

Welcome, this is the report we created for your project.

We analysed the reviews that have been merged in the last year, focusing on which changes were applied to the code under review.

We found out that you successfully merged **554** reviews!

(please, note that we restricted the scope of our tool only to the Java files in your project)

ID: 17

Text / Instructions

# Code changes happening during code review in your project

How does your code change thanks to the work your team puts during the reviews? The code changes that happen during the review process are, substantially, one of the main outcomes of the code review process. We call them *review changes*. How do these review changes look like in your project?

We could classify the review changes that happened during your code review process in two main categories:

- 1. **Functional** changes
- 2. **Evolvability** changes

**1. Functional** changes impact how the program functions. A reviewer may require a functional change to the code, for instance, to check how the variables or resources are used, as well as to improve an algorithm.

Here an example from your project:

Link to review

**2. Evolvability** changes do not directly impact the functionality of a program, but make the software more maintainable and easier to evolve.

Examples of evolvability changes are reorganising the code, removing dead lines, and adding a comment.

ID: 19

Text / Instructions

Most of the changes that happen during the reviews in your projects are evolvability changes. For this reason, we further divided the **Evolvability** changes in **3 groups**:

**2.1 Documentation:** Changes that tackle any issue in the documentation of the code. They include changes to comments and names in the program.

An example from your project:

```
153 » * @param parent the parent <code>Composite</code>
154 » * @param treeStyle the style bits for the <code>Tree</code>
155 » * @param filter the filter to be used
156 » *
157 » * @deprecated As of 3.8, replaced by
158 » * {link #filteredTree(Composite, int, PatternFilter, boolean)}
159 » * where using the new look is encouraged
160 » */
161 » @Deprecated
```

```
159 » * @param parent the parent <code>Composite</code>
160 » * @param treeStyle the style bits for the <code>Tree</code>
161 » * @param filter the filter to be used
162 » *
163 » * @deprecated As of 3.116, replaced by
164 » * {link #FilteredTree(Composite, int, PatternFilter, boolean, boolean)}
165 » *
166 » */
167 » @Deprecated
```

[Link to review](#)

**2.2 Visual Representation:** Changes that modify the layout of the code. In other words, any formatting that does not impact the compilation result.

An example from your project:

```
360 » private boolean workbenchAutoSave = true;
361 »
362 » private EditorHistory editorHistory;
363 »
```

```
358 » private boolean workbenchAutoSave = true;
359 »
360 » private EditorHistory editorHistory;
```

[Link to review](#)

**2.3 Structure:** Changes to the organisation of the code itself or how a particular solution is implemented (without having an effect on the functionality of the code).

```
360 » public void put(String key, String value) {
361 »     items.put(key, value);
362 » }
363 »
```

```
364 » public void put(String key, String value) {
365 »     if (value == null) {
366 »         items.remove(key);
367 »     } else {
368 »         items.put(key, value);
369 »     }
370 » }
```

[Link to review](#)

## Visualising Review Changes Stats

This is a mock-up of our tool interface. Please take into account the space limitation; the following figure is meant to just give a general overview of the data. Our tool interface adds three new visualization on the bottom of the page.

The single graphs will be shown again with more details later in the report.

The graph in the bottom left shows the number of reviews merged per month.

The graph in the middle shows the amount of review changes according to the types we have presented before: Documentation (2.1), Visual representation (2.2), Structure (2.3) and Functional (1).

The graph in the bottom right shows the distribution of the review changes over the last year.

## Background

To improve the scientific validity of your feedback, It would be great if you could answer to the following demographic questions too.

Role in OSS project

19. What is your involvement with the development of the project analyzed in this report?

- ☐ I am a core developer
- ☐ I have committing/merging rights
- ☐ I am an external contributor (no merge rights)
- ☐ I am an active user (e.g., I open issue reports, but do not develop any code in it)
- ☐ I am an external user (I am not involved in the development at all)
- ☐ Other - Write In Please enter an 'other' value for this selection.

20. What is your current job?

- ☐ Professional Developer
- ☐ Academic Researcher
- ☐ Industrial Researcher
- ☐ Project Manager
- ☐ Spare-time Developer
- ☐ Student
- ☐ Other - Write In Please enter an 'other' value for this selection.

21. How many years have you developed software in a professional setting?

I have no experience in software development in a professional setting

☐

1 year or less

☐

2 years

☐

3-5 years

☐

6-10 years

☐

11 years or more

☐

ID: 13

Radio Buttons

22. How often do you currently program software?

Not at all   About once a year   About once a month   About once a week   Daily or more often

☐Not at all☐About once a year☐About once a month☐About once a week☐Daily or more often

23. How many years have you performed code reviews?

I have never done code review   1 year or less   2 years   3-5 years   6-10 years   11 years or more

☐I have never done code review☐1 year or less☐2 years☐3-5 years☐6-10 years☐11 years or more

24. How often do you currently perform code reviews?

Not at allAbout once a yearAbout once a monthAbout once a weekDaily or more often

☐Not at all☐About once a year☐About once a month☐About once a week☐Daily or more often
