Learning outcomes

By the end of this exercise, you will learn how to:

- 1) Install clicSAND Software
- 2) Install glpk solver
- 3) Install .NET Runtime

Important requirement

Please make sure to set your regional settings to **English (United Kingdom)** using the following:

Settings -> Region -> Regional Settings -> **Current format: English (United Kingdom)**.

Then **restart** your computer.

This ensures that the Decimal (.) and Thousands (,) separators are compatible with clicSAND Software, the tool used in the Hands-On Exercises.

Install clicSAND Software

Important requirement: Please make sure to set your regional settings to English (United Kingdom) using the following:

Settings -> Region -> Regional Settings -> Current format: English (United Kingdom).

Then restart your computer.

This ensures that the Decimal (.) and Thousands (,) separators are compatible with the tool used in the Hands On Exercises.

1. Download the installer by clicking this link [clicSANDinstaller.exe](#) (hosted on GitHub: [link](#)):

Latest release

v1.1

clicSAND v1.1

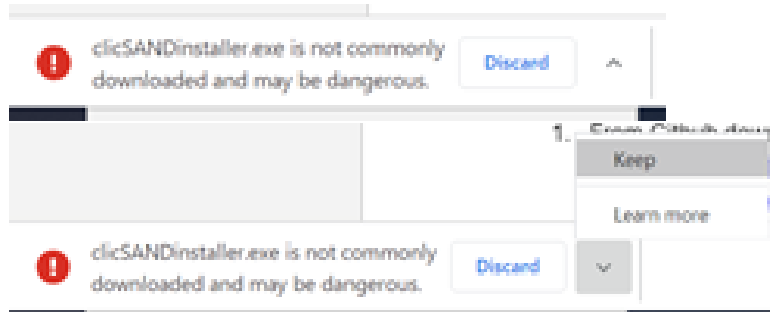

▼ Assets **3**

clicSANDinstaller.exe

[Source code \(zip\)](#)

[Source code \(tar.gz\)](#)

2. If you see this message, click the small arrow and then click 'Keep'.

3. Double click on the installer once it has downloaded.

4. If you see this message, click 'more info' then 'run anyway'.

Windows protected your PC

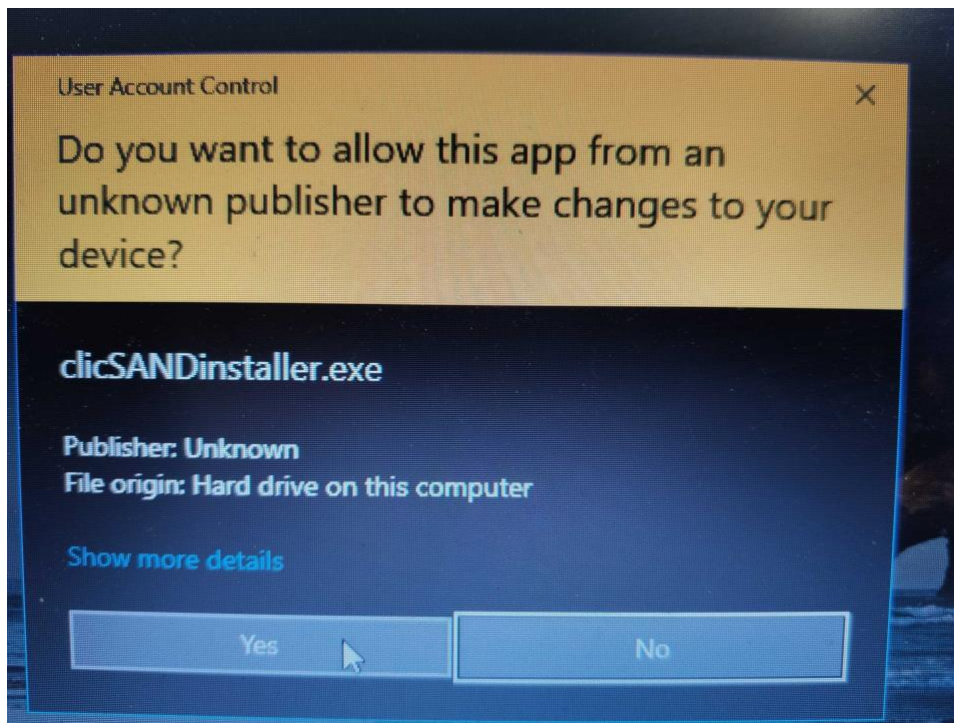

Microsoft Defender SmartScreen prevented an unrecognized app from starting. Running this app might put your PC at risk.

