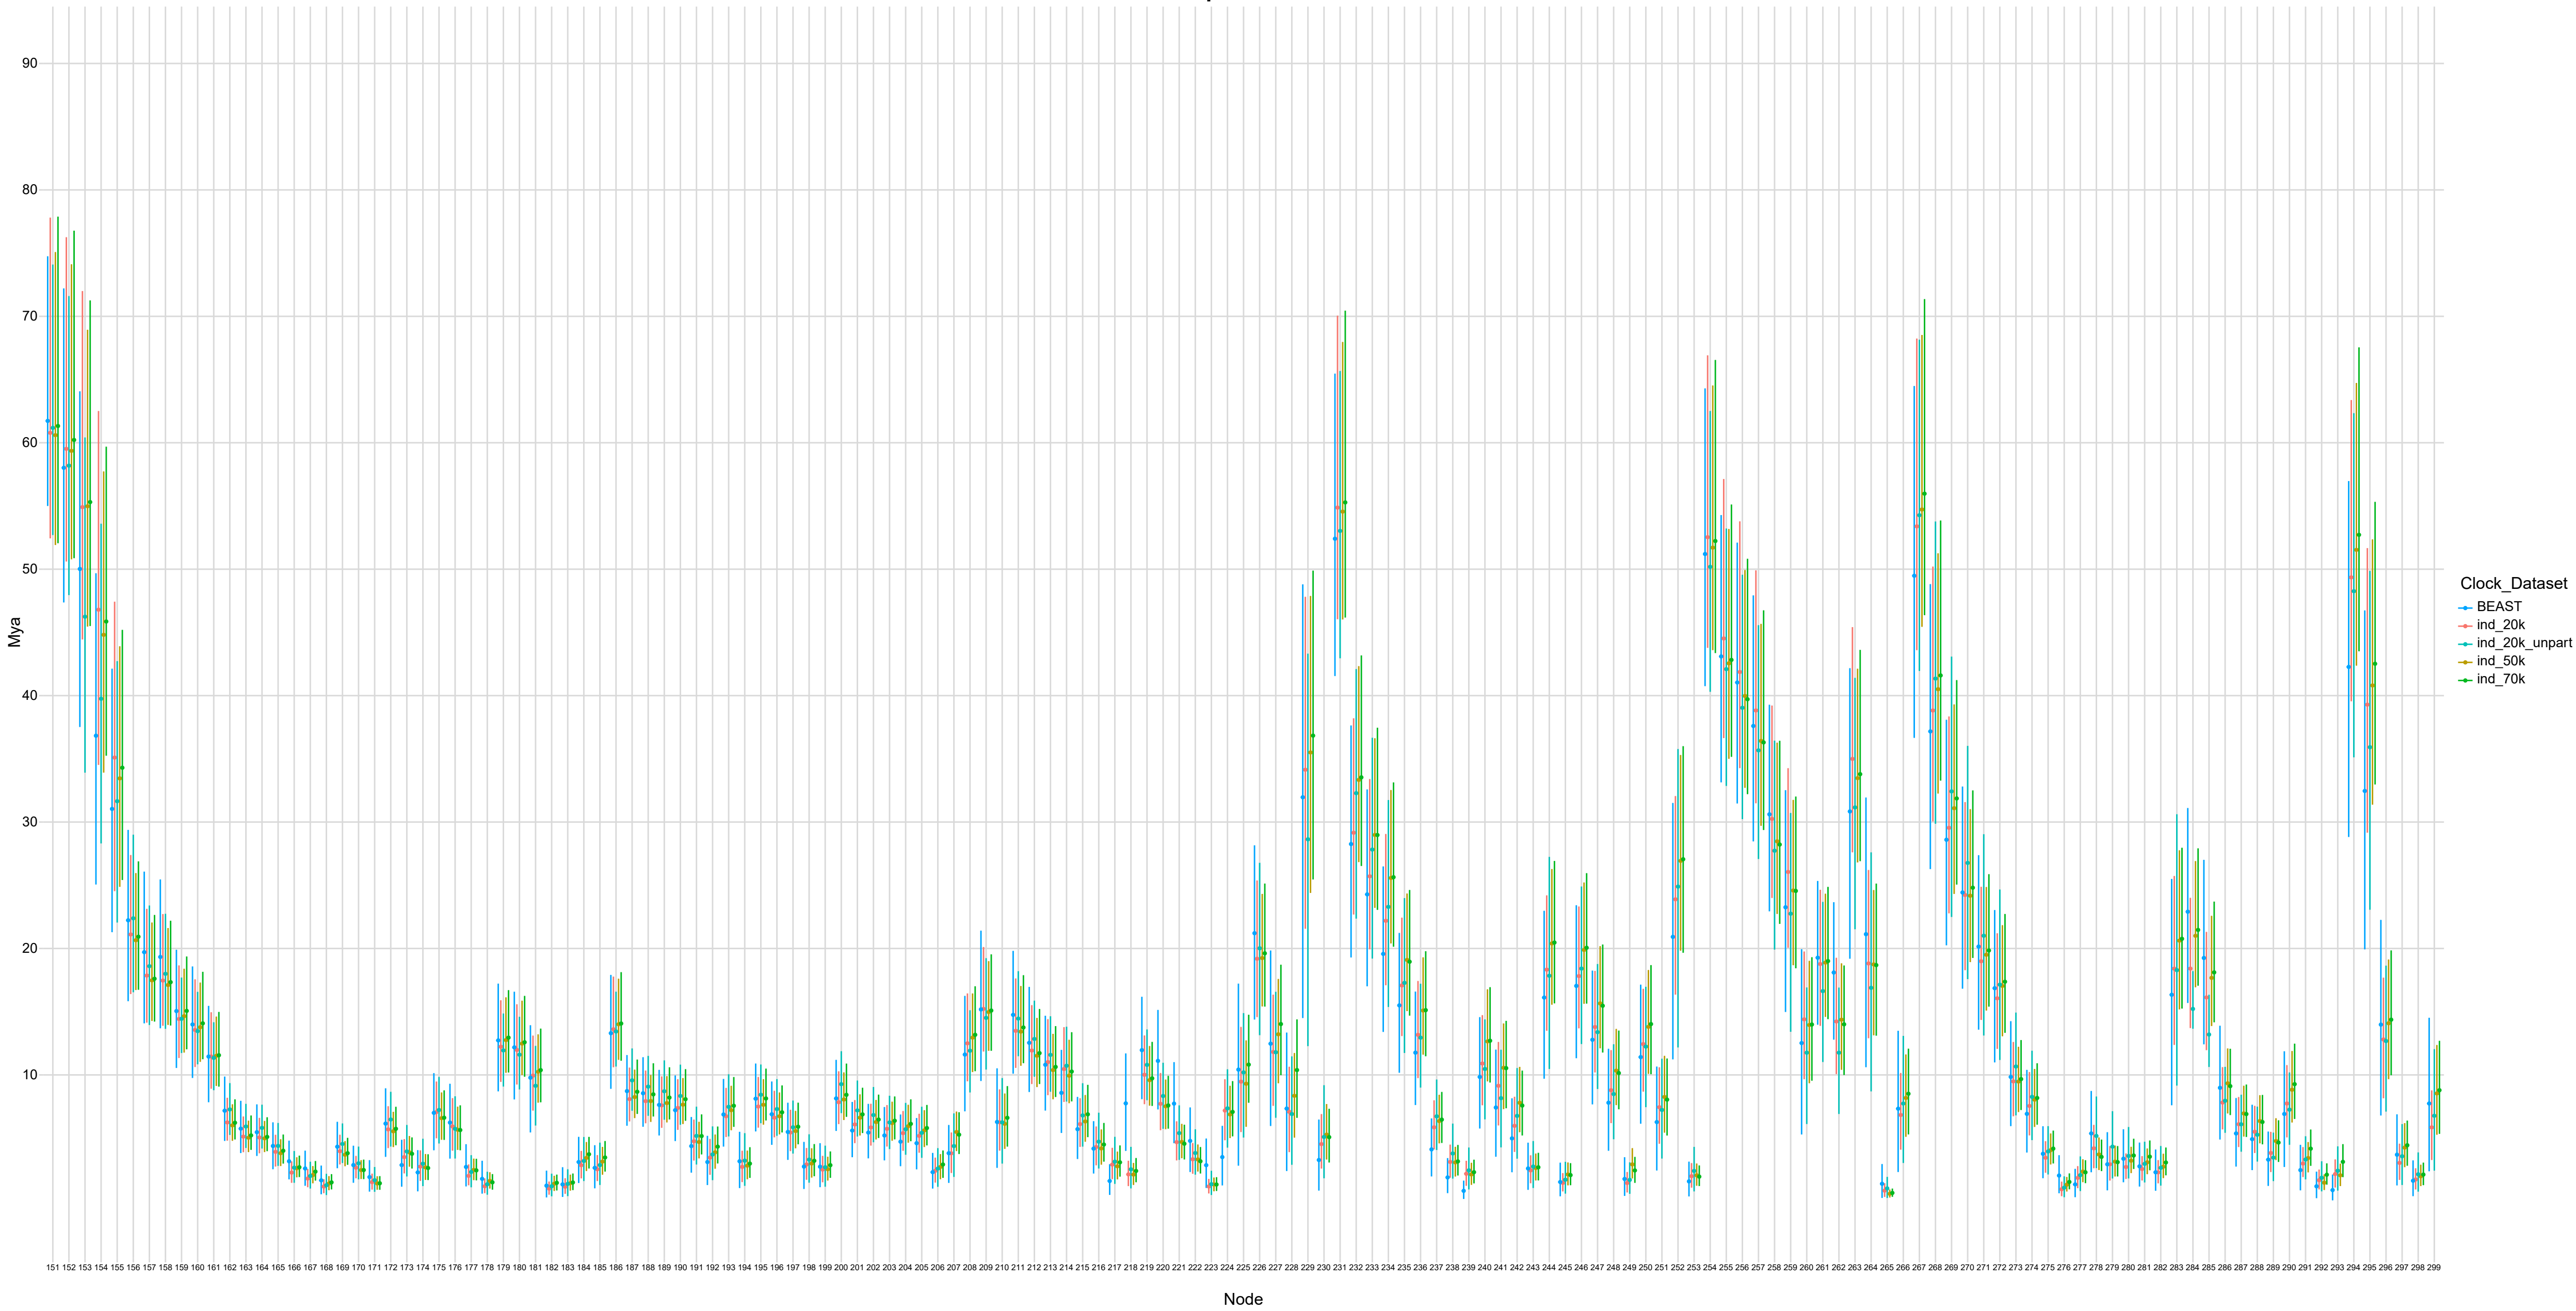

Figure S7-1 Comparison among means (dots) and HPDs (lines) of all the nodes in the tree of Eucerinae using independent rates (IR) clock model. These nodes are pointed out in Fig. S7-3 below.

