

Code review changes - report - Eclipse platform UI

Code review changes - report - Eclipse platform UI

Response ID:1 Data

1. (untitled)

1. After you have looked at this interface for your project, it would be great if you could let us know what you think about it:

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree	No Answer
The information is clear and easy to understand					X	
This summary is useful for my project and contains relevant information				X		
This information can be useful for a developer				X		
This information can be useful for a project manager					X	
This information reflects my expectations of the code review process of the project						X

2. Feel free to add any further comments about your answers above or the information:

A 5th change category might be testing. E.g. a patch was submitted without test and got a unit test during the review process.

3. After you have looked at this visualization, it would be great if you could let us know what you think about it:

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree	No Answer
The graph is clear and easy to understand					X	
This summary is useful for my project and contains relevant information				X		
This information cab be useful for a developer				X		
This information can be useful for a project manager					X	
This information reflects my expectations of the code review process of the project						X

4. Feel free to add any further comments about your answers above or the visualization:

5. After you have looked at this visualization for your project, it would be great if you could let us know what you think about it:

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree	No Answer
The graph is clear and easy to understand			X			
This summary is useful for my project and contains relevant information				X		
This information can be useful for a developer				X		
This information can be useful for a project manager					X	
This information reflects my idea of the temporary distribution of the changes in our review						X

6. Feel free to add any further comments about your answers above or the visualization:

7. The whole report is useful for my project and contains relevant information.

Agree

8. Please specify:

9. I have learned something about my project that I have not been aware of before.

Agree

10. Please specify:

11. The results made me curious. I plan to investigate further the code review process of my project.

Agree

12. This report provides information that is not available in any other tool I know.

Agree

13. Having this kind of information at ready would have a positive influence over the Code Review process of my team.

No Answer

14. Based on the information you have seen in this report, I would change something in the code review practices of my project:

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree	No Answer
Code review policies (e.g., mandatory review after each commit)						X
Use of tools (e.g., static analysis tools like Check style or FINDBUGS)			X			
Reviewers assignment (e.g., by finding specific reviewers for specific defects)				X		

15. Please, give us further details on this:

16. I think that the information of this report might help with ...

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree	No Answer
To understand how resources are spent on our project				X		
To avoid performing the same mistakes again				X		

17. Please, give us further details on this (optional):

18. If you want, please give further feedback on our report. (Optional)

19. What is your involvement with the development of the project analyzed in this report?

I have committing/merging rights

20. What is your current job?

Professional Developer

21. How many years have you developed software in a professional setting?

3-5 years

22. How often do you currently program software?

Daily or more often

23. How many years have you performed code reviews?

1 year or less

24. How often do you currently perform code reviews?

About once a month

In addition to analyzing your data in an anonymous form, can we also share your answers (in an anonymous form) in a publicly available dataset?

Yes

26. If you have any comments on the report or on the topic, please add them here.

To avoid performing the same mistakes again		X				

16. If you want, please give further feedback on our report. (Optional)

17. What is your involvement with the development of the project analyzed in this report?

I have committing/merging rights

18. What is your current job?

Professional Developer

19. How many years have you developed software in a professional setting?

11 years or more

20. How often do you currently program software?

Daily or more often

21. How many years have you performed code reviews?

11 years or more

22. How often do you currently perform code reviews?

Daily or more often

In addition to analyzing your data in an anonymous form, can we also share your answers (in an anonymous form) in a publicly available dataset?

Yes

23. If you have any comments on the report or on the topic, please add them here.

You should document how you sorted changes into the categories. I would sort some of the given examples differently. E. G. The high number of documentation changes seems to be caused by version number changes and by javadoc formatting. Those are like plain formatting changes to me.

15. What is your involvement with the development of the project analyzed in this report?

16. What is your current job?

17. How many years have you developed software in a professional setting?

18. How often do you currently program software?

19. How many years have you performed code reviews?

20. How often do you currently perform code reviews?

About once a week

In addition to analyzing your data in an anonymous form, can we also share your answers (in an anonymous form) in a publicly available dataset?

Yes

21. If you have any comments on the report or on the topic, please add them here.

Without answering all questions, these kind of statistics are nice for a manager, but no clue how this would influence daily practice of an engineer? Maybe it indicates that engineers must be trained to pay attention to documentation too.

My main concerns about this report:

First, answering 21 questions (36 counting all sub questions) will always take more then 5 minutes, if you want serious feedback.

Second, did you review your detection methods? The structural example is in my opinion a functional change. The code before the review contains a bug, the code after the review is correct.
