

Repository Policy Generator (RePol)

Interactive policy creation tool

Branko Marović (UoB/RCUB)

- Managing the repository policy is a serious business - RePol helps guided customisation of predefined content
- Using a template, it drafts the policy that follows good practices
- The result is human- and machine-readable and in line with typical requirements and expectations
- It goes beyond OpenDOAR with Creative Commons licensing, CTS and CORE requirements and extra details on privacy

RePol Functionality

- Simple choice-based creation of repository policies
- Multi-step wizard
- Policies can be later recreated with same or changed data
- Templates can be improved or to updated to reflect new needs
- It can be used to create several types of documents
 - 'Generic' Privacy Policy for easier GDPR compliance

Demo