Correlated rates

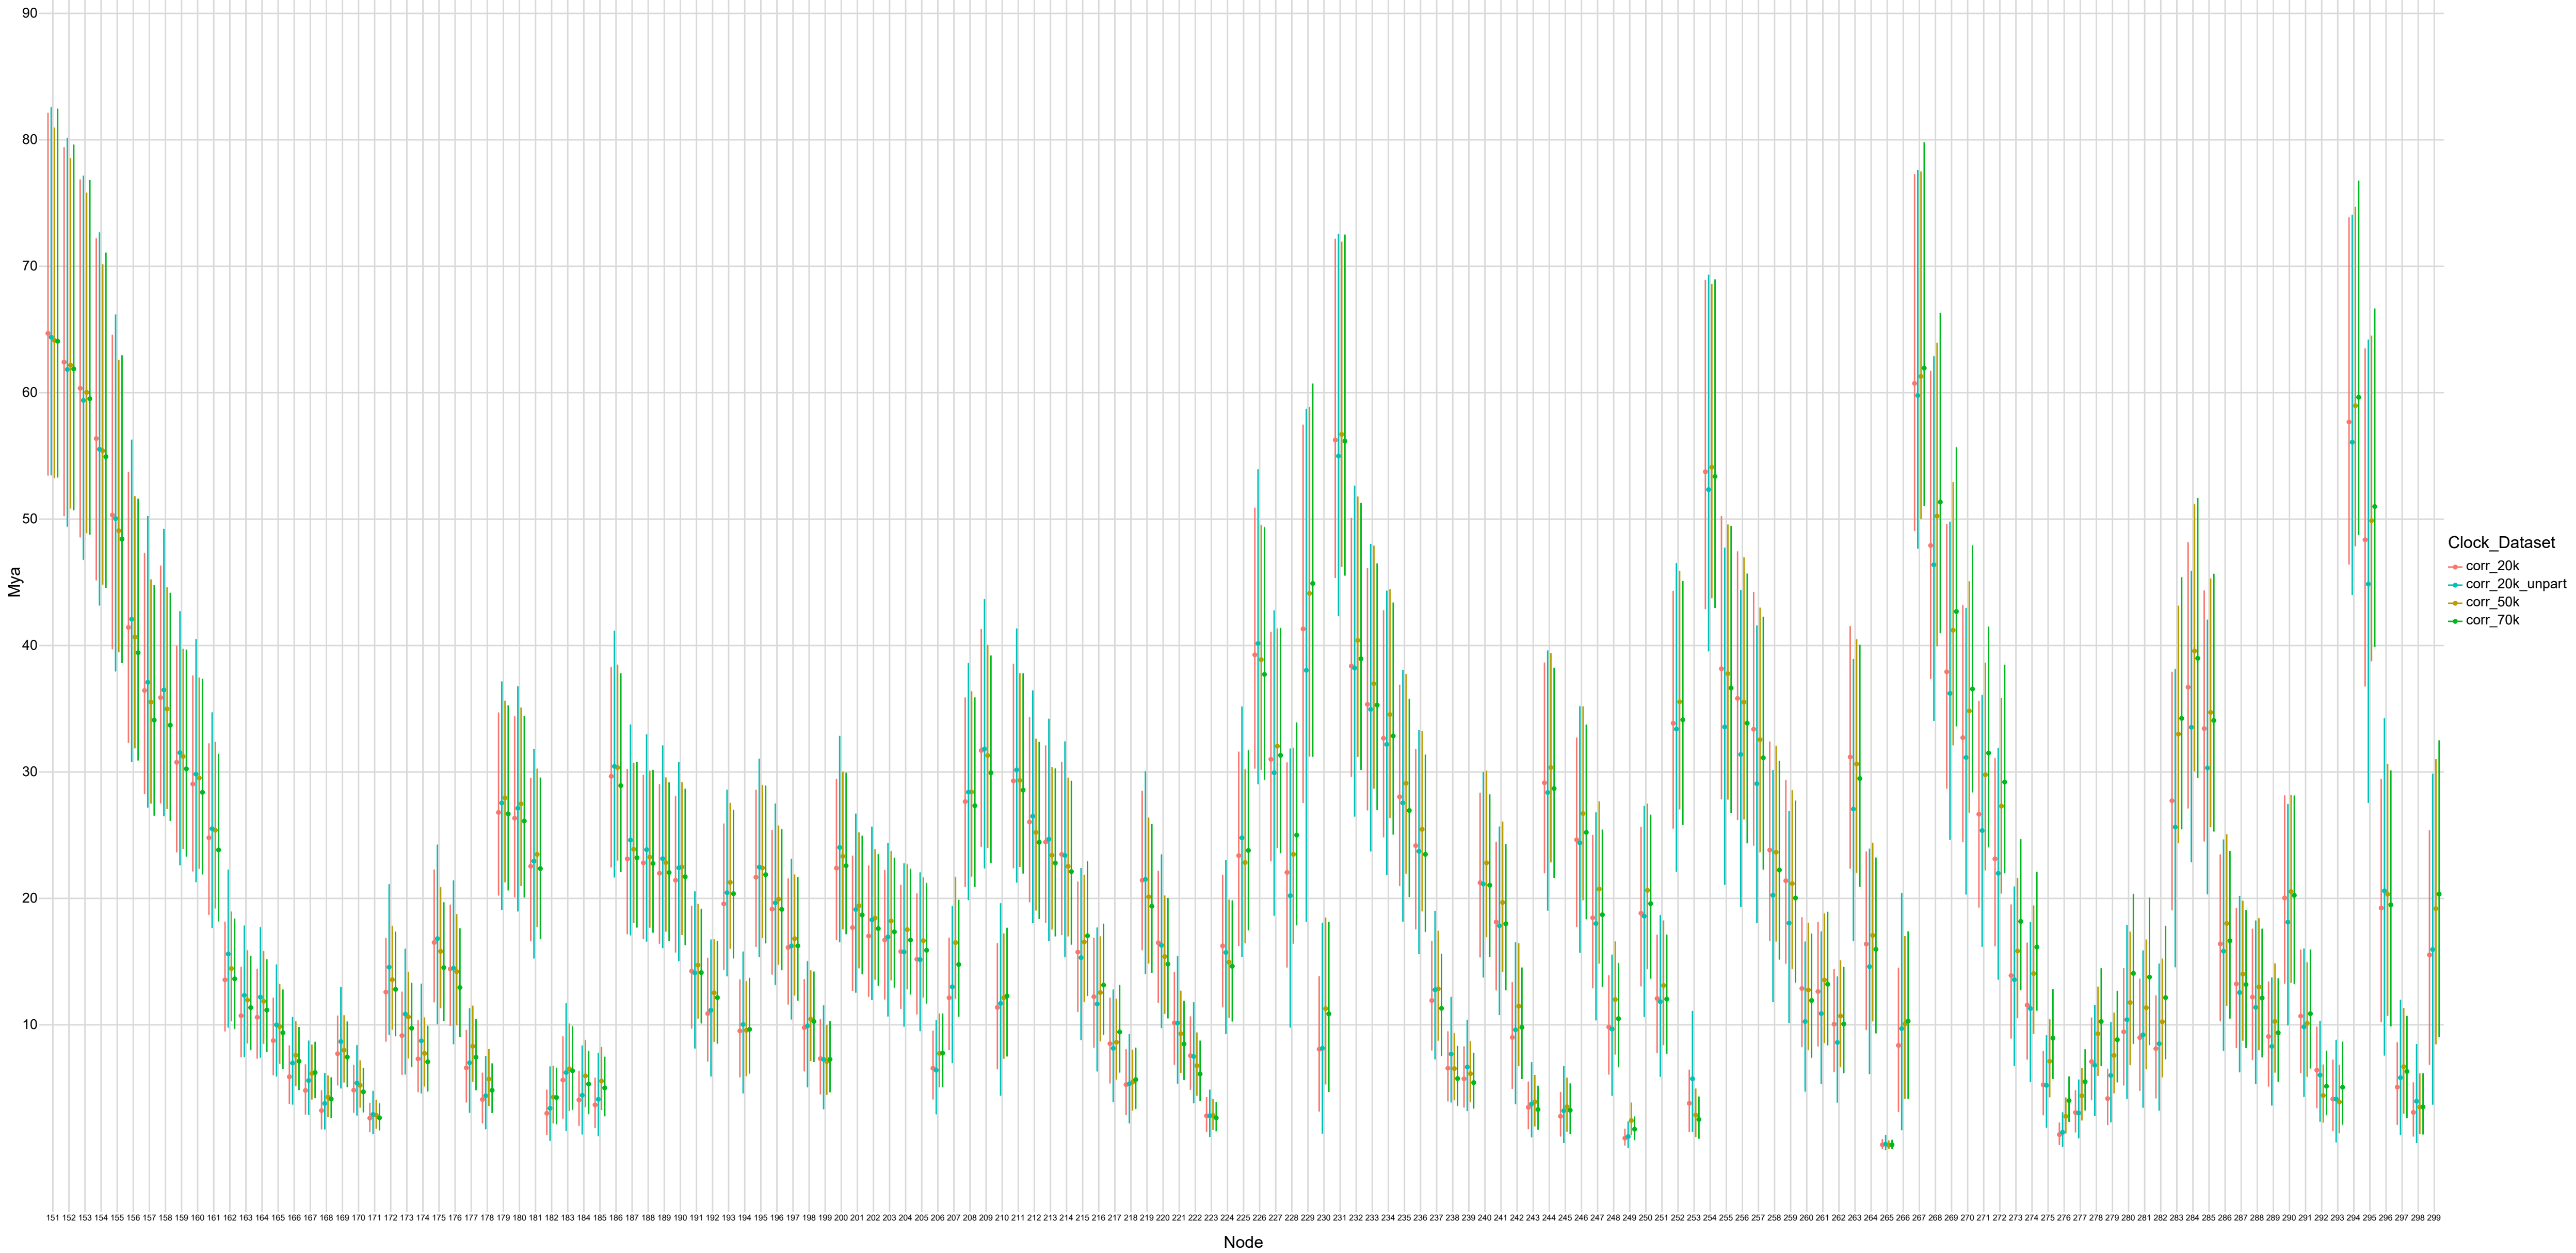

Figure S7-1 