### **Abstract**

Ketenes are mostly used as common starting materials for structurally diverse mono-, spiro- and fused six-membered heterocycles such as lactones, pyrans, pyronones, pyridines, quinolines, isoquinolines, oxazine, quinoxalines, thiazines, oxathines, etc.

### **Keywords**

Isoquinolines, Ketenes, Thiazines, Oxathines, Oxazine, Pyrans, Pyridines, Pyronones, Quinolines, Quinoxalines