[More info](#)

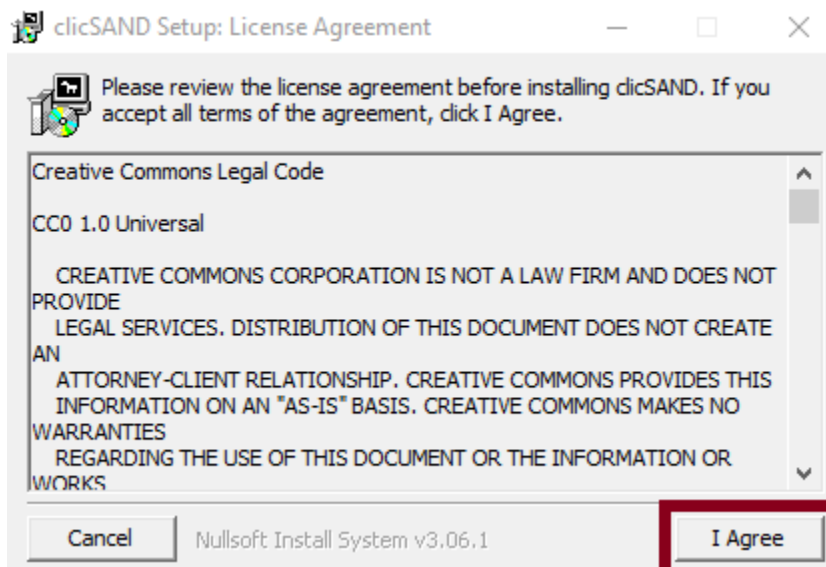

Don't run

5. Click 'yes' when asked if you want to allow the clicSAND software to make changes to your computer.

6. Read and agree to the license, then ensure the file path is to 'Program Files'. Then select 'Install'.

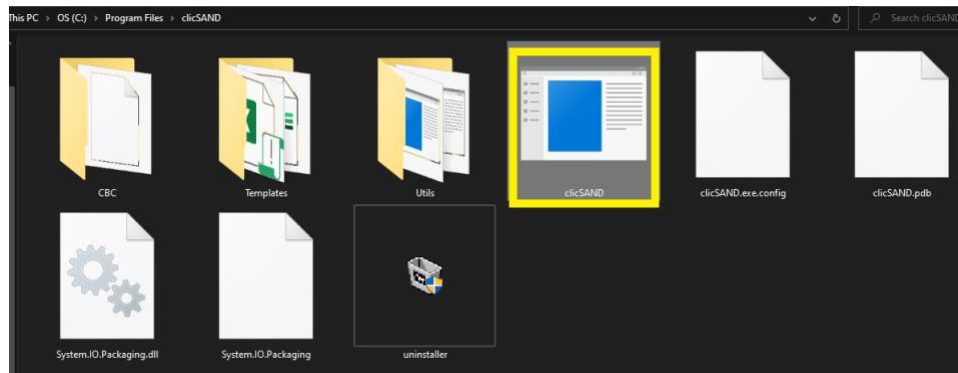

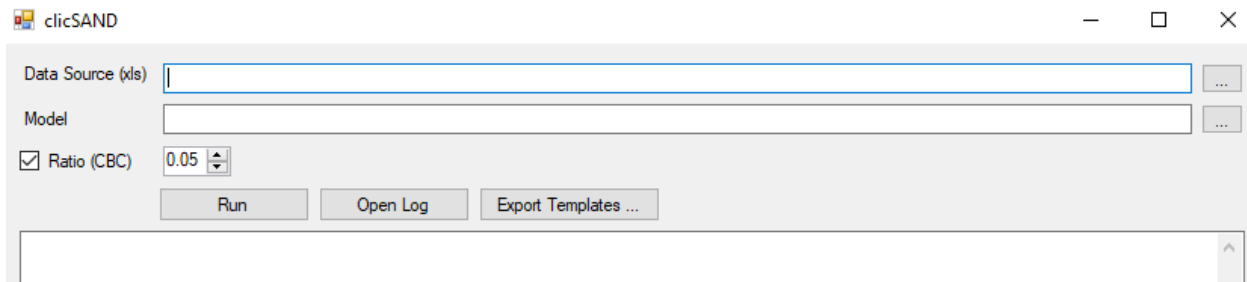

7. Click 'Close when completed.

8. Open the folder and double-click on **clicSAND.exe**.

9. If everything goes as expected, you should be able to see the screen below. If you get an Antivirus Warning, click on 'See more' and 'Accept all' (**don't worry, there are no viruses in clicSAND**).

Install .NET Runtime

Download .NET Runtime at [this link](#).

Install glpk Solver

Install glpk solver following the guidelines provided [here](#).