Comparison among means (dots) and HPDs (lines) of all the nodes in the tree of Eucerinae, using autocorrelated rates (AR) clock model. These nodes are pointed out in Fig. S7-3 below.

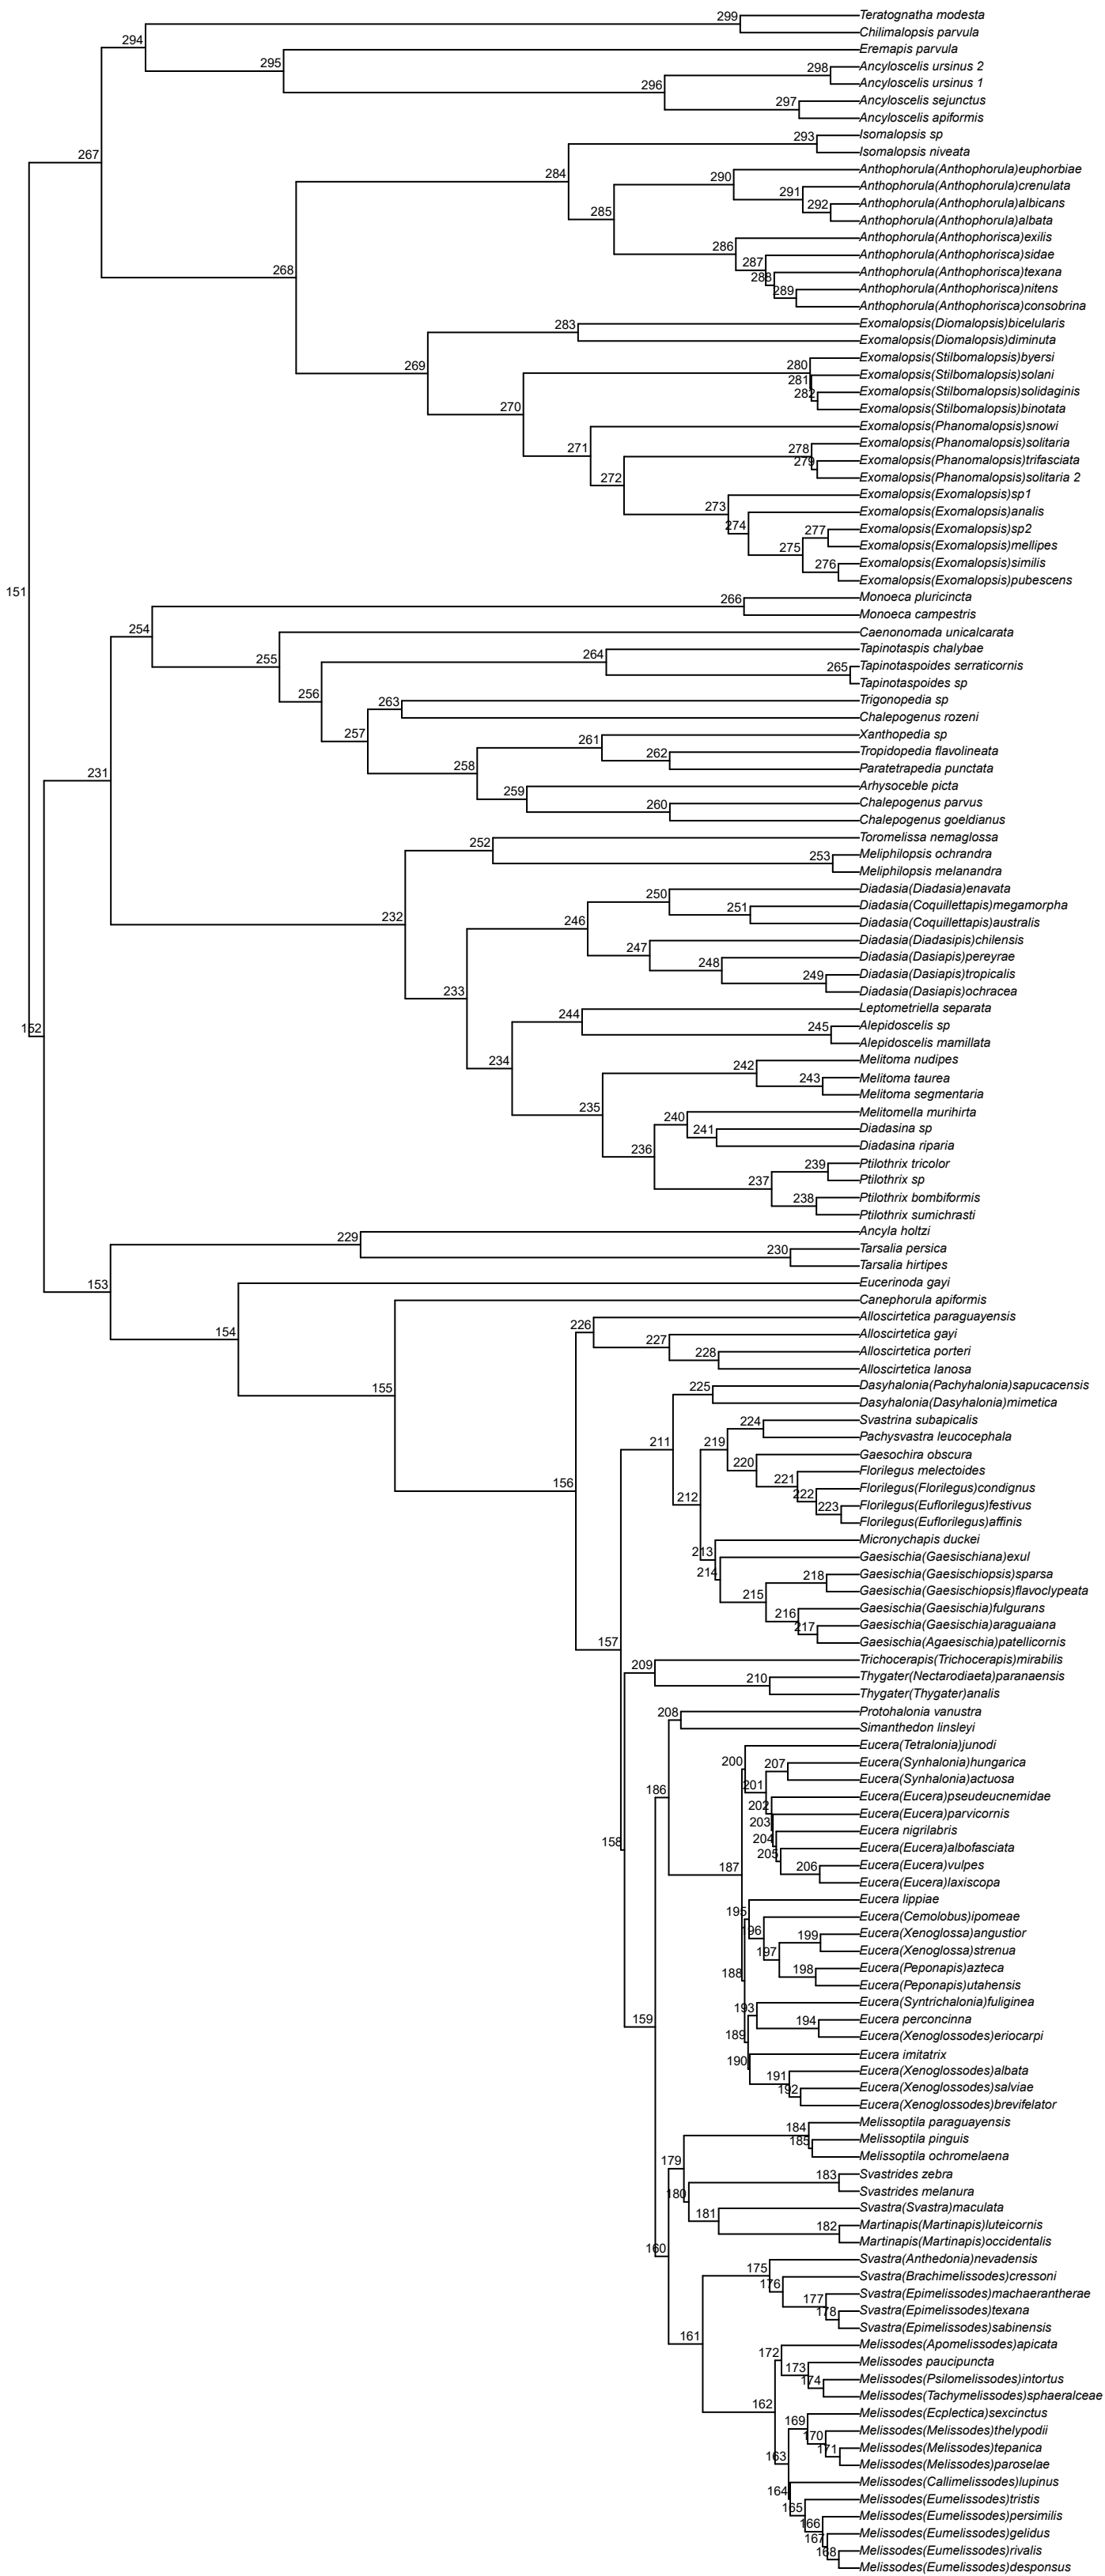

Figure S7-1 Eucerinae tree with node numbers showed on each node.
